The Jew in Canada Arthur Daniel Hart 2010-05 Originally published in 1926, *The Jew in Canada* is the most thorough and ambitious book ever assembled about the Jews of Montreal, Toronto, Halifax, Ottawa, Winnipeg, Regina, Calgary, Vancouver and numerous other Canadian cities. A treasure trove of history and genealogy, *The Jew in Canada* is filled with capsule biographies of hundreds of prominent personalities and community leaders, each augmented with an elegant portrait photograph. Interspersed are descriptions and illustrations of many historic synagogues, community organizations and endeavours. This is an abridged facsimile edition of an original long out of print and almost impossible to attain second-hand. It is certain to be a valuable resource for genealogists, historians, students and everyone else with an interest in Canadian Jewish history. The present edition contains all of the biographical and genealogical material of the original; only several historical essays have been omitted. Paperback, 8.25 x 11 in., 466 pages.

Brands of Faith Mara Einstein 2007-09-14 In a society overrun by commercial clutter, religion has become yet another product sold in the consumer marketplace, and faiths of all kinds must compete with a myriad of more entertaining and more convenient leisure activities. Brands of Faith argues that in order to compete effectively faiths have had to become brands - easily recognizable symbols and spokespeople with whom religious prospects can make immediate connections Mara Einstein shows how religious branding has expanded over the past twenty years to create a blended world of commerce and faith where the sacred becomes secular and the secular sacred. In a series of fascinating case studies of faith brands, she explores the significance of branded church courses, such as Alpha and The Purpose Driven Life, mega-churches, and the popularity of the televangelist Joel Olsteen and television presenter Oprah Winfrey, as well as the rise of Kaballah. She asks what the consequences of this religious marketing will be, and outlines the possible results of religious commercialism - good and bad. Repackaging religion - updating music, creating teen-targeted bibles - is justifiable and necessary. However, when the content becomes obscured, religion may lose its unique selling proposition - the very ability to raise us above the market.

Screen Translation Yves Gambier 2016-04-08 There are three fundamental issues in the field of screen translation, namely, the relationship between verbal output and pictures and soundtrack, between a foreign language/culture and the target language/culture, and finally between the spoken code and the written one. All three issues are raised and discussed by contributors to this special issue of *The Translator*. The topics covered include the following: the use of multimodal transcription for the analysis of audiovisual data; the depiction and reception of cultural otherness in Disney animated films produced in the 1990's; the way in which subtitles in Flanders strengthen the already streamlined narratives of mainstream film stories, and how they 'enhance' the characteristics of the films and their underlying ideology; developing a research methodology for testing the effectiveness of intralingual subtitling for the deaf and hard of hearing; the pragmatic, semiotic and communicative dimensions of puns and plays on words in *The Simpsons*; the reception of translated humour in the Marx Brothers' film *Duck Soup*; and non-professional interpreting in live interviews on breakfast television in Finland. The volume also includes a detailed profile of two postgraduate courses that have been successfully piloted and run at the Universitat Autònoma de Barcelona: the Postgrado de Traducción Audiovisual and the Postgrado de Traducción Audiovisual On-line.

Intelligent Projects Using Python Santanu Pattanayak 2019-01-31 Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key FeaturesA go-to guide to help you master AI algorithms and concepts8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillanceUse TensorFlow, Keras, and other Python libraries to implement smart AI applicationsBook Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learnBuild an intelligent machine translation system using seq-2-seq neural translation machinesCreate AI applications using GAN and deploy smart mobile apps using TensorFlowTranslate videos into text using CNN and RNNImplement smart AI Chatbots, and integrate and extend them in several domainsCreate smart reinforcement, learning-based applications using Q-LearningBreak and generate CAPTCHA using Deep Learning and Adversarial Learning Who this book is for This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book

Global Burden of Armed Violence 2015 Geneva Declaration Secretariat 2015-04-16 The 2015 edition of the Global Burden of Armed Violence provides a wealth of data relevant to security and the post-2015 sustainable development framework. It estimates that 508,000 people died violently - in both conflict and non-conflict settings - every year in 2007-12, down from 526,000 in 2004-09. This trend is visible in non-conflict settings, where the proportion of women and girls is also slightly reduced, from 17 to 16 per cent. Yet, the number of direct conflict deaths is on the rise: from 55,000 to 70,000 per year over the same periods. Firearms are used in close to half of all homicides committed and in almost one-third of direct conflict deaths. Nearly USD 2 trillion in global homicide-related economic losses could have been saved if the homicide rate in 2000-10 had been reduced to the lowest practically attainable levels - between 2 and 3 deaths per 100,000 population.

Autobiography & Postmodernism Kathleen M. Ashley 1994 Exploring the connections between autobiography and postmodernism, this book addresses self-representation in a variety of literatures - Native American, British, Chicana, immigrant, and lesbian, among others - in genres as diverse as poetry, naming, confession, photography, and the manifesto. The essays examine how different writers respond to the culturally specific pressures of genre, how these constraints are negotiated, and what self-representation reveals about the politics of identity.

Style Guide The Economist 2015-06-23 This expanded twelfth edition of the bestselling guide to style is based on the Economist's own updated house style manual, and is an invaluable companion for everyone who wants to communicate with the clarity, style and precision for which the Economist is renowned. As the introduction says, 'clarity of writing usually follows clarity of thought.' The Economist Style Guide gives general advice on writing, points out common errors and clichés, offers guidance on consistent use of punctuation, abbreviations and capital letters, and contains an exhaustive range of reference material - covering everything from accountancy ratios and stock market indices to laws of nature and science. Some of the numerous useful rules and common mistakes pointed out in the guide include: *Which informs, that defines. This is the house that Jack built. But: This house, which Jack built, is now falling down. Discreet means circumspect or prudent; discrete means separate or distinct. Remember that "Questions are never indiscreet. Male & Female Circumcision Sami Awad Aldeeb Abu-Sahlieh 2001 "Originally published in Arabic and also translated into French, Dr. Aldeeb now makes his landmark study of male and female circumcision available to an English speaking audience. Dr. Aldeeb is an advocate in the Swiss Institute of Comparative Law and a leading figure in human rights issues. This major work explores the issues of circumcision in Judaism, Christianity, and Islam from religious, legal, medical, and social perspectives. It serves as both a major reference work for the subject and a monumental statement of human rights."

Liberty or Equality Erik von Kuehnelt-Leddihn 2007 Sometime in the 18th century, the word equality gained ground as a political ideal, but the idea was always vague. In this treatise, Erik von Kuehnelt-Leddihn argues that it reduced to one simple and very dangerous idea: equality of political power as embodied in democracy. He marshals the strongest possible case that democratic equality is the very basis not of liberty, as is commonly believed, but the total state. He uses national socialism as his prime example. He further argues the old notion of government by law is upheld in old monarchies, restrained by a noble elite. Aristocracy, not democracy, gave us liberty. On his side in this argument, he includes the whole of the old liberal tradition, and offers overwhelming evidence for his case. In our times, war and totalitarianism do indeed sail under the democratic flag. This book, capable of overturning most of what you thought you knew about political systems, was first published in 1952.
