Ethics and Robotics Rafael Capurro 2009 "Ethics and robotics are two academic disciplines, one dealing with the moral norms and values underlying implicitly or explicitly human behavior and the other aiming at the production of artificial agents, mostly as physical devices, with some degree of autonomy based on rules and programmes set up by their creators. Robotics is also one of the research fields where the convergence of nanotechnology, biotechnology, information technology and cognitive science is currently taking place with large societal and legal implications beyond traditional industrial applications. Robots are and will remain -in the foreseeable future- dependent on human ethical scrutiny as well as on the moral and legal responsibility of humans. Human-robot interaction raises serious ethical questions right now that are theoretically less ambitious, but practically more important than the possibility of the creation of moral machines that would be more than machines with an ethical code. The ethical perspective addressed in this volume is therefore the one we humans have when interacting with robots. Topics include the ethical challenges of healthcare and warfare applications of robotics, as well as fundamental questions concerning the moral dimension of human-robot-interaction including epistomological, ontological and psychoanalytic issues. It deals also with the intercultural dialogue between Western and Non-Western as well as between European and US-American ethicists."-- P. [4] of cover.

Discomposition Redressed Patrick Brandt 2019-12-09 Modern theoretical linguistics lives by the insight that the meanings of complex expressions derive from the meanings of their parts and the way these are composed. However, the currently dominating theories of the syntax-semantics interface hastily relegate important aspects of meaning which cannot readily be aligned with visible structure to empty projecting heads non-reductively (mainstream Generative Grammar) or to the syntactic construction holistically (Construction Grammar). This book develops an alternative, compositional analysis of the hidden aspectual-temporal, modal and comparative meanings of a range of productive constructions of which pseudorefl exive, excessive and directional complement constructions take center stage. Accordingly, a contradiction-inducing hence semantically problematic part of literally

coded meaning is locally ignored and systematically realized "expatriately" with respect to parts of structure that achieve the indexical anchoring of propositional contents in terms of times, worlds and standards of comparison, thus yielding the observed hidden meanings.

The Berlin Reader Matthias Bernt 2014-03-31 By drawing together widely dispersed yet central writings, the Berlin Reader is an essential resource for everyone interested in urban development in one of the most interesting and important metropolises in Europe. It provides scholars as well as students, journalists and visitors with an overview of the most central discussions on the tremendous changes Berlin experienced since the fall of the wall. It covers a wide range of issues, including inner city renewal, housing and the local economy, gentrification and other urban conflicts. The book breaks ground in two dimensions: first, by offering also non-German speakers an insight into the very controversial debates after reunification, and, second, by highlighting the ambivalent consequences of Berlin's urban transformation in the past decades.

Frames interdisziplinär: Modelle, Anwendungsfelder, Methoden Alexander Ziem 2018-06-25 Das Frame-Konzept als kognitives RepraÌˆsentationsformat ist seit seiner EinfuÌˆhrung durch Minsky und Fillmore vielfach rezipiert und modifiziert worden. Dieser interdisziplinaÌˆr ausgerichtete Band vereint BeitraÌˆge aus so unterschiedlichen Disziplinen wie Linguistik, Philosophie, Medien-, Kommunikations- und Informationswissenschaften bis hin zur Klinischen Psychiatrie, die das Frame-Konzept aus grundlagentheoretischer sowie methodologischer Perspektive in den Blick nehmen, die aber auch verschiedene Anwendungsfelder fuÌˆr Frames erproben. The series 'Proceedings in Language and Cognition' explores issues of mental representation, linguistic structure and representation, and their interplay. The research presented in this series is grounded in the idea explored in the Collaborative Research Center 'The structure of representations in language, cognition and science' (SFB 991) that there is a universal format for the representation of linguistic and cognitive concepts.

