Using Science to Improve the BLM Wild Horse and Burro Program Committee to Review the Bureau of Land Management Wild Horse and Burro Management Program 2013-09-18 Using Science to Improve the BLM Wild Horse and Burro Program: A Way Forward reviews the science that underpins the Bureau of Land Management's oversight of free-ranging horses and burros on federal public lands in the western United States, concluding that constructive changes could be implemented. The Wild Horse and Burro Program has not used scientifically rigorous methods to estimate the population sizes of horses and burros, to model the effects of management actions on the animals, or to assess the availability and use of forage on rangelands. Evidence suggests that horse populations are growing by 15 to 20 percent each year, a level that is unsustainable for maintaining healthy horse populations as well as healthy ecosystems. Promising fertility-control methods are available to help limit this population growth, however. In addition, science-based methods exist for improving population estimates, predicting the effects of management practices in order to maintain genetically diverse, healthy populations, and estimating the productivity of rangelands. Greater transparency in how science-based methods are used to inform management decisions may help increase public confidence in the Wild Horse and Burro Program.

The Racial Contract Charles W. Mills 2022-04-15 The Racial Contract puts classic Western social contract theory, deadpan, to extraordinary radical use. With a sweeping look at the European expansionism and racism of the last five hundred years, Charles W. Mills demonstrates how this peculiar and unacknowledged "contract" has shaped a system of global European domination: how it brings into existence "whites" and "non-whites," full persons and sub-persons, how it influences white moral theory and moral psychology; and how this system is imposed on non-whites through ideological conditioning and violence. The Racial Contract argues that the society we live in is a continuing white supremacist state. As this 25th anniversary edition—featuring a foreword by Tommy Shelbie and a new preface by the author—makes clear, the still-urgent The Racial Contract continues to inspire, provoke, and influence thinking about the intersection of the racist underpinnings of political philosophy.

Measuring and Monitoring Plant Populations Caryl Elzinga 2015-01-02 This technical reference applies to monitoring situations involving a single plant species, such as an indicator species, key species, or weed. It was originally developed for monitoring special status plants, which have some recognized status at the Federal, State, or agency level because of their rarity or vulnerability. Most examples and discussions in this technical reference focus on these special status species, but the methods described are also applicable to any single-species monitoring and even some community monitoring situations. We thus hope wildlife biologists, range conservationists, botanists, and ecologists will all find this technical reference helpful.

Political Turmoil in a Tumultuous World David Carment 2021-05-22 In the last two years, Canadian society has been marked by political and ideological turmoil. How does an increasingly divided country engage a world that is itself divided and tumultuous? Political instability has been reinforced by international uncertainty: the COVID-19 pandemic, populism, Black Lives Matter, and the chaotic final year of the Trump presidency that increased tensions between the West, China and Russia. Even with a Biden presidency, these issues will continue to influence Canada's domestic situation and its ability to engage as an effective global actor. Contributors explore issues that cause or reflect these tensions, such as Canada's willingness to address pressing crises through multilateralism, including the COVID-19 pandemic. Can Canada forge its own path in a turbulent world?

What is Critical Environmental Justice? David Naguib Pellow 2017-11-27 Human societies have always been deeply interconnected with our ecosystems, but today those relationships are witnessing greater frictions, tensions, and harms than ever before. These harms mirror those experienced by marginalized groups across the planet. In this novel book, David Naguib Pellow introduces a new framework for critically analyzing Environmental Justice scholarship and activism. In doing so he extends the field's focus to topics not usually associated with environmental justice, including the Israel/Palestine conflict and the Black Lives Matter movement in the United States. In doing so he reveals that ecological violence is first and foremost a form of social violence, driven by and legitimated by social structures and discourses. Those already familiar with the discipline will find themselves invited to think about the subject in a new way. This book will be a vital resource for students, scholars, and policy makers interested in transformative approaches to one of the greatest challenges facing humanity and the planet.

