Teaching for Effective Learning in Higher Education N. Hativa 2001-01-31 This book identifies strategies that are consistently associated with good teaching and presents them within a theoretical framework that explains how they promote students' active and meaningful learning. The book promotes teachers' pedagogical knowledge and their perception of teaching as scholarly, intellectual work, and provides extensive practical advice.

Between Serb and Albanian Miranda Vickers 1998 The dissolution of communism and the rise of ethnic and religious conflict throughout the former Yugoslavia, which sparked the war among Bosnians, Serbs, and Croats, has captivated the attention of the Western media throughout the 1990s. But little notice has been paid to the growing ethnic and religious tensions within the Serbian province of Kosovo -- tensions that now pose a serious threat to the security of the Balkans. Nearly 90 percent of the population of Kosovo is composed of Albanian Muslims, many of whom support a growing movement -- at first peaceful, but now turning violent -- for independence from Christian Serbia. In *Between Serb and Albanian*, Miranda Vickers explores the roots of this conflict and tracks the recent trajectory of Serbian and Albanian relations in Kosovo. The first third of the book outlines the history of Kosovo during the medieval and Ottoman periods, when relations between the two communities were generally good. The second part examines Kosovo since 1945, when the area fell under Serbian administration in the socialist Yugoslav system. Vickers concludes by surveying the steady deterioration in Serb-Albanian relations since the disintegration of Yugoslavia in 1981. With careful detail, she reveals how a largely peaceful, politically driven campaign for the independence of Kosovo has recently turned to violence with terrorist attacks on Serb political and military institutions, on Albanians thought to be collaborating with the Serbs, and on Serbs themselves. In the process, the author provides a balanced account of the Serb and Albanian positions, while placing much of the blame for the current situation on the repressive policies of Serb dictator Slobodan Milosevic. Vickers sees ominous portents that the conflict may soon spread to neighboring Balkan countries. This book is essential reading for all those wishing to understand the historical, social, and cultural aspects of ethnic and religious

strife in Serbia, and the implications of this conflict for the current political situation in all of southeast Europe.

The Communicative Ethics Controversy Eugene Meyer Professor of Political Science and Philosophy Seyla Benhabib 1990 This timely reader in moral philosophy addresses a controversy that strongly affected recent European reflections on the relevance of ethics for theories of democratic institutions and democratic legitimacy. The debate centers around the idea of a communicative ethics as articulated by Jürgen Habermas and Karl-Otto Apel, and it is representative both of recent attempts to bridge the gap between Continental and Anglo-American philosophy and of the turn to language that has characterized much of recent philosophy. The Communicative Ethics Controversy illustrates philosophical dialogue in action, moving from theses to counterarguments to rejoinders. Theoretical statements by Habermas, Apel, and two of their leading students, Dietrich Böhlen and Robert Alexy, are followed by a series of five arguments by their leading critics, who represent viewpoints ranging from Kantian idealism to Wittgensteinian ordinary-language theory. Fred Dallmayr's introduction and Seyla Benhabib's incisive conclusion place the debate in perspective, bringing it up to date and relating it to the Anglo-American context. Seyla Benhabib is Associate Professor of Philosophy and Women's Studies at the State University of New York, Stony Brook. Fred Dallmayr is Packey Dee Professor of Government at the University of Notre Dame. Contributors: Robert Alexy. Karl-Otto Apel. Seyla Benhabib. Dietrich Böhlen. Jürgen Habermas. Otfried Hoffe. The Poetics of Reverie Gaston Bachelard 1971-06-01 In this, his last significant work, an admired French philosopher provides extraordinary meditations on the relations between the imagining consciousness and the world, positing the notion of reverie as its most dynamic point of reference. In his earlier book, *The Poetics of Space*, Bachelard considered several kinds of "praiseworthy space" conducive to the flow of poetic imagery. In *Poetics of Reverie* he considers the absolute origins of that imagery: language, sexuality, childhood, the Cartesian ego, and the universe. Approaching the psychology of wonder from the phenomenological viewpoint, Bachelard demonstrates the arguable potential of all that awareness. Thus he distinguishes what is merely a phenomenon of relaxation from the kind of reverie which "poetry puts on the right track, the track of expanding consciousness"

The Enforceability of Promises in European Contract Law James Gordley 2001-07-12 Civil law and common law systems are held to enforce promises differently: civil law, in principle, will enforce any promise, while common law will enforce only those with 'consideration'. In that respect, modern civil law supposedly differs from the Roman law from which it descended, where a promise was enforced depending on the type of contract the parties had made.

