*Nobody's Fool* Richard Russo 2011-11-09 This slyly funny, moving novel about a blue-collar town in upstate New York—and in the life of Sully, of one of its unluckiest citizens, who has been doing the wrong thing triumphantly for fifty years—is a classic American story. Divorced from his own wife and carrying on halfheartedly with another man's, saddled with a bum knee and friends who make enemies redundant, Sully now has one new problem to cope with: a long-estranged son who is in imminent danger of following in his father's footsteps. With its uproarious humor and a heart that embraces humanity's follies as well as its triumphs, *Nobody's Fool*, from Pulitzer Prize-winning author, Richard Russo, is storytelling at its most generous. *Nobody's Fool* was made into a movie starring Paul Newman, Bruce Willis, Jessica Tandy, and Melody Griffith.

**Dorie** Dorie N. Van Stone 1981-07-26 'Someone has said that when you have nothing left but God, you realize that God is enough. God had stood beside me when no one else wanted me. He was not going to abandon me now. God would have to heal the emotional pain that throbbed through my body.' As a child, Dorie was rejected by her mother, sent to live in an orphanage where she was regularly beaten by the orphanage director, was beaten time and again by cruel foster parents, and was daily told that she was ugly and unlovable. Dorie never knew love until a group of college students visited the orphanage and told her that God loved her. As she accepted that love, her life began to change. Dorie is the thrilling, true account of what God's love can do in a life. Doris Van Stone takes readers through the hard years of her childhood into her fascinating years as a missionary with her husband to the Dani tribe in New Guinea. With the rise of illegitimate births, the increase in divorce statistics, and the frightening escalation of child abuse, this story stands as a reminder that God's love, forgiveness, and grace are greater than human hurt and sorrow. More than 170,000 in print.

Hanakam & Schuller Angela Stief 2016-10-10 Hanakam & Schuller are tricksters. As artists and researchers, they remodel the rules of fine art, creating idiosyncratic orders and new world designs incorporated in videos and objects. The artefacts of the two artists from Vienna are "Gestalt-changers"; they change their outer shape and re-appear in a number of different contexts. The trickster art book illustrates the oeuvre and provides an insight into its making using multi-page photo spreads from video stills, and production photographs. The Arkadikon essay captures readers and leads them to contemporary hypothetical landscapes, deconstructing them as modern surrogates of an increasingly virtual world. The artists discuss ideal, pop, aura and abduction with Angela Stief, Anselm Franke, Uta Grosenick, Annette Hünnekens, Wolfgang Ullrich, Lois Weinberger, Stephanie Weber und Oliver Zybok.

*The Three Dimensions of Freedom* Billy Bragg 2019-04-30 At a time when opinion trumps facts and truth is treated as nothing more than another perspective, free speech has become a battleground. While authoritarians and algorithms threaten democracy, we argue over who has the right to speak. To protect ourselves from encroaching tyranny, we must look beyond this one-dimensional notion of what it means to be free and, by reconnecting liberty to equality and accountability, restore the individual agency engendered by the three dimensions of freedom.

Troy Alexandra Villing 2019-11-21 Troy is familiar to us from the timeless and epic tales of Homer's *Iliad* and Virgil's *Aeneid*. These have been retold over the centuries by writers from Chaucer to Shakespeare to Madeline Miller and Rick Riordan, and enacted by stars such as Elizabeth Taylor and Brad Pitt. But how much do we really know about the city of Troy; its storytellers, myth, actual location or legacy? In this richly

illustrated book, the story of Troy is told through a new lens. Published to accompany an exhibition at the British Museum, it introduces the storytellers and Classical artists inspired by the myths of Troy, then examines the tales themselves - from the Judgment of Paris to the return of Odysseus - through the Classical objects for which the museum is internationally known. The third section focuses on Heinrich Schliemann's excavations at Hissarlik, introducing the nineteenth-century search for the location of Troy that convinced the world that this city did once exist. Also explored is the possible Bronze Age background for the myth of the Trojan War, the historicity of which remains unresolved today. The final section delves into the legacy of Troy, and the different ways in which its story has been retold, both in literature and art, from Homer to the present day. Focusing on the major characters - Helen of Troy, Achilles and Hector, Aeneas and Odysseus - it illustrates how artists from Cranach and Rubens to Romare Bearden and Cy Twombly have been inspired by this archetypal tale to reflect on contemporary themes of war and heroism, love and beauty.

