Enjoyment of Mathematics Hans Rademacher 2015-12-08 What is so special about the number 30? How many colors are needed to color a map? Do the prime numbers go on forever? Are there more whole numbers than even numbers? These and other mathematical puzzles are explored in this delightful book by two eminent mathematicians. Requiring no more background than plane geometry and elementary algebra, this book leads the reader into some of the most fundamental ideas of mathematics, the ideas that make the subject exciting and interesting. Explaining clearly how each problem has arisen and, in some cases, resolved, Hans Rademacher and Otto Toeplitz's deep curiosity for the subject and their outstanding pedagogical talents shine through. Originally published in 1957. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Variation in German Professor of German and Linguistics Stephen Barbour 1990-05-10 This book examines the interrelations between language and society in the German-speaking countries. The questions 'what is German and who speaks it?' and 'how does the language vary dependent on social, political and geographical factors?' are addressed and placed in their historical context. This is a comprehensive account of major topics in the contemporary study of German sociolinguistics, and topics covered include the history and development of the German language, German as a minority language, minority languages in German-speaking countries, traditional dialects, variation in contemporary colloquial speech, the influence of English on German, and German in East and

West. It draws together much otherwise inaccessible material from a great range of sources. The authors also assess critically research work carried out in German-speaking countries.

Object-oriented Databases John G. Hughes 1991 The principles of the semantic data modelling are described here in depth and this is followed by a description of the application of object-oriented techniques in this area. Separate chapters are devoted to implementational issues, such as persistence and concurrency.

Aspects of Automatic Text Analysis Alexander Mehler 2007-06-24 This book presents recent developments in automatic text analysis. Providing an overview of linguistic modeling, it collects contributions of authors from a multidisciplinary area that focus on the topic of automatic text analysis from different perspectives. It includes chapters on cognitive modeling and visual systems modeling, and contributes to the computational linguistic and information theoretical grounding of automatic text analysis.

Interaction in the Language Curriculum Leo Van Lier 2014-06-03 Interaction in the Language Curriculum offers an innovative theory of language education integrating curriculum practice, research and teaching. It emphasises the interdependence of knowledge and values and stresses the central importance of learning as a social process. Leo van Lier argues that moral as well as intellectual and practical principles must underlie curriculum development and everyday teaching, captured in his triple focus on Awareness, Autonomy, and Authenticity. In addition to its rich grounding in language education practice, the book draws support for his position from diverse sources in sociology, philosophy and cognitive science, from the work of Bourdieu, Giddens, Wittgenstein, Peirce, Vygotsky, Bakhtin, and Dewey. In the current broadening context of language education this study makes an important contribution to research. It presents a coherent philosophical theory as well as considering practical issues in implementation of a new language curriculum. As such, it will be of great benefit to teachers, applied linguists and educationalists generally.

Mobile Service Innovation and Business Models Harry Bouwman 2008-05-27 Modern economies depend on innovation in services for their future growth. Service innovation increasingly depends on information technology and digitization of information processes. Designing new services is a complex matter, since collaboration with other companies and organizations is necessary. Service

innovation is directly related to business models that support these services, i.e. services can only be successful in the long run with a viable business model that creates value for its customers and providers. This book presents a theoretically grounded yet practical approach to designing viable business models for electronic services, including mobile ones, i.e. the STOF model and – based on it – the STOF method. The STOF model provides a ‘holistic’ view on business models with four interrelated perspectives, i.e., Service, Technology, Organization and Finance. It elaborates on critical design issues that ultimately shape the business model and drive its viability.

