Kateman 2019-01-04 In Muhammad Abduh and his Interlocutors: Conceptualizing Religion in a Globalizing World, Ammeke Kateman offers an account of Muhammad Abduh's Islamic Reformism in a globalizing and diverse world.

**Southeast European Studies in a Globalizing World** Christian Promitzer 2014 Since the early 1990s, Southeast European studies have undergone profound changes, being shaped by the wars of Yugoslav succession and the ramifications of post-socialism, coupled with democratic deficiencies, which characterize most of Southeast Europe. The countries which it encompasses rest uneasily on the periphery of the developed variant of Western capitalism, but they have nonetheless to contend with the challenges of adjusting to a market economy. The imprint of these contexts on academic research has led to a discussion of the role of Southeast European studies. It is the task of this volume to summarize and raise awareness of this discussion. (Series: Studies on South East Europe - Vol. 16) [Subject: European Studies, Sociology, Politics]

Arabic Thought against the Authoritarian Age Jens Hanssen 2018-02-15 In the wake of the Arab uprisings, the Middle East descended into a frenzy of political turmoil and unprecedented human tragedy which reinforced regrettable stereotypes about the moribund state of Arab intellectual and cultural life. This volume sheds important light on diverse facets of the post-war Arab world and its vibrant intellectual, literary and political history. Cutting-edge research is presented on such wide-ranging topics as poetry, intellectual history, political philosophy, and religious reform and cultural resilience all across the length and breadth of the Arab world, from Morocco to the Gulf States. This is an important statement of new directions in Middle East studies that challenges conventional thinking and has added relevance to the study of global intellectual history more broadly.

*Teaching Recent Global History* Diana B. Turk 2014-03-05 *Teaching Recent Global History* explores innovative ways to teach world history, beginning with the early 20th century. The authors' unique approach unites historians, social studies teachers, and educational curriculum specialists to offer historically rich, pedagogically innovative, and academically rigorous lessons that help students connect with and deeply understand key events and trends in recent global history. Highlighting the best

scholarship for each major continent, the text explores the ways that this scholarship can be adapted by teachers in the classroom in order to engage and inspire students. Each of the eight main chapters highlights a particularly important event or theme, which is then complemented by a detailed discussion of a particular methodological approach. Key features include: • An overarching narrative that helps readers address historical arguments; • Relevant primary documents or artifacts, plus a discussion of a particular historical method well-suited to teaching about them; • Lesson plans suitable for both middle and secondary level classrooms; • Document-based questions and short bibliographies for further research on the topic. This invaluable book is ideal for any aspiring or current teacher who wants to think critically about how to teach world history and make historical discussions come alive for students.

Global Calvinism Charles H. Parker 2022 A comprehensive study of the connection between Calvinist missions and Dutch imperial expansion during the early modern period "A tour de force offering the reader the best study of global Calvinism in the realms of the Dutch East India Company."--Ronnie Po-Chia Hsia, editor, *Calvinism and Religious Toleration in the Dutch Golden Age* Calvinism went global in the seventeenth and eighteenth centuries, as close to a thousand Dutch Reformed ministers, along with hundreds of lay chaplains, attached themselves to the Dutch East India and West India companies. Across Asia, Africa, and the Americas where the trading companies set up operation, Dutch ministers sought to convert "pagans," "Moors," Jews, and Catholics and to spread the cultural influence of Protestant Christianity. As Dutch ministers labored under the auspices of the trading companies, the missionary project coalesced, sometimes grudgingly but often readily, with empire building and mercantile capitalism. Simultaneously, Calvinism became entangled with societies around the world as encounters with indigenous societies shaped the development of European religious and intellectual history. Though historians have traditionally treated the Protestant and European expansion as unrelated developments, the global reach of Dutch Calvinism offers a unique opportunity to understand the intermingling of a Protestant faith, commerce, and empire.

