*Bureaucrats and Beggars* Thomas McStay Adams 1991-01-31 In the mid-eighteenth century in France, the royal authorities launched a new campaign to sweep beggars from the streets, pinning their hopes on the creation of a uniform royal network of lock-ups in which anyone found begging might be detained. In this study, Adams probes the accomplishments and the failings of these so-called *dépôts de mendicité*, as seen by critics of the experiment (including learned judges and influential spokesmen of the provincial Estates) and as seen by those responsible for its success: the provincial intendants, the royal engineers, the doctors, the inspectors, the contractors, and various givers of advice. He shows how the debate--both internal and external--over the operation of the *dépôts* contributed to the intellectual ferment of the Enlightenment and the Revolution. The resulting web of reasoning and empirical data gave support to Montesquieu's principle that the state owes every one of its citizens "a secure subsistence, suitable food and clothing, and a manner of life that is not contrary to good health."

*France, Germany, and Nuclear Deterrence* Nicolas Badalassi 2022-01-14 The legacy of World War II and the division of Eastern and Western Europe produced a radical asymmetry, and a variety of misgivings and misunderstandings, in French and German experiences of the nuclear age. At the same time, however, political actors in both nations continually labored to reconcile their differences and engage in productive strategic dialogue. Grounded in cutting-edge research and freshly discovered archival sources, *France, Germany, and Nuclear Deterrence* teases out the paradoxical nuclear interactions between France and Germany from 1954 to the present day.
