Blues & Gospel Records, 1890-1943 Robert M. W. Dixon 1997 Since its first edition, in 1964, Dixon and Godrich's Blues and Gospel Records has been dubbed 'the bible' for collectors of pre-war African-American music. It provides an exhaustive listing of all recordings made up to the end of 1943 in a distinctively African-American musical style, excluding those customarily classed as jazz (which are the subject of separate discographies). The book covers recordings made for the commercial market (whether issued at the time or not) and also recordings made for the Library of Congress Archive of Folk Song and similar bodies -- about 20,000 titles in all, by more than 3,000 artists. For each recording session, full details are given of: artist credit, accompaniment, place and date of recording, titles, issuing company and catalogue numbers, matrix numbers and alternate takes. There are also short accounts of the major 'race labels', which recorded blues and gospel material,

and a complete list of field trips to the south by travelling recording units. Howard Rye has joined the original compilers for this thoroughly revised fourth edition. The scope has been enlarged by the addition of about 150 new artists, in addition to newly discovered recordings by other artists. Early cylinder recordings of gospel music, from the 1890s, are also included for the first time. Previous editions of this work were applauded for their completeness, accuracy, and reliability. This has now been enhanced by the addition of new information from record labels and from record company files, and by listening to a wide selection of titles, and detailed cross-checking.

A Catholic Book of Hymns Noel Jones 2021-02-04 Sacred Music Library's A Catholic Book of Hymns goes beyond merely being notes and words on a page for a congregation to sing. It has other books to assist organists in mastering the art of playing hymns by writing out the hymns as organ music. There are techniques that are required to play hymns. As organ teachers are even harder to find than organists today, we have created this book which simplifies the hymns while still supporting the singing of the hymns. Our regular ORGAN EDITION has the organist playing the same notes the people are singing, but adapted to the organ to make the organ sound at its best and fully support singing as a trained organist with years of experience would do. In this book we have preserved the Soprano Melody and the Bass Line exactly as they are in the hymn and composed a middle part to carry the harmony, derived from the Alto & Tenor parts. This makes playing the hymn much easier for the new organist or organists who are short on time to practice and prepare the hymns each week. And it also gives confidence to the new organist. To fulfill the needs of organists to accompany hymns, we offer two books with the hymns scored for organ - meaning that when an organist plays. We also provide suggested stop registration for all 295 hymns, once again, to give new organists suggestions that assist them in playing. For those who also play piano and keyboards for rehearsals and Mass, this book and the standard ORGAN EDITION can be very helpful as well. Hymnals are written for singers, not for organists pianists or keyboard players!
