The Real Messiah Stephan Huller 2012-01-01 Highly controversial but impeccably researched, The Real Messiah explodes the myth that Jesus was the long-prophesied Messiah of the Jewish nation. Indeed, it argues that Jesus never claimed that role but thought of himself as herald to the true Messiah: Marcus Julius Agrippa, the last King of the Jews and Jesus' contemporary. It was he who truly founded what became known as Christianity, and wanted to build a faith to which anyone could aspire. Though Marcus Agrippa was initially successful, with the passing of time those in charge of the new faith capitulated to the whims of successive Roman Emperors and centered their religion on Jesus instead.

Hygiene of Nerves and Mind in Health and Disease Auguste Forel 1907 Publisher description: The Lightning Shrikes is a cinematic novel about an American Indian softball team in a national coed professional league sponsored by a rich and powerful Nike-like company. The team is led by an ex-major leaguer with a gift for making the most of any business opportunity and a great eye for talent -- along with a weakness for home cooking -- stocked with the best Native athletes from around the country, most with no experience on the diamond, The Shrikes work hard to destroy misconceptions about Native Americans, to instill pride in their people(s), to promote greater communication between Native tribes and nations, and to build the skills and teamwork needed to win the inaugural national championship. Devon Mihesuah makes her characters real, unlike the Hollywood or New Age Indian caricatures that are usually foisted upon the public. The Lightning Shrikes are far from perfect: they're good and bad, strong and weak, determined and vacillating, but in the end, like the fierce shrike -- the diminutive butcher bird of the Western plains that impales its often much larger prey, they prevail against the odds.

Karl Kraus, Apocalyptic Satirist Edward Timms 1989-01-01 This is a fascinating study of the life and work of Karl Kraus, brilliant Austrian writer, satirist and personality of fin de siecle Vienna. This encyclopaedic study of his life, his work and his generation will be of great interest to both the enthusiast and the general student of European culture. Drawing on unfamiliar sources, Edward Timms analyses Kraus's involvement in the fundamental ideological issues of his time, and shows that Kraus's political position - caught between traditional Habsburg loyalties and new democratic commitments - was far more complex than has previously been suspected. 'A major landmark in Kraus studies, and an important contribution to our understanding of the culture of the early twentieth century. It abounds in discoveries and insights.' Times Higher Education Supplement 'Timm's lucid prose, his masterly organization of the voluminous material he treats, his excellent translations of the documents he cites and his broad, readable portrayal of Viennese fin-de-siecle culture makes this study accessible to the average reader and a pleasure for the literary professional ... An example of German studies at its best.' European Studies Journal 'This study, which takes us to the end of the Great War, is unquestionably the most detailed and thoughtful book about him in any language. Edward Timms' account skilfully interweaves his life, times and work.' The Listener 'Timms successfully weaves a colourful, and thoroughly researched and documented account of essential cultural currents in Habsburg Vienna around his central figure. Copious illustrations and photographs enhance a most enjoyable text, making this an ideal introduction to Kraus and his work.' Choice Edward Timms is lecturer in German at the University of Cambridge and a fellow of Gonville and Caius College.

Climate in Motion Deborah R. Coen 2018-07-19 Today, predicting the impact of human activities on the earth's climate hinges on tracking interactions among phenomena of radically different dimensions, from the molecular to the planetary. Climate in Motion shows that this multiscale, multicausal framework emerged well before computers and satellites. Extending the history of modern climate science back into the nineteenth century, Deborah R. Coen uncovers its roots in the politics of empire-building in central and eastern Europe.

She argues that essential elements of the modern understanding of climate arose as a means of thinking across scales in a state—the multinational Habsburg Monarchy, a patchwork of medieval kingdoms and modern laws—where such thinking was a political imperative. Led by Julius Hann in Vienna, Habsburg scientists were the first to investigate precisely how local winds and storms might be related to the general circulation of the earth's atmosphere as a whole. Linking Habsburg climatology to the political and artistic experiments of late imperial Austria, Coen grounds the seemingly esoteric science of the atmosphere in the everyday experiences of an earlier era of globalization. *Climate in Motion* presents the history of modern climate science as a history of “scaling”—that is, the embodied work of moving between different frameworks for measuring the world. In this way, it offers a critical historical perspective on the concepts of scale that structure thinking about the climate crisis today and the range of possibilities for responding to it.

Heller Hautkrebs Dirk Hasselmann 2018-11-23 Der helle (weiße) Hautkrebs ist mit jährlich über 230.000 Neuerkrankungen in Deutschland der mit Abstand häufigste Krebs überhaupt. Wir werden erfreulicherweise immer älter, weshalb wir unseren Hautkrebs überhaupt erst erleben können. Am häufigsten tritt er im 6. und 7. Lebensjahrzehnt auf und da haben wir doch gute Chancen, dieses Alter zu erreichen. Warum dieser Ratgeber und für wen? Es fehlte bislang eine Informationsquelle, die den ganzen Bogen von der Prävention über die Hautkrebsvorsorge, die einzelnen Therapiemöglichkeiten und schließlich die Nachsorge des hellen Hautkrebses spannt - verständlich, neutral und unabhängig. Von der Hautarzt-Praxis für den Alltag sozusagen. Der Ratgeber ist für Betroffene, ihre Angehörige und an diesem Themengebiet allgemein Interessierte gleichermaßen geeignet. Das Buch wurde 2018 für den "Preis für Patientenkommunikation in der dermatologischen Versorgung" des Berufsverbandes der Deutschen Dermatologen nominiert. TWENTYSIX-Topftitel im Oktober. Die Jury sagt: "Was ist heller Hautkrebs? Woran erkenne ich ihn, wie entsteht er und wie kann ich ihn vermeiden? Diese und andere wichtige Fragen werden im Ratgeber von Dr. med. Dirk Hasselmann umfassend beantwortet. Klar und verständlich erklärt der Hautarzt alles rund um die häufigste Krebsart. Wir finden: Ein Must-Read für alle, die sich selbst und Angehörige schützen wollen."

Life is Good Alex Capus 2018-03-15 Max has been married to Tina for twenty-five years. She is the love of his life, but now he must come to terms with the fact that she is to spend a year away on a work assignment—away, for the first time, from their home, their children and their life together. Her absence leaves him feeling like an Odysseus in reverse: he stays put while his Penelope goes out into the world. Max, alone with his three teenage sons for the first time, is left contemplating life and the daily routine of the little bar of which he is the proprietor. As he spends more time with the regulars their problems begin to become his own. This new novel by Alex Capus is a hymn to trust, friendship and life's small pleasures. Told with his trademark humor, *Life is Good* is a novel about finding contentment in rootedness as the world speeds up.
