Antiviral Drug Resistance Douglas D. Richman 1996-12-02 The study of antiviral drug resistance has provided important insights into the structure of virus enzymes, the functions of certain genes, mechanisms of action of antiviral drugs, the design of new antiviral compounds and the pathogenesis of viral diseases. The emergence of resistant strains must be explored at all stages of drug development: during the preclinical evaluation of candidate compounds; during the early clinical evaluation of new drugs; and as part of epidemiological surveillance for the prevalence of resistance during use of approved treatments. Accumulating understanding of antiviral drug resistance thus reflects progress in the chemotherapy of viral infection. Antiviral Drug Resistance provides state-of-the-art coverage of the basic and clinical aspects of this subject. It deals with the basic science, including the mechanisms of drug resistance and drug action, genetics of drug resistance, cross resistance, and X-ray crystallographic structural aspects of resistance, as well as the clinical aspects, including issues of assay of susceptibility of clinical isolates, descriptive aspects of emergence of reduced susceptibility, and clinical significance and impact of resistance. As such this unique volume will be essential to basic researchers in drug discovery and viral pathogenesis, as well as clinicians involved in antiviral chemotherapy.

The Army and Ideology in Indonesia Muhamad Haripin 2020-09-04 This book is an analysis of Indonesia's civil-military relations in the post-1998 reform era. It focuses on the political thinking of the Indonesian Army during the time of democratic consolidation. The book examines the army (Tentara Nasional Indonesia Angkatan Darat, TNI AD), a pivotal player in the political scene of Indonesian state, and the aspect of military ideology development. Based on in-depth interviews with civilian and military figures and applying the methodology of utilised process tracing and empirical analysis surrounding the appearance of military thinking, the book argues that the Indonesian military pursues to sustain its political power by propagating a set of values construed as moral compass for all members of society. Specifically, the book discusses the origins and impacts of 'proxy war' and 'bela negara' ('defend the state'), which was promoted by former TNI Commander Gatot Nurmantyo (2015-2017) and former Defence Minister Ryamizard Ryacudu (2014-2019). The authors demonstrate that both ideologies facilitate expansion of the military's influence in all aspects of life and protection of its corporate interests in the age of democracy. Offering insights for theoretical discussion on the influence of military ideology to civil-military relations, particularly in the post-authoritarian period, this book will be of interest to academics and policy makers in the fields of Southeast Asian Politics, Asian Politics and Civil-Military Relations.

Improving the Quality of Long-Term Care Institute of Medicine 2001-02-27 Among the issues confronting America is long-term care for frail, older persons and others with chronic conditions and functional limitations that limit their ability to care for themselves. *Improving the Quality of Long-Term Care* takes a comprehensive look at the quality of care and quality of life in long-term care, including nursing homes, home health agencies, residential care facilities, family members and a variety of others. This book describes the current state of long-term care, identifying problem areas and offering recommendations for federal and state policymakers. Who uses long-term care? How have the characteristics of this population changed over time? What paths do people follow in long term care? The committee provides the latest information on these and other key questions. This book explores strengths and limitations of available data and research literature especially for settings other than nursing homes, on methods to measure, oversee, and improve the quality of long-term care. The committee makes recommendations on setting and enforcing standards of care, strengthening the caregiving workforce, reimbursement issues, and expanding the knowledge base to guide organizational and individual caregivers in improving the quality of care.

Maternal Immunization Elke Leuridan 2019-11-26 Immunization during pregnancy with currently recommended vaccines prevents infection in the mother, the unborn fetus, and the young infant, and there is an increasing focus from different stakeholders to use this approach for other infections of importance to protect these vulnerable groups. The aim of this Maternal Immunization book is to provide a contemporary overview of vaccines used in pregnancy (and the lactation period), with emphasis on aspects of importance for the target groups, namely, rationale for the use of vaccines in pregnancy, safety, immunogenicity (immunology), timing to vaccinate, repeat doses, protective effects in the mother, fetus, and infant, and public acceptance and implementation, of existing and of future vaccines. Provides an overview of a quickly evolving topic. This will benefit the reader who wishes to rapidly become informed and up-to-date with new developments in this field Suitable to a broad audience: scientific researchers, obstetricians, gynecologists, neonatologists, vaccinators, pediatricians, students, and industry. Maternal vaccination impacts a wide range of specialists Allows health care professionals/researchers to gain insight into other aspects of vaccination in pregnancy outside of their specialism Is coauthored by specialists from multiple disciplines, providing a diverse view of the subject, increasing its interest and appeal Creates awareness of the current developments in this area of medicine and of the potential of maternal vaccination to improve the health of mothers and infants worldwide
