Calmodulin Antagonists and Cellular Physiology Hiroyoshi Hidaka 2012-12-02 Calmodulin Antagonists and Cellular Physiology focuses on the biochemistry of calmodulin antagonists as regulators of cellular physiology. Emphasis is placed on the use of calmodulin antagonists as an indicator of calmodulin function. The mechanism of action of calmodulin antagonists and their interactions with calmodulin are explored. This book is comprised of 33 chapters and begins with an introduction to the biochemical aspects of calmodulin as well as its distribution and functions, followed by a discussion on how calmodulin antagonists and other agents modulate Ca²⁺-dependent regulatory systems. The next section is devoted to the mechanism of action of calmodulin antagonists and includes chapters that examine the interaction of various drugs with calmodulin and the structure-activity relationships of calmodulin antagonists. The effects of calmodulin antagonists on cell proliferation and growth are then discussed. The remaining chapters deal with the role of calmodulin antagonists in cell function and the contractile process, along with their effect on protein kinase C. This monograph will be a useful resource for biochemists as well as students and researchers in biochemistry.

Pesticide Management and Insecticide Resistance David Watson 2012-12-02 Pesticide Management and Insecticide Resistance explores the problem of insect resistance to pesticides and reviews various approaches to pesticide management and safety. It looks at the environmental hazards of pesticide residues and their regulation, along with application techniques aimed at maximum efficiency against the pest and minimum waste to pollution, safety considerations in the development of pest control programs, and pesticide monitoring. Divided into eight parts encompassing 49 chapters, this volume begins with an overview of the global pesticide industry and the costs of commercializing pesticides relative to their profit potential. It then introduces the reader to the release of fluorohydrocarbon propellants in pesticidal aerosols and their hazards to the ozone layer, management of pests in urban environments, international plant protection, the current status of DDT, the importance of training pest-control personnel, and procedures of forest spraying. Other chapters focus on pesticide management safety from a medical perspective; pesticide safety as it relates to the manufacturing, warehousing, and distribution of pesticides; importance of pesticide application equipment and related field practices in developing countries; and the importance of pesticides in successful pest management programs. This book is a valuable resource for scientists, students, researchers, and policymakers who want to ensure the safety of consumers, applicators, and harvesters when using pesticides.

Building Community Disaster Resilience Through Private-Public Collaboration National Research Council 2011-03-17 Natural disasters-including hurricanes, earthquakes, volcanic eruptions, and floods-caused more than 220,000 deaths worldwide in the first half of 2010 and wreaked havoc on homes, buildings, and the environment. To withstand and recover from natural and human-caused disasters, it is essential that citizens and communities work together to anticipate threats, limit their effects, and rapidly restore functionality after a crisis. Increasing evidence indicates that collaboration between the private and public sectors could improve the ability of a community to prepare for, respond to, and recover from disasters. Several previous National Research Council reports have identified specific examples of the private and public sectors working cooperatively to reduce the effects of a disaster by implementing building codes, retrofitting buildings, improving community education, or issuing extreme-weather warnings. State and federal governments have acknowledged the importance of collaboration between private and public organizations to develop planning for disaster preparedness and response. Despite growing ad hoc experience across the country, there is currently no comprehensive framework to guide private-public collaboration focused on disaster preparedness, response, and recovery. *Building Community Disaster Resilience through Private-Public Collaboration* assesses the current state of private-public sector collaboration dedicated to strengthening community resilience, identifies gaps in knowledge and practice, and recommends research that could be targeted for investment. Specifically, the book finds that local-level private-public collaboration is essential to the development of community resilience. Sustainable and effective resilience-focused private-public collaboration is dependent on several basic principles that increase communication among all sectors of the community, incorporate flexibility into collaborative networks, and encourage regular reassessment of collaborative missions, goals, and practices.