What Is Global Studies? Manfred B. Steger 2016-11-10 What is Global Studies, and how does it relate to globalization? Responding to this frequently asked question, Manfred B. Steger and Amentahru Wahrab provide the first comprehensive overview of this emerging field. Authoritative and accessible, this primer

speaks to students and instructors interested not only in key theories but also in applied teaching and learning programs designed to educate "global citizens" to meet the concrete challenges of the twenty-first century. Linking the influential arguments of major thinkers in Global Studies to their own framework, the authors discuss the "Four Pillars of Global Studies": globalization, transdisciplinarity, space and time, and critical thinking. The book, with instructive appendix materials, will appeal to readers seeking a deeper understanding of Global Studies—one of the most popular fields of study in major universities around the world.

**The Handy Military History Answer Book** Samuel Willard Crompton 2015-03-23 Brutality and fear. Heroism and sacrifice. Military history is a fascinating, complex, and often contradictory subject. War and fighting between tribes, clans, groups and countries has been with us forever. Great leaders, great villains, pivotal moments and events become transformative, causing political, social, and technological upheavals, which were often built on the foundation of war. The Handy Military History Answer Book is a captivating, concise, and convenient look at how the world, the United States, and the lives we lead today have been changed by war and the military. The weapons, leaders, soldiers, battles, tactics, strategies, blunders, technologies, and outcomes are all examined in this powerful primer on the military, its history—and world history. From early Greeks and Romans to Genghis Kahn and other great conquering militaries of the past, continuing on through the civil wars and world wars that shaped the boundaries of today's nations, and to the modern weapons, technologies, guerrilla warfare, and terrorism currently reported in the nightly news, this book investigates everything from the smallest miscalculations and maneuvers to the biggest invasions and battles, as well as the cutting-edge technologies and firepower that led to victories and helped change the world. The Handy Military History Answer Book looks at the who, the what, the why, and the how of conflicts throughout history. It answers over 1,100 questions, from the mostly widely asked to the more obscure, such as: Who cast the first stone (of human history)? Who were the "Sea Peoples?" Is there anything to the story of Ancient Troy? Could Alexander the Great have conquered the early Roman Republic? How wealthy would each of Alexander's men been had the treasure at Persepolis been divided? How many Romans lost their lives at the Battle of Cannae? Why did people underestimate Julius Caesar when he was in his thirties? How many men, and auxiliary fighters, were there in a Roman legion? Was the Battle of Actium truly decisive? And what way? Which precious metal did the Vikings

prefer above all others? Do we even have his name--Genghis Khan--right? Who employed the composite bow with greater effectiveness: the Arabs or the Turks? Why did Pope Urban II go to central France in 1095? Where did Richard the Lion-Heart get his nickname? Why on earth did Hitler code-name his invasion of Russia for a German emperor who drowned? Who was the greater wit: Voltaire or King Frederick the Great? About whom did King George II remark: "Mad, is he? Well I hope he bites some of my other generals?" What great poet spent years gathering food and wine for the Spanish Armada? What was the price for King Francis' freedom, in 1526? How long did it take to learn how to use the longbow? What was the largest of the cannon brought by the Ottoman Turks to the siege of Constantinople Who took over when Genghis Khan died (after a fall from his horse)? What did the Franciscan monks say when they returned from Karakorum? Was Napoleon really not French? Who won the Battle of the Nile, and how? Where was the world's first submarine deployed? When did George Washington have to alter all his plans: and how did he go about making the change? How many people died at the Siege of Fort Sumter? What was the worst day of the Civil War, in the Far West? When were balloons first deployed in warfare? Where did the name "Uncle Sam" come from? What signals did Paul Revere watch for on the evening of April 18, 1775? What did Rasputin have to say about the approach of the First World War? How close did Hitler come to victory at Moscow in 1941? What ten days decided the outcome of World War II? What was so special about the B-24? When did the Cold War commence? What was the last action of the Yom Kippur War? What role did Colin Powell play in the run-up to war in Iraq?