Omar Khayyam Poems Omar Khayyam 2021-07-23 The poems attributed to Omar Khayyam have a universal and timeless philosophical theme: life is a meaningful journey even if brief and uncertain. They inspire an unconstrained free-thinking mindset and a wise realization that guides thinking persons: it is impossible to see the absolute truth, as the universe has its own reality that remains largely hidden, and that one must think and act accordingly. This book presents a selection of Khayyam's poems in their original Persian language along with their English translations in a faithful and modern version. By relying only on the original Persian version of Khayyam's poems, and using the author's own body of literary and linguistic knowledge, this book presents a modern translation of Omar Khayyam's poems since Edward Fitzgerald's Rubaiyat in 1859.

Qualitative Methods in Migration Studies Theodoros Iosifides 2011 Recent years have witnessed growing interest in a series of issues related to migration, including identity formation and change, the role of social capital and social networks, ethnic discrimination, racism and xenophobia, socio-political

participation and mobilisation and the complex nature of the causal mechanisms linked to migration - issues that are better highlighted and investigated using qualitative methods. Moving away from the quantitative and empiricist-positivist approaches that have often characterised migration research, "Qualitative Methods in Migration Studies" explores in a concise but comprehensive way the key issues involved in researching migratory phenomena in a qualitative manner. It addresses themes including the basic characteristics of contemporary migration, qualitative research into social processes related to migration, and the relationship between theory, research design and practice. Drawing upon empirical case studies and a series of real and hypothetical examples, this book develops a critical realist alternative both to empiricism and interpretivist, social constructionist and post-structuralist relativism in qualitative migration research. With special emphasis on the meta-theoretical dimensions of qualitative research practice, this volume connects qualitative findings to policy formation and 'politics making', exploring the multiple dimensions involved in researching migratory phenomena, such as ontology, epistemology, methodology, ethics and research practice. As such, it will be of interest to students and researchers in migration across the social sciences.

HM Government: Serious Organised Crime Strategy - Cm. 8715 Great Britain: Home Office 2013-10-07 This is a new strategy to deal with the challenges we face from serious and organised crime. It is published to coincide with the launch of the new National Crime Agency (NCA) and reflects changes to the threats faced and the lessons learned from previous work. Organised crime includes drug trafficking, human trafficking, and organised illegal immigration, high value fraud and other financial crimes, counterfeiting, organised acquisitive crime and cyber crime. The aim of the strategy is to substantially reduce the level of serious and organised crime affecting the UK and its interests. The strategy uses the framework developed for our counter-terrorist work and has four components: prosecuting and disrupting people engaged in serious and organised crime (Pursue); preventing people from engaging in this activity (Prevent); increasing protection against serious and organised crime (Protect); and reducing the impact of this criminality where it takes place (Prepare). The strategy lists strategic objectives under each of the four areas of work. Tactical operational objectives (e.g. priority crime groups) will be set by the NCA with law enforcement agency counterparts. Our immediate priority is the work set out under Pursue to prosecute and relentlessly disrupt organised criminals and reduce the threat they pose. Like other threats to our national security, serious and organised crime requires a response across the whole of government, and close collaboration with the public, the private sector and with many other countries

The Mozart Family Ruth Halliwell 1998 The family into which Mozart was born has never received a rigorous contextual study which does justice to the complexity of its relationships or to its interactions with colleagues, friends, and neighbours in Mozarts native city, Salzburg. Most biographies of Mozart have undervalued the manypassages in the rich family correspondence which do not bear directly on him. This book draws on the neglected material, most of which has never been translated into English. At the heart of the work is a detailed examination of the letters, supplemented by little-known archival material from thepapers of the Berchtold family, into which Mozarts sister Nannerl married. Additional information concerning Salzburg's local history, especially the working conditions at court and the provision for dependants of court employees, enables the hopes, expectations, and fears of the Mozarts to belocated in the context of the social conditions there. As well as providing a sympathetic account of the other members of the family, all of whom were profoundly affected by the experience of sharing

