Hudson River Valley National Heritage Area Hudson River Valley National Heritage Area 2016-07-07 New for 2016, a completely updated guide to the Heritage Sites of the Hudson River Valley National Heritage Area Traveling down the Hudson River, named by Native Americans the river that flows both ways, you discover people, places, and events that made American history. The cultural, historic, and scenic resources of the Hudson Valley are so numerous, so varied, and so compelling that it's no wonder Congress recognized the Hudson River Valley as a National Heritage Area in 1996. The National Park Service called the region the "landscape that defined America" and characterized the valley as "an exceptionally scenic landscape that has provided the setting and inspiration for new currents of American thought, art, and history." Its political importance was demonstrated early in our history when the river played a critical role in the Revolutionary War. The many streams and waterfalls of the tributaries of the Hudson River powered early sawmills and gristmills. The river and its landscapes inspired the Hudson River school of painters. Sublime and picturesque paintings by Thomas Cole, Frederic Church, and Asher Durand depicted this unique American landscape for the world to witness. Industrialists and commercial leaders like William and John D. Rockefeller, Frederick Vanderbilt, J. P. Morgan, and Ogden Mills built their great estates along the Hudson River. The second edition includes completely updated user-friendly design and vibrant photography; heritage site pages that include brief descriptions, contact information, and accessibility site characteristics; and National Park Service Passport Stamp locations with new cancellation stamp pages for your collection. Heritage sites in this guidebook are associated with areas of interest and categorized as must see, best bet, or special interest to make it easy to explore the stories of the Hudson River Valley. Heritage sites are also organized by geography and proximity to make it easy to find heritage sites nearby.

Resurrecting Bertha Rob Siegel 2019-09-15 To most people, cars are just appliances to be disposed of when they rust, become unreliable, or are outgrown. But to car people, it's different. Cars are like photographs that occupy physical space. They hold aromas that trigger memories, and remind us of who we once were. In addition, to some people, the relationship with the car itself is a real thing. Many enthusiasts pine for the cars of their youth, regret that they ever let them go, and yearn and search for them the way people do with old lovers, hoping to find them and rekindle that old spark. In *Resurrecting Bertha*, Rob Siegel assures you that this is normal (well, as normal as anything is with car people), and embarks on this journey himself. Writing in his trademark Hack Mechanic voice that's enthralled readers for 35 years, Rob describes his original eight-year relationship with his highly-modified 1975 BMW 2002 "Bertha," selling the car to a dear friend, its 26 years of storage, and buying it back in a weak whisky-soaked moment only to experience the "oh dear God what did I just do" regret when he raises the long-closed garage door and comes face-to-face with the badly deteriorated car. The book details the steps Rob went through to get the car running, then driving, then sufficiently sorted to make a 2000-mile drive, and how the reconnection with the car was so much deeper than he expected. *Resurrecting Bertha* is about more than just the nuts and bolts; it's about deciding what's important, the joy of doing good, and how, if you do it right, not only can you go home again, but you can do so in the same car.