This 2001 volume is concerned with the extent to which these characterizations are true, and how these and other differences affect the enforceability of promises. Beginning with a concise history of these distinctions, the volume then considers how twelve European legal systems would deal with fifteen concrete situations. Finally, a comparative section considers why legal systems enforce certain promises and not others, and what promises should be enforced. This is the second completed project of The Common Core of European Private Law launched at the University of Trento.

Tito and the Rise and Fall of Yugoslavia Richard West 2012-11-15 Few figures have dominated a nation's destiny as much as Marshal Tito of former Yugoslavia. For nearly thirty years he held together mutually hostile religious groups in a deeply divided country, but his death in 1980 rekindled centuries-old hatreds and by 1992 Yugoslavia ceased to exist. In this revealing biography, Richard West questions the full impact of Tito's reign of power and his implicit responsibility for the ensuing violent, bloody war in Bosnia. 'Excellent ... I recommend his book for those who already know about Yugoslavia and want food for thought about the future.' David Owen, Sunday Times 'Admirable ... Carefully researched and extremely readable.' Literary Review 'A passionate book, in which West's historical sense is interlaced with his own very intimate knowledge of Yugoslavia from the late 1940s on and of the poignancy of [subsequent] events.' Fergus Pyle, Irish Times 'Masterly'. Glasgow Herald

European Coasts of Bohemia Jiri Janac 2013-08-01 The Danube-Oder-Elbe Canal promised to create an integrated waterway system across Europe, linking Black Sea ports to Atlantic markets and giving landlocked Czech nation its own connections to the ocean. The fascinating history of this never-completed project, *European Coasts of Bohemia* tells the story of the experts who confronted and contributed to different and often conflicting geopolitical visions of Europe. Jíra Janác shows how the canal-backers adapted themselves to various political developments, such as the break-up of the Austrian–Hungarian Empire and the integration into the Soviet Bloc, while still managing to keep the canal project alive.

Governing by Inspection Sotiria Grek 2014-09-19 In recent decades, governing practices in education have become highly contradictory: deregulation and decentralisation are accompanied by re-regulation and increased centralisation, contributing to considerable governing tensions in and across different national systems and within the emergent European education policy space. On the one hand there is the persistence of performance monitoring through target-setting, indicators and benchmarks, and on the other, the promotion of self-evaluation and 'light touch' regulation that express a 'softer' governance turn, and promote self-regulation as the best basis for constant improvement. Drawing on research undertaken into three national systems, this edited volume explores the attempts to manage these tensions in Europe through the development of inspection as a governing practice. Inspectorates and inspectors offer key locations for the exploration of governing tensions, positioned as they are between the international, the national, and the local and institutional, and with responsibility for both regulation and development. All three national systems offer contrasting approaches to inspection, all of which have changed considerably in recent years. *Governing by Inspection* positions

Patterns of Local Autonomy in Europe Andreas Ladner 2018-10-26 This book considers local autonomy, measured as a multidimensional concept, from a cross-country comparative perspective, and examines how variations can be explained and what their consequences are. It fills a gap in the literature by providing a comprehensive study of the different components of local autonomy across a large number of countries, over time. It offers a theoretically saturated concept to measure local autonomy and applies it to 39 countries, including all 28 EU member states together with Albania, Georgia, Iceland, Liechtenstein, Macedonia, Moldova, Norway, Serbia, Switzerland Turkey and Ukraine, over a period of 25 years (1990-2014).

known by outsiders; it was deliberately closed to the outside world during the communist era. Now it has thankfully become free again, its borders are open and it can be visited, and it is increasingly integrating with the rest of Europe and beyond. Unfortunately, Albania has had its share of problems in the post-communist era; it's a land of destitution and despair, thanks in part to the Albanian mafia, which has turned the country into one of blood-feuds, kalashnikovs, and eternal crises. Yet, Albania is, in essence, a European nation like any other and will soon, it is to be hoped, advance and take its proper place in Europe and the world. The second edition of the Historical Dictionary of Albania relates the history of this little-known country through a detailed chronology, an introduction, a bibliography, appendixes, and over 700 cross-referenced dictionary entries on significant persons, places, and events; institutions and organizations; and political, economic, social, cultural, and religious facets.

The Ghost Rider Ismail Kadare 2010-05-20 An old woman is awoken in the dead of night by knocks at her front door. The woman opens it to find her daughter, Doruntine, standing there alone in the darkness. She has been brought home from a distant land by a mysterious rider she claims is her brother Konstandin. But unbeknownst to her, Konstandin has been dead for years. What follows is chain of events which plunges a medieval village into fear and mistrust. Who is the ghost rider?

landlockedness, infrastructure and trade: new estimates for central asian countries Christopher Grigoriou 2007 Abstract: This paper assesses the impact of internal infrastructure and landlockedness on Central Asian trade using a panel gravity equation estimated on a large sample of countries (167 countries over 1992-2004). The panel structure of the dataset makes it possible to control for country-pair specific effects (as opposed to the usual importer and exporter effects) that would otherwise be captured by the coefficients of time-invariant variables such as distance or landlockness. Our findings highlight the need to pursue a dual policy agenda. First, transit corridors are regional public goods and should be managed as such through international cooperation. International Financial Institutions can -and do- play a key role in this regard through assistance, coordination and policy dialogue. Second, the Central Asian countries should actively seek diversification of their transit corridors to prevent the creation or maintenance of monopoly positions in transit and bottleneck points such as trans-shipment platforms.

