Malpertuis Jean Ray 1998 One of the most famous gothic/uncanny novels of 20th century French writing, Ray's work has been compared to the best of Lovecraft and Meyrink and has never been out of print since its first publication in 1943. The author was a man surrounded by as much mystery as the bizarre old mansion of Malpertuis where the insane and horrific events of this novel ineluctably unfold. Fellow writer, Thomas Owen, said of him: Jean Ray was a Gothic personality. He had about him a touch of the damned priest or the cathedral gargoyle.'

An Egyptian Novel Orly Castel-Bloom 2017-07-21 The protagonist has Egyptian roots going back many generations: on her father's side, to the expulsion of the Jews of Spain in 1492, when seven brothers of the Kastil family (from Castilla) landed on the Gaza coast after many trials and tribulations. Her mother's side goes back even further, to the only family that Jewish history has ignored: the ones who said "No" to Moses and stayed in Egypt. After migrating to Israel in the 1950s and settling on a kibbutz—from which they were soon expelled for Stalinism—this storied clan moved to Tel Aviv. In this unconventional family saga, Orly Castel-Bloom blends fact with fiction, history with legend, reimagining the lives of her forebears in unforgettable prose.

Music in Cinema Michel Chion 2021-10-12 Michel Chion is renowned for his explorations of the significance of frequently overlooked elements of cinema, particularly the role of sound. In this inventive and inviting book, Chion considers how cinema has deployed music. He shows how music and film not only complement but also transform each other. The first section of the book examines film music in historical perspective, and the second section addresses the theoretical implications of the crossover between art forms. Chion discusses a vast variety of films across eras, genres, and continents, embracing all the different genres of music that filmmakers have used to tell their stories. Beginning with live accompaniment of silent films in early movie houses, the book analyzes Al Jolson's performance in *The Jazz Singer*, the zither in *The Third Man*, Godard's patchwork sound editing, the synthesizer welcoming the flying saucer in *Close Encounters of the Third Kind*, and the Kinshasa orchestra in *Félicité*, among many more. Chion considers both original scores and incorporation of preexisting works, including the use and reuse of

particular composers across cinematic traditions, the introduction of popular music such as jazz and rock, and directors' attraction to atonal and dissonant music as well as musique concrète, of which he is a composer. Wide-ranging and original, *Music in Cinema* offers a welcoming overview for students and general readers as well as refreshingly new and valuable perspectives for film scholars.

Disaster Falls Stéphane Gerson 2017-01-24 A haunting chronicle of what endures when the world we know is swept away On a day like any other, on a rafting trip down Utah's Green River, Stéphane Gerson's eight-year-old son, Owen, drowned in a spot known as Disaster Falls. That night, as darkness fell, Stéphane huddled in a tent with his wife, Alison, and their older son, Julian, trying to understand what seemed inconceivable. "It's just the three of us now," Alison said over the sounds of a light rain and, nearby, the rushing river. "We cannot do it alone. We have to stick together." Disaster Falls chronicles the aftermath of that day and their shared determination to stay true to Alison's resolution. At the heart of the book is an unflinching portrait of a marriage tested. Husband and wife grieve in radically different ways that threaten to isolate each of them in their post-Owen worlds. ("He feels so far," Stéphane says when Alison shows him a selfie Owen had taken. "He feels so close," she says.) With beautiful specificity, Stéphane shows how they resist that isolation and reconfigure their marriage from within. As Stéphane navigates his grief, the memoir expands to explore how society reacts to the death of a child. He depicts the "good death" of his father, which reveals an altogether different perspective on mortality. He excavates the history of the Green River—rife with hazards not mentioned in the rafting company's brochures. He explores how stories can both memorialize and obscure a person's life—and how they can rescue us. Disaster Falls is a powerful account of a life cleaved in two—raw, truthful, and unexpectedly consoling.

