*Lost Downtown* Peter Hujar 2016-02 It's a vanished world, and Peter Hujar was right there in it. The Lower East Side between 1972 and 1985 -- filled with artists, wannabe artists and hangers-on -- was a community of the misbegotten gathered from every town in America and relocated in the mean streets between Broadway and the Bowery. Nothing but their talent, their flamboyance, their rank gender-bending mockery and their arch irony supported them. Some made their names. Many came to grief. A few made art. In those days, the gutted streets of the Lower East Side looked like a war zone. Everyone lived and worked on the extreme outer margins of money and art, penniless and unknown. As a community, Downtown was a counterstatement to the rich New York of the banks, museums, media, corporations ... and the art world itself. That Downtown is forever gone. Time, gentrification, disease and death have taken their toll and turned this vibrant epoch into a chapter of art history. But before it

vanished, its extravagant cast sat for Peter Hujar's camera -- and is now alive again in front of our eyes. Featured among others: Joe Brainard, William Burroughs, Remy Charlip, Edwin Denby, Divine, Ray Johnson, Fran Lebowitz, Charles Ludlum, Susan Sontag, Paul Thek, John Waters, Robert Wilson, David Wojnarowicz.

*Nutrient Requirements of Dogs and Cats* National Research Council 2006-07-01  
Updating recommendations last made by the National Research Council in the mid-1980s, this report provides nutrient recommendations based on physical activity and stage in life, major factors that influence nutrient needs. It looks at how nutrients are metabolized in the bodies of dogs and cats, indications of nutrient deficiency, and diseases related to poor nutrition. The report provides a valuable resource for industry professionals formulating diets, scientists setting research agendas, government officials developing regulations for pet food labeling, and as a university textbook for dog and cat nutrition. It can also guide pet owners feeding decisions for their pets with information on specific nutrient needs, characteristics of different types of pet foods, and factors to consider when feeding cats and dogs.

**Pius IX** Roberto De Mattei 2004 The solemn beatification of Pope Pius IX in September 2000 celebrated the heroic virtue of one of the most influential figures of the nineteenth century. Born in 1792, Giovanni Maria Mastai Ferretti was elected Pope on June 16th 1846. His pontificate, the subject of this biographical study, lasted thirty-two years, the longest after that of St Peter himself. Elevated to the Papacy amid the historical backdrop of turmoil and revolution in Italy and Europe, he was also to play a central role in the drama of the Risorgimento that led to the creation of a united Italy. Publication of the English translation of Roberto de Mattei's acclaimed study of Pius IX marks the 150th anniversary of the Pope's solemn definition of the Dogma of Our Lady's Immaculate Conception. Roberto de Mattei holds the chair of Modern History at the University of Cassino (Rome), is vice president of the Italian C.N.R. (National Council for Research) and is well-known in Italy as a journalist and writer.

*Intellectual Property Rights and China* Bryan S. Bachner 2009 The aim of this book is to analyze the patent law that regulates traditional Chinese medicine and to suggest how it may be improved so as, on the one hand, to ensure that pharmaceutical firms have sufficient incentives to continue to research and develop traditional Chinese medicine while, on the other hand, to recognize the value of the authentic traditional contributions. This book raises to a new level the continuing discussion of the correlation between intellectual property rights and environmental law. In the establishment of the law

concerning intellectual property rights, the state is primarily concerned with creating incentives for invention through the assignment of property rights. In enacting environmental law, the state prioritizes the prevention of environmental injury by regulating the harmful by-products of a particular economic activity. A welcome addition to the literature, this study will be of interest to academics, practising lawyers, government legal advisors, and investors alike.

Introducing Shakespeare Nick Groom 2014-12-01 Shakespeare's absolute pre-eminence is simply unparalleled. His plays pack theatres and provide Hollywood with block-buster scripts; his works inspire mountains of scholarship and criticism every year. He has given us many of the very words we speak, and even some of the thoughts we think. Nick Groom and Piero explore how Shakespeare became so famous and influential, and why he is still widely considered the greatest writer ever. They investigate how the Bard has been worshiped at different times and in different places, used and abused to cultural and political ends, and the roots of intense controversies which have surrounded his work. Much more than a biography or a guide to his plays and sonnets, *Introducing Shakespeare* is a tour through the world of Will and concludes that even after centuries, Shakespeare remains the battlefield on which our very comprehension of humanity is being fought out.

**Indigenous Heritage and Intellectual Property** Silke von Lewinski 2008-01-01 For indigenous cultures, property is an alien concept. Yet the market-driven industries of the developed world do not hesitate to exploit indigenous raw materials, from melodies to plants, using intellectual property law to justify their behaviour. Existing intellectual property law, for the most part, allows industries to use indigenous knowledge and resources without asking for consent and without sharing the benefits of such exploitation with the indigenous people themselves. It should surprise nobody that indigenous people object. Recognizing that the commercial exploitation of indigenous knowledge and resources takes place in the midst of a genuine and significant clash of cultures, the eight contributors to this important book explore ways in which intellectual property law can expand to accommodate the interests of indigenous people to their traditional knowledge, genetic resources, indigenous names and designations, and folklore. In so doing they touch upon such fundamental issues and concepts as the following: collective rights to the living heritage; relevant human rights norms; benefit-sharing in biological resources; farmers rights; the practical needs of documentation, assistance, and advice; the role of customary law; bioprospecting and biopiracy; and public domain. As a starting point toward mutual understanding and a common basis for communication between Western-style industries and indigenous communities, *Indigenous Heritage and Intellectual Property* is of immeasurable value. It offers not only an in-depth evaluation of the current legal situation under national, regional and international law including analyses of the Convention on Biological Diversity and other international instruments, as well as initiatives of the World Intellectual Property Organization (WIPO), the UN Food and Agriculture Organization (FAO), and other international bodies but also probes numerous further possibilities. While no one concerned with indigenous culture or environmental issues can afford to ignore it, this book is also of special significance to practitioners and policymakers in intellectual property law in relation to indigenous heritage. This book, here in its second edition, presents the most recent state of knowledge in the field.