**Palgrave Handbook of Research in Historical Culture and Education** Mario Carretero 2017-03-07 This volume comprises a broad interdisciplinary examination of the many different approaches by which contemporary scholars record our history. The editors provide a comprehensive overview through thirty-eight chapters divided into four parts: a) Historical Culture and Public Uses of History; b) The Appeal of the Nation in History Education of Postcolonial Societies; c) Reflections on History Learning and Teaching; d) Educational Resources: Curricula, Textbooks and New Media. This unique text integrates contributions of researchers from history, education, collective memory, museum studies, heritage, social and cognitive psychology, and other social sciences, stimulating an interdisciplinary dialogue. Contributors come from various countries of Northern and Southern America, Europe and Asia, providing an international perspective that does justice to the complexity of this field of study. The Palgrave Handbook of Research

in Historical Culture and Education provides state-of-the-art research, focussing on how citizens and societies make sense of the past through different ways of representing it.

**History in Times of Unprecedented Change** Zoltán Boldizsár Simon 2019-06-13 Our understanding of ourselves and the world as historical has drastically changed since the postwar period, yet this emerging historical sensibility has not been appropriately explained in a coherent theory of history. In this book, Zoltán Simon argues that instead of seeing the past, the present and the future together on a temporal continuum as history, we now expect unprecedented change to happen in the future (in visions of the future of technology, ecology and nuclear warfare) and we look at the past by assuming that such changes have already happened. This radical theory of history challenges narrative conceptualizations of history which assume a past potential of humanity unfolding over time to reach future fulfillment and seeks new ways of conceptualizing the altered socio-cultural concerns Western societies are currently facing. By creating a novel set of concepts to make sense of our altered historical condition regarding both history understood as the course of human affairs and historical writing, *History in Times of Unprecedented Change* offers a highly original and engaging take on the state of history and historical theory in the present and beyond.

**The French Revolution as a Moment of Respatialization** Matthias Middell 2019-09-23 The French Revolution has primarily been understood as a national event that also had a lasting impact in Europe and in the Atlantic world. Recently, historiography has increasingly emphasized how France's overseas colonies also influenced the contours of the French Revolution. This volume examines the effects of both dimensions on the reorganization of spatial formats and spatial orders in France and in other societies. It departs from the assumption that revolutions shatter not only the political and economic old regime order at home but, in an increasingly interdependent world, also result in processes of respatialization. The French Revolution, therefore, is analysed as a key event in a global history that seeks to account for the shifting spatial organization of societies on a transregional scale.

**The American South** William J. Cooper Jr. 2016-11-17 In *The American South: A History*, Fifth Edition, William J. Cooper, Jr. and Thomas E. Terrill demonstrate their belief that it is impossible to divorce the

history of the South from the history of the United States. The authors' analysis underscores the complex interaction between the South as a distinct region and the South as an inescapable part of America. Cooper and Terrill show how the resulting tension has often propelled section and nation toward collision. In supporting their thesis, the authors draw on the tremendous amount of profoundly new scholarship in Southern history. Each volume includes a substantial bibliographical essay—completely updated for this edition—which provides the reader with a guide to literature on the history of the South. This volume contains updated chapters, and tables.

*Global Mental Health and Neuroethics* Dan J. Stein 2020-01-17 *Global Mental Health and Neuroethics* explores conceptual, ethical and clinical issues that have emerged with the expansion of clinical neuroscience into middle- and low-income countries. **Climate Change and the Course of Global History** John L. Brooke 2014-03-17 The first global study by a historian to fully integrate the earth-system approach of the new climate science with the material history of humanity.

**Moral Mappings of South and North** Peter Wagner 2017-06-02 The term 'Global South' marks a new attempt at providing order and meaning in the current global political constellation, replacing the term 'Third World'. But the term 'Global South' is fraught with many ambiguities. This book explores the possible meanings of this new distinction and assesses the advantages and disadvantages of adopting it for understanding the contemporary world. It casts a wide exploratory net, addressing historical transformations of world-interpretation and wider cultural-intellectual meanings.

