White Fragility Dr. Robin DiAngelo 2018-06-26 The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this “vital, necessary, and beautiful book” (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and “allows us to understand racism as a practice not restricted to ‘bad people’ (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

The 48 Laws Of Power Robert Greene 2010-09-03 THE MILLION COPY INTERNATIONAL BESTSELLER Drawn from 3,000 years of the history of power, this is the definitive guide to help readers achieve for themselves what Queen Elizabeth I, Henry Kissinger, Louis XIV and Machiavelli learnt the hard way. Law 1: Never outshine the master Law 2: Never put too much trust in friends; learn how to use enemies Law 3: Conceal your intentions Law 4: Always say less than necessary. The text is bold and elegant, laid out in black and red throughout and replete with fables and unique word sculptures. The 48 laws are illustrated through the tactics, triumphs and failures of great figures from the past who have wielded - or been victimised by - power. _____ (From the Playboy interview with Jay-Z, April 2003) PLAYBOY: Rap careers are usually over fast: one or two hits, then styles change and a new guy comes along. Why have you endured while other rappers haven't? JAY-Z: I would say that it's from still being able to relate to people. It's natural to lose yourself when you have success, to start surrounding yourself with fake people. In *The 48 Laws of Power*, it says the worst thing you can do is build a fortress around yourself. I still got the people who grew up with me, my cousin and my childhood friends. This guy right here (gestures to the studio manager), he's my friend, and he told me that one of my records, Volume Three, was wack. People set higher standards for me, and I love it.

REVIEWS FOR THE BOOK "Educative addition to the technical trader's shelf." — The Hindu Business Line "Clearly explains and reinforces the message of each candlestick pattern, pointing out other details that can help determine success or failure at each occurrence. The real life examples are manifold, well chosen and amplify the lessons being taught. Highly recommended reading for traders in all markets to discover ways of profiting from candlestick trading." — Alan Northcott "Sadekar's book not only manages to live upto the expectations but probably excels them. Sadekar attempts to keep things simple, and targets the beginner to intermediate level technician as his target audience. Each type of reversal, consolidation and continuation pattern is tackled in individual chapters and illustrated liberally with charts of Indian stocks. The author leaves ample strategies for the not so active trader, also combining Dow theory tools like trend lines, oscillators and moving averages with the oriental techniques. This gives the reader an immediate advantage of getting the best of both the worlds. While all chapters are interesting read, chapters 11 & 12 are the highlights of the book as they lay out a simple but actionable game plan for a trader and investor. As if the overall package was not sweet enough, Sadekar has compiled a tear-away candlestick ready-reckoner at the end of the book to identify emerging patterns in real time. At its price, the book is a value buy. All in all, a must read book for every freshman candle sticks trader." — Vijay L. Bhambwani, Technical Analyst, CEO - BSPLIndia.com

Doing School Denise Clark Pope 2008-10-01 This book offers a highly revealing and troubling view of today's high school students and the ways they pursue high grades and success. Denise Pope, veteran teacher and curriculum expert, follows five motivated and successful students through a school year, closely shadowing them and engaging them in lengthy reflections on their school experiences. What emerges is a double-sided picture of school success. On the one hand, these students work hard in school, participate in extracurricular activities, serve their communities, earn awards and honours, and appear to uphold school values. But on the other hand, they feel that in order to get ahead they must compromise their values and manipulate the system by scheming, lying, and cheating. In short, they do school, that is, they are not really engaged with learning nor can they commit to such values as integrity and community. The words and actions of these five students - two boys and three girls from diverse ethnic and socioeconomic backgrounds - underscore the frustrations of being caught in a grade trap that pins future success to high grades and test scores. Their stories raise critical questions that are too important for parents, educators, and community leaders to ignore. Are schools cultivating an environment that promotes intellectual curiosity, cooperation, and integrity? Or are they fostering anxiety, deception, and hostility? Do today's schools inadvertently impede the very values they claim to embrace? Is the success that current assessment practices measure the kind of success we want for our children?

The Complete Guide to Using Candlestick Charting Alan Northcott 2009 The investment world is full of different methods for understanding how to best grow your rates of return and minimize risk. The Candlestick Charting method, first developed by Japanese rice traders in the middle of the 19th century, has become one of the favorite modern methods of analyzing and understanding the market through careful plotting and analysis of the data provided. This book will guide you through the seemingly

complex, but revolutionary, useful method of candlestick charting to gain the highest possible rates of return while ensuring your risks are as minimal as possible. Candlestick charting is a complex language all in itself and for that reason, this book will guide you through the entire process of understanding the language, starting with the very origins of the technique. You will learn how it was developed and why it is still used today, including what changes have been made to the methods by Western investors. You will learn how the candlestick charts are prepared and what the different line constructions signify. Additionally, you will be shown how to read and differentiate between the different bodies, including the short and long white and black bodies, to measure high and low price levels, support, and resistance. You will be shown the various additional forms such as spinning tops, shadows, and doji. Next, the various different candle lines are outlined in full detail, showing you dozens of different formations including the single candle lines of "the hammer", "the hanging man", and "the shooting star", the dual candle lines of "dark cloud over", "the piercing pattern", "the engulfing pattern", "last engulfing pattern", and "harami". You will also learn the window candle lines, as well as the formations of three or more candle lines. Analysis of candle lines and the technical aspects, including how to discern stops, the risk/reward in each line, trends, the use of computers, and how to place and offset trades will supply you with the necessary information you need to read the candle lines. By interviewing dozens of experts in the reading and analysis of candle charts, this book is able to provide a comprehensive perspective of candle charts and how you can start using moving averages, analyzing three line break charts, renko charts, and kagi charts. You will be provided with practice charts for all three major types and additional resources to help you learn how to read and analyze each type. For anyone interested in the centuries old Japanese style of market analysis that is candlestick charting, this book provides a comprehensive overview from the very origins to the most modern of interpretations. Levin's retirement as president of Yale University, this captivating collection of speeches and essays from the past decade reflects both his varied intellectual passions and his deep commitment to university life and leadership. Whether discussing the economic implications of climate change or speaking to an incoming class of Yale freshmen, he argues for the vital importance of scholarship and the critical role that universities play in educating students and promoting the overall well-being of our society. This collection is a sequel to *The Work of the University*, which contained the principal writings from Levin's first decade as Yale's president, and it enunciates many of the same enduring themes: forging a strong partnership with the city of New Haven, rebuilding Yale's physical infrastructure, strengthening science and engineering, and internationalizing the university. Good to Great Jim Collins 2011-07-19 The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?
