Culture, Mind, and Brain Laurence J. Kirmayer 2020-09-24 Recent neuroscience research makes it clear that human biology is cultural biology - we develop and live our lives in socially constructed worlds that vary widely in their structure values, and institutions. This integrative volume brings together interdisciplinary perspectives from the human, social, and biological sciences to explore culture, mind, and brain interactions and their impact on personal and societal issues. Contributors provide a fresh look at emerging concepts, models, and applications of the co-constitution of culture, mind, and brain. Chapters survey the latest theoretical and methodological insights alongside the challenges in this area, and describe how these new ideas are being applied in the sciences, humanities, arts, mental health, and everyday life. Readers will gain new appreciation of the ways in which our unique biology and cultural diversity shape behavior and experience, and our ongoing adaptation to a constantly changing world.

Emotional Choices Robin Markwica 2018-03-09 Why do states often refuse to yield to military threats from a more powerful actor, such as the United States? Why do they frequently prefer war to compliance? International Relations scholars generally employ the rational choice logic of consequences or the constructivist logic of appropriateness to explain this puzzling behavior. Max Weber, however, suggested a third logic of choice in his magnum opus *Economy and Society*: human decision making can also be motivated by emotions. Drawing on Weber and more recent scholarship in sociology and psychology, Robin Markwica introduces the logic of affect, or emotional choice theory, into the field of International Relations. The logic of affect posits that actors' behavior is shaped by the dynamic interplay among their norms, identities, and five key emotions: fear, anger, hope, pride, and humiliation. Markwica puts forward a series of propositions that specify the affective conditions under which leaders are likely to accept or reject a coercer's demands. To infer

emotions and to examine their influence on decision making, he develops a methodological strategy combining sentiment analysis and an interpretive form of process tracing. He then applies the logic of affect to Nikita Khrushchev's behavior during the Cuban missile crisis in 1962 and Saddam Hussein's decision making in the Gulf conflict in 1990-1 offering a novel explanation for why U.S. coercive diplomacy succeeded in one case but not in the other.

Authoritarianism and the Elite Origins of Democracy Michael Albertus 2018-01-25

This book argues that - in terms of institutional design, the allocation of power and privilege, and the lived experiences of citizens - democracy often does not restart the political game after displacing authoritarianism. Democratic institutions are frequently designed by the outgoing authoritarian regime to shield incumbent elites from the rule of law and give them an unfair advantage over politics and the economy after democratization. *Authoritarianism and the Elite Origins of Democracy* systematically documents and analyzes the constitutional tools that outgoing authoritarian elites use to accomplish these ends, such as electoral system design, legislative appointments, federalism, legal immunities, constitutional tribunal design, and supermajority thresholds for change. The study provides wide-ranging evidence for these claims using data that spans the globe and dates from 1800 to the present. Albertus and Menaldo also conduct detailed case studies of Chile and Sweden. In doing so, they explain why some democracies successfully overhaul their elite-biased constitutions for more egalitarian social contracts.

*Creating Literacy Instruction for All Students* Thomas G. Gunning 2005 With its inclusive view of literacy, *Creating Literacy Instruction for All Students* emphasizes methods that have been validated by research and practice, while delivering the basics of all major aspects of reading and writing. The Fifth Edition of this best-selling book continues to be a comprehensive, practical text that provides its readers with step-by-step guidance for teaching reading and writing. Written by distinguished author Tom Gunning, this text features sample lessons for virtually every major literacy skill/strategy and offers numerous reinforcement suggestions and generous listings of materials. With its careful balance between the theory and the practice, readers are always given the theories behind the methods, encouraging them to choose, adapt, and construct their own approaches as they create a balanced program of literacy instruction. Special emphasis has been given to adapting instruction for English language learners, struggling readers and writers, and special needs students throughout the book. Unlike comparable texts, the new edition stresses effective steps for closing the gap between achieving and struggling readers as mandated by the No Child Left Behind legislation and Reading First.

*When Right Makes Might* Stacie E. Goddard 2018-12-15 Why do great powers accommodate the rise of some challengers but contain and confront others, even at the risk of war? *When Right Makes Might* proposes that the ways in which a rising power legitimizes its expansionist aims significantly shapes great power responses. Stacie E. Goddard theorizes that when faced with a new challenger, great powers will attempt to divine the challenger's intentions: does it pose a revolutionary threat to the system or can it be incorporated into the existing international order? Goddard departs from conventional theories of international relations by arguing that great powers come to understand a contender's intentions not only through objective capabilities or costly signals but by observing how a rising power justifies its behavior to its audience. To understand the dynamics of rising powers, then, we must take seriously the role of legitimacy in international relations. A rising power's ability to expand depends as much on its claims to right as it does on its growing might. As a result, *When Right Makes Might* poses significant questions for academics and policymakers alike. Underpinning her argument on the oft-ignored significance of public self-presentation, Goddard suggests that academics (and others) should recognize talk's critical role in the formation of grand strategy. Unlike rationalist and realist theories that suggest rhetoric is mere window-dressing for power, *When Right Makes Might* argues that rhetoric fundamentally shapes the contours of grand strategy. Legitimacy is not marginal to international relations; it is essential to the practice of power politics, and rhetoric is central to that practice.

