The Late Age of Print Ted Striphas 2009-04-08 Ted Striphas argues that, although the production and propagation of books have undoubtedly entered a new phase, printed works are still very much a part of our everyday lives. With examples from trade journals, news media, films, advertisements, and a host of other commercial and scholarly materials, Striphas tells a story of modern publishing that proves, even in a rapidly digitizing world, books are anything but dead. From the rise of retail superstores to Oprah's phenomenal reach, Striphas tracks the methods through which the book industry has adapted (or has failed to adapt) to rapid changes in twentieth-century print culture. Barnes & Noble, Borders, and Amazon.com have established new routes of traffic in and around books, and pop sensations like Harry Potter and the Oprah Book Club have inspired the kind of brand loyalty that could only make advertisers swoon. At the same time, advances in digital technology have presented the book industry with extraordinary threats and unique opportunities. Striphas's provocative analysis offers a counternarrative to those who either triumphantly declare the end of printed books or deeply mourn their passing. With wit and brilliant insight, he isolates the invisible processes through which books have come to mediate our social interactions and influence our habits of consumption, integrating themselves into our routines and intellects like never before.

Different Faces of Attachment Hiltrud Otto 2014-07-17 Attachment between an infant and his or her parents is a major topic within developmental psychology. An increasing number of psychologists, evolutionary biologists and anthropologists are articulating their doubts that attachment theory in its present form is applicable worldwide, without, however, denying that the development of attachment is a universal need. This book brings together leading scholars from psychology, anthropology and related fields to reformulate attachment theory in order to fit the cultural realities of our world. Contributions are based on empirical research and observation in a variety of cultural contexts. They are complemented by careful evaluation and deconstruction of many of the underlying premises and assumptions of attachment theory and of conventional research on the role of infant-parent attachment in human development. The book creates a contextual cultural understanding of attachment that will provide the basis for a groundbreaking reconceptualization of attachment theory.

The Summer My Father Died dit Kiss 2012-09-03 dit Kiss grew up a communist in Budapest, soaking up her father's ideology unquestioningly. As a child she is puzzled when others refer to her as Jewish; she only knows that her family doesn't believe in God. How can they? As her father lies dying, dit tries to understand the enigma surrounding his life. Where does his unshakeable communist conviction come from? Why doesn't he have relatives? As she digs deeper into his tragic history, dit is forced to confront the contradictions and lies woven into the life of her family - and her country - through the dramatic twists of twentieth century Hungary. 'Lyrical and poetic *The Summer My Father Died* is a powerful memoir. In this remarkable memoir, dit Kiss uncovers the paternal history that shaped her own, even while she was unaware of it ... the journey is riveting.' Lisa Appignanesi 'It shook me profoundly ... not only the richness of the relationship between father and daughter, but the internal development of the narrator also had a deep impact on me.' István Szabó, director of *Mephisto* and *Being Julia*.

NurtureShock Po Bronson 2009-09-03 In a world of modern, involved, caring parents, why are so many kids aggressive and cruel? Where is intelligence hidden in the brain, and why does that matter? Why do cross-racial friendships decrease in schools that are more integrated? If 98% of kids think lying is morally wrong, then why do 98% of kids lie? What's the single most important thing that helps infants learn language? *NurtureShock* is a groundbreaking collaboration between award-winning science journalists Po Bronson and Ashley Merryman. They argue that when it comes to children, we've mistaken good intentions for good ideas. With impeccable storytelling and razor-sharp analysis, they demonstrate that many of modern society's strategies for nurturing children are in fact backfiring--because key twists in the science have been overlooked. Nothing like a parenting manual, the authors' work is an insightful exploration of themes and issues that transcend children's (and adults') lives.

Hoosiers and the American Story Madison, James H. 2014-10-01 A supplemental textbook for middle and high school students, *Hoosiers and the American Story* provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

The Scientific Training of Children Christian D. Larson 2007-03-01 In this short instructional work, Christian D. Larson provides a matter-of-fact approach to bringing out the intelligence and creativity in your child. His suggestions-with their emphasis on helping children channel their energy and imaginations in positive and stimulating ways-may seem like common sense, but in the nearly 100 years since this book was written it's clear that more parents could have heeded his advice. This is a great little handbook for any parent willing to encourage their children's natural talents, no matter how impractical, and help them use those talents constructively. American New Thought pioneer CHRISTIAN DAA LARSON (b. 1874) is the author of the well-known Optimist Creed and published several important works of spiritual science, including *Mastery of Self*, *In the Light of the Spirit*, and *The Great Within*.

