Photography and the Old West Karen Current 1978 This work is an explanation of the role of the nineteenth-century photographer as a conscious historian of the West - a recorder of events, people, and places as surely as they were the diary-keepers, journalists, and writers. Like them, he exercised choice in what he recorded; unlike them, he documented aspects of reality that we can know in no other way. Photographers as documenters are too often casually, even carelessly, regarded. *Photography And The Old West* is intended to convey as clearly as possible how people learned to use a camera and became camera-wise in an individual way; how tools and materials affected photographic seeing; and what a few of the many photographers hoped to express. This work is not a comprehensive survey but rather a selective look at some of the imagery of the West that a few conscious photographers produced.

The End of Indian Kansas H. Craig Miner 1978 Miner and Unrau show Kansas at midcentury to be a moral testing ground where the drama of Indian inheritance was played out. They related how railroad men, land speculators, and timber operations came to be firmly entrenched on Indian land in territorial Kansas.

Great Lakes Ore Docks and Ore Cars Patrick Dorin 2007-09-27 The iron mining industry was quite extensive throughout the area known as the Lake Superior Iron Ore District, which included Michigan, Wisconsin, Minnesota and Ontario and other prominent iron mining regions to the northeast and east of Lake Superior in Ontario as well Quebec and Labrador. All of the iron ore was transported by rail to a wide number of lake ports on Lake Superior, Lake

Michigan and Lake Huron. This book lists all of the ore docks constructed on the Great Lakes, as well as their operational life span right up to the present time. Each chapter for each railroad includes the types of ore docks once or currently operated as well as a roster of ore cars from the 1940s to the present time, and includes photos of the ore docks and ore cars, ore car schematics and pertinent data. It also provides some new perspectives for historical and future research, and can be used for the art work of model railroading.

Chicago Stations & Trains Photo Archive John Kelly 2008-05-15 No other American city had such a fascinating group of railroad passenger stations as Chicago. This book highlights Chicago's six major railroad stations and the trains that served them. Included are Dearborn Station, Grand Central Station, Central Station, La Salle Street Station, North Western Station, and Union Station. During the heyday of passenger trains, Chicago was the undisputed rail center of the United States and its railroad stations were the gates to everywhere. Chicago's railroad stations featured superb architecture with marble floors and staircases, while restaurants, newsstands and shops filled the concourse areas. Steel latticework beams helped support glass-domed roofs and public address systems echoed train information throughout the high-ceiling stations. Huge station clocks loomed above the brass and neon train bulletin boards that listed "On Time" trains. Beyond the boarding gates, the constant parade of trains sounded with clanging bells and rumbling steel wheels. Historic photographs feature name trains like Super Chief, Capitol Limited, 20th Century Limited, Broadway Limited, California Zephyr, Hiawatha, 400, and City of Denver. Included are maps, station drawings, timetables and promotional advertising.

The Iron Way William G. Thomas 2011-10-25 How railroads both united and divided us: "Integrates military and social history...a must-read for students, scholars and enthusiasts alike."—Civil War Monitor Beginning with Frederick Douglass's escape from slavery in 1838 on the railroad, and ending with the driving of the golden spike to link the transcontinental railroad in 1869, this book charts a critical period of American expansion and national formation, one largely

dominated by the dynamic growth of railroads and telegraphs. William G. Thomas brings new evidence to bear on railroads, the Confederate South, slavery, and the Civil War era, based on groundbreaking research in digitized sources never available before. The Iron Way revises our ideas about the emergence of modern America and the role of the railroads in shaping the sectional conflict. Both the North and the South invested in railroads to serve their larger purposes, Thomas contends. Though railroads are often cited as a major factor in the Union's victory, he shows that they were also essential to the formation of "the South" as a unified region. He discusses the many—and sometimes unexpected—effects of railroad expansion, and proposes that America's great railroads became an important symbolic touchstone for the nation's vision of itself. "In this provocative and deeply researched book, William G. Thomas follows the railroad into virtually every aspect of Civil War history, showing how it influenced everything from slavery's antebellum expansion to emancipation and segregation—from guerrilla warfare to grand strategy. At every step, Thomas challenges old assumptions and finds new connections on this much-traveled historical landscape."—T.J. Stiles, Pulitzer Prize-winning author of *The First Tycoon: The Epic Life of Cornelius Vanderbilt*

Walker Evans Walker Evans 2000 Walker Evans, America's preeminent "documentary artist", has profoundly changed the way Americans look at themselves and their country. The authors document Evans' monumental career and present scores of his never-before-published pictures, drawn from the largest private collection of his work in the world. 160 duotones.

The Challenge of Crime in a Free Society United States. President's Commission on Law Enforcement and Administration of Justice 1967 This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and

delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

Chicago & North Western Passenger Trains of the 400 Fleet Photo Archive John Kelly 2006-04-19 The Chicago & North Western was well-known for its Chicago-Twin Cities 400 passenger train. Encouraged by the success of the Twin Cities 400, the North Western established an entire fleet of regional streamliners that brought people from Madison, Milwaukee, Green Bay, Wisconsin's North Woods, Upper Michigan, and southern Minnesota into the big city of Chicago for a day of shopping or business. The yellow-and-green 400 Fleet had a loyal following of passengers not served by rivals Burlington Route and Milwaukee Road. "Ride the 400", "Speed, Luxury and Safety", "400 Miles in 400 Minutes" and "The Train that Set the Pace for the World" were successful advertising slogans for business and vacation travelers. Coverage includes the Twin Cities 400, Minnesota 400, Peninsula 400, Flambeau 400, Kate Shelley 400, and commuter streamliners.

Railfan & Railroad 2005

Annals of Iowa 2003

Grand Excursion Steven James Keillor 2004 "In June 1854, to celebrate completion of the first railroad to reach the Mississippi River, the owners of the Chicago & Rock Island invited hundreds of shareholders, bondholders, notables, and fashionables to travel by rail to Rock Island, Illinois, and from there by steamboat to St. Anthony Falls in fledgling Minnesota ... Relying largely on the excursionists' own accounts of the roundtrip journey, Steven Keillor's portrait of a week in the lives of this microcosm of antebellum society captures the prevailing sectionalism, the railroad-driven economy, reform movements, the ongoing literary renaissance, westward expansion, the second-party system, the postmillennial optimism and pre-Darwinian religious fervor, the gradually changing notions of gender and class, and the romantic idealism of this period before realism." -- jacket.

Historical Painting Techniques, Materials, and Studio Practice Arie Wallert 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium--designed for art historians, conservators, conservation scientists, and museum curators worldwide--was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original

techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.