**Studies on a Global History of Music** Reinhard Strohm 2018-04-09 The idea of a global history of music may be traced back to the Enlightenment, and today, the question of a conceptual framework for a history of music that pays due attention to global relationships in music is often raised. But how might a historical interpretation of those relationships proceed? How should it position, or justify, itself? What would 'Western music' look like in an account of music history that aspires to be truly global? The studies presented in this volume aim to promote post-European historical thinking. They are based on the idea that a global history of music cannot be one single, hegemonic history. They rather explore the paradigms and terminologies that might describe a history of many different voices. The chapters address historical practices and interpretations of music in different parts of the world, from Japan to Argentina and from Mexico to India. Many of these narratives are about relations between these cultures and the Western tradition; several also consider socio-political and historical circumstances that have affected music in the various regions. The book addresses aspects that Western musical historiography has tended to neglect

even when looking at its own culture: performance, dance, nostalgia, topicality, enlightenment, the relationships between traditional, classical, and pop musics, and the regards croisés between European, Asian, or Latin American interpretations of each other's musical traditions. These studies have been derived from the Balzan Musicology Project Towards a Global History of Music (2013–2016), which was funded by the International Balzan Foundation through the award of the Balzan Prize in Musicology to the editor, and designed by music historians and ethnomusicologists together. A global history of music may never be written in its entirety, but will rather be realised through interaction, practice, and discussion, in all parts of the world.

*Dreams of Germany* Neil Gregor 2018-12-17 For many centuries, Germany has enjoyed a reputation as the 'land of music'. But just how was this reputation established and transformed over time, and to what extent was it produced within or outside of Germany? Through case studies that range from Bruckner to the Beatles and from symphonies to dance-club music, this volume looks at how German musicians and their audiences responded to the most significant developments of the twentieth century, including mass media, technological advances, fascism, and war on an unprecedented scale.

*Barron's Passware* PHILLIP LEFTON 1997 Designed for students to use in the classroom or at home to study and prepare for the New York State Regents exam on global studies.

**The Contested History of Autonomy** Gerard Rosich 2018-10-04 *The Contested History of Autonomy* examines the concept of autonomy in modern times. It presents the history of modernity as constituted by the tension between sovereignty and autonomy and offers a critical interpretation of European modernity from a global perspective. The book shows, in contrast to the standard view of its invention, that autonomy (re)emerged as a defining quality of modernity in early modern Europe. Gerard Rosich looks at how the concept is first used politically, in opposition to the rival concept of sovereignty, as an attribute of a collective-self in struggle against imperial domination. Subsequently the book presents a range of historical developments as significant events in the history of imperialism which are connected at once with the consolidation of the concept of sovereignty and with a western view of modernity. Additionally, the book provides an interpretation of the history of globalization based on this connection. Rosich discusses

the conceptual shortcomings and historical inadequacy of the traditional western view of modernity against the background of recent breakthroughs in world history. In doing so, it reconstructs an alternative interpretation of modernity associated with the history of autonomy as it appeared in early modern Europe, before looking to the present and the ongoing tension between 'sovereignty' and 'autonomy' that exists. This is a groundbreaking study that will be of immense value to scholars researching modern Europe and its relationship with the World.

*Eurocentrism and the Politics of Global History* Alessandro Stanziani 2018-07-27 Global history locates national histories in the context of broader processes, in which the West is not necessarily synonymous with progress. And yet it often suffers from the same Eurocentrism that plagues national history, accepting Western categories and values uncritically and largely ignoring non-English historiographies. Alessandro Stanziani examines these tensions and asks what global history is and ought to be. Drawing upon a wide array of sources, he historicizes global history writing from the sixteenth century onward, tracing the forces of revolution, globalization, totalitarianism, colonization, decolonization and the Cold War. By considering global history in the context of a *longue durée*, multipolar perspective, this book assesses the strengths and limits of the field, and clarifies what is at stake.

