Lost Downtown Peter Hujar 2016-02 It's a vanished world, and Peter Hujar was right there in it. The Lower East Side between 1972 and 1985 -- filled with artists, wannabe artists and hangers-on -- was a community of the misbegotten gathered from every town in America and relocated in the mean streets between Broadway and the Bowery. Nothing but their talent, their flamboyance, their rank gender-bending mockery and their arch irony supported them. Some made their names. Many came to grief. A few made art. In those days, the gutted streets of the Lower East Side looked like a war zone. Everyone lived and worked on the extreme outer margins of money and art, penniless and unknown. As a community, Downtown was a counterstatement to the rich New York of the banks, museums, media, corporations ... and the art world itself. That Downtown is forever gone. Time, gentrification, disease and death have taken their toll and turned this vibrant epoch into a chapter of art history. But before it vanished, its extravagant cast sat for Peter Hujar's camera -- and is now alive again in front of our eyes. Featured among others: Joe Brainard, William

Burroughs, Remy Charlip, Edwin Denby, Divine, Ray Johnson, Fran Lebowitz, Charles Ludlum, Susan Sontag, Paul Thek, John Waters, Robert Wilson, David Wojnarowicz.

A Catalogue of Printed Maps of Greece Christos G. Zacharakis 2009 In its third edition, this catalogue covers a period of more than 300 years of printed European cartography concerning Greece. With nearly 4,000 maps listed alphabetically by the makers names and 500 black-and-white illustrations, this is the most inclusive cartographical bibliography produced about Greece from the period of 1477 to 1800. Maps are listed in alphabetical order under the name of the particular cartographer, publisher, and engraver. Variant maps also show some of the inaccuracies of the time including the Ptolemaic style of cartography for Greece. An area of special attention is the Eastern Mediterranean basin, which has been the center of the civilized European world for many centuries. The cartographic descriptions of the region were especially necessary during ancient times, and relevant maps of the area were followed up and developed by the efficient Byzantine administration. Such rich material was later used by European cartographers of the sixteenth, seventeenth, and eighteenth centuries. Like any other scientific and artistic activity of the period under review, cartography was influenced by the intense interest in Greece and enhanced by the revival of Greek culture and the flourishing of classical studies during and after the Renaissance.

Flintknapping John C. Whittaker 2010-06-25 A detailed, practical guide to the

ancient craft of making stone tools, featuring an archaeological analysis. Flintknapping is an ancient craft enjoying a resurgence of interest among both amateur and professional students of prehistoric cultures. In this guide, John C. Whittaker offers the most detailed handbook on flintknapping currently available and the only one written from the archaeological perspective of interpreting stone tools as well as making them. Flintknapping contains detailed, practical information on making stone tools. Whittaker starts at the beginner level and progresses to discussion of a wide range of techniques. He includes information on necessary tools and materials, as well as step-by-step instructions for making several basic stone tool types. Numerous diagrams allow the reader to visualize the flintknapping process, and drawings of many stone tools illustrate the discussions and serve as models for beginning knappers. Written for a wide amateur and professional audience, Flintknapping will be essential for practicing knappers as well as for teachers of the history of technology, experimental archaeology, and stone tool analysis. "A mid-range user's guide to flintknapping is long overdue. There have been some admirable attempts to produce such a volume, but these have been targeted at specific, fairly narrow audiences. Not so with Flintknapping. . . . [Whittaker's] clear aim is to reach professional archaeologists as well as hobbyists. I believe he achieves this goal with incredible skill and humor. . . . I highly recommend this book to everyone interested in flintknapping." -Plains Anthropologist "Very attractive to readers interested in ancient crafts, survival skills, or the history of technology Far superior to anything currently available." -James C. Woods, director, The Herrett Museum, College of Southern Idaho

The Impact of Institutions and Professions on Legal Development Paul Mitchell 2014-07-31 Legal professions and legal institutions have a profound influence on the direction and form of legal change, but it is often difficult to identify exactly how and why such influence has been exerted. Even those individuals directly involved in bringing about changes may not realise the full impact of professional and institutional factors, since these factors often form part of the participants' own assumed roles. This collection of essays casts light on how one particularly important legal category, fault liability, has been shaped by legal professions and institutions between 1850 and 2000. Its unique comparative approach highlights how different legal systems generate very different pressures for change, and how actors' perceptions of their own roles can have a profound effect on how changes take effect.