**Open Sky** Paul Virilio 1997 "One day the day will come when the day will not come." Bleak in its analysis of the social destruction wrought by modern technologies of communication and surveillance, but passionately political, *Open Sky* is Paul Virilio's most far-reaching and radical book for many years. Deepening and extending his earlier work on speed perception and political control, and applying it now to the global 'real time' of the information superhighways, he explores the growing danger of what he calls a "generalized accident," provoked by the breakdown of our collective and individual relation to time, space and movement. But this is not merely a lucid and disturbing lament for the loss of real geographical spaces, distance, intimacy or democracy. *Open Sky* is also a call for revolt—against the insidious and accelerating manipulation of perception by the electronic media and repressive political power, against the tyranny of "real time," and against the infantilism of cyberhype. Paul Virilio makes a powerful case for a new ethics of perception, and a new ecology, one which will not only strive to protect the natural world from pollution and destruction, but will also combat the devastation of urban communities by proliferating technologies of control and virtuality.

**On Diary** Philippe Lejeune 2009-04-30 Summary: "On Diary is the second collection in English of the groundbreaking and profoundly influential work of one of the best-known and provocative theorists of autobiography and diary. Ranging from the diary's historical origins to its pervasive presence on the Internet, from the spiritual journey of the sixteenth century to the diary of Anne Frank, and from the materials and methods of diary writing to the question of how diaries end, these essays display Philippe Lejeune's expertise, eloquence, passion, and humor as a commentator on the functions, practices, and significance of keeping or reading a diary. Two substantial introductory essays by Jeremy Popkin and Julie Rak place Lejeune's work within its critical and theoretical traditions and comment on his central importance within the fields of life writing, literary genetic studies, and cultural studies."--Publisher description.

*Innovations for Metropolitan Areas* Patrick Planing 2020-06-17 This book presents human-centered concepts and solutions for mobility, logistics and infrastructure that will make our growing metropolitan areas more livable and sustainable. The still accelerating megatrend of urbanization is leading to constantly growing metropolitan areas. This creates a whole series of challenges for municipalities, as well as citizens, such as overcrowded traffic routes, limited building space and an increasingly difficult supply situation. With this book we want to answer the following question: How can people live in densely populated areas and meet their needs in terms of mobility, freedom, self-determination, security, prosperity, communication or in other words: how can metropolitan regions be made humane? The answer to this question requires innovative ideas and approaches in various areas: Sustainable designs of infrastructure Economically and ecologically efficient logistics and mobility approaches Intelligent applications for navigation and communication All these ideas must

be measured against the needs of citizens and should thus be developed following a human-centered design approach. This ensures that innovative solutions will be widely accepted by the public. In addition, they also have the potential to turn citizens into active co-designers of future metropolitan areas.

Responsible Leadership Nicola M. Pless 2012-11-27 These chapters on ‘Responsible Leadership’ represent the latest thinking on a topic of increasing relevance in a connected world. There are many challenges that still remain when it comes to establishing responsible leadership both in theory and practice. Whilst offering conceptualisations for the improvement of leadership is a first and perhaps easier response, what is more difficult is to facilitate the actual change to happen. These chapters will not only generate interest in the emerging domain of studies on responsible leadership, but also will pave the way for future research in this area in the years to come. *Be Dynamic (Acts 1-12)* Warren W. Wiersbe 2012-12-10 In his first of two books covering the book of Acts, *Be Dynamic* focuses on Peter's ministry, mostly in Israel and centered in Jerusalem. Through explaining Luke's record of the gospel's advancement and church expansion, Wiersbe opens the door to understanding the work of the church today. Using hard-hitting quotes from recognized names like St. Augustine and John Bunyan, Wiersbe proves himself a well-read author and gifted writer. The depth of his study is astounding, yet the accessibility of his text for every age group is evident as well. He proves what Luke intended—for Acts to be interpreted not as the apostles' glorious acts, but as the life-changing acts of the Holy Spirit. The same Spirit lives in believers today, the same God calls followers to expand His church, and the same basic problems still arise within the church, but the same power available then is still available now to change the nations.