*Feminisms* Lucy Delap 2020-11-24 Feminism's origins have often been framed around a limited cast of mostly white and educated foremothers, but the truth is that feminism has been and continues to be a global movement. For centuries, women from all walks of life have been mobilizing for gender justice. As the last decade has reminded even the most powerful women, there is nothing "post-feminist" about our world. And there is much to be learned from the passion and protests of the past. Historian Lucy Delap looks to the global past to give us a usable history of the movement against gender injustice—one that can help clarify questions of feminist strategy, priority and focus in the contemporary moment. Rooted in recent innovative histories, the book incorporates alternative starting points and new thinkers, challenging the presumed priority of European feminists and ranging across a global terrain of revolutions, religions, empires and anti-colonial struggles. In *Feminisms*, we find familiar stories—of suffrage, of solidarity, of protest—yet there is no assumption that feminism looks the same in each place or time. Instead, Delap explores a central paradox: feminists have demanded inclusion but have persistently practiced their own

exclusions. Some voices are heard and others are routinely muted. In amplifying the voices of figures at the grassroots level, Delap shows us how a rich relationship to the feminist past can help inform its future.

A Contest of Civilizations Andrew F. Lang 2020-11-24 Most mid-nineteenth-century Americans regarded the United States as an exceptional democratic republic that stood apart from a world seemingly riddled with revolutionary turmoil and aristocratic consolidation. Viewing themselves as distinct from and even superior to other societies, Americans considered their nation an unprecedented experiment in political moderation and constitutional democracy. But as abolitionism in England, economic unrest in Europe, and upheaval in the Caribbean and Latin America began to influence domestic affairs, the foundational ideas of national identity also faced new questions. And with the outbreak of civil war, as two rival governments each claimed the mantle of civilized democracy, the United States' claim to unique standing in the community of nations dissolved into crisis. Could the Union chart a distinct course in human affairs when slaveholders, abolitionists, free people of color, and enslaved African Americans all possessed irreconcilable definitions of nationhood? In this sweeping history of political ideas, Andrew F. Lang reappraises the Civil War era as a crisis of American exceptionalism. Through this lens, Lang shows how the intellectual, political, and social ramifications of the war and its meaning rippled through the decades that followed, not only for the nation's own people but also in the ways the nation sought to redefine its place on the world stage.

**A Global History of Convicts and Penal Colonies** Clare Anderson 2018-05-17 Between 1415, when the Portuguese first used convicts for colonization purposes in the North African enclave of Ceuta, to the 1960s and the dissolution of Stalin's gulags, global powers including the Spanish, Dutch, Portuguese, British, Russians, Chinese and Japanese transported millions of convicts to forts, penal settlements and penal colonies all over the world. *A Global History of Convicts and Penal Colonies* builds on specific regional archives and literatures to write the first global history of penal transportation. The essays explore the idea of penal transportation as an engine of global change, in which political repression and forced labour combined to produce long-term impacts on economy, society and identity. They investigate the varied and interconnected routes convicts took to penal sites across the world, and the relationship of these convict flows to other forms of punishment, unfree labour, military service and indigenous

incarceration. They also explore the lived worlds of convicts, including work, culture, religion and intimacy, and convict experience and agency.

Debating New Approaches to History Marek Tamm 2018-10-04 With its innovative format, Debating New Approaches to History addresses issues currently at the top of the discipline's theoretical and methodological agenda. In its chapters, leading historians of both older and younger generations from across the Western world and beyond discuss and debate the main problems and challenges that historians are facing today. Each chapter is followed by a critical commentary from another key scholar in the field and the author's response. The volume looks at topics such as the importance and consequences of the 'digital turn' in history (what will history writing be like in a digital age?), the challenge of posthumanist theory for history writing (how do we write the history of non-humans?) and the possibilities of moving beyond traditional sources in history and establishing a dialogue with genetics and neurosciences (what are the perspectives and limits of the so-called 'neurohistory'?). It also revisits older debates in history which remain crucial, such as what the gender approach can offer to historical research or how to write history on a global scale. Debating New Approaches to History does not just provide a useful overview of the new approaches to history it covers, but also offers insights into current historical debates and the process of historical method in the making. It demonstrates how the discipline of history has responded to challenges in society – such as digitalization, globalization and environmental concerns – as well as in humanities and social sciences, such as the 'material turn', 'visual turn' or 'affective turn'. This is a key volume for all students of historiography wanting to keep their finger on the pulse of contemporary thinking in historical research.