**The Count of Monte Cristo** Alexander Dumas 2019-06-27 The Count of Monte Cristo is an adventure novel by French author Alexandre Dumas. It is one of the author's most popular works, along with The Three Musketeers. Like many of his novels, it is expanded from plot outlines suggested by his collaborating ghostwriter Auguste Maquet. The story takes place in France, Italy and islands in the Mediterranean during the historical events of 1815–1838. It begins from just before the Hundred Days period (when Napoleon returned to power after his exile) and spans through to the reign of Louis-Philippe of France. The historical setting is a fundamental element of the book. An adventure story primarily concerned with themes of hope, justice, vengeance, mercy and forgiveness, it focuses on a man who is wrongfully imprisoned, escapes from jail, acquires a fortune and sets about getting revenge on those responsible for his imprisonment. However, his plans have devastating consequences for the innocent as well as the guilty. In addition, it is a story that involves romance, loyalty, betrayal and selfishness, shown throughout the story as characters slowly reveal their true inner nature. The book is considered a literary classic today. According to Luc Sante, "The Count of Monte Cristo has become a fixture of Western civilization's literature, as inescapable and immediately identifiable as Mickey Mouse, Noah's flood, and the story of Little Red Riding Hood."

Institutional Racism in Psychiatry and Clinical Psychology Suman Fernando 2017-09-08 This book examines the deep roots of racism in the mental health system. Suman Fernando weaves the histories of racial discourse and clinical practice into a narrative of power, knowledge, and black suffering in an ostensibly progressive and scientifically grounded system. Drawing on a lifetime of experience as a practicing psychiatrist, he examines how the system has shifted in response to new forms of racism which have emerged since the 1960s, highlighting the widespread pathologization of black people, the impact of Islamophobia on clinical practice after 9/11, and various struggles to reform. Engaging and accessible, this book makes a compelling case for the entrenchment of racism across all aspects of psychiatry and clinical psychology, and calls for a paradigm shift in both theory and practice.

Leadership in Organizations Gary A. Yukl 2010 This book is about leadership in organizations. The primary focus is on managerial leadership, as opposed to parliamentary leadership, leadership of social movements, or informal leadership in peer groups. The book presents a broad survey of theory and research on leadership in formal organizations. The topic of leadership effectiveness is of special interest.

*Diversity and Leadership* Jean Lau Chin 2014-09-02 Although leadership theories have evolved to reflect changing social contexts, many remain silent on issues of equity, diversity, and social justice. *Diversity and Leadership*, by Jean Lau Chin and Joseph E. Trimble, offers a new paradigm for examining leadership by bringing together two domains—research on leadership and research on diversity—to challenge existing notions of leadership and move toward a diverse and global view of society and its institutions. This compelling book delivers an approach to leadership that is inclusive, promotes access for diverse leaders, and addresses barriers that narrowly confine our perceptions and expectations of leaders. Redefining leadership as global and diverse, the authors impart new understanding of who our leaders are, the process of communication, exchange between leaders and their members, criteria for selecting, training, and evaluating leaders in the 21st century, and the organizational and societal contexts in which leadership is exercised.

*International Norms, Moral Psychology, and Neuroscience* Richard Price  
2021-06-30 Research on international norms has yet to answer satisfactorily some of our own most important questions about the origins of norms and the conditions under which some norms win out over others. The authors argue that international relations (IR) theorists should engage more with research in moral psychology and neuroscience to advance theories of norm emergence and resonance. This Element first provides an overview of six areas of research in neuroscience and moral psychology that hold particular promise for norms theorists and international relations theory more generally. It next surveys existing literature in IR to see how literature from moral psychology is

already being put to use, and then recommends a research agenda for norms researchers engaging with this literature. The authors do not believe that this exchange should be a one-way street, however, and they discuss various ways in which the IR literature on norms may be of interest and of use to moral psychologists, and of use to advocacy communities.

**Ideology and Hegemony of English Foreign Language Textbooks** Ömer Gökhan Ulum  
2020-01-27 This volume investigates ideological and hegemonic practices in globally and locally written English as a Foreign Language (EFL) textbooks, and explores whether these textbooks reflect the values, beliefs and norms of the native-speaker society by examining their ideological components and the hegemonic practices by means of which the source society or state seeks to influence learners of the language. It also attempts to clarify EFL teachers' and students' views on the underlying ideology and hegemonic practices in globally and locally written EFL textbooks. Studies on the relationship between ideology, hegemony and textbooks in applied linguistics have become more prevalent in recent decades, as the emergence of critical theory, critical pedagogy, and critical thinking skills from the 1920s onwards has led scholars to adopt a more critical perspective towards EFL textbooks, especially with regard to elements of ideology and hegemony. These two terms encompass a plethora of components, ranging from nationalism to religion. At the same time, the importance of metanarratives originating from the tenets of modernism has declined from the 1960s onwards, the assumption being that the world has entered a new age called postmodernism and post-structuralism that emphasizes the role of individuals and rejects efforts to reinforce post-colonialism, the effects of which can be seen in EFL textbooks. Accordingly, taking the elements of ideology and hegemony into account remains a vital aspect in the analysis of EFL textbooks.