Audubon Wildlife Report 1988/1989 William J. Chandler 2013-09-24 Audubon Wildlife Report 1988/1989 focuses on federal wildlife conservation policy, with extensive background information on the history, legal authorities, and administrative structure of federal wildlife agencies and programs. The report also includes in-depth treatment of significant problems, issues, and developments including wildlife. The text is divided into five parts. Part One features an agency related to wildlife conservation, which is The National Marine Fisheries Service in this volume. Part Two covers wildlife issues in national forests and national parks, as well as legal developments affecting wildlife. Part Three deals with challenges in conservation such as wildlife and water projects on the Platte River, international wildlife trade, and plastic debris and its effects on marine wildlife. Part Four discusses species accounts such as the moose, the Florida panther, and the common barn owl. Part Five consists of appendices which indexes directories of conservation agencies, congressional contacts, and the endangered species list. The book is recommended for biologists, conservationists, and environmentalists who would like to know more about the status of endangered species, as well as the problems and programs of certain conservation agencies.

The Scholar Denied Aldon Morris 2017-01-17 In this groundbreaking book, Aldon D. Morris's ambition is truly monumental: to help rewrite the history of sociology and to acknowledge the primacy of W. E. B. Du Bois's work in the founding of the discipline. Calling into question the prevailing narrative of how sociology developed, Morris, a major scholar of

social movements, probes the way in which the history of the discipline has traditionally given credit to Robert E. Park at the University of Chicago, who worked with the conservative black leader Booker T. Washington to render Du Bois invisible. Morris uncovers the seminal theoretical work of Du Bois in developing a “scientific” sociology through a variety of methodologies and examines how the leading scholars of the day disparaged and ignored Du Bois’s work. *The Scholar Denied* is based on extensive, rigorous primary source research; the book is the result of a decade of research, writing, and revision. In exposing the economic and political factors that marginalized the contributions of Du Bois and enabled Park and his colleagues to be recognized as the “fathers” of the discipline, Morris delivers a wholly new narrative of American intellectual and social history that places one of America’s key intellectuals, W. E. B. Du Bois, at its center. *The Scholar Denied* is a must-read for anyone interested in American history, racial inequality, and the academy. In challenging our understanding of the past, the book promises to engender debate and discussion.

Small Screen, Big Feels Melissa Ames 2020-12-02 While television has always played a role in recording and curating history, shaping cultural memory, and influencing public sentiment, the changing nature of the medium in the post-network era finds viewers experiencing and participating in this process in new ways. They skim through commercials, live tweet press conferences and award shows, and tune into reality shows to escape reality. This new era, defined by the heightened anxiety and fear ushered in by 9/11, has been documented by our media consumption, production, and reaction. In *Small Screen, Big Feels*, Melissa Ames asserts that TV has been instrumental in cultivating a shared memory of emotionally charged events unfolding in the United States since September 11, 2001. She analyzes specific shows and genres to illustrate the ways in which cultural fears are embedded into our entertainment in series such as *The Walking Dead* and *Lost* or critiqued through programs like *The Daily Show*. In the final section of the book, Ames provides three audience studies that showcase how viewers consume and circulate emotions in the post-network era: analyses of live tweets from Shonda Rhimes’s drama, *How to Get Away with Murder* (2010–2020), ABC’s reality franchises, *The Bachelor* (2002–present) and *The Bachelorette* (2003–present), and political coverage of the 2016 Presidential Debates. Though film has been closely studied through the lens of affect theory, little research has been done to apply the same methods to television. Engaging an impressively wide range of texts, genres, media, and formats, Ames offers a trenchant analysis of how televisual programming in the United States responded to and reinforced a cultural climate grounded in fear and anxiety.

