*Linking Project Management to Business Strategy* Aaron J. Shenhar 2007-09-01 In *Linking Project Management to Business Strategy*, researchers were guided by the hypothesis: If projects are successful in aligning their efforts with the business strategy, they will better contribute to the long-term goals of the organization. Strategic alignment is a two-way process. Overall business strategy informs project planning and in turn, project success impacts enterprise success. Strategic alignment of a project takes into account strategic focus, operational efficiency and team leadership. The extent to which a project is focused on each dimension determines the level of “strategic maturity” for a given project. Research has shown that higher levels of strategic maturity are associated with higher levels of project success.

This book will be an indispensable part of every hemostasis laboratory, where, given its hands-on nature, it will rarely sit to get dusty on the shelves." --Frits R. Rosendaal, Leiden University Medical Center The hemostasis laboratory has a vital role in the diagnosis and management of patients with familial and acquired hemorrhagic and thrombotic disorders. Its role in the monitoring traditional anticoagulant therapy as well as therapy using new anticoagulants presents new challenges to the laboratory. Quality in Laboratory Hemostasis and Thrombosis not only addresses these important issues, but also covers international guidelines for testing, the

development of international standard materials, management of hemostasis testing from the laboratory to the point of care as well as molecular genetic testing. Designed as a guide for all those working in hemostasis laboratories, this book details a quality program that, when put into place, will help to improve standards in testing.
