Joan and Peter Herbert George Wells 1918

Dictatorship and Political Police E.K. Bramstedt 2013-09-27 First Published in 1998. Initially written in the period between 1942 and 44, with additional notes in the appendices of 1945, this volume looks at the areas of the secret Police, the secret control as developed by Fascism and National Socialism as laid on the Third Reich and the relationship between the law and the Political Police and their co-ordination with propaganda and the impact of the instrument of terror on the people.

The Berlin stories Christopher Isherwood 1970

The Gap in the Curtain John Buchan 2014-03-24 The Gap in the Curtain John Buchan is remembered for his spy thrillers like "The 39 Steps" but he also wrote tales of the supernatural. Whether The Gap in the Curtain is a supernatural tale, or science fiction, or horror, is difficult to say. A brilliant but possibly slightly unbalanced scientist discovers a means of lifting the curtain for a moment and gaining a glimpse of the future. This discovery allows six guests in his country house to see, for a brief instant of time, a page from a newspaper from one year in the future. The book then follows the life of each of the six people up to that date a year in the future, and examines the way they deal with the knowledge they have gained. The trick to it is that what they each see is an isolated fact, taken out of context. It can enlighten, but it can just as easily mislead. They know one thing that is going to happen, but they don't know how and why it will happen. The knowledge turns out to be surprisingly dangerous.

Learning with Professionals James E. Lightfoot 2005 A collection of writings by present or former faculty and students at the Joint Military Intelligence College. The purpose of the book is to provide an academic resource for students, teachers, and practitioners of intelligence. The growth of the literature, and some of the most significant writings have come from a center of excellence in the field, the Joint Military Intelligence College. Those presented here represent a cross section of subdisciplines, some with a very timely element, some timeless.

The Man with the Clubfoot Valentine Williams 1919 This is a pre-1923 historical reproduction that was curated for quality. Quality assurance was conducted on each of these books in an attempt to remove books with imperfections introduced by the digitization process. Though we have made best efforts - the books may have occasional errors that do not impede the reading experience. We believe this work is culturally important and have elected to bring the book back into print as part of our continuing commitment to the preservation of printed works worldwide.

The Books of Nature and Scripture J.E. Force 2013-03-09 Dick Popkin and James Force have attended a number of recent conferences where it was apparent that much new and important research was being done in the fields of interpreting Newton's and Spinoza's contributions as biblical scholars and of the relationship between their biblical scholarship and other aspects of their particular philosophies. This collection represents the best current research in this area. It stands alone as the only work to bring together the best current work on these topics. Its primary audience is specialised scholars of the thought of Newton and Spinoza as well as historians of the philosophical ideas of the late seventeenth and early eighteenth centuries.

Berlin Embassy William Russell 2015-11-06 "First published in 1941 to considerable acclaim, Berlin Embassy is the classic account of the last days of peace in Europe, and has been out-of-print for almost fifty years. William Russell was a young American diplomat working at the US Embassy, in Hermann Goering Strasse, during the grim days of 1939. He had studied in Germany, prior to becoming part of America's diplomatic mission, which placed him in a position to gain unheard of access to remote areas—both physically and ideologically—of German society during one of the most momentous times in world history. Russell does not miss any opportunity to capitalize on this unique position as he gives a totally absorbing account of both the horror and farce which so often defines such epic times. This quite remarkable account is sure to find a whole new readership."-Print ed. "Vitaly significant and impressive."—William L. Shirer.

Men Around the Kaiser Frederic William Wile 1914

Minute Mysteries Harold Austin Ripley 1949

The Plot Against the Peace Michael Sayers 2018-09-03 The Plot Against the Peace, which was first published in 1945, uncovers Nazi Germany's secret plans for a Third World War. The book reveals how the behind-the-scenes clique which really rules Germany is plotting to undermine the peace, split the United Nations, and convert military defeat into actual victory. Written by two journalists who have won an international reputation for their exposés of fifth-column activities and worldwide fascist intrigues, this book offers thoroughly documented, indisputable evidence to prove that Germany's undercover apparatus is at work in the United States today, laying the groundwork for a post-war secret offensive against America. The book disclosed how German spies and assassins are already carrying out their new assignments in the United States, as throughout the rest of the world. The Plot Against the Peace is a book that names names. Among the vitally important disclosures discussed are how Germany is secretly preparing for the continued post-war operations of the Nazi apparatus; the real story behind the German factories of death; the clandestine building of German

hidden arsenals in Spain, Argentina and other countries; the plot for maintaining a Nazi-Junker officer corps in temporary exile abroad after the war; who are the “real brains” behind the German international network; how the Germans have smuggled funds, diamonds and other valuables into the United States to finance their post-war machinations; and what the German plans are for disuniting the United Nations, inciting international turmoil and thus making impossible the fulfilment of the Allied peace aims. The authors have left nothing to the imagination in their account of the hitherto untold secret history of Nazism, and in their description of the character and deeds of the German General Staff. But, as the authors write, “Those facts had to be recorded and they have to be read.” An amazing, revealing and urgent document.