Making All Black Lives Matter Barbara Ransby 2018-08-28 “A powerful — and personal — account of the movement and its players.”—*The Washington Post* “This perceptive resource on radical black liberation movements in the 21st century can inform anyone wanting to better understand . . . how to make social change.”—*Publishers Weekly* The breadth and impact of Black Lives Matter in the United States has been extraordinary. Between 2012 and 2016, thousands of people marched, rallied, held vigils, and engaged in direct actions to protest and draw attention to state and vigilante violence against Black people. What began as outrage over the 2012 murder of Trayvon Martin and the exoneration of his killer, and accelerated during the Ferguson uprising of 2014, has evolved into a resurgent Black Freedom Movement, which includes a network of more than fifty organizations working together under the rubric of the Movement for Black Lives coalition. Employing a range of creative tactics and embracing group-centered leadership models, these visionary young

organizers, many of them women, and many of them queer, are not only calling for an end to police violence, but demanding racial justice, gender justice, and systemic change. In *Making All Black Lives Matter*, award-winning historian and longtime activist Barbara Ransby outlines the scope and genealogy of this movement, documenting its roots in Black feminist politics and situating it squarely in a Black radical tradition, one that is anticapitalist, internationalist, and focused on some of the most marginalized members of the Black community. From the perspective of a participant-observer, Ransby maps the movement, profiles many of its lesser-known leaders, measures its impact, outlines its challenges, and looks toward its future.

From #BlackLivesMatter to Black Liberation Keeanga-Yamahtta Taylor 2016-02-01 The author of *Race for Profit* carries out “[a] searching examination of the social, political and economic dimensions of the prevailing racial order” (Michelle Alexander, author of *The New Jim Crow*). In this winner of the Lannan Cultural Freedom Prize for an Especially Notable Book, Keeanga-Yamahtta Taylor “not only exposes the canard of color-blindness but reveals how structural racism and class oppression are joined at the hip” (Robin D. G. Kelley, author of *Freedom Dreams*). The eruption of mass protests in the wake of the police murders of Michael Brown in Ferguson, Missouri, and Eric Garner in New York City have challenged the impunity with which officers of the law carry out violence against black people and punctured the illusion of a post-racial America. The Black Lives Matter movement has awakened a new generation of activists. In this stirring and insightful analysis, activist and scholar Keeanga-Yamahtta Taylor surveys the historical and contemporary ravages of racism and the persistence of structural inequality, such as mass incarceration and black unemployment. In this context, she argues that this new struggle against police violence holds the potential to reignite a broader push for black liberation. “This brilliant book is the best analysis we have of the #BlackLivesMatter moment of the long struggle for freedom in America. Keeanga-Yamahtta Taylor has emerged as the most sophisticated and courageous radical intellectual of her generation.” —Dr. Cornel West, author of *Race Matters* “A must read for everyone who is serious about the ongoing praxis of freedom.” —Barbara Ransby, author of *Ella Baker and the Black Freedom Movement* “[A] penetrating, vital analysis of race and class at this critical moment in America’s racial history.” —Gary Younge, author of *The Speech: The Story Behind Dr. Martin Luther King Jr.’s Dream*

The Color of Law: A Forgotten History of How Our Government Segregated America Richard Rothstein 2017-05-02 New York Times Bestseller • Notable Book of the Year • Editors' Choice Selection One of Bill Gates' “Amazing Books” of the Year One of Publishers Weekly's 10 Best Books of the Year Longlisted for the National Book Award for Nonfiction An NPR Best Book of the Year Winner of the Hillman Prize for Nonfiction Gold Winner • California Book Award (Nonfiction) Finalist • Los Angeles Times Book Prize (History) Finalist • Brooklyn Public Library Literary Prize This “powerful and disturbing history” exposes how American governments deliberately imposed racial segregation on metropolitan areas nationwide (New York Times Book Review). Widely heralded as a “masterful” (Washington Post) and “essential” (Slate) history of the modern American metropolis, Richard Rothstein's *The Color of Law* offers “the most forceful argument ever published on how federal, state,

and local governments gave rise to and reinforced neighborhood segregation” (William Julius Wilson). Exploding the myth of de facto segregation arising from private prejudice or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning; public housing that purposefully segregated previously mixed communities; subsidies for builders to create whites-only suburbs; tax exemptions for institutions that enforced segregation; and support for violent resistance to African Americans in white neighborhoods. A groundbreaking, “virtually indispensable” study that has already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), *The Color of Law* forces us to face the obligation to remedy our unconstitutional past.

The Image of the City Kevin Lynch 1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

Communities in Action National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

[World Social Report 2020](#) Department of Economic and Social Affairs 2020-02-14 This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.