Kosovo Noel Malcolm 2018-05-31 By the early-1980s Kosovo had reached a state of permanent crisis and military occupation, and it became the main focus for the revival of Serbian nationalism. This book traces the history of Kosovo,

examining the Yugoslavian conflict, and the part played by Western Europe in its destruction. 'This is a profound and important book, essential reading for those who wish to understand either the complex history or the present politics of Yugoslavia.' Self-Evaluation in European Schools Lars Jakobsen 2003-09-02 In a political and economic climate in which school performance is made public, performance tables and inspectors' reports can only tell a partial story. This is a unique book. It tells the story of one school seen through the eyes of a pupil, a parent, a teacher, a headteacher and a critical friend. The story is a compelling journey through the process of school improvement; theories of school effectiveness and school improvement are progressively clarified. This book is based on a well-known and well-documented research project that represents eighteen European countries, which clearly sets it in a European Policy context. It includes a wealth of practical tools for raising standards for teachers and school managers to refer to, and guidance on how to use them. This eagerly awaited follow-up to *Schools Must Speak for Themselves* by John MacBeath (RoutledgeFalmer 1999) is a vital and useful source of good ideas, challenging insights and practical strategies for real schools.

Experimental and Quantitative Methods in Contemporary Economics Kesra Nermend 2019-10-12 Contemporary economists, when analyzing economic behavior of people, need to use the diversity of research methods and modern ways of discovering knowledge. The increasing popularity of using economic experiments requires the use of IT tools and quantitative methods that facilitate the analysis of the research material obtained as a result of the experiments and the formulation of correct conclusions. This proceedings volume presents problems in contemporary economics and provides innovative solutions using a range of quantitative and experimental tools. Featuring selected contributions presented at the 2018 Computational Methods in Experimental Economics Conference (CMEE 2018), this book provides a modern economic perspective on such important issues as: sustainable development, consumption, production, national wealth, the silver economy, behavioral finance, economic and non-economic factors determining the behavior of household members, consumer preferences, social campaigns, and neuromarketing. International case studies are also offered.

book illustrates how schools can tell their own story. It draws on ground-breaking work with the National Union of Teachers to demonstrate a practical approach to identifying what makes a good school and the part that pupils, parents and teachers can play in school improvement. Its usefulness for and use by, classroom teachers to evaluate their practice will prove to be its greatest strength in an ever expanding effectiveness literature.

The Kosovo Crisis Paul Latawski 2003 This book looks at the legacy of the 1998-99 Kosovo crisis for European security affairs. It examines the debates about the nature and justification of intervention in the affairs of sovereign states. It also considers the impact of the crisis on NATO and on relations between western states and Russia both during and since Kosovo. Well-known "facts" are critically assessed and challenged. The authors argue that the NATO attacks on Serbia were not a "war," nor did the crisis directly lead to moves to endow the European Union with its own military dimension. They place the Kosovo crisis in the context of the long-term evolution of a transatlantic "community of values" between Europe and North America.

Rule of Law, Human Rights and Judicial Control of Power Rainer Arnold 2017-05-16 Judicial control of public power ensures a guarantee of the rule of law. This book addresses the scope and limits of judicial control at the national level, i.e. the control of public authorities, and at the supranational level, i.e. the control of States. It explores the risk of judicial review leading to judicial activism that can threaten the principle of the separation of powers or the legitimate exercise of state powers. It analyzes how national and supranational legal systems have embodied certain mechanisms, such as the principles of reasonableness, proportionality, deference and margin of appreciation, as well as the horizontal effects of human rights that help to determine how far a judge can go. Taking a theoretical and comparative view, the book first examines the conceptual bases of the various control systems and then studies the models, structural elements, and functions of the control instruments in selected countries and regions. It uses country and regional reports as the basis for the comparison of the convergences and divergences of the implementation of control in certain countries of Europe, Latin America, and Africa. The book's theoretical reflections and comparative investigations provide answers to important questions, such as whether or not there are nascent universal principles concerning the control of public power, how strong the impact of particular legal traditions is, and to what extent international law concepts have had harmonizing and strengthening effects on internal public-power control.