Alignment in Communication Ipke Wachsmuth 2013-11-15 Alignment in Communication is a novel direction in communication research, which focuses on interactive adaptation processes assumed to be more or less automatic in humans. It offers an alternative to established theories of human communication and also has important implications for human-machine interaction. A collection of articles by international researchers in linguistics, psychology, artificial intelligence, and social robotics, this book provides evidence on why such alignment occurs and the role it plays in communication. Complemented by a discussion of methodologies and explanatory frameworks from dialogue theory, it presents cornerstones of an emerging new theory of communication. The ultimate purpose is to extend our knowledge about human communication, as well as creating a foundation for natural multimodal dialogue in human-machine interaction. Its cross-disciplinary nature makes the book a useful reference for cognitive scientists, linguists, psychologists, and language philosophers, as well as engineers developing conversational agents and social robots.

Introduction to Literary Hermeneutics Peter Szondi 1995 Peter Szondi is widely regarded as being among the most distinguished post-war literary critics. This first English edition of one of his most lucid and interesting series of lectures opens up his work in hermeneutics for English-speaking readers. The question of what is involved in understanding a text occupied Biblical and legal scholars long before it became a concern of literary critics. Peter Szondi here traces the development of hermeneutics through examination of the work of eighteenth-century German scholars. Ordinarily treated only as prefigurations of Schleiermacher, the work of Enlightenment theorists Johann Martin Chladenius, George Friedrich Meier, and Friedrich Ast yields valuable insight into the 'material theory' of interpretation, on which a practical interpretive methodology might be built.

Warrior Woman of Yueh tells the story of one of the epic battles of Ancient China between the enemy states of Yueh and Wu. Marked by the magic of White Tiger Mother and trained to use the staff by the great mountain ape, Grandfather Wang, Jiang Li grows into a beautiful woman, loved by all in Yueh who meet her. Faced with the choice of becoming concubine to the Prince whom she loves, or a warrior and savior of Yueh, she forfeits love of a man for love of her country. While Jiang Li trains to save the State of Yueh, another woman warrior, Brother Rat, trains to save her State of Wu. The two women meet in dreams, and by the time they meet in life, they have become friends who must fight to the death.

Agroecological Practices For Sustainable Agriculture: Principles, Applications, And Making The Transition Wezel Alexander 2017-06-19 Good agroecological practices are indispensable for the development of sustainable agriculture. In this book, principles, diversity and applications of agroecological practices for a range of systems are presented, transforming scientific research and participatory knowledge of production into practical application. It illustrates a broad range of research and teaching being used within the farming community to demonstrate best practice and current state-of-play within the field. Agroecological methods used in crop farming, grass-based livestock farming, fish production, and other complex farming systems are discussed. Conclusions are drawn from studies to provide an outlook on future trends of agroecological practices and on policies supporting implementation. Due to emphasis on real-life application, it is relevant not only to students of the agricultural sciences and public policy, but also to researchers, stakeholders and policy makers involved in the development of sustainable agriculture.

strategy development and positioning strategies and positioning models. A new theoretic framework from a RBV was developed to identify the most important elements of the successful positioning of destinations and its organizations from a stakeholder perspective. An empirical study was applied to all stakeholders who form a destination by the example of three very successful positioned destinations in the Austrian Alps. The theoretical model was tested by the application of frequency distribution and multiple linear regression analysis. Most of the points were confirmed but also a few rejected which asks for further research. However, the applied model gives a great insight in how stakeholders can successful and sustainable position their organizations and the destination as a whole. It further can be used as a tool to find an efficient positioning strategy for young entrepreneurs or gives helpful advice for stagnating or decreasing businesses to formulate a new positioning strategy or aim for a relaunch.

Animal Beauty Christiane Nüsslein-Volhard 2019-05-14 An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as "beauty"? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize-winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a "sexual selection" distinct from natural selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the

zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.

Hidden Agendas Jane Kelsey 2013-05-01 'Forget the label "free trade agreement". The TPPA, under negotiation between New Zealand, the USA and ten other countries, is a direct assault on our right to decide our own future.' In this hard-hitting BWB Text, Professor Jane Kelsey picks apart the current negotiations surrounding the proposed Trans-Pacific Partnership Agreement (TPPA) and comes to some disturbing conclusions. Such a treaty, she says in this new work, has little credible economic rationale but could have potentially dangerous effects on our ability to decide for ourselves how we address the economic, environmental, social and Treaty challenges of the twenty-first century. At a time of constitutional review, the secrecy surrounding the TPPA negotiations raises hard questions about the future shape of New Zealand.