Tretjak Max Landorff 2013-08-27 A bestselling European psychological thriller set around the Italian lakes Gabriel Tretjak is a fixer, hired by rich clients to fix their lives, to change fate on their behalf. He does so without moral limitations or scruples. His methods draw on experimental psychology and the latest research into the human brain. His fees are high, but his clients are always willing to pay. No matter how desperate their situation, they want a happy ending. But happy for whom? Soon the body of a famous brain surgeon is discovered in a horsebox: a murder made all the more gruesome by the fact that the victim's eyes have been removed by something resembling an ice-cream scoop. The surgeon is the first victim of a murderer who leaves tantalising clues behind, all pointing to Tretjak. While Tretjak tries to stay in control, a feeling begins to take hold, a feeling that he normally uses to his advantage when working on behalf of a client. That feeling is fear. It slowly dawns on him - and soon the police - that these murders are all linked to his past. The one thing he cannot fix.

Crime Fiction and the Law Maria Aristodemou 2016-12-08 This book opens up a range of important perspectives on law and violence by considering the ways in which their relationship is formulated in literature, television and film. Employing critical legal theory to address the relationship between crime fiction, law and justice, it considers a range of topics, including: the relationship between crime fiction, legal reasoning and critique; questions surrounding the relationship between law and justice; gender issues; the legal, political and social impacts of fictional representations of crime and justice; post-colonial perspectives on crime fiction; as well as the impact of law itself on the crime fiction's development. Introducing a new sub-field of legal and literary research, this book will be of enormous interest to scholars in critical, cultural and socio-legal studies, as well as to others in criminology, as well as in literature.

C-H Bond Activation in Organic Synthesis Jie Jack Li 2015-04-07 Greener than conventional methods, C–H activation methods have flourished during the last decade and become especially attractive to organic chemists. Edited by a practitioner in this rapidly developing field, *C–H Bond Activation in Organic Synthesis* provides an overview of this exciting playground of chemistry. The book summarizes the state of the art in C–H activation for functionalization, enabling you to carry out reactions in the most environmentally friendly fashion with the least contamination of by-products. The most popular C–H activation reactions are catalyzed by transition metals. This book dedicates a chapter to each of the following catalysts: palladium, rhodium, nickel, iron, copper, and cobalt. In addition, it covers radical-mediated C–H activation, fluorination via C–H activation, and C–H activation of heterocycles. Using a pedagogically practical approach, each chapter is divided by the transition metal catalyst, not a specific transformation. This gives you an up-to-date review of the most important topics of C–H activation. The area of C–H activation has experienced a flurry of activity over the past two decades, so the time is right for a resource that summarizes these powerful tools with which you can design and construct heteroaromatic molecules. Thus, direct C–H functionalization methods are expected to continue to greatly contribute to the mission of green chemistry: low-energy, waste-free, and atom-economic transformations for the synthesis of organic materials and biologically active molecules in the twenty-first century. Using this book, you can carry out environmentally friendly reactions that enable the conversion of cheap and abundant alkanes into valuable functionalized organic compounds.

Plan D Simon Urban 2013-06-20 October 2011. While West Berlin enjoys all the trappings of capitalism, on the crowded, polluted, Eastern side of the Wall, the GDR is facing bankruptcy. The ailing government's only hope lies in economic talks with the West, but then an ally of the GDR's chairman is found murdered – and all the clues suggest that his killer came from within the Stasi. Detective Martin Wegener is assigned to the case, but,

with the future of East Germany hanging over him, Wegener must work with the West German police if he is to find the killer, even if it means investigating the Stasi themselves. It is a journey that will take him from Stasi meeting rooms to secret prisons as he begins to unravel the identity of both victim and killer, and the meaning of the mysterious Plan D. Plan D is a gripping thriller and a thought-provoking alternative history in the vein of Robert Harris's *Fatherland* and John le Carré's *The Spy Who Came in from the Cold*.

Satisficing and Maximizing Michael Byron 2004-07-19 How do we think about what we plan to do? One dominant answer is that we select the best possible option available. However, a growing number of philosophers would offer a different answer: since we are not equipped to maximize we often choose the next best alternative, one that is no more than satisfactory. This strategy choice is called satisficing (a term coined by the economist Herb Simon). This new collection of essays explores both these accounts of practical reason.
