**Foreign Language Assessment in Grades K-8** 1997 The annotated bibliography describes foreign language assessment instruments currently used in elementary and middle schools. The instruments are drawn from a wide variety of program models: Foreign Language in the Elementary School (FLES), middle school sequential instruction, and immersion (total, two-way, partial). The bibliography has six sections: assessment instruments; program evaluation instruments; classroom assessment activities; sample assessment instruments; selected related resources; and selected commercially available language tests. An index of instruments according to purpose, language, and grade level is included. Descriptions of assessment instruments and activities and sample assessments were collected from teachers, schools, school districts, state education offices, and educational research organizations. In each section, materials are listed in alphabetical order according to language. The major emphasis is on French, German, Italian, Japanese, and Spanish. Also included are Arabic, Catalan, Chinese, Chuukese (Lagoon), Gallego, Haitian-Creole, Indonesian, Korean, Latin, Modern Greek, Navajo, Palauan, Pohnpeian, Portuguese, Russian, Tagalog, and Welsh. Each entry includes information on availability, current users, language program type, intended grade level, intended test use, skills tested, test author, publications date, test cost, length, test materials, format, scoring method, a description, test development and technical information, parallel versions in other languages, and a contact person. An introductory section gives an overview of the bibliography's contents and notes on selecting an assessment instrument. (MSE)

Grading for Equity Joe Feldman 2018-09-25 "Joe Feldman shows us how we can use grading to help students become the leaders of their own learning and lift the veil on how to succeed. . . . This must-have book will help teachers learn to implement improved, equity-focused grading for impact." --Zaretta Hammond, Author of Culturally Responsive Teaching & The Brain Crack open the grading conversation Here at last—and none too soon—is a resource that delivers the research base, tools, and courage to tackle one of the most challenging and emotionally charged conversations in today's schools: our inconsistent grading practices and the ways they can inadvertently perpetuate the achievement and opportunity gaps among our students. With Grading for Equity, Joe Feldman cuts to the core of the conversation, revealing how grading practices that are accurate, bias-resistant, and motivational will improve learning, minimize grade inflation, reduce failure rates, and become a lever for creating stronger teacher-student relationships and more caring classrooms. Essential reading for schoolwide and individual book study or for student advocates, Grading for Equity provides A critical historical backdrop, describing how our inherited system of grading was originally set up as a sorting mechanism to provide or deny opportunity, control students, and endorse a "fixed mindset" about students' academic potential—practices that are still in place a century later A summary of the research on motivation and equitable teaching and learning, establishing a rock-solid foundation and a "true north" orientation toward equitable grading practices Specific grading practices that are more equitable, along with teacher examples, strategies to solve common hiccups and concerns, and evidence of effectiveness Reflection tools for facilitating individual or group engagement and understanding As Joe writes, "Grading practices are a mirror not just for students, but for us as their teachers." Each one

of us should start by asking, "What do my grading practices say about who I am and what I believe?" Then, let's make the choice to do things differently . . . with Grading for Equity as a dog-eared reference.
