He may physically be an adult, but still wonders, "Am I a man?" When John Sowers twin daughters were born, he felt exposed, thinking manhood was out of reach. He needed direction. Following in the steps of ordinary men and the heroes of history, legend and myth, he uncovered a new and ancient road. Walk with John on his personal quest to discover the "wild masculine" and to become all that God intended men to be. From a thrilling brush with Kodiak bears in Alaska, to a war hero who rescued his comrades in the Valley of Death, from mythic heroes of Tolkien, to the footsteps of the One, True Myth - as Jesus walked from village into the wilderness, and back again. Stunningly written, this revolutionary book calls older men out of complacency and younger men out of confusion. It calls all men into the greater Story - into a life of sacrificial love, holy defiance, and clear purpose.

Violence and Mental Health Jutta Lindert 2015-02-25 Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

Developing Creativity in the Classroom Todd A. Kettler 2021-09-03 Developing Creativity in the Classroom applies the most current theory and research on creativity to support the design of teaching and learning. Creative thinking and problem solving are at the heart of learning and application as students prepare for innovation-driven careers. This text debunks myths about creativity and teaching and, instead, illustrates productive conceptions of creative thinking and innovation, including a constructivist learning approach in which creative thinking enhances and strengthens conceptual understanding of the curriculum. Through models of teaching that support creativity and problem solving, this book extends the idea of a creative pedagogy to the four core curriculum domains. Developing Creativity in the Classroom focuses on explanations and examples of how creative thinking and deep learning merge to support engaging learning environments, rising to the challenge of developing 21st-century competencies.

Bright Not Broken Diane M. Kennedy 2011-09-13 The future of our society depends on our gifted children—the population in which we'll find our next Isaac Newton, Albert Einstein, or Virginia Woolf. Yet the gifts and talents of some of our most brilliant kids may never be recognized because these children fall into a group known as twice exceptional, or "2e." Twice exceptional kids are both gifted and diagnosed with a disability—often ADHD or an Autism Spectrum Disorder—leading teachers and parents to overlook the child's talents and focus solely on his weaknesses. Too often, these children get lost in an endless cycle of chasing diagnostic labels and are never given the tools to fully realize their own potential. *Bright Not Broken* sheds new light on this vibrant population by identifying who twice exceptional children are and taking an unflinching look at why they're stuck. The first work to boldly examine the widespread misdiagnosis and controversies that arise from our current diagnostic system, it serves as a wake-up call for parents and professionals to question why our mental health and education systems are failing our brightest children. Most importantly, the authors show what we can do to help 2e children, providing a whole child model for parents and educators to strengthen and develop a child's innate gifts while also intervening to support the deficits. Drawing on painstaking research and personal experience, *Bright Not Broken* offers groundbreaking insight and practical strategies to those seeking to help 2e kids achieve their full potential. Diane M. Kennedy, author of *The ADHD-Autism Connection*, is a long time advocate, international speaker/trainer, and mother of three twice-exceptional sons. Rebecca S. Banks, M.A., co-author of *The ADHD-Autism Connection*, is a veteran educator, national speaker/trainer, and mother of two twice-exceptional children. Temple Grandin, Ph.D., is a professor, prolific author, and one of the most accomplished and renowned adults with autism in the world.