*Something Beautiful for God* Malcolm Muggeridge 1986-10-01 No woman alive today has inspired so many with her simplicity of faith and compassion so all-encompassing. As she daily embraces the "least of the least" in her arms,

Mother Theresa challenges the whole world to greater acts of service and understanding in the name of love. First published in 1971, this classic work introduced Mother Theresa to the Western World. As timely now as it was then, *Something Beautiful for God* interprets her life through the eyes of a modern-day skeptic who became literally transformed within her presence, describing her as "a light which could never be extinguished."

*Pavarotti* Luciano Pavarotti 1996 Every generation or so an opera singer attains the kind of public adulation and affection usually reserved for film stars or pop singers. Luciano Pavarotti reached this level of fame: he was the most celebrated tenor of all time, his concerts attended by thousands, his records selling millions of copies. In *Pavarotti: My World*, he talks candidly about his successes and trials, from his forays into popular music and his performances in China, to the boos he endured at La Scala, from the near-fatal illness of his youngest daughter, to his worldwide efforts to convert people to the joys of classical music and opera. Pavarotti's acclaimed autobiography shows us how this great artist felt about his extraordinary voice, how he saw his work and how he regarded his extraordinary position in the world of music and entertainment. Generously illustrated with photographs taken from Pavarotti's private collection, this is an intimate, absorbing and wonderfully honest account of an astonishing talent.

*Mother Teresa* Gëzim Alpion 2006-10-16 Mother Teresa was one of the most written about and publicised women in modern times. Apart from Pope John Paul II, she was arguably the most advertised religious celebrity in the last quarter of the twentieth century. During her lifetime as well as posthumously, Mother Teresa continues to generate a huge level of interest and heated debate. Gëzim Alpion explores the significance of Mother Teresa to the mass media, to celebrity culture, to the Church and to various political groups. A section explores the ways different vested interests have sought to appropriate her after her death, and also examines Mother Teresa's own attitude to her childhood and to the Balkan conflicts in the 1980s and 1990s. This book sheds a new and fascinating light upon this remarkable and influential woman, which will intrigue followers of Mother Teresa and those who study the vagaries of stardom and celebrity

culture.

**Intellectual Property and Human Development** Tzen Wong 2010-10-21 This book examines the social impact of intellectual property laws. It addresses issues and trends relating to health, food security, education, new technologies, preservation of bio-cultural heritage and contemporary challenges in promoting the arts. It explores how intellectual property frameworks could be better calibrated to meet socio-economic needs in countries at different stages of development, with local contexts and culture in mind. A resource for policy-makers, stakeholders, non-profits and students, this volume furthermore highlights alternative modes of innovation that are emerging to address such diverse challenges as neglected or resurgent diseases in developing countries and the harnessing of creative possibilities on the Internet. The collected essays emphasize not only fair access by individuals and communities to intellectual property – protected material, whether a cure, a crop variety, clean technology, a textbook or a tune – but also the enhancement of their own capabilities in cultural participation and innovation.

**St John of the Cross: His Life and Poetry** Gerald Brenan 1973-05-17 The paperback edition of a very successful and in some ways remarkable book, first published in 1973. Gerald Brenan is well known for his 'expository' works on Spanish history and literature, and now in his eighties he has returned to an early interest in the Spanish mystics to produce an absorbing study of St John of the Cross, one of the foremost of Catholic mystics and poets. The book is perhaps the first in English to combine an objective - but sensitive and lively - account of St John's life with a fresh translation (by Mr Brenan's associate Lynda Nicholson) of his verse.

Science and Pseudoscience in Clinical Psychology, First Edition Scott O. Lilienfeld 2012-02-21 This is the first major text designed to help professionals and students evaluate the merits of popular yet controversial practices in clinical psychology, differentiating those that can stand up to the rigors of science from those that cannot. Leading researchers review widely used therapies for alcoholism, infantile autism, ADHD, and posttraumatic stress disorder; herbal remedies for depression and anxiety; suggestive techniques for memory recovery; and self-help models. Other topics covered include issues surrounding psychological expert testimony, the uses of projective assessment techniques, and unanswered questions about dissociative identity disorder. Providing knowledge to guide truly accountable mental health practice, the volume also imparts critical skills for designing and evaluating psychological research programs. It is ideal for use in advanced undergraduate- and graduate-level courses in clinical psychology, psychotherapy, and evidence-based practice.