Writings/Interviews Richard Serra 1994-08-15 One of the most important sculptors of this century, Richard Serra has been a spokesman on the nature and status of art in our day. Best known for site-specific works in steel, Serra has much to say about the relation of sculpture to place, whether urban, natural, or architectural, and about the nature of art itself, whether political, decorative, or personal. In interviews with writers including Douglas and Davis Sylvester, he discusses specific installations and offers insights into his approach to the problem each presents. Interviews by Peter Eisenman and Alan Colquhoun elicit Serra's thoughts on the relation of architecture to contemporary sculpture, a primary component in his own work. From essays like "Extended Notes from Sight Point Road" to Serra's extended commentary on the Tilted Arc fiasco, the pieces in this volume comprise a document of one artist's engagement with the practical, philosophical, and political problems of art.

Overshoot William R. Catton 1982-06 Our day-to-day experiences over the past decade have taught us that there must be limits to our tremendous appetite for energy, natural resources, and consumer goods. Even utility and oil companies now promote conservation in the face of demands for dwindling energy reserves. And for years some biologists have warned us of the direct correlation between scarcity and population growth. These scientists see an appalling future riding the tidal wave of a worldwide growth of population and technology. A calm but unflinching realist, Catton suggests that we cannot stop this wave - for we have already overshoot the Earth's capacity to support so huge a load. He contradicts those scientists, engineers, and technocrats who continue to write optimistically about energy alternatives. Catton asserts that the technological panaceas proposed by those who would harvest from the seas, harness the winds, and farm the deserts are ignoring the fundamental premise that "the principals of ecology apply to all living things." These principles tell us that, within a finite system, economic expansion is not irreversible and population growth cannot continue indefinitely. If we disregard these facts, our sagging American Dream will soon shatter completely.

Get in Trouble Kelly Link 2015-02-03 FINALIST FOR THE PULITZER PRIZE • NATIONAL BESTSELLER • A bewitching story collection from a writer hailed as “the most darkly playful voice in American fiction” (Michael Chabon) and “a national treasure” (Neil Gaiman). NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BookPage • BuzzFeed • Chicago Tribune • Kirkus Reviews • NPR • San Francisco Chronicle • Slate • Time • Toronto Star • The Washington Post She has been hailed by Michael Chabon as “the most darkly playful voice in American fiction” and by Neil Gaiman as “a national treasure.” Now Kelly Link’s eagerly awaited new collection—her first for adult readers in a decade—proves indelibly that this bewitchingly original writer is among the finest we have. Link has won an ardent following for her

ability, with each new short story, to take readers deeply into an unforgettable, brilliantly constructed fictional universe. The nine exquisite examples in this collection show her in full command of her formidable powers. In "The Summer People," a young girl in rural North Carolina serves as uneasy caretaker to the mysterious, never-quite-glimpsed visitors who inhabit the cottage behind her house. In "I Can See Right Through You," a middle-aged movie star makes a disturbing trip to the Florida swamp where his former on- and off-screen love interest is shooting a ghost-hunting reality show. In "The New Boyfriend," a suburban slumber party takes an unusual turn, and a teenage friendship is tested, when the spoiled birthday girl opens her big present: a life-size animated doll. Hurricanes, astronauts, evil twins, bootleggers, Ouija boards, iguanas, The Wizard of Oz, superheroes, the Pyramids . . . These are just some of the talismans of an imagination as capacious and as full of wonder as that of any writer today. But as fantastical as these stories can be, they are always grounded by sly humor and an innate generosity of feeling for the frailty—and the hidden strengths—of human beings. In *Get in Trouble*, this one-of-a-kind talent expands the boundaries of what short fiction can do. Praise for *Get in Trouble* "Ridiculously brilliant . . . These stories make you laugh while staring into the void."—The Boston Globe "When it comes to literary magic, Link is the real deal: clever, surprising, affecting, fluid and funny."—San Francisco Chronicle