their lives with Mozart, this approach gives new significance to the events of Mozart's life; notonly are they set against the background of his familys expectations of him, but the ways in which the source material has to be used for this purpose necessarily involves fundamental improvements in its interpretation. Ruth Halliwell challenges most previous views of the characters in Mozart's family (especially of his father, Leopold), and of the relationships within it. She also introduces a wealth of characters from the Mozarts's circle in Salzburg, from chambermaids to princes, and demonstrates the relevanceof the gossip stories the Mozarts told about them to the larger outlook of the members of the family. In an important final section, Halliwell traces the roles of Nannerl and Mozart's wife Constanze in using, controlling, and handing on the biographical source material after Mozarts death. She discusses their dealings with publishers such as Breitkopf and Hartel, and with the authors of theearliest biographies of Mozart. This complex topic here receives an account which not only illuminates the characters of both women and the relations between them, but also addresses the question of how myths were able to creep into the Mozartian biography at so early a stage and take tenacioushold.

Autonomous Driving Markus Maurer 2016-05-21 This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving".

Modern German Grammar Ruth Whittle 2013-03-01 Modern German Grammar: A Practical Guide, Third Edition is an innovative reference guide to German, combining traditional and function-based grammar in a single volume. The Grammar is divided into two parts. Part A covers grammatical

categories such as word order, nouns, verbs and adjectives. Part B is organised according to language functions and notions such as: making introductions asking for something to be done delivering a speech possibility satisfaction. The book addresses learners' practical needs and presents grammar in both a traditional and a communicative setting. New to this edition, and building on feedback from the previous edition: The rules of the latest (and so far final) spelling reform have been implemented throughout. Examples of usage have been updated and consideration given to Swiss and Austrian variants. The chapter on register has been expanded and now includes youth language and frequently used Anglicisms in German. The Index now has even more key words; it has also been redesigned to differentiate between German words, grammar terms, and functions, thus making it more user-friendly. The Grammar assumes no previous grammatical training and is intended for all those who have a basic knowledge of German, from intermediate learners in schools and adult education to undergraduates taking German as a major or minor part of their studies. The Grammar is accompanied by a third edition of Modern German Grammar Workbook (ISBN 978-0-415-56725-1) which features exercises and activities directly linked to the Grammar. Ruth Whittle is Lecturer, John Klapper is Professor of Foreign Language Pedagogy, Katharina Glöckel is the Austrian Lektorin and Bill Dodd is Professor of Modern German Studies – all at the University of Birmingham. Christine Eckhard-Black is Tutor and Advisor in German at the Oxford University Language Centre.

Knowledge Representation and the Semantics of Natural Language Hermann Helbig 2006-01-27 Natural Language is not only the most important means of communication between human beings, it is also used over historical periods for the pres- vation of cultural achievements and their transmission from one generation to the other. During the last few decades, the ?ood of digitalized information has been growing tremendously. This tendency will continue with the globali- tion of information societies and with the growing importance of national and international computer networks. This is one reason why the theoretical und- standing and the automated treatment of communication processes based on natural language have such a decisive social and economic impact. In this c- text, the semantic representation of knowledge originally formulated in natural language plays a central part, because it connects all components of natural language processing systems, be they the automatic understanding of natural language (analysis), the rational reasoning over knowledge bases, or the g- eration of natural language expressions from formal representations. This book presents a method for the semantic representation of natural l- guage expressions (texts, sentences, phrases, etc.) which can be used as a u- versal knowledge representation paradigm in the human sciences, like lingu- tics, cognitive psychology, or philosophy of language, as well as in com- tational linguistics and in arti?cial intelligence. It is also an attempt to close the gap between these disciplines, which to a large extent are still working separately.

