**African Indigenous Knowledge and the Sciences** Gloria Emeagwali 2016-07-08 This book is an intellectual journey into epistemology, pedagogy, physics, architecture, medicine and metallurgy. The focus is on various dimensions of African Indigenous Knowledge (AIK) with an emphasis on the sciences, an area that has been neglected in AIK discourse. The authors provide diverse views and perspectives on African indigenous scientific and technological knowledge that can benefit a wide spectrum of academics, scholars, students, development agents, and policy makers, in both governmental and non-governmental organizations, and enable critical and alternative analyses and possibilities for understanding science and technology in an African historical and contemporary context.

Explaining Social Behavior Jon Elster 2015-07-28 In this new edition of his critically acclaimed book, Jon Elster examines the nature of social behavior, proposing choice as the central concept of the social sciences. Extensively revised throughout, the book offers an overview of key explanatory mechanisms, drawing on many case studies and experiments to explore the nature of explanation in the social sciences; an analysis of the mental states - beliefs, desires, and emotions - that are precursors to action; a systematic comparison of rational-choice models of behavior with alternative accounts, and a review of mechanisms of social interaction ranging from strategic behavior to collective decision making. A wholly new chapter includes an exploration of classical moralists and Proust in charting mental mechanisms operating 'behind the back' of the agent, and a new conclusion points to the pitfalls and

fallacies in current ways of doing social science, proposing guidelines for more modest and more robust procedures.

**A Tragedy of Lives** Chiedza Musengezi 2003 A collection of first-hand stories, based on interviews with former female prisoners, conducted by Zimbabwe Women's Writers. Each story is highly personal and particular. As a body, they document that women who find themselves in prison are often driven by circumstances into a situation where the emotional or material poverty of their lives makes breaking the law the only option. They illustrate how once in prison, women are subjected to punitive or demeaning action; and not infrequently, are regarded as pariahs by their families and friends, and society at large. The stories further shed light on the impact of imprisonment on the children of prisoners, who by virtue of the absence of their mothers, suffer deprivation, which limits their opportunities for a fulfilling life. The writers pose the challenges: how much responsibility should be borne by the culprits themselves; and how much are their failures an indictment against the whole society, outlining what might be done to prevent the so-called crime and create a more compassionate environment. The stories are supplemented with scholarly essays written by specialists in law, gender and prison reform, who raise some important general issues regarding women, criminal law and punishment regimes.

**The Circle** Dave Eggers 2013-10-08 A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our lives—a “compulsively readable parable for the 21st century” (Vanity Fair). When Mae Holland is hired to work for the Circle, the world’s most powerful internet company, she feels she’s been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users’ personal emails,

social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company's modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can't believe her luck, her great fortune to work for the most influential company in the world—even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman's ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.

West of Sunset Stewart O'Nan 2017-01-01 In 1937, F. Scott Fitzgerald was a troubled, uncertain man whose literary success was long behind him. In poor health, with his wife consigned to a mental asylum and his finances in ruin, he struggled to make a new start as a screenwriter in Hollywood. With flashbacks to key moments from Fitzgerald's past, the story follows him as he arrives on the MGM lot, falls in love with brassy gossip columnist Sheilah Graham, begins work on *The Last Tycoon*, and tries to maintain a semblance of family life with the absent Zelda and their daughter, Scottie. Written with striking grace and subtlety, this wise and intimate portrait of a man trying his best to hold together a world that's flying apart, if not gone already, is an American masterpiece.

The Uninhabitable Earth David Wallace-Wells 2020 "It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible. In California, wildfires now rage year-round, destroying thousands of homes. Across the US, "500-year" storms pummel communities month after month, and floods displace tens of millions annually. This is only a preview of the changes to come. And they are coming fast. Without a revolution in how billions of humans conduct their lives, parts of the Earth could become close to uninhabitable, and other parts horrifically inhospitable, as soon as the end of

this century. In his travelogue of our near future, David Wallace-Wells brings into stark relief the climate troubles that await -- food shortages, refugee emergencies, and other crises that will reshape the globe. But the world will be remade by warming in more profound ways as well, transforming our politics, our culture, our relationship to technology, and our sense of history. It will be all-encompassing, shaping and distorting nearly every aspect of human life as it is lived today. Like *An Inconvenient Truth* and *Silent Spring* before it, *The Uninhabitable Earth* is both a meditation on the devastation we have brought upon ourselves and an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation"--

The Mushroom at the End of the World Anna Lowenhaupt Tsing 2017-09-19 Matsutake is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the northern hemisphere. Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, *The Mushroom at the End of the World* presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.
