Children with Developmental Disabilities S Venkatesan 2004-02-10 This manual is designed as a guide for parents, teachers and caregivers dealing with children up to the age of six who are afflicted by developmental disabilities. The author provides details of more than 400 non-formal activities along with guidelines on how to use them both at home and in pre-school settings. The book is divided into three sections: - the first describes a wide range of impairments, disabilities and handicaps along with information on their manifestations and characteristics. The author also outlines steps to handle negative or problem behaviour during training. - the next section presents a Comprehensive Activity Checklist for pre-school children. All items have been empirically tested and are located on a scale of increasing difficulty. - the third section comprises two chapters. The first is a `do-it-yourself` activity assistance guide which will be of immense use to trainers, caregivers, teachers and parents. In the last chapter, Dr Venkatesan discusses contemporary problems and issues related to the rights and privileges of persons with developmental disabilities in India.

IEP Goal Writing for Speech-Language Pathologists Lydia Kopel 2020-06-15 IEP Goal Writing for Speech-Language Pathologists: Utilizing State Standards, Second Edition familiarizes the speech-language pathologist (SLP) with specific Early Learning Standards (ELS) and Common Core State Standards (CCSS) as well as the speech-language skills necessary for students to be successful with the school curriculum. It also describes how to write defensible Individualized Education Plan (IEP) goals that are related to the ELS and CCSS. SLPs work through a set of steps to determine a student's speech-language needs. First, an SLP needs to determine what speech-language skills are necessary for mastery of specific standards. Then, the SLP determines what prerequisite skills are involved for each targeted speech-language skill. Finally, there is a determination of which Steps to Mastery need to be followed. It is through this process that an SLP and team of professionals can appropriately develop interventions and an effective IEP. The text takes an in-depth look at the following speech-language areas: vocabulary, questions, narrative skills/summarize, compare and contrast, main idea and details, critical thinking, pragmatics, syntax and morphology, and articulation and phonological processes. These areas were selected because they are the most commonly addressed skills of intervention for students aged 3 to 21 with all levels of functioning. For each listed area, the text analyzes the prerequisite skills and the corresponding Steps to Mastery. It provides a unique, step-by-step process for transforming the Steps to Mastery into defensible IEP goals. The key is to remember that the goal must be understandable, doable, measurable, and achievable. This text provides clear guidelines of quantifiable building blocks to achieve specific goals defined by the student's IEP. School-based SLPs are instrumental in helping students develop speech and language skills essential for mastery of the curriculum and standards. All SLPs working with school-aged children in public schools, private practice, or outpatient clinics will benefit from the information in this text. New to the Second Edition: * Ten Speech and Language Checklists for determining speech and language needs of an individual, 3–21 years of age, as well as measuring progress. * Material on measuring progress including five performance updates. * Goal writing case studies for four students of different ages and skill levels. * A thoroughly updated chapter on writing goals with up-to-date examples. * Revised Prerequisite Skills and Steps to Mastery to reflect the current state of research. * Expanded focus on evidence-based practice. Disclaimer: Please note that ancillary content (such as documents, audio, and video, etc.) may not be included as published in the original print version of this book.

The Marshmallow Incident Judi Barrett 2010-11-01 From the creators of the bestseller CLOUDY WITH A CHANCE OF MEATBALLS comes another zany, laugh-out-loud picture book! The Town of Left and the Town of Right are separated by a dotted yellow line, and no one on either side can remember how things got to be this way! One day, an unlucky citizen crosses the line--forcing the Order of the Ambidextrous Knights who guard the border to take action. Unfortunately, the only ammunition they have around is marshmallows--50,000 boxes worth! So begins the Marshmallow Incident, a tale of Left and Right, and Right and Wrong, with an incredibly silly but delicious dose of Mallo-Puffs and Marsh-Pillows thrown in. Kids will read it once and then beg for s'more!

Journey to Literacy: No Worksheets Required Krista Flemington 2011 "The play-based learning and individualized strategies in this practical book build on the wide range of literacy skills present in the kindergarten classroom. This resource explores simple ways to use traditional learning centres to provide children with real and authentic reasons to listen, speak, read, write, and

view. Teachers will find a wealth of resources for creating meaningful learning experiences, including: answers to often-asked questions; milestones to inform teaching instruction; activities and games for both individuals and groups, and literacy extensions that involve children with quality literature, authentic artifacts, and recordings This highly readable book will support teachers as they move beyond worksheets and nurture students on their journey to lifelong literacy."--Publisher.