**Oval** Elvia Wilk 2019-06-04 Bizarre weather. Unprecedented economic disparity. Artists employed by corporations. And the ultimate work of art: Oval, a pill that increases generosity. This unforgettable debut novel asks questions of empathy and power on every scale—from bodies to bureaucracies—to create an unsettling portrait of the future. In the near future, Berlin's real estate is being flipped in the name of “sustainability,” only to make the city even more unaffordable; artists are employed by corporations as consultants, and the weather is acting strange. When Anja and Louis are offered a rent-free home on an artificial mountain—yet another eco-friendly initiative run by a corporation—they seize the opportunity, but it isn't long before the experimental house begins malfunctioning. After Louis's mother dies, Anja is convinced he has changed. At work, Louis has become obsessed with a secret project: a pill called Oval that temporarily

rewires the user's brain to be more generous. While Anja is horrified, Louis believes he has found the solution to Berlin's income inequality. *Oval* is a fascinating portrait of the unbalanced relationships that shape our world, as well as a prescient warning of what the future may hold. "A fascinating near-future exploration of relationships, sustainability, and power. An extraordinarily accomplished debut novel." —Jeff VanderMeer, author of *Borne* and *Annihilation* "Elvia Wilk's *Oval* is a marvel. At the core of this seductive, acute, superbly-contemporary update of mid-period J.G. Ballard lies a deep-beating, deep-dreaming heart." —Jonathan Lethem

*James Carey* Eve Stryker Munson 1997 James Carey - scholar, media critic, and teacher of journalists - almost single-handedly established the importance of defining a cultural perspective when analyzing communications. Interspersing Carey's major essays with articles exploring his central themes and their importance, this collection provides a critical introduction to the work of this significant figure. In *James Carey: A Critical Reader*, sever scholars who have been influenced by him consider his work and how it has affected the development of media studies. Carey has examined the roles the media and the academy have played in creating and maintaining a public sphere, as well as the ways technology helps or hinders that project. Carey's themes range from the strains on democracy and drawbacks of technology to the critique of journalism and the politics of academe.

**Travels with My Donkey** Tim Moore 2014-05-06 "A donkey?' blurted my family as one. For a moment it didn't seem they'd ever be able to list all the reasons that made this so entertainingly ludicrous. . . .Yes, I'd never ridden a donkey on a beach or petted one at a city farm, never even pinned a cardboard tail to one's throat after the cake and ice cream....A donkey would be my hairy-coated hair shirt, making my pilgrimage to Santiago de Compostela a truer test of the will, a trial." With these words, having no knowledge of Spanish and even less about the care and feeding of donkeys, Tim Moore, Britain's indefatigable traveling Everyman, sets out on a pilgrimage to the cathedral at Santiago de Compostela with a donkey named Shinto as his companion.

Armed only with the Codex Calixtinus, a twelfth-century handbook to the route, and expert advice on donkey management from Robert Louis Stevenson, Moore and his four-legged companion travel the ancient five-hundred-mile route from St. Jean Pied-de-Port, on the French side of the Pyrenees, to the cathedral at Santiago de Compostela, which houses the remains of Spain's patron saint, St. James. Over sun-scorched highways, precipitous bridges, dirt paths shaded by leafy trees, and vineyards occasionally lashed by downpours, Moore and Shinto pass through some of the oldest towns and cities in northern Spain in colorful company, both past and present. Pilgrims real and imagined have traveled this route throughout the ages, a diverse cast of wayfarers spanning Charlemagne, St. Francis of Assisi, Chaucer's Wife of Bath, and New Age diva, Shirley MacLaine. Moore's present-day companions are no less florid or poignant. Clearly more interested in Shinto than in Moore, their fellow walkers are an assortment of devout Christian pilgrims, New Age spirituality seekers, travelers grieving over a lost love affair, Baby Boomers contemplating the advent of middle age, and John Q. Public just out for a cheap, boozy sun-drenched outdoor holiday. As Moore pushes, pulls, wheedles, cajoles, and threatens Shinto across Spain toward the crypt of St. James in a quest to find the spiritual pilgrim within, the duo overnights in the bedrooms, dormitories, and---for Shinto---adjacent grassy fields of northern Spain's hostels, inns, convents, seminaries, and farmhouses. Shinto, a donkey with a finely honed talent for relieving himself at the most inopportune moments, has better luck in the search for his next meal than Moore does in finding his inner St. Francis. Undaunted, however, Man and Beast finally arrive at the cathedral and a successful end to their journey. For readers who delighted in his earlier books, *Travels with My Donkey* is the next hilarious chapter in the travels of Tim Moore, a book that keeps the bones of St. James rattling till this day.

