LL Organizational Behavior: Real Solutions to Real Challenges Bill Bommer 2020-02-19 This new kind of OB product, *Organizational Behavior: Real Solutions to Real Challenges*, came from our increasing recognition of the challenges faced by former students working in contemporary organizations today. Those graduates tell us that they are ultimately challenged most by the "people problems" in their work. So, we wanted our current students to understand that reality and to exposure them to the best current evidence and thinking about how informed people attack those challenges. Our charge was to create a product that focused on real solutions to real challenges in the real world. We have drawn on many sources including the *Management & Organizational Behavior Teaching Society (MOBTS)* and the *Teaching and Learning Conference (TLC)* of the *Academy of Management*.

Efficiently Inefficient Lasse Heje Pedersen 2019-09-17 Efficiently Inefficient describes the key trading strategies used by hedge funds and demystifies the secret world of active investing. Leading financial economist Lasse Heje Pedersen combines the latest research with real-world examples and interviews with top hedge fund managers to show how certain trading strategies make money--and why they sometimes don't. Pedersen views markets as neither perfectly efficient nor completely inefficient. Rather, they are inefficient enough that money managers can be compensated for their costs through the profits of their trading strategies and efficient enough that the profits after costs do not encourage additional active investing. Understanding how to trade in this efficiently inefficient market provides a new, engaging way to learn finance. Pedersen analyzes how the market price of stocks and bonds can differ from the model price, leading to new perspectives on the relationship between trading results and finance theory. He explores several different areas in depth--fundamental tools for investment management, equity strategies, macro strategies, and arbitrage strategies--and he looks at such diverse topics as portfolio choice, risk management, equity valuation, and yield curve logic. The book's strategies are illuminated further by interviews with leading hedge fund managers: Lee Ainslie, Cliff Asness, Jim Chanos, Ken Griffin, David Harding, John Paulson, Myron Scholes, and George Soros.

Managers Not MBAs Henry Mintzberg 2005-06-02 In this sweeping critique of how managers are educated and how, as a consequence, management is practiced, Henry Mintzberg offers thoughtful and controversial ideas for reforming both. "The MBA trains the wrong people in the wrong ways with the wrong consequences," Mintzberg writes. "Using the classroom to help develop people already practicing management is a fine idea, but pretending to create managers out of people who have never managed is a sham." Leaders cannot be created in a classroom. They arise in context. But people who already practice management can significantly improve their effectiveness given the opportunity to learn thoughtfully from their own experience. Mintzberg calls for a more engaging approach to managing and a more reflective approach to management education. He also outlines how business schools can become true schools of management.
