Families Caring for an Aging America National Academies of Sciences, Engineering, and Medicine 2016-11-08 Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. *Families Caring for an Aging America* examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

Holding Back The Tears Annie Mitchell 2013-09-16 This is true story about real people is set in Edinburgh City and Dundee, where a petite Scottish Lassie called Rosie Gilmour, mother to Finlay Sinclair, receives news of the death of her son - who tragically has taken his own life by hanging. Rosie pretends her son is still alive by talking to him, for that takes away the unbearable pain of her loss. But once she begins to face up to the fact that Finlay is not coming back, her conversations become more of a challenge than she can handle. When memories of her past are triggered by everyday life events, they take her mind back and forth in time - back to her own childhood days in 1960, when she flirted with the fairground boys, and to the day she gave birth to Finlay - 'ME LADDIE'. Rosie's Scottish accent becomes more apparent whenever her emotions are heightened and she begins to recite poetry. She goes on to reveal doubts about her own self-worth and and how she re-unites her role as mother - a role she had denied herself for seven years prior to Finlay's death. Rosie learns how to forgive herself and how to accept her loss with using practical coping strategies that sometimes but not always work for her. Many voices of different natures and walks of life appear in Rosie's, story with each one offering a part of their own belief to try and console her in her misery - except that she turns her back on any advice or support offered. Rosie is convinced that she can cope with her loss on her own and "needs no help from anyone, thank you" - until a sweet, gentle, soft-spoken voice begins to travel with her throughout her ordeal, leaving her no other choice but to listen. Eventually moving to the countryside in Angus, Rosie finds the isolation gives her life a new meaning offering her the opportunity to re-value

her belief's about her own self values and decides the time has come to give her son a memorial service and invite a chosen few dance companions whom she met on a regular basis in Edinburgh to honour this day. Rosie begins to accept she will never be the same person she once had been and shall never be again, believing now her journey through grief taught her many lessons making her a stronger and better person than she imagined she could ever be.

Bad Karma Deborah Blum 2013-06-22 A TRUE CRIME THRILLER THAT EXPLORES THE DARKEST REGIONS OF ROMANTIC INFATUATION. THE YEAR: 1969 THE SETTING: Berkeley, California THE STORY: Amidst the turmoil of student rebellion two loners encounter each other and turn an innocent flirtation into a dance of death. THE CHARACTERS: Prosenjit Poddar was the brilliant engineering student who wanted nothing more than to return to his native India a big success and to marry a woman of his parents' choosing. Tanya Tarasoff was the naive coed who just wanted somebody to love. And Larry Moore was the young psychologist who thought he recognized the warning signs that his patient was not just suffering from a jilted love affair... but was about to commit an act of murder. THE STAKES: In a culture clash that pits the traditional values of male-dominated India against free-love attitudes of Berkeley in the '60s, an impending tragedy unfolds. Soon Larry Moore finds himself face-to-face with the biggest dilemma of his career. What does a doctor do if he perceives his patient as mentally unstable and a threat to the well-being of another... but is bound by the oath of doctor-patient confidentiality not to warn the police? This true story tracks Moore's race against time to stop the inevitable. BAD KARMA is more than an anatomy of madness; it is also a chronicle of the events that would culminate in a landmark decision handed down by the California Supreme Court. Known simply as Tarasoff, this 1976 ruling would change the oath of confidentiality between therapist and patient, and establish the rule that a mental health professional has the legal duty to protect a threatened individual.

Transforming the Workforce for Children Birth Through Age 8 National Research Council 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of

professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

The Design of Learning Experience Brad Hokanson 2015-07-03 This book delves into two divergent, yet parallel themes; first is an examination of how educators can design the experiences of learning, with a focus on the learner and the end results of education; and second, how educators learn to design educational products, processes and experiences. The book seeks to understand how to design how learning occurs, both in the instructional design studio and as learning occurs throughout the world. This will change the area's semantics; at a deeper level, it will change its orientation from instructors and information to learners; and it will change how educators take advantage of new and old technologies. This book is the result of a research symposium sponsored by the Association for Educational Communications and Technology [AECT].

A Long Shot to Glory Michael Burgess 2012 Sometimes life is like a movie. There are moments and events in life - not often - that are as exciting and as dramatic as a movie. What happened in Lake Placid, New York in February 1980 at the Thirteenth Winter Olympics was such a time. For those who experienced it in person or watched the games on television, they remember where they were when the US hockey team beat the Soviet Union and then beat the team from Finland two days later to win the gold medal. The sports victory of an underdog group of college kids was thrilling enough but it was a win against the Soviet Union. This Cold War adversary was also the nation hosting the summer games later that year which the United States was threatening to boycott. The excitement and drama in Lake Placid gave the games a huge lift of enthusiasm and popularity when some had even come to believe that staging the Olympics was no longer affordable for many communities and that perhaps the 1980 Winter Games should be cancelled entirely. Indeed, as the games began, a US News and World Report magazine questioned whether the Lake Placid games were the "last Olympics." What happened on the hockey ice was improbable enough, but the Lake Placid Winter Games were a long shot, if not a miracle too. Winning the games had been an unlikely decades-long quest for this small town to overcome the barriers of exploding finances, environmental concerns and world politics. Few remember that the 1980 games were never supposed to take place in Lake Placid. They came to the small village because of unexpected events which unfolded and made the two weeks in the remote Adirondacks before a worldwide audience of nearly a billion viewers one of the most dramatic times in the modern era of sports, media and politics. It would not be too much of a stretch to say that the Lake Placid Games, which brought the "Miracle on Ice," saved the Winter Olympics in 1980 and greatly enhanced them for the future.