Exploring the Interior Karl S. Guthke 2018-05-24 In this fascinating collection of essays Harvard Emeritus Professor Karl S. Guthke examines the ways in which, for European scholars and writers of the eighteenth and early nineteenth century, world-wide geographical exploration led to an exploration

of the self. Guthke explains how in the age of Enlightenment and beyond intellectual developments were fuelled by excitement about what Ulrich Im Hof called "the grand opening-up of the wide world", especially of the interior of the non-European continents. This outward turn was complemented by a fascination with "the world within" as anthropology and ethnology focused on the humanity of the indigenous populations of far-away lands – an interest in human nature that suggested a way for Europeans to understand themselves, encapsulated in Gauguin's Tahitian rumination "What are we?" The essays in the first half of the book discuss first- or second-hand, physical or mental encounters with the exotic lands and populations beyond the supposed cradle of civilisation. The works of literature and documents of cultural life featured in these essays bear testimony to the crossing not only of geographical, ethnological, and cultural borders but also of borders of a variety of intellectual activities and interests. The second section examines the growing interest in astronomy and the engagement with imagined worlds in the universe, again with a view to understanding homo sapiens, as compared now to the extra-terrestrials that were confidently assumed to exist. The final group of essays focuses on the exploration of the landscape of what was called "the universe within"; featuring, among a variety of other texts, Schiller's plays The Maid of Orleans and William Tell, these essays observe and analyse what Erich Heller termed "The Artist's Journey into the Interior." This collection, which travels from the interior of continents to the interior of the mind, is itself a set of explorations that revel in the discovery of what was half-hidden in language. Written by a scholar of international repute, it is eye-opening reading for all those with an interest in the literary and cultural history of (and since) the Enlightenment.

Spaces and Identities in Border Regions Christian Wille 2015-11-30 Spatial and identity research operates with differentiations and relations. These are particularly useful heuristic tools when examining border regions where social and geopolitical demarcations diverge. Applying this approach, the authors of this volume investigate spatial and identity constructions in cross-border contexts as they appear in everyday, institutional and media practices. The results are discussed with a keen eye for obliquely aligned spaces and identities and relinked to governmental issues of normalization and subjectivation. The studies base upon empirical surveys conducted in Germany, France, Belgium and Luxembourg.

Friedrich Nietzsche (1844-1900) Jürgen Backhaus 2006-10-11 Friedrich Nietzsche's influence on the development of modern social sciences has not been well documented. This volume reconsiders some of Nietzsche's writings on economics and the science of state, pioneering a line of research up to now unavailable in English. The authors intend to provoke conversation and inspire research on the role that this much misunderstood philosopher and cultural critic has played – or should play – in the history of economics.

As German as Kafka Lene Rock 2019-12-10 Since the turn of the 21st century, countless literary endeavors by 'new Germans' have entered the spotlight of academic research. Yet 'minority writing', with its distinctive renegotiation of traditional concepts of cultural identity, is far from a recent phenomenon in German literature. A hundred years previously, the intense involvement of German-Jewish intellectuals in cultural and political discourses on Jewish identity put a clear stamp on German modernism. This book is the first to unfold literary parallels between these two riveting periods in German cultural history. Drawing on the philosophical oeuvre of Jean-Luc Nancy, a comparative reading of texts by, amongst others, Beer-Hofmann, Kermani, Özdamar, Roth, Schnitzler, and Zaimoglu examines a variety of literary approaches to the thorny issue of cultural identity, while developing an overarching perspective on the 'politics of literature'.