The Rise of Africa's Middle Class Henning Melber 2016-12-15 Across Africa, a burgeoning middle class has become the poster child for the 'Africa rising' narrative. Ambitious, aspirational and increasingly affluent, this group is said to embody the values and hopes of the new Africa, with international bodies ranging from the United Nations Development Programme to the World Bank regarding them as important agents of both economic development and democratic change. This narrative, however, obscures the complex and often ambiguous role that this group actually plays in African societies. Bringing together economists, political scientists, anthropologists and development experts, and spanning a variety of case

studies from across the continent, this collection provides a much-needed corrective to the received wisdom within development circles, and provides a fresh perspective on social transformations in contemporary Africa.

*Mapping South-South Connections* Fernanda Peñaloza 2019-03-15 This book explores contemporary cultural, historical and geopolitical connections between Latin America and Australia from an interdisciplinary perspective. It seeks to capitalise on scholarly developments and further unsettle the multiple divides created by the North-South axis by focusing on processes of translocal connectivities that link Australia with Latin America. The authors conceptualise the South-South not as a defined geographic space with clear boundaries, but rather as a mobile terrain with multiple, evolving and overlapping translocal processes.

*The Palgrave Handbook of Climate History* Sam White 2018-08-10 This handbook offers the first comprehensive, state-of-the-field guide to past weather and climate and their role in human societies. Bringing together dozens of international specialists from the sciences and humanities, this volume describes the methods, sources, and major findings of historical climate reconstruction and impact research. Its chapters take the reader through each key source of past climate and weather information and each technique of analysis; through each historical period and region of the world; through the major topics of climate and history and core case studies; and finally through the history of climate ideas and science. Using clear, non-technical language, *The Palgrave Handbook of Climate History* serves as a textbook for students, a reference guide for specialists and an introduction to climate history for scholars and interested readers.

*Curry* Colleen Taylor Sen 2009-11-15 Curry is one of the most widely used—and misused—terms in the culinary lexicon. Outside of India, the word curry is often used as a catchall to describe any Indian dish or Indian food in general, yet Indians rarely use it to describe their own cuisine. Curry answers the question, “What is curry?” by giving a lively historical and descriptive account of a dish that has many incarnations. In this global history, food writer Colleen Taylor Sen describes in detail the Anglo-Indian origins of curry and how this widely used spice has been adapted throughout the world. Exploring the curry universe

beyond India and Great Britain, her chronicles include the elegant, complex curries of Thailand; the exuberant curry/rotis of the Caribbean; kari/raisu, Japan's favorite comfort food; Indonesian gulais and rendang; Malaysia's delicious Nonya cuisine; and exotic Western hybrids such as American curried chicken salad, German currywurst, and Punjabi-Mexican-Hindu pizza. Along the way, Sen unravels common myths about curry and Indian food and illuminates the world of curry with excerpts from popular songs, literary works, historical and modern recipes, and illustrations depicting curry dishes and their preparations. A vibrant, flavorful book about an increasingly popular food, Curry will find a wide audience of cooking enthusiasts and hungry fans of Indian food.

