The Oxford Dictionary of the Christian Church Frank Leslie Cross 2005 Uniquely authoritative and wide-ranging in its scope, The Oxford Dictionary of the Christian Church is the indispensable one-volume reference work on all aspects of the Christian Church. It contains over 6,000 cross-referenced A-Z entries, and offers unrivalled coverage of all aspects of this vast and often complex subject, from theology; churches and denominations; patristic scholarship; and the bible; to the church calendar and its organization; popes; archbishops; saints; and mystics. In this revision, innumerable small changes have been made to take into account shifts in scholarly opinion, recent developments, such as the Church of England's new prayer book (Common Worship), RC canonizations, ecumenical advances and mergers, and, where possible, statistics. A number of existing articles have been rewritten to reflect new evidence or understanding, for example the Holy Sepulchre entry, and there are a few new articles, on Desmond Tutu and Padre Pio, for example. Perhaps most significantly, a great number of the bibliographies have been updated. Established since its first appearance in 1957 as an essential resource for ordinands, clergy, and members of religious orders; ODCC is an invaluable tool for academics, teachers, and students of church history and theology, as well as for the general reader. THEOLOGY- the development of doctrines throughout the ages, with their philosophical background and the different traditions of the major Churches- spirituality and heresy- history of the Reformation and Counter-Reformation PATRISTIC

SCHOLARSHIP: Fathers of the Church, on whose work later theology is founded, are covered in detail, for example- the Nag Hammadi papyri and their significance for our understanding of Gnosticism- the problems of Marcarius of Egypt and Macarius/Simeon are explored- the recently discovered sermons of Augustine are mentioned, with their places of publication listed
CHURCHES AND DENOMINATIONS- the beliefs and structures of both the mainstream and lesser-known denominations such as Amish, Muggletonians, Shakers, and Wee Frees- lengthy articles on the history of Christianity throughout the world, in countries such as Angola, Canada, Ireland, New Zealand, the Philippines, Poland, Spain, the United States, Vietnam, and Zaire
THE CHURCH CALENDAR AND ORGANIZATION- feast and saints' days- Sacraments- church services, offices, rites, and practices- canon law including Catholic revision- councils and synods- religious orders
THE BIBLE- individual Biblical Books- major figures from Abraham, Moses, and King David to St Paul and the Evangelists- schools of Biblical criticism and entries on their chief exponents
BIOGRAPHICAL ENTRIES- these are wide ranging and include saints, popes, patriarchs, and archbishops- emperors, kings, and other rulers- mystics, heretics, and reformers- theologians and philosophers, with a summary of their opinions- artists, poets, and musicians

Bulletin Boston Public Library 1894 Quarterly accession lists; beginning with Apr. 1893, the bulletin is limited to "subject lists, special bibliographies, and reprints or facsimiles of original documents, prints and manuscripts in the Library," the accessions being recorded in a separate classified list, Jan.-Apr. 1893, a weekly bulletin Apr. 1893-Apr. 1894, as well as a classified list of later accessions in the last number published of the bulletin itself (Jan. 1896)

Scientific and Technical Aerospace Reports 1977 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

1974 Annual Supplement Joan Schmitz Bergholt 2013-12-21

Muslims and Christians in Norman Sicily Dr Alexander Metcalfe 2014-01-21 The social and linguistic history of medieval Sicily is both intriguing and complex. Before the Muslim invasion of 827, the islanders spoke dialects of either Greek or Latin or both. On the arrival of the Normans around 1060 Arabic was the dominant language, but by 1250 Sicily was an almost exclusively Christian island, with Romance dialects in evidence everywhere. Of particular importance to the development of Sicily was the formative period of Norman rule (1061-1194), when most of the key transitions from an Arabic-speaking Muslim island to a 'Latin'-speaking Christian one were made. This work sets out the evidence for those changes and provides an authoritative approach that re-defines the conventional thinking on the subject.

Histoire Géographie 3e Christine Lécureux 2016-09-07 Le livre du professeur.

Arid and Semi-Arid Geomorphology Andrew S. Goudie 2013-05-27 Based on four decades of research by Professor Andrew Goudie, this volume provides a state-of-the-art synthesis of our understanding of desert geomorphology. It presents a truly international perspective, with examples from all over the world. Extensively referenced and illustrated, it covers such topics as the importance of past climatic changes, the variability of different desert environments, rock breakdown, wind erosion and dust storm generation, sand dunes, fluvial and slope forms and processes, the role of the applied geomorphologist in desert development and conservation, and the Earth as an analogue for other planetary bodies. This book is destined to become the classic volume on arid and semi-arid geomorphology for advanced students and researchers in physical geography, geomorphology, Earth science, sedimentology, environmental science and archaeology.

Kant: Natural Science Immanuel Kant 2012-10-04 Though Kant is best known for his strictly philosophical works in the 1780s, many of his early publications in particular were devoted to what we would call 'natural science'. Kant's *Universal Natural History and Theory of the Heavens* (1755) made a significant advance in cosmology, and he was also instrumental in establishing the newly emerging discipline of physical geography, lecturing on it for almost his entire career. In this volume Eric Watkins brings together new English translations of Kant's first publication, *Thoughts on the True Estimation of Living Forces* (1746–9), the entirety of *Physical Geography* (1802), a series of shorter essays, along with many of Kant's most important publications in natural science. The volume is rich in material for the student and the scholar, with extensive linguistic and explanatory notes, editorial introductions and a glossary of key terms.

Power from the North Caroline Desbiens 2013-05-15 In the 1970s, Hydro-Québec declared “We Are Hydro-Québécois.” The slogan symbolized the intimate ties that had emerged between hydroelectric development in the North and French Canadian aspirations in the South. Caroline Desbiens focuses on the first phase of the James Bay hydroelectric project to explore how this culture of hydroelectricity hastened the erasure of Aboriginal homelands and the manipulation of Northern Quebec’s material landscape. She concludes that truly sustainable resource development will depend on all actors bringing an awareness of their cultural histories and visions of nature, North, and nation to the negotiating table.