Manual Sign Acquisition in Children with Developmental Disabilities Nicola Grove 2019 Manual signs are used worldwide to support the communication and language development of children who have developmental disabilities. This book provides an overview of forty years of research and practice by recognised experts, from a developmental perspective. Uniquely, the book includes contributions on both sign languages and sign systems, linking the two fields of Deaf studies and Augmentative and Alternative Communication which have historically been seen as separate. This text is the most authoritative single text to date on the topic, providing an invaluable resource for speech pathologists, researchers, psychologists and educators. The main sections of the book include: the typical development of sign language and of gesture; literature reviews on sign acquisition in children with disabilities such as Down syndrome, autism spectrum disorders, Llandau Kleffner syndrome and deaf blindness. An important chapter deals with the latest research on sign language impairments in deaf children with developmental language difficulties, or autism spectrum disorders. The third section of the book addresses assessment and intervention, covering vocabulary, sign production difficulties and intelligibility, grammar and multi-signing, and pragmatics and discourse skills. The final two sections are concerned with use of signs in context: in the home, in school, and in different cultures. Throughout, care is taken to ensure that the voices of users are present and vivid, whether these be family members, teaching staff or the children themselves, with an entire chapter given over to an interview with a young adult's reflections on her use of sign since childhood. The book concludes with a call for a multimodal perspective on augmentative communication to be adopted in the future.

Medical Migration: Martine Rutten 2008 This paper seeks to determine the macro-economic impacts of migration of skilled medical personnel from a receiving country's perspective. The resource allocation issues are explored in theory, by developing an extension of the Rybczynski theorem in a low-dimension Heckscher-Ohlin framework, and empirically, by developing a static computable general equilibrium model for the United Kingdom with an extended health sector component. Using simple diagrams, an expansion of the health sector by recruiting immigrant skilled workers in certain cases is shown to compare favorably to the (short-term) long-term alternative of using domestic (unskilled) workers. From a formal analysis, changes in non-health outputs are shown to depend on factor-bias and scale effects. The net effects generally are indeterminate. The main finding from the applied model is that importing foreign doctors and nurses into the United Kingdom yields higher overall welfare gains than a generic increase in the National Health Service budget. Welfare gains rise in case of wage protection.

Mudwoman Joyce Carol Oates 2012-03-20 "Oates is just a fearless writer...with her brave heart and her impossibly lush and dead-on imaginative powers." –Los Angeles Times "[An] extraordinarily intense, racking, and resonant novel." –Booklist (starred review) One of the most acclaimed writers in the world today, the inimitable Joyce Carol Oates follows up her searing, New York Times bestselling memoir, *A Widow's Story*, with an extraordinary new work of fiction. *Mudwoman* is a riveting psychological thriller, taut with dark suspense, that explores the high price of repression in the life of a respected university president teetering on the precipice of a nervous breakdown. Like Daphne DuMaurier's gothic masterwork, *Rebecca*, and the classic ghost story, *The Turn of the Screw*, by Henry James, Oates's *Mudwoman* is a chilling page-turner that hinges on the power of the imagination and the blurry lines between the real and the invented—and it stands tall among the author's most powerful and beloved works, including *The Falls*, *The Gravedigger's Daughter*, and *We Were the*

Mulvaney's.

Borders Wilfried N'Sondé 2021-02-10 In *Borders*, Jean-Michel André questions the notion of border, a question which takes the form of a wandering, whose starting point is in the Jungle of Calais on the eve of the evacuation of the slum in 2016. André pursued the project over three years in France, Italy, Spain and Tunisia - anywhere there were refugees in search of shelter, anywhere there were men, women and children brought together by the same hope of crossing one final stretch of water. With these images of the Jungle, he mixes various fragments of landscapes to form a visual palimpsest. These silent places never cease to signify partition, rupture and desolation and exhale the vertigo of emptiness. Desires from elsewhere become dust and smoke in these spaces where the human figure, photographed isolated and from behind, is located on a threshold, between reality and imagination, memory and present. With accompanying texts by writer Wilfried N'Sondé, whose novels follow similar themes, together André and N'Sondé combine their disciplines the creation being *Borders* which is neither a linear series nor narrative - rather a collection of works.

Attachment Therapy with Adolescents and Adults Dorothy Heard 2018-03-21 This is a revised edition of an important title originally published in 2009. It is written primarily for psychotherapists and other practitioners and describes a new and effective form of dynamic therapy designed for working with adults and with adolescents. The theory, on which the new form of therapy is based, is centred in a paradigm that extends and crucially alters the paradigm for developmental psychology opened by the Bowlby/Ainsworth attachment theory. It describes a pre-programmed process, the dynamics sustaining attachment and interest sharing, which is activated as soon as people perceive that they are in danger. This process is made up of seven pre-programmed systems which interact with one another as an integrated whole. They include Bowlby's two complementary goal-corrected behavioural systems: attachment (also referred to as careseeking) and caregiving. Whenever the process is able to function effectively, it enables people to adapt more constructively and co-operatively to changing circumstances.