The Culture of Cities Lewis Mumford 1981-01-01

The City in History Lewis Mumford 1961 An examination of Cities of the Western world tracing their development from Egypt through the Middle Ages to the present

When Money Dies Adam Ferguson 2010-10-12 Presents a history of the 1923 German economic crisis that made the currency worthless, reduced the country to a barter economy, and left severe social unrest in its wake.

The German Chemical Industry in the Twentieth Century John E. Lesch 2013-04-17 In the twentieth century, dyes, pharmaceuticals, photographic products, explosives, insecticides, fertilizers, synthetic rubber, fuels, and fibers, plastics, and other products have flowed out of the chemical industry and into the consumer economies, war machines, farms, and medical practices of industrial societies. The German chemical industry has been a major site for the development and application of the science-based technologies that gave rise to these products, and has had an important role as exemplar, stimulus, and competitor in the international chemical industry. This volume explores the German chemical industry's scientific and technological dimension, its international connections, and its development after 1945. The authors relate scientific and technological change in the industry to evolving German political and economic circumstances, including two world wars, the rise and fall of National Socialism, the post-war division of Germany, and the emergence of a global economy. This book will be of interest to historians of modern Germany, to historians of science and technology, and to business and economic historians.

Making Africa Mateo Kries 2015 Over the past decade, Africa has experienced a tremendous political, economic and technological transformation. Spearheading this shift is a new generation of entrepreneurs and doers who have opened up a fresh view of this vast and diverse continent, using the Internet to make themselves visible. Developed in collaboration with renowned curator Okwui Enwezor, "Making Africa: A Continent of Contemporary Design" embraces this new perspective, seeking to reveal the continent as a thinktank and investigating the intriguing possibility of a new understanding of design. It focuses on a generation of African designers, architects and artists who transcend the boundaries between design, art, photography, architecture and urbanism. Utilizing traditional techniques as comfortably as new media such as Facebook and mobile banking systems, these designers are establishing a new design identity-and thus a new future-for the

continent. "Making Africa" examines everyday life through such items as furniture, posters, fashion garments and accessories, including J.D. Okhai Ojeikere's "Nigerian hairstyles" and Cyrus Kabiru's eyewear sculptures as well as the objects of Cheick Diallo, fashion by Buki Akib, the photographs of Mário Macilau and Okhai Ojeikere, the architecture of Francis Kéré, the animation art of Robin Rhode and many other creations of designers from different disciplines. Grounding these new movements in a larger historical context, "Making Africa" also takes a look at the first generation of postcolonial Africa.

AIVF Guide to International Film and Video Festivals Kathryn Bowser 1988

Urban Design Jon Lang 2017-03-31 *Urban Design: A Typology of Procedures and Products*, 2nd Edition provides a comprehensive and accessible introduction to urban design, defining the field and addressing the controversies and goals of urban design. Including over 50 updated international case studies, this new edition presents a three-dimensional model with which to categorize the processes and products involved: product type, paradigm type, and procedural type. The case studies not only illuminate the typology but provide information that designers can use as precedents in their own work. Uniquely, these case study projects are framed by the design paradigm employed, categorized by procedural type instead of instrumental or land use function. The categories used here are Total Urban Design, All-of-a-piece Urban Design, Plug-in Urban Design, and Piece-by-piece Urban Design. Written for both professionals and those encountering urban design in their day-to-day life, *Urban Design* is an essential introduction to the field and practice, considering the future direction of the field and what can be learned from the past.

Fanny Herself Edna Ferber 2021-05-28 *Fanny Herself* (1917) is a novel by Edna Ferber. Inspired by her experience as a young Jewish woman from the Midwest, *Fanny Herself* is the story of a young woman who recognizes the unhappiness in her life and decides to risk it all for something better. Lighthearted in nature, yet serious in its ideals, Ferber's novel recalls the best of Fitzgerald in its unswerving commitment to humanity in all its beauty and heartbreak. "You could not have lived a week in Winnebago without being aware of Mrs. Brandeis." Such a confident pronouncement proves even truer for young Fanny, whose mother is the Mrs. Brandeis in question. As the owner of Brandeis' Bazaar—a successful store raised from the ashes of her deceased husband's chronic mismanagement—Molly Brandeis is a deeply serious woman who wants nothing but the best for her daughter. Where they differ, of course, is in the definition of that deceptive superlative. While Molly wants to train her daughter to follow in her managerial footsteps, Fanny dreams of training as an artist in order to escape the confinement of small-town life. Consistently moving, frequently funny, and supremely true, *Fanny Herself* is an underappreciated novel from Pulitzer Prize winning author Edna Ferber. With a beautifully designed cover and professionally typeset manuscript, this edition of Edna Ferber's *Fanny Herself* is a classic work of American literature reimaged for modern readers.