Introduction To Mindfulness IntroBooks Team Mindfulness is the elementary human aptitude to feel own presence, i.e., being conscious of the point of the existence of self and the corresponding boundary of performance, posing complete rejection to the undue recognition or excessive activities, revolving around alarmingly. Awakening to the 3-pronged internal functional structure of the physical, mental and spiritual processes, lying dormant in an individual is the prime objective of mindfulness. Mindfulness is naturally present in a person's mind and soul, but it warrants a steadfast practice and exertion that should be included in daily chores. Then only, this abstract element can be viewed as a tangible object and mindfulness will complete its full circle. Sometimes, knowledge is taken as lessons of what a person observes straight through senses or thoughts and perceptions. This indicates that a particular person is mindful. Experiments are always on the path of an impulsive run in displaying that an individual is reshaping the brain's physical framework when the brain is educated to be mindful.

to study the process of instruction, aids thereto, and the learning process itself, with special reference to science teaching at the university level. Generous support from a number of foundations provided the means for assembling and maintaining an experienced staff to co-operate with members of the Institute's Physics Department in the examination, improvement, and development of physics curriculum materials for students planning careers in the sciences. After careful analysis of objectives and the problems involved, preliminary versions of textbooks were prepared, tested through classroom use at M.I.T. and other institutions, re-evaluated, rewritten, and tried again. Only then were the final manuscripts undertaken.

Living Law Marc Hertogh 2008-12-13 This collection of essays is the first edited volume in the English language which is entirely dedicated to the work of Eugen Ehrlich. Eugen Ehrlich (1862-1922) was an eminent Austrian legal theorist and professor of Roman law. He is considered by many as one of the 'founding fathers' of modern sociology of law. Although the importance of his work (including his concept of 'living law') is widely recognised, Ehrlich has not yet received the serious international attention he deserves. Therefore, this collection of essays is aimed at 'reconsidering' Eugen Ehrlich by bringing together an interdisciplinary group of leading international experts to discuss both the historical and theoretical context of his work and its relevance for contemporary law and society scholarship. This book has been divided into four parts. Part I of this volume paints a lively picture of the Bukowina, in southeastern Europe, where Ehrlich was born in 1862. Moreover it considers the political and academic atmosphere at the end of the nineteenth century. Part II discusses the main concepts and ideas of Ehrlich's sociology of law and considers the reception of Ehrlich's work in the German speaking world, in the United States and in Japan. Part III of this volume is concerned with the work of Ehrlich in relation to that of some his contemporaries, including Roscoe Pound, Hans Kelsen and Cornelis van Vollenhoven. Part IV focuses on the relevance of Ehrlich's work for current socio-legal studies. This volume provides both an introduction to the important and innovative scholarship of Eugen Ehrlich as well as a starting point for further reading and discussion.

Essential Ornithology Graham Scott 2020-08-21 Essential Ornithology provides the reader with a concise but comprehensive introduction to the biology of birds, one of the most widely studied taxonomic groups. The book begins by considering the dinosaur origins of birds and their subsequent evolution. Development, anatomy, and physiology are then discussed followed by chapters devoted to avian reproduction, migration, ecology, and conservation. Sections dealing with aspects of bird/human relationships and bird conservation give the book an applied context. This new edition has been thoroughly updated, providing new information from rapidly-developing fields including the avian fossil record, urban and agricultural ecology, responses to climate change, invasive species biology, technologies to track movement, avian disease, and the role of citizen scientists. There is also a greater focus on North American ornithology. Drawing extensively upon the wider scientific literature, this engaging text places the results of classical studies of avian biology

alongside the most recent scientific breakthroughs. Useful case studies are presented in a concise and engaging style with the student reader foremost in mind. Key points are highlighted and suggestions for guided reading and key references are included throughout. Essential Ornithology is a companion textbook for advanced undergraduate and graduate students taking courses in avian science, as well as a useful reference for professional researchers and consultants. Amateur ornithologists will also find this book offers a scientifically rigorous and accessible overview for a more general readership.