The Book of Pearl Timothee de Fombelle 2018-02-06 In prose as magical and intricate as the tale it tells, Timothée de Fombelle delivers an unforgettable story of a first love that defines a lifetime. Joshua Pearl comes from a world that we no longer believe in – a world of fairy tale. He knows that his great love waits for him there, but he is stuck in an unfamiliar time and place – an old-world marshmallow shop in Paris on the eve of World War II. As his memories

begin to fade, Joshua seeks out strange objects: tiny fragments of tales that have already been told, trinkets that might possibly help him prove his own story before his love is lost forever. Sarah Ardizzone and Sam Gordon translate the original French into a work both luminous and layered, enabling Timothée de Fombelle's modern fairy tale to thrum with magic. Brimming with romance and history, mystery and adventure, this ode to the power of memory, storytelling, and love will ensnare any reader's imagination, and every reader's heart.

The France of the Little-Middles Marie Cartier 2016-08-01 The Poplars housing development in suburban Paris is home to what one resident called the "Little-Middles" – a social group on the tenuous border between the working- and middle- classes. In the 1960s The Poplars was a site of upward social mobility, which fostered an egalitarian sense of community among residents. This feeling of collective flourishing was challenged when some residents moved away, selling their homes to a new generation of upwardly mobile neighbors from predominantly immigrant backgrounds. This volume explores the strained reception of these migrants, arguing that this is less a product of racism and xenophobia than of anxiety about social class and the loss of a sense of community that reigned before.

Crow Gulch Douglas Walbourne-Gough 2019-09-17 From the author: I cannot let the story of Crow Gulch -- the story of my family and, subsequently, my own story -- go untold. This book is my attempt to resurrect dialogue and story, to honour who and where I come from, to remind Corner Brook of the glaring omission in its social history. "These deeply engaging poems -- courageous, shrewdly observed, disillusioned -- give sharp, personal expression to the harsh-beautiful landscape of western Newfoundland, and the human community precariously, stubbornly rooted there." -- John Steffler In his debut poetry collection, Douglas Walbourne-Gough reflects on the legacy of a community that sat on the shore of the Bay of Islands, less than two kilometres west of downtown Corner Brook. Crow Gulch began as a temporary shack town to house migrant workers in the 1920s during the construction of the pulp and paper mill. After the mill was complete, some of the residents, many of Indigenous ancestry, settled there permanently -- including the poet's great-grandmother Amelia Campbell and her daughter, Ella -- and those the locals called the "jackytars," a derogatory epithet used to describe someone of mixed French and Mi'kmaq descent. Many remained there until the late 1970s, when the settlement was forcibly abandoned and largely forgotten. Walbourne-Gough lyrically sifts through archival memory and family accounts, resurrecting story and conversation, to patch together a history of a people and place. Here he finds his own identity within the legacy of Crow Gulch and reminds those who have forgotten of a glaring omission in history.

The Quantum World Bernard d'Espagnat 2017-05-08 In this largely nontechnical book, eminent physicists and philosophers address the philosophical impact of recent advances in quantum physics. These are shown to shed new light on profound questions about realism, determinism, causality or locality. The participants contribute in the spirit of an open and honest discussion, reminiscent of the time when science and philosophy were inseparable. After the editors' introduction, the next chapter reveals the strangeness of quantum mechanics and the subsequent discussions examine our notion of reality. The spotlight is then turned to the topic of decoherence. Bohm's theory is critically examined in two chapters, and the relational interpretation of quantum mechanics is likewise described and discussed. The penultimate chapter presents a proposal for resolving the measurement problem, and finally the topic of loop quantum gravity is presented by one of its founding fathers, Carlo Rovelli. The original presentations and discussions on which this volume is based took place under the auspices of the French "Académie des Sciences Morales et Politiques". The book will appeal to everybody interested in knowing

how our description of the world is impacted by the results of the most powerful and successful theory that physicists have ever built.