Method Mania Lynne Ecenbarger 2007-10 Success in school, in work, and in life can be greatly enhanced by the ability to write effectively. And due to the writing process revolution we are gradually improving the quality of writing. The writing process focuses on exploring metacognitively what writers actually do throughout a writing task; how real writers go about constructing texts. Teachers work closely with students, helping them to understand writing as a communication and learning process. The importance of the creation, expression, and comprehension of meaning is emphasized throughout the process. Because writing is a complex process, students need to progress through a number of levels, not necessarily in a linear fashion, to experience the process. Too often students approach writing with a "one and done" mentality, failing to recognize that complex writing cannot be accomplished in a single sitting, in a single draft. We need to help them realize that successful writers are reflective about their writing processes and habits, learning what procedures work best and adapting them to suit particular situations. The best forum for implementing the writing process into the classroom is through a writer's workshop. A typical writer's workshop is a block of time scheduled each day for students to work through the steps in the process. It is important to remember that writing should extend across the curriculum. If a block of writing time can't be scheduled for one day it should be integrated into another subject. Writing should be viewed as a means of communicating and emerge naturally out of other activities. Teachers should make writing so integral to each lesson that the flow of the class is smooth from mental to verbal to written communication. Teachers using the workshop approach do not ignore the product and parts of language. Instead, the product is considered within the process. Grammar and mechanics are taught in the context of use. In the past, the teaching of formal grammar usually displaced some instruction and practice in actual composition. Unfortunately, with our overcrowded curriculum, teachers can't afford to spend excessive class time on decontexualized grammar exercises that involve little or no actual composition. Students should be given daily opportunities to explore writing and create written text for various purposes. We know that writing is a powerful tool that can influence others and clarify one's own thoughts. Teaching the writing process through the workshop approach can give students the key to unlocking this powerful tool. And the activities in this book are designed to help make the process easier for teachers to pick up and implement today. You will find over 200 mini lessons designed to stimulate critical and creative thinking that can be applied to written composition in all phases of the writing process. Students will continue to recognize that adults who use these activities in the context of authentic literacy lessons are those who are committed to facilitating and promoting only

the very best of writers.

Semantic Processing and Word Finding Difficulty Across the Lifespan Pei-Fang Hung 2021-11-30 For readers looking to understand lexical access and word-finding difficulty (WFD), Semantic Processing and Word Finding Difficulty Across the Lifespan: A Practical Guide for Speech-Language Pathologists provides a comprehensive review of current research and clinical approaches to establish a holistic, interdisciplinary understanding of lexical access and retrieval difficulty across different communication disorders. By including practical guidelines and protocols, this professional text can help speech-language pathologists (SLPs) and other related professionals bridge the gap between research and clinical practice. This text covers a wide range of communication disorders, including developmental language disorder, autism spectrum disorder, aphasia, normal aging, and dementia. It illustrates the connections between the research evidence and clinical practice and addresses lexical learning and retrieval difficulty through a holistic lens and cognitive-linguistic frameworks. This text integrates research evidence from a variety of disciplines, including speech-language pathology, linguistics, neuroscience, and psychology. The authors take readers for a deep dive into different underlying problems that lead to lexical access and retrieval difficulty and strategies to remediate them effectively. By addressing lexical issues from a broader view, this unique resource helps readers see the connections from different perspectives to further understand the complex issues involved in lexical learning and retrieval. Key Features: * A discussion of lexical learning and expansion from birth to school-age by incorporating metalinguistic skills and considering the relationships between language domains. * An exploration of contributing factors to lexical learning and word retrieval. * A holistic review of standardized and nonstandard measures for the breadth and depth of lexical access and retrieval across the lifespan and for people with diverse cultural and linguistic backgrounds. * A comprehensive review of current available evidence-based and semantic-focused interventions for both developmental and neurogenic communication disorders. * Chapter summaries and discussion questions close each chapter. * Clinical implication sections help connect research to clinical practice. * Therapy plan examples for commonly implemented lexical intervention approaches. Disclaimer: Please note that ancillary content (such as documents, audio, and video, etc.) may not be included as published in the original print version of this book.