The Lost World of Thomas Jefferson Daniel J. Boorstin 1993-08-15 In this classic work by one of America's most distinguished historians, Daniel Boorstin enters into Thomas Jefferson's world of ideas. By analysing writings of 'the Jeffersonian Circle,' Boorstin explores concepts of God, nature, equality, toleration, education and government in order to illuminate their underlying world view. The Lost World of Thomas Jefferson demonstrates why on the 250th anniversary of his birth, this American leader's message has remained relevant to our national crises and grand concerns. "The volume is too subtle, too rich in ideas for anyone to do justice to it in brief summary, too heavily documented and too carefully wrought for anyone to dismiss its thesis. . . . It is a major contribution not only to Jefferson studies but to American intellectual history. . . . All who work in the history of ideas will find themselves in Mr. Boorstin's debt."—Richard Hofstadter, South Atlantic Monthly

Bamboos Christine Recht 2015-02-05 Bamboos are fascinating for their beauty, elegance and variety of form, not to mention their importance in the symbolism of Far Eastern poetry and art. Garden designers have for a long time recognised the many possibilities offered by this unique plant. Here the reader is offered all the information they need to grow bamboos in garden, on balconies and terraces, in conservatories and even in roof gardens. Fascination with bamboos has led many gardeners to buy them but ignorance of their requirements has often brought frustration and despair. This book aims to correct that situation and offers a major source of detailed reference and inspirational colour

The Greatest Treasure Hunt in History: The Story of the Monuments Men (Scholastic Focus) Robert M. Edsel 2019-01-29 Robert M. Edsel brings the story of his #1 NYT bestseller for adults The Monuments Men to young readers for the first time in this dynamic, narrative nonfiction project packed with photos. Robert M. Edsel, #1 New York Times bestselling author of The Monuments Men, brings this story to young readers for the first time in a sweeping, dynamic adventure detailing history's greatest treasure hunt. As the most destructive war in history ravaged Europe, many of the world's most cherished cultural objects were in harm's way. The Greatest Treasure Hunt in History recounts the astonishing true story of 11 men and one woman who risked their lives amidst the bloodshed of World War II to preserve churches, libraries, monuments, and works of art that for centuries defined the heritage of Western civilization. As the war raged, these American and British volunteers -- museum curators, art scholars and educators, architects, archivists, and artists, known as the Monuments Men -- found themselves in a desperate race against time to locate and save the many priceless treasures and works of art stolen by Adolf Hitler and the Nazis.

Japanese Garden Design Marc P. Keane 2012-05-15 Filled with gorgeous photographs, this book explains the theory, history, and intricacies of Japanese gardening. The creation of a Japanese garden combines respect for nature with adherence to simple principles of aesthetics and structure. In Japanese Garden Design, landscape architect Marc Peter Keane presents the history and development of the classical metaphors that underlie all Japanese gardens. Keane describes the influences of Confucian, Shinto and Buddhist principles that have linked poetry and philosophy to the tangible metaphor of the garden in Japanese culture. Creative inspiration is found in the prehistoric origin of Japanese concepts of nature; the gardens of Heian aristocrats; the world-renowned Zen garden, or rock garden; the tea garden; courtyard garden; and stroll garden. Detailed explanations of basic design concepts identify and interpret the symbolism of various garden forms and demonstrate these principles in use today in Japanese landscape architecture. Topics include: Design Principles Design Techniques Design Elements Godspirit in Nature Poetry in Paradise The Art of Emptiness Spiritual Passage Private Niches A Collector's Park