*Higher Calling* Max Leonard 2017-05-25 Why do road cyclists go to the mountains? Many books tell you where the mountains are, or how long and how high. None of them ask 'Why?' After all, cycling up a mountain is hard – so hard that, to many non-cyclists, it can seem absurd. But, for some, climbing a mountain gracefully (and beating your competitors up the slope) represents the pinnacle of cycling achievement. The mountains are where legends are forged and cycling's greats make their names. Why are Europe's mountain ranges professional cycling's Wembley Stadium or its Colosseum? Why do amateurs also make a pilgrimage to these high, remote roads and what do we see and feel when we do? Why are the roads there in the first place? *Higher Calling* explores the central place of mountains in the folklore of road cycling. Blending adventure and travel writing with the rich narrative of pro racing, Max Leonard takes the reader from the battles that created the Alpine roads to the shepherds tending their flocks on the peaks, and to a Grand Tour climax on the 'highest road in Europe'. And he tells stories of courage and sacrifice, war and love, obsession and elephants along the way.

**My Fellow Prisoners** Mikhail Khodorkovsky 2015-02-24 The Russian oil mogul and activist offers reflections on his decades-long incarceration under Putin in this "illuminating and brave" prison memoir (The Washington Post). Mikhail Khodorkovsky was Russia's most successful businessman—and an outspoken critic of the Kremlin. As his oil company Yukos revived the Russian oil industry, Khodorkovsky began sponsoring

programs to encourage civil society and fight corruption. Then he was arrested at gunpoint. Sentenced to ten years in a Siberian penal colony on fraud and tax evasion charges in 2003, Khodorkovsky was put on trial again in 2010 and sentenced to fourteen years on new charges that contradicted the previous ones. While imprisoned, Khodorkovsky fought for the rights of his fellow prisoners, going on hunger strike four times. After he was pardoned in 2013, he vowed to continue fighting for prisoners' rights, and this book is dedicated to that work. A moving portrait of the prisoners Khodorkovsky met, *My Fellow Prisoners* is an eye-opening account of Russia's brutal prison system. "Vivid, humane and poignant" —Financial Times

*Learning to Smoke* Jason Hughes 2003-02-15 Why do people smoke? Taking a unique approach to this question, Jason Hughes moves beyond the usual focus on biological addiction that dominates news coverage and public health studies and invites us to reconsider how social and personal understandings of smoking crucially affect the way people experience it. *Learning to Smoke* examines the diverse sociological and cultural processes that have compelled people to smoke since the practice was first introduced to the West during the sixteenth century. Hughes traces the transformations of tobacco and its use over time, from its role as a hallucinogen in Native American shamanistic ritual to its use as a prophylactic against the plague and a cure for cancer by early Europeans, and finally to the current view of smoking as a global pandemic. He then analyzes tobacco from the perspective of the individual user, exploring how its consumption relates to issues of identity and life changes. Comparing sociocultural and personal experiences, Hughes ultimately asks what the patterns of tobacco use mean for the clinical treatment of smokers and for public policy on smoking. Pointing the way, then, to a more learned and sophisticated understanding of tobacco use, this study will prove to be essential reading for anyone interested in the history of smoking and the sociology of addiction.