Dodsworth Sinclair Lewis 1974

Studying and Conserving Paintings New York University. Institute of Fine Arts. Conservation Center 2006
This is the first volume of Occasional Papers on the Samuel H. Kress Collection and is published in the memory

of Mario Modestini who died in January 2006. The book marks the tenth anniversary of the advanced training in Old Masters conservation sponsored by the Kress Foundation at the Conservation Center of the Institute of Fine Arts of New York University. The first part of the book is an overview of historic approaches to the conservation of European paintings and the conservation history of the Kress collection of paintings, which was formed between 1929 and 1961. The second part gives the results of scientific and humanistic research gained in the process of conserving specific Italian and Dutch Old Masters.

Holiday Homes 2014 Over the last three decades, Engel & Volkers has made a worldwide name for itself as a specialist in selling and renting remarkable properties in especially beautiful locations. With more than 500 offices in 38 countries and on five continents, the company is an undisputed expert in exclusive vacation properties and second homes located in the globe's most idyllic places. This unique book presents a curated selection of exceptional homes that are ideal for leaving behind everyday life--for a week, a few months, or even a lifetime. Whether in a spacious villa, a modern townhouse, or a charming chalet, the utmost in comfort can be enjoyed by aesthetes, sports enthusiasts, and those seeking peace and tranquility. All within the midst of pristine coastal or mountain scenery, of course.

The Last of Mr. Norris Christopher Isherwood 1952 "Arthur Norris spent days in almost orgiastic luxury with his wealthy friends, and nights in squalid cellar-clubs with fellow conspirators plotting the overthrow of a government"--Inside front cover.

Physics In A Mad World Shifman Misha 2015-08-28 This book tells captivating stories of misadventures of two renowned theoretical physicists in the Soviet Union. The first part is devoted to Friedrich (Fritz) Houtermans, an outstanding Dutch-Austrian-German physicist who was the first to suggest that the source of stars' energy is thermonuclear fusion, and also made a number of other important contributions to cosmochemistry and geochemistry. In 1935, Houtermans, a German communist, in an attempt to save his life from Hitler's Gestapo, fled to the Soviet Union. He took up an appointment at the Kharkov Physico-Technical Institute, working there for two years with the Russian physicist Valentin P Fomin. In the Great Purge of 1937, Houtermans was arrested in December by the NKVD (Soviet Secret Police, KGB's predecessor). He was tortured, and confessed to being a Trotskyist plotter and German spy, out of fear of threats against his wife Charlotte. However, Charlotte had already escaped from the Soviet Union to Denmark, after which she went to England and finally the USA. As a result of the Hitler-Stalin Pact of 1939, Houtermans was turned over to the Gestapo in May 1940 and imprisoned in Berlin. The second part consists of two essays that narrate the life story of Yuri Golfand, one of the codiscoverers of supersymmetry, a major discovery in theoretical physics in the 20th century. In 1973, just two years after the publication of his seminal paper, he was fired from the Lebedev Physics Institute in Moscow. Because of his Jewish origin he could find no job. Under such circumstances, he applied for an exit visa to Israel, but his application was denied. Yuri Golfand became a refusnik and joined the Human rights movement, along with two other prominent physicists, Andrei Sakharov and Yuri Orlov. To earn his living, he had to do manual work, repeatedly being intimidated by KGB. Only 18 years later, shortly before the demise of the Soviet Union, did he obtain permission to leave the country, emigrating to Israel in 1990. These personal life stories of two outstanding theorists are intertwined with the tragedies of the 20th century and

make for compelling reading.

Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Romantic Modernism Wim Denslagen 2009 In the world of architectural conservation, there is little tolerance for reconstructing or even protecting historic facades when everything behind is modern, and even less for reconstructing a building that has been completely destroyed. These offenses are considered lies against history. In this thoughtful, revealing work, conservation expert Wim Denslagen traces this predilection for honesty to the legacy of Functionalism, a Romantic-era movement that denounced the building of pseudo-architecture in favor of a new, rational form of building. With detailed analyses of headline-making restoration projects from Bruges to Berlin, Denslagen shows that the adoption of these romantic values by conservationists gave rise to a new wave of modern additions and transformations.

