Export Growth in Latin America Carla Macario 2000 Although Latin American and Caribbean countries have assigned a high priority to increasing exports, export performance in most cases remains deficient. Lexicon Grammaticorum Harro Stammerjohann 1996 The "Lexicon Grammaticorum" is a comprehensive reference book that provides information on the lives and work of all scholars and thinkers throughout the world who have concerned themselves down the ages with the study and description of language. The "Lexicon" contains articles on more than 1,500 representatives of the world's linguistic traditions, written by 422 authors from 27 countries. Generally, an article consists of a biography, an abstract of the linguist's achievements, including his or her influence, and a two-part bibliography, listing first his or her writings, then those about him or her. Whenever possible, the references are complete; where the works are too numerous for them all to be listed, as is often the case with more recent linguists, only the main titles appear, with references to already existing bibliographies. The aim of the "Lexicon" is twofold: namely to provide access to the history of linguistics through its most important representatives and to combine the world's diverse linguistic traditions in one book, thus showing what is individual and is universal in human thought about language.

Messages, Signs, and Meanings Marcel Danesi 2004 Messages, Signs, and Meanings can be used directly in introductory courses in semiotics, communications, media, or culture studies. Additionally, it can be used as a complementary or supplementary text in courses dealing with cognate areas of investigation (psychology, mythology, education, literary studies, anthropology, linguistics). The text builds upon what readers already know intuitively about signs, and then leads them to think critically about the world in which they

live - a world saturated with images of all kinds that a basic knowledge of semiotics can help filter and deconstruct. The text also provides opportunities for readers to do "hands-on" semiotics through the exercises and questions for discussion that accompany each chapter. Biographical sketches of the major figures in the field are also included, as is a convenient glossary of technical terms. The overall plan of the book is to illustrate how message-making and meaning-making can be studied from the specific vantage point of the discipline of semiotics. This third edition also includes updated discussions of information technology throughout, focusing especially on how meanings are now negotiated through such channels as websites, chat rooms, and instant messages.
