Nanotechnology Janet Slingerland 2015-12-15 Thrilling new discoveries in science and technology are announced almost daily. Cutting-Edge Science and Technology keeps readers at the forefront of new research. Nanotechnology covers the amazing advances scientists and engineers have made in microscopic technology, including applications in medicine, safety gear, self-cleaning surfaces, and tiny computers. High-impact photos and explanatory graphics and charts bring scientific concepts to life. Features include essential facts, a glossary, selected bibliography, websites, source notes, and an index. Aligned to Common Core Standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO.

Galaxies Barry N. Malzberg 2011-09-29 Fortieth-Century Space Probe! The diabolically clever Bureau had superbly trained their space pilot, beautiful Lena Thomas. Nothing could go wrong in an age where science had conquered the universe. In one of their fifteen faster-than-light ships, Lena would reach beyond the over-populated Milky Way, carrying her grotesque cargo: seven programmed prosthetic engineers to give advice and comfort, and 515 dead men sealed in gelatinous fix. Exposed to the unskilled ultraviolet of space, they would gradually become the living again! But the omniscient Bureau was not aware of the black galaxy in Lena's charted path. And Lena's ship fell into it, fell through twenty-five billion miles of hyperspace, into the lifeless, timeless expanse of the dreadful pit . . . The cyborg engineers couldn't help Lena now. She was totally alone except for the awakening dead! If she geared the ship up to tachyonic drive, would she break out of the terrifying black hole? Or would she destroy the universe?

I Want to See the Galaxy Yvette Green 2021-11-04 Stellar Loves to gaze up at the sky and imagine what is beyond the clouds. Explore the galaxy through the vivid imagination of Stellar, as she and her friend put on their astronaut spacesuits and blast into the universe illuminated with stars, planets, and infinite possibilities.

Galaxies, Galaxies! Gail Gibbons 2018-03-20 Planet Earth is in the Milky Way Galaxy, the cloudy band of light that stretches clear across the night sky. How many galaxies are there in the universe? For years astronomers thought that the Milky Way was the universe. Now we know that there are billions of them. Gail Gibbons takes the reader on a journey light-years away.

Guardians of the Galaxy Read-Along Storybook and CD Megan Ilnitzki 2017-04-04 Brash space pirate, Peter Quill, finds himself the target of bounty hunters after he steals an orb that once belonged to Ronan, a feared villain. In order to escape Ronan's relentless pursuit, Peter must enlist the help of a rag tag bunch of misfits including the weapon-wielding Rocket Raccoon, the tree-like humanoid Groot, the mysterious Gamora, and the vengeful Drax. Action-packed narration and thrilling sound effects add to the magic in this exciting storybook-and-CD set.

Ada and the Galaxies Alan Lightman 2021-09-07 Stargazers rejoice! In his first book for children, renowned physicist Alan Lightman and collaborators, with help from the Hubble telescope, light up the night sky. New York Times best-selling author Alan Lightman, in collaboration with Olga Pastuchiv, brings galaxies close in a stunning picture-book tribute to the interconnectedness of the natural world. Layering photographs taken from the Hubble telescope into charming and expressive art, illustrator Susanna Chapman zooms in on one child's experiences: Ada knows that the best place for star-gazing is on the island in Maine where she vacations with her grandparents. By day, she tracks osprey in the trees, paddles a kayak, and hunts for shells. But she's most in her element when the sun goes down and the stars blink to life. Will the fog this year foil her plans, or will her grandfather find a way to shine a spotlight on the vast puzzle of the universe . . . until the weather turns?

Me and My Place in Space Joan Sweeney 2018-09-18 Where am I in the solar system? A beloved bestseller, now refreshed with new art from Christine Gore, that will help children discover their place in the Milky Way. Where is the earth? Where is the sun? Where are the stars? Now with new art by Christine Gore, here is an out-of-this world introduction to the universe for children. With Earth as a starting point, a young astronaut leads readers on a tour past each planet and on to the stars, answering simple questions about our solar system. In clear language, drawings, and diagrams, space unfolds before a child's eyes. Colorful illustrations, filled with fun detail, give children a lot to look for on every page, and a glossary helps reinforce new words and concepts. A terrific teaching tool, Me and My Place in Space is an easy and enjoyable way to introduce the concept of space to budding astronomers.

First Big Book of Space Catherine D. Hughes 2012 Introduces basic concepts about outer space, from the sun and the moon to the planets and space exploration.

A Wrinkle in Time Madeleine L'Engle 2019-07-18 A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high

school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.