European Elites and Ideas of Empire, 1917-1957 Dina Gusejnova 2016-06-16 Explores European civilisation as a concept of twentieth-century political practice and the project of a transnational network of European elites. This title is available as Open Access.

Applied Acoustics: Concepts, Absorbers, and Silencers for Acoustical Comfort and Noise Control Helmut V. Fuchs 2013-01-12 The author gives a comprehensive overview of materials and components for noise control and acoustical comfort. Sound absorbers must meet acoustical and architectural requirements, which fibrous or porous material alone can meet. Basics and applications are demonstrated, with representative examples for spatial acoustics, free-field test facilities and canal linings. Acoustic engineers and construction professionals will find some new basic concepts and tools for developments in order to improve acoustical comfort. Interference absorbers, active resonators and micro-perforated absorbers of different materials and designs complete the list of applications.

Man Meets Woman Yang Liu 2014 In this first in a new series for TASCHEN, leading graphic designer Yang Liu tackles one of the hottest, and one of the oldest, topics of all: he and she. Drawing on the experiences, challenges and many perspectives on men and women she has encountered in her own life, Yang Liu distils the vast, swirling question of gender to bold, binary pictograms.

Family History Digital Libraries William Sims Bainbridge 2018-11-02 In the modern era, every family and local community can cultivate its own history, endowing living people with meanings inherited from the people of the past, by means of today's computer-based information and communication technologies. A new profession is emerging, family historians, serving the wider public by assisting in collection and analysis of fascinating data, by teaching talented amateur historians, and by producing complete narratives. Essential are

the skills and technologies required to preserve and connect photos, movies, videos, diaries, memoirs, correspondence, artefacts and even architecture such as homes. Online genealogical services are well established sources of official government records, but usually not for recent decades, and not covering the valuable records of legal, medical, and religious organizations. Information can be shared and interpreted by family members through oral history interviews, social media, and online private archives such as wikis and shared file depositories. This book explores a wide variety of online information sources and achieves coherence by documenting and interpreting the history of a particular extended American family on the basis of 9 decades of movies and videos, 17 decades of photographs, and centuries of documents. Starting now, any family may begin to preserve their current experiences for the historians of the future, but this will require social as well as technical innovations. This book is the essential resource, providing the fundamental principles, effective methods, and fascinating questions required to make our past live again.

High in the Clouds Paul McCartney 2006 Imagine a land where all the animals are free . . . To the creatures of the woodland, the land of Animalia sounds like a dream - a tropical island where all the animals live in harmony. They are over-shadowed by a much more evil community; the polluted Megatropolis, whose dirty skyscrapers block the horizon. And then one day, Wirral the Squirrel's woodland is destroyed by developers and he is thrown into the nightmare world of Megatropolis. But Wirral believes in Animalia and he joins with Froggo, a world-class amphibian balloonist, and Wilhamina, a girl squirrel, to lead the enslaved animals of the city to a new life. So begins an exciting adventure through the mean streets of Megatropolis, over the sea and through the sky. Developed out of an exceptional fusion of creative talents, this story explodes onto every page. The plot is fast, furious and funny; the illustrations are full of rich depth and colour; and the characters live on long after you have turned the final page. It will delight children of all ages and is sure to become an enduring classic. 'Young audiences will delight in the clever wordplay and smartly-drawn comic characters.' Independent

Margaret Sanger: an autobiography Margaret Sanger 2022-05-28 This autobiography tells of Sanger, a pioneer in the struggle for birth control as a basic human right and the founder of the International Planned Parenthood Federation. Sanger is a nurse, who has witnessed first-hand the devastating effects of unwanted pregnancy, triumphed over arrest, indictment, and exile. Her autobiography is a classic of women's studies.

Human Computer Confluence Andrea Gaggioli 2015-12 Human computer confluence is a research area aimed at developing an effective, even transparent, bidirectional communication between humans and computers, which has the potential to enable new forms of sensing, perception, interaction, and understanding. This book provides a groundbreaking collection of chapters exploring the science, technology and applications of HCC, bringing together experts in neuroscience, psychology and computer science.

The Ruhleben Prison Camp Israel Cohen 1917

Goodbye to Berlin Christopher Isherwood 1986

Work Of Art Sinclair Lewis 2012-07-10 One of Sinclair Lewis's lesser-known novels, *Work of Art* follows three generations of the Weagle family through their work in the American hospitality industry. In *Work of Art* Lewis again delivers memorable characters struggling to better themselves and achieve prosperity against the backdrop of traditional American values and craftsmanship. HarperPerennial Classics brings great works of literature to life in digital format, upholding the highest standards in ebook production and celebrating reading in all its forms. Look for more titles in the HarperPerennial Classics collection to build your digital library.