The Oxford World History of Empire Peter Fibiger Bang 2021 This is the first world history of empire, reaching from the third millennium BCE to the present. By combining synthetic surveys, thematic comparative essays, and numerous chapters on specific empires, its two volumes provide unparalleled coverage of imperialism throughout history and across continents, from Asia to Europe and from Africa to the Americas. Only a few decades ago empire was believed to be a thing of the past; now it is clear that it has been and remains one of the most enduring forms of political organization and power. We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods, such as the relatively short age of European colonialism. The history of empire, as these volumes amply demonstrate, needs to be drawn on the much broader canvas of global history. Volume I: The Imperial Experience is dedicated to synthesis and comparison. Following a comprehensive theoretical survey and bold world history synthesis, fifteen chapters analyze and explore the multifaceted experience of empire across cultures and through the ages. The broad range of perspectives includes: scale, world systems and geopolitics, military organization, political economy and elite formation, monumental display, law, mapping and registering, religion, literature, the politics of difference, resistance, energy transfers, ecology, memories, and the decline of empires. This broad set of topics is united by the central theme of power, examined under four headings: systems of power, cultures of power, disparities of power, and memory and decline. Taken together, these chapters offer a comprehensive and unique view of the imperial experience in world history. Volume II: The History of Empires tracks the protean history of political domination from the very beginnings of state formation in the Bronze Age up to the present. Case studies deal with the full range of the historical experience of

empire, from the realms of the Achaemenids and Asoka to the empires of Mali and Songhay, and from ancient Rome and China to the Mughals, American settler colonialism, and the Soviet Union. Forty-five chapters detailing the history of individual empires are tied together by a set of global synthesizing surveys that structure the world history of empire into eight chronological phases.

**Global Bioethics** Henk ten Have 2016-02-10 The panorama of bioethical problems is different today. Patients travel to Thailand for fast surgery; commercial surrogate mothers in India deliver babies to parents in rich countries; organs, body parts and tissues are trafficked from East to Western Europe; physicians and nurses migrating from Africa to the U.S; thousands of children or patients with malaria, tuberculosis and AIDS are dying each day because they cannot afford effective drugs that are too expensive. Mainstream bioethics as it has developed during the last 50 years in Western countries is evolving into a broader approach that is relevant for people across the world and is focused on new global problems. This book provides an introduction into the new field of global bioethics. Addressing these problems requires a broader vision of bioethics that not only goes beyond the current emphasis on individual autonomy, but that criticizes the social, economic and political context that is producing the problems at global level. This book argues that global bioethics is a necessity because the social, economic and environmental effects of globalization require critical responses. Global bioethics is not a finished product that can simply be applied to solve global problems, but it is the ongoing result of interaction and exchange between local practices and global discourse. It combines recognition of differences and respect for cultural diversity with convergence towards common perspectives and shared values. The book examines the nature of global problems as well as the type of responses that are needed, in order to exemplify the substance of global bioethics. It discusses the ethical frameworks that are available for global discourse and shows how these are transformed into global governance mechanisms and practices.

**Principles And Laws In World Politics: Classical Chinese Perspectives On Global Conflict** Walter Wan Fai Lee 2021-12-02 The search for universal principles and laws in world politics is a colossal common task for all civilisations. It should not be monopolised by the Western liberal paradigm. Thirty years after the end of the Cold War, global conflicts have been satisfactorily resolved neither by communism nor

liberalism. Humanitarian intervention, now under the cover of the responsibility to protect (R2P), has destabilised many societies, leaving justice undone. This inspiring book invites debates on the post-liberal imagination of 'emancipated Leviathan': an almighty political authority which exercises awe and force to restore order, as well as enshrines globally-negotiated values of common conscience and reinvented cosmopolitanism. Human well-being will truly become reality when we synergise pre-modern and pre-liberal ways of thinking, worldviews, ethics, and aesthetic styles by means of cross-civilisational, cross-disciplinary fundamental research, and let an emancipated Leviathan exercise principles and laws of virtue derived from the study. The starting point of such intellectual innovation is China. This book explores the application of classical Chinese resources to the innovation of thoughts in contemporary Chinese international relations (IR). It examines whether 'Knowledge Archaeology of Chinese International Relations' (KACIR), coined by the author, responds sensibly to today's issues of international ethics and global justice. The book contends that emancipative hermeneutics holds the key to the Chinese soft power puzzle. A bottom-up, non-nationalistic, and non-ethnocentric approach to the Chinese civilisation will reinvent intellectual pluralism and cosmopolitan elements in the Chinese tradition that interact constructively with and ultimately transcend the liberal Western model. Strolling from contemporary IR back to ancient Chinese philosophy, then striding into the future searching for common principles and laws, this insightful book is a must-read for those who want to reflect on global conflicts in this era of great uncertainty and transformation, as well as those who love to make our world a better place to live in.