Competing Germanies Robert Kelz 2020-02-15 Following World War II, German antifascists and nationalists in Buenos Aires believed theater was crucial to their highly politicized efforts at community-building, and each population devoted considerable resources to competing against its rival onstage. Competing Germanies tracks the paths of several stage actors from European theaters to Buenos Aires and explores how two of Argentina's most influential immigrant groups, German nationalists and antifascists (Jewish and non-Jewish), clashed on the city's stages. Covered widely in German- and Spanish-language media, theatrical performances articulated strident Nazi, antifascist, and Zionist platforms. Meanwhile, as their thespian representatives grappled onstage for political leverage among emigrants and Argentines, behind the curtain, conflicts simmered within partisan institutions and among theatergoers. Publicly they projected unity, but offstage nationalist, antifascist, and Zionist populations were rife with infighting on issues of political allegiance, cultural identity and, especially, integration with their Argentine hosts. Competing Germanies reveals interchange and even mimicry between antifascist and nationalist German cultural institutions. Furthermore, performances at both theaters also fit into contemporary invocations of diasporas, including taboos and postponements of return to the native country, connections among multiple communities, and forms of longing, memory, and (dis)identification. Sharply divergent at first glance, their shared condition as cultural institutions of emigrant populations caused the antifascist Free German Stage and the nationalist German Theater to adopt parallel tactics in community-building, intercultural relationships, and dramatic performance. Its cross-cultural, polyglot blend of German, Jewish, and Latin American studies gives Competing Germanies a wide, interdisciplinary academic appeal and offers a novel intervention in Exile studies through the lens of theater, in which both victims of Nazism and its adherents remain in focus.

Strategies of Humor in Post-Unification German Literature, Film, and Other Media Jill Twark 2011-01-18 The fourteen chapters in this anthology feature original analyses of contemporary German-language literary texts, films, political cartoons, cabaret, and other types of performance. The artworks display a wide spectrum of humor modes, such as irony, satire, the grotesque, Jewish humor, and slapstick, as responses to unification with the accompanying euphoria, but also alienation and dislocation. Kerstin Hensel's Lärchenau, Christoph Hein's Landnahme, and vignette collections by Jakob Hein (Antrag auf ständige Ausreise und andere Mythen der DDR) and Wladimir Kaminer (Es gab keinen Sex im Sozialismus) are interpreted as examples of the grotesque. The popular films Lola rennt, Sonnenallee, Herr Lehmann, NVA, Alles auf Zucker!, and Mein Führer—Die wirklich wahrste Wahrheit über Adolf Hitler are reexamined through the lens of traditional and more recent humor or comic book theories. The contributors focus on how each artwork enriches four prominent postwall German cultural trends: post-unification identity reconstruction, Vergangenheitsbewältigung (including Hitler humor), New German Popular Literature (Christian Kracht's ironic subtexts), and immigrant perspectives (a "third voice" in the East-West binary reflected here pointedly in Eulenspiegel cartoons). To date, no other scholarly work provides as comprehensive an overview of the diverse strategies of humor used in the past two decades in German-speaking countries.

Narration and Hero Victor Millet 2014-07-28 By the early middle ages vernacular aristocratic traditions of heroic narration were firmly established in Western and Northern Europe. Although there are regional, linguistic and formal differences, one can observe a number of similarities. Oral literature disseminates a range of themes that are shared by narratives in most parts of the continent. In all the European regions, this tradition of heroic narration came into contact with Christianity, which led to modifications. Similar processes of adaptation and transformation can be traced everywhere in this field of early European vernacular narrative. But with the increasing specialization of academic fields over

the last half century, inter-disciplinary dialogue has become increasingly difficult. The volume is a contribution to renew the inter-disciplinary dialogue about common themes, topics and motifs in Nordic, Roman, Anglo-Saxon and Germanic literature, and about the different methodologies to explore them.

The (Mis)Behaviour of Markets Benoit B. Mandelbrot 2010-10-01 This international bestseller, which foreshadowed a market crash, explains why it could happen again if we don't act now. Fractal geometry is the mathematics of roughness: how to reduce the outline of a jagged leaf or static in a computer connection to a few simple mathematical properties. With his fractal tools, Mandelbrot has got to the bottom of how financial markets really work. He finds they have a shifting sense of time and wild behaviour that makes them volatile, dangerous - and beautiful. In his models, the complex gyrations of the FTSE 100 and exchange rates can be reduced to straightforward formulae that yield a much more accurate description of the risks involved.