Functional Neurology for Practitioners of Manual Medicine E-Book Randy W. Beck 2011-09-21 *Functional Neurology for Practitioners of Manual Medicine* takes the reader from the embryonic beginnings of the nervous system, through the biochemistry of receptor activation and on to the functional systems of the nervous system. Concepts, relationships and scientific mechanisms of the nervous system function are covered, and this aids the practitioner in developing their clinical approach to a wide variety of patient presentations. The text is fully referenced, which allows the reader to immediately apply the concepts to practice situations. New for this edition are new chapters on pain (including headache) and theoretical evidence, plus extensive electronic resources supporting the text. Utilizes our understanding of how the nervous system works in the treatment of a variety of clinical conditions Demystifies the clinical results seen in the practice of Functional Neurology and scientifically validates its clinical success Addresses function rather than pathology, allowing the reader to gain a firm understanding of the neurological processes seen in health and disease Contains clinical cases which are designed to be read and answered before starting the chapter to allow the reader to gauge their current state of knowledge 'Quick Facts' introduce new concepts or allow rapid review of information already presented in the text in a brief and succinct manner Contains a detailed overview of the concepts relating to our understanding of the development of emotion to demonstrate the link between physical health and the mind Contains abundant references to support controversial concepts Contains new chapters on theoretical evidence and the management of pain (including headache) Contains a wide range of additional case studies, 'clinical conundrums' and key questions and answers for each topic Bonus DVD contains fully searchable text, a downloadable image bank, brain dissection and video clips of the manipulative techniques and examination procedures found within the volume plus 200 multiple choice questions

Oracle JDeveloper 10g Harshad Oak 2008-01-01 The age for using a simple text editor is long gone. The ever-growing complexity of Java and J2EE creates a need for Java development tools that offer more. If you want to be more productive with Java, you need a Java IDE. Oracle JDeveloper 10g is an IDE that enables you to develop Java applications with minimal effort. JDeveloper can do wonders for your Swing, JSP, Servlets, Struts, EJBs, and Web Services developments. In this indispensable guide, renowned author Harshad Oak puts the technology first, enhancing the text with sample applications that demonstrate how JDeveloper can simplify your developments using the technology. Oak also focuses on the Application Development Framework (ADF) that comes with JDeveloper 10g—a framework that will get your applications up and running fast. The book also delves into JDeveloper's many code optimization tools, demonstrating how to use them to find improper or resource-hungry code that requires your immediate attention. Oak continues on to discuss JDeveloper extensions that add even more value to JDeveloper.

The Dangerous Places Louis Golding 2021-08-31 "The Dangerous Places" by Louis Golding. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Confessions of the Pricing Man Hermann Simon 2015-10-20 The world's foremost expert on pricing strategy shows how this mysterious process works and how to maximize value through pricing to company and customer. In all walks of life, we constantly make decisions about whether something is worth our money or our time, or try to convince others to part with their money or their time. Price is the place where value and money meet. From the global release of the latest electronic gadget to the bewildering gyrations of oil futures to markdowns at the bargain store, price is the most powerful and pervasive economic force in our day-to-day lives and one of the least understood. The recipe for successful pricing often sounds like an exotic cocktail, with equal parts psychology, economics, strategy, tools and incentives stirred up together, usually with just enough math to sour the taste. That leads managers to water down the drink with hunches and rules of thumb, or leave out the parts with which they don't feel comfortable. While this makes for a sweeter drink, it often lacks the punch to have an impact on the customer or on the business. It doesn't have to be that way, though, as Hermann Simon illustrates through dozens of stories collected over four decades in the trenches and behind the scenes. A world-renowned speaker on pricing and a trusted advisor to Fortune 500 executives, Simon's lifelong journey has taken him from rural farmers' markets, to a distinguished academic career, to a long second career as an entrepreneur and management consultant to companies large and small throughout the world. Along the way, he has learned from Nobel Prize winners and leading management gurus, and helped countless managers and executives use pricing as a way to create new markets, grow their businesses and gain a sustained competitive advantage. He also learned some tough personal lessons about value, how people perceive it, and how people profit from it. In this engaging and practical narrative, Simon leaves nothing out of the pricing cocktail, but still makes it go down smoothly and leaves you wanting to learn more and do more—as a consumer or as a business person. You will never look at pricing the same way again.
