Fire in Montana Greg Martin 2006-05 In the summer of 1949 fifteen smokejumpers parachuted into a remote Montana canyon called Mann Gulch. It started as a very small fire in rugged country but within two hours after landing, thirteen of these young men were caught in a raging inferno and were killed. They died bravely, together with their friends, and in the service of their country. Everyone was young and attractive, healthy and strong, enthusiastic and in love. They were bursting into the prime of their lives. There were no malcontents here. Everyone did their best but events overtook them. Until now the actual time line has never been connected to the people involved. Fire in Montana connects the lives of young smokejumpers who lived with a joy of life and expectations of shining futures, the forest rangers and volunteers who fought valiantly to rescue them, and their families, lovers, and friends who were forced to wait and pray, then face the devastating and heart wrenching loss.

Exhibition 2015-12-31 "Exhibition" a 136-page, hardcover volume, showcases photographer Michael Stokes' penchant for photographing "male erotic images and figure studies of fitness competitors, personal trainers, and body builders from around the world." Following his massively-successful "Masculinity" and "Bare Strength," Stokes-whose number of Facebook followers top an astonishing 650,000-has created a new, modern figure study of the male form. He is best known for his work with nude American soldier amputees-photos that have been banned by social media sites like Facebook and Instagram, many of which are featured in his book "Always Loyal." Stokes' photos have appeared on "The Today Show," "Good Morning America," "The View," and "The Tonight Show."

The Do Over A. L. Zaun 2013-05 Life doesn't look like it's supposed to for Dani Ruiz, a hopeless romantic. After a painful and sudden break-up with Rick Marin, Dani hides away from reality, retreating to a world of fiction where she prefers book boyfriends over the hassles of a relationship. Almost two years later, Dani's friends are tired of watching her in a holding pattern, so they stage an intervention, forcing her back into the real world of dating. Unexpectedly, Dani meets Liam Lucas, a down-to-earth firefighter. He might be the person to show her she's still worth something. Dani's hesitant to trust her heart with another man, but their instant and electric chemistry is something she can't deny. As Dani starts to believe that she's found her real-life book boyfriend, Rick decides that he'll go to any lengths to get her back. Seeing Rick as a changed man makes Dani question everything. Can Dani trust her patched-up heart with Liam? Or has Rick transformed into the man she's always wanted? Written from various points of views, *The Do Over* is a story of second chances and new beginnings.

Intelligent Systems and Computer Technology D.J. Hemanth 2020-12-15 Recent developments in soft-computation techniques have paved the way for handling huge volumes of data, thereby bringing about significant changes and technological advancements. This book presents the proceedings of the 3rd International Conference on Emerging Current Trends in Computing & Expert Technology (COMET 2020), held at Panimalar Engineering College, Chennai, India on 6 and 7 March 2020. The aim of the book is to disseminate cutting-edge developments taking place in the technological fields of intelligent systems and computer technology, thereby assisting researchers and practitioners from both institutions and industry to upgrade their knowledge of the latest developments and emerging areas of study. It focuses on technological innovations and trendsetting initiatives to improve business values, optimize business processes and enable inclusive growth for corporates, industries and education alike. The book is divided into two sections; 'Next Generation Soft Computing' is a

platform for scientists, researchers, practitioners and academics to present and discuss their most recent innovations, trends and concerns, as well as the practical challenges encountered in the field. The second section, 'Evolutionary Networking and Communications' focuses on various aspects of 5G communications systems and networking, including cloud and virtualization solutions, management technologies, and vertical application areas. It brings together the latest technologies from all over the world, and also provides an excellent international forum for the sharing of knowledge and results from theory, methodology and applications in networking and communications. The book will be of interest to all those working in the fields of intelligent systems and computer technology.

Upon the Gardens of Epicurus William Temple 2004 Sir William Temple, diplomat, statesman, and writer, retired to his garden in the 1680s and wrote what has become one of the key texts, not only of gardening, but also of the English aesthetic. It was he who introduced the idea of the charm of irregularity, and who gave it the allegedly Chinese name sharawadgi. The English style of landscape gardening can be traced in a direct line to this essay, which has not been in print for over 95 years.