**The Long End of the First World War** Anorthe Wetzels 2018-09-15 This fall marks the centennial of the Armistice of November 11, 1918, the agreement that put a stop to the hostilities of World War I. But was the end of this historic conflict really as clearly defined as we think? *The Long End of the First World War* takes aim at the notion of a static and final ceasefire, revealing it to be the result of European narratives that ignored the truly global aftermath of the war. The contributors to this volume examine the war's effect from multiple angles, taking into account the experiences of prisoners of war, demobilized soldiers, women, and children from Asia, Africa, and the Middle East, and investigating the social, economic, and ecological results of the conflict. *The Long End of the First World War* serves as a complement to the commemorations of the Armistice we'll surely see this year, asking us to consider who and what ends up in the historical record and what ought to be rediscovered.

*A Global History of Modern Historiography* Georg G Iggers 2016-09-01 The first book on historiography to adopt a global and comparative perspective on the topic, A Global History of Modern Historiography looks not just at developments in the West but also at the other great historiographical traditions in Asia, the

Middle East, and elsewhere around the world over the course of the past two and a half centuries. This second edition contains fully updated sections on Latin American and African historiography, discussion of the development of global history, environmental history, and feminist and gender history in recent years, and new coverage of Russian historical practices. Beginning in the mid-eighteenth century, the authors analyse historical currents in a changing political, social and cultural context, examining both the adaptation and modification of the Western influence on historiography and how societies outside Europe and America found their own ways in the face of modernization and globalization. Supported by online resources including a selection of excerpts from key historiographical texts, this book offers an up-to-date account of the status of historical writing in the global era and is essential reading for all students of modern historiography.

*A Global History of Runaways* Marcus Rediker 2019-07-30 During global capitalism's long ascent from 1600–1850, workers of all kinds—slaves, indentured servants, convicts, domestic workers, soldiers, and sailors—repeatedly ran away from their masters and bosses, with profound effects. *A Global History of Runaways*, edited by Marcus Rediker, Titas Chakraborty, and Matthias van Rossum, compares and connects runaways in the British, Danish, Dutch, French, Mughal, Portuguese, and American empires. Together these essays show how capitalism required vast numbers of mobile workers who would build the foundations of a new economic order. At the same time, these laborers challenged that order—from the undermining of Danish colonization in the seventeenth century to the igniting of civil war in the United States in the nineteenth.

**Thinking History Globally** Diego Olstein 2014-11-04 The book brings together many recent trends in writing history under a common framework: thinking history globally. By thinking history globally, the book explains, applies, and exemplifies the four basic strategies of analysis, the big C's: comparing, connecting, conceptualizing, and contextualizing, using twelve different branches of history.

**Routledge Handbook of Football Studies** John Hughson 2016-10-04 Football is unquestionably the world's most popular and influential sport. There is no corner of the globe in which the game is not played or followed. More countries are affiliated to FIFA, football's governing body, than to the United Nations. The sport has therefore become an important component of our social, cultural, political and economic life. The Routledge Handbook of Football Studies is a landmark work of reference, going further than any other book in considering the historical and contemporary significance of football around the world. Written by a team of leading sport scholars, the book covers a broad range of disciplines from history, sociology, politics and business, to philosophy, law and media studies. The central section of the book examines key themes and issues in football studies, such as the World Cup and international competition, governance and ownership, fandom and celebrity. The concluding section offers in-depth surveys of the culture and organisation of football in each of the regional confederations, from UEFA to CONCACAF. This book will be fascinating reading for any serious football fan and an essential resource for advanced students or scholars undertaking research in football or sport studies, and any practitioner or policy-maker working in football.
