Body of Art Phaidon Editors 2015-10-12 The first book to celebrate the beautiful and provocative ways artists have represented, scrutinized and utilized the body over centuries. Body of Art is the first book to explore the various ways the human body has been both an inspiration and a medium for artists over hundreds of thousands of years. Unprecedented in its scope, it examines the many different manifestations of the body in art, from Anthony Gormley and Maya Lin sculptures to eight-armed Hindu gods and ancient Greek reliefs, from feminist graphics and Warhol's empty electric chair to the blue-tinted complexion of Singer Sargent's Madame X. It is the most expansive examination of the human body in art, spanning western and non-western, ancient to contemporary, representative to abstract and conceptual. Over 400 artists are featured in chapters that explore identity, beauty, religion, absent body, sex and gender, power, body's limits, abject body and bodies & space. Works range from 11,000 BC hand stencils in Argentine caves to videos and performances by contemporary artists such as Marina Abramovic, Joan Jonas and Bruce Nauman. Its fresh, accessible and dynamic voice brings to life the thrilling diversity of both classical and contemporary art through the prism of the body. More than simply a book of representations, this is an original and thought provoking look at the human body across time, cultures and media.

Holbein Norbert Wolf 2017 Renaissance presence Hans Holbein the Younger, portraitist extraordinaire Religion, Renaissance, and Reformation—these three ideologies shaped the world of 16th-century portraitist Hans Holbein the Younger (1497/98–1543), a pivotal figure of the Northern Renaissance, whose skills took him to Switzerland, Belgium, Italy, and England, and garnered patrons and subjects as prestigious as Henry VIII, Thomas More, Anne of Cleves, and Reformation advocate Thomas Cromwell. While he started out with, and maintained, a repertoire of religious works, Holbein is regarded above all as one of the greatest portraitists in Western art history. His probing eye was matched with a draftsman mastery of line and an almost supernatural ability to control details, from the textures of luxurious clothing to the ornament of a room. He combined this meticulous mimesis with an inspired amalgam of regional painterly traits, combining Flemish-style realism, late medieval German composition, and Italian formal grandeur to astonishing effect. During his time in England, Holbein became official court painter to Henry VIII, producing both reformist propaganda and royalist paintings to bolster Henry's status as monarch and as the new Supreme Head of the Church following the English Reformation. His portrait of Henry from 1537 is regarded not only as a portraiture pinnacle but also as an iconic record of this transformative monarch and the Tudor dynasty. Through this turbulent period, Holbein also produced anticlerical woodcuts, and sketched and painted Lutheran merchants, visiting ambassadors, and Henry's notorious succession of wives. In this Basic Art introduction, we survey some of Holbein's key works from his illustrious and international career. Along the way, we discover a period as ripe with artistic innovation as with courtly drama and radical religious change, and an artist

Experiences in Translation Umberto Eco 2008-01-01 In this book Umberto Eco argues that translation is not about comparing two languages, but about the interpretation of a text in two different languages, thus involving a shift between cultures. An author whose works have appeared in many languages, Eco is also the translator of Gérard de Nerval's *Sylvie* and Raymond Queneau's *Exercices de style* from French into Italian. In *Experiences in Translation* he draws on his substantial practical experience to identify and discuss some central problems of translation. As he convincingly demonstrates, a translation can express an evident deep sense of a text even when violating both lexical and referential faithfulness. Depicting translation as a semiotic task, he uses a wide range of source materials as illustration: the translations of his own and other novels, translations of the dialogue of American films into Italian, and various versions of the Bible. In the second part of his study he deals with translation theories proposed by Jakobson, Steiner, Peirce, and others. Overall, Eco identifies the different types of interpretive acts that count as translation. An enticing new typology emerges, based on his insistence on a common-sense approach and the necessity of taking a critical stance.

The Plebeian Experience Martin Breugh 2013-12-10 How do people excluded from political life achieve political agency? Through a series of historical events that have been mostly overlooked by political theorists, Martin Breugh identifies fleeting yet decisive instances of emancipation in which people took it upon themselves to become political subjects. Emerging during the Roman plebs's first secession in 494 BCE, the plebeian experience consists of an underground or unexplored configuration of political strategies to obtain political freedom. The people reject domination through political praxis and concerted action, therefore establishing an alternative form of power. Breugh's study concludes in the nineteenth century and integrates ideas from sociology, philosophy, history, and political science. Organized around diverse case studies, his work undertakes exercises in political theory to show how concepts provide a different understanding of the meaning of historical events and our political present. The Plebeian Experience describes a recurring phenomenon that clarifies struggles for emancipation throughout history, expanding research into the political agency of the many and shedding light on the richness of radical democratic struggles from ancient Rome to Occupy Wall Street and beyond.

History of the Restoration and Conservation of Works of Art Alessandro Conti 2016-01-20 At times controversial and uncompromising, always intellectually honest, Alessandro Conti's book is - astonishingly - the only attempt to comprehensively chart in time, the changing impact of man's desire to preserve for future generations the materials, meaning and appearances of works of art. Remarkable in its meticulous research of source material and breadth of scope, *History of the Restoration and Conservation of Works of Arts*, translated by Helen Glanville, charts the practices and underlying philosophies of conservation and 'restored' works of art from the Middle Ages to the end of the nineteenth century. In English-speaking countries, a lack of foreign language skills leaves many unable to consult a wealth of both published and unpublished historical documentation. Developments in conservation have therefore tended toward the scientific and analytical. Access to such documentation leads to better understanding of the present appearance of works of art and of their changing aspect and

perception over time. Recent publications indicate that there is a great need for people writing on the subject to be aware of material which is not in their mother tongue: approaches presented as 'new' are in fact merely 'contemporary', and have been discussed or practiced in other centuries and countries. Just as knowledge of practices and effects of art conservation and restoration should form an integral part of History of Art Degrees, the more theoretic, abstract and historical aspects, should also be part of the training. This book is an invaluable source for academic and public institutions, art historians as well as practicing conservators and lovers of art.

Art Since 1900 Hal Foster 2005-05-01 A landmark in art history and the most anticipated art publishing event of the new millennium. In this groundbreaking and original work of scholarship, four of the most influential and provocative art historians of our time have come together to provide a comprehensive history of art in the twentieth century, an age when artists in the United States, Europe, and elsewhere sought to overturn the traditions of the past and expectations of the present in order to invent new practices and forms. Adopting a unique year-by-year approach, Foster, Krauss, Bois, and Buchloh present more than 100 short essays, each focusing on a crucial event--the creation of a seminal work, the publication of an artistic manifesto, the opening of a major exhibition--to tell the story of the dazzling diversity of practice and interpretation that characterizes the art of the period. All the turning points and breakthroughs of modernism and postmodernism are explored in depth, as are the frequent and sustained antimodernist reactions that proposed alternative visions of art and the world. Illustrating the authors' texts are more than 600 of the most important works of the century, many reproduced in full color. The book's flexible structure and extensive cross-referencing allow readers to follow any one of the many narratives that unfold, whether that be the history of a medium such as photography or painting, the development of art in a particular country, the influence of a movement such as surrealism or feminism, or the emergence of a stylistic or conceptual category like abstraction or minimalism. Boxes give further background information on the important figures and issues. In their insightful introductions, the four authors explain the different methods of art history at work in the book, providing the reader with the conceptual tools for further study. Two roundtable discussions --one at midcentury, the other at the close of the book--consider the questions raised by the preceding decades and look ahead to the art of the future. A glossary of terms and concepts completes this extraordinary volume. 600 illustrations, 400 in color. This college edition also includes the "Art 20" CD-ROM.