Four Signs of a Dynamic Catholic Matthew Kelly 2014-12 As human beings we are constantly engaging and disengaging in everything we do. We engage and disengage at work, in marriage, as parents, in our quest for health and well-being, in personal finances, environmentally, politically, and, of course, we engage or disengage spiritually. If you walk into any Catholic church next Sunday and look around, you will discover that some people are highly engaged, others are massively disengaged, and the majority are somewhere in between. Why? What is the difference between highly engaged Catholics and disengaged Catholics? Answering this question is essential to the future of the Catholic Church. If we truly want to engage Catholics and reinvigorate parish life, we must first discover what drives engagement among Catholics. Matthew Kelly explores this question in his groundbreaking new book, and the simplicity of what he discovers will amaze you. Four things make the difference between highly engaged Catholics and disengaged Catholics: the four signs of a Dynamic Catholic. Whether you are ready to let God take your spiritual life to the next level or want to help reinvigorate your parish, *The Four Signs of a Dynamic Catholic* promises to take you on a journey that will help you live out the genius of Catholicism in your everyday life.

Research Methods for Public Administrators Gary Rassel 2020-12-30 *Research Methods for Public Administrators* contains a thorough overview of research methods and statistical applications for advanced undergraduate and graduate students, and practitioners. The material is based on established social science methods. Concepts and applications are discussed and illustrated with examples from actual research. The book covers research design, methods of data collection, instructions on formulating research plans, measurement, sampling procedures, and statistical applications from basic statistics to more advanced techniques. The basics of conducting experiments, survey research, case studies, and focus groups are discussed. Data organization, management, and analysis are also covered, as are data analysis and hypothesis testing. Descriptive and inferential statistics are discussed and illustrated with examples. The book also includes a chapter on obtaining and analyzing secondary data (data already collected for other purposes) and a chapter on reporting and presenting research results to a variety of audiences. This is a general textbook written primarily for students of public administration and practitioners in public and not-for-profit organizations. It includes materials shown to be useful in gathering and assessing information for making decisions and implementing policies. The material is discussed at a level to be accessible and with enough detail to be useful. New to the seventh edition: Additional and expanded material on qualitative research, big data, metadata, literature reviews, and causal inference New material on experiments and experimental research New examples and case studies, including those dealing with public policy Expanded material on using computers for

data management Information on new NSF and NIH ethics and protection of human subjects requirements for researchers New data sets and Power Point slides for each chapter.

Diabetes Diet Nate Daniels 2020-12-26 What is diabetes? Diabetes is a disease that occurs when your body doesn't make or use the hormone insulin properly. It causes too much blood glucose (sugar) to build up in the blood. There are 2 main types of diabetes. Type 1 diabetes occurs when your body doesn't produce any insulin. It's sometimes called juvenile diabetes because it's usually discovered in children and teenagers, but it may appear in adults, too. Type 2 diabetes occurs when your body doesn't produce enough insulin or doesn't use the insulin as it should. In the past, doctors thought only adults were at risk of developing type 2 diabetes. However, an increasing number of children in the United States are now being diagnosed with the disease. Doctors think this increase is mostly because more children are overweight or obese and are less physically active. Prediabetes occurs when blood sugar levels are higher than they should be, but not high enough to officially be diagnosed as diabetes. Pre-diabetes greatly increases the risk of developing type 2 diabetes. The good news is that, if you have prediabetes, you can prevent or delay the onset of full-blown type 2 diabetes by making lifestyle changes. These include eating a healthy diet, reaching and maintaining a healthy weight, and exercising regularly. Symptoms of diabetes Symptoms vary from person to person. The early stages of diabetes have very few symptoms. You may not know you have the disease. But damage may already be happening to your eyes, your kidneys, and your cardiovascular system. Common symptoms include - Extreme hunger. - Extreme thirst. - Frequent urination. - Unexplained weight loss. - Fatigue or drowsiness. - Blurry vision. - Slow-healing wounds, sores, or bruises. - Dry, itchy skin. - Tingling or numbness in the hands or feet. - Frequent or recurring skin, gum, bladder, or vaginal yeast infections. People who have type 2 diabetes also may show signs of insulin resistance. This includes darkening skin around the neck or in the armpits, high blood pressure, cholesterol problems, yeast infections, and skipped or absent periods in teen girls and women. If blood sugars are extremely high, people can develop diabetic ketoacidosis (DKA). This is a very dangerous complication of uncontrolled diabetes. People with DKA might have - Nausea or vomiting more than once. - Deeper, faster breathing. - The smell of nail polish remover coming from your breath. - Weakness, drowsiness, trembling, confusion, or dizziness. - Uncoordinated muscle movement. If diabetes is left untreated, your blood sugar levels become too high. When this happens, symptoms may include shortness of breath, pain in the abdomen, vomiting, dehydration, and even coma and death.

The Biopolitics of Gender Jemima Repo 2016 This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America.
