Buying and Selling a Home For Dummies Melanie Bien 2011-02-16 No-one obsesses over property quite like the British, even though buying and selling a home can be a personal headache and a financial lucky-dip. British newspapers groan under the weight of property supplements; TV reports constantly track house prices; young people fret about getting on the property ladder, while established homeowners worry about how to increase the value of their home or the market crashing. Buying a property is rarely straightforward and can be very time-consuming. There are numerous choices to make, from the style of building and location, to proximity to schools and other amenities. Most of all, there are plenty of opportunities to make the wrong decisions. Selling your home is also fraught with stress; from deciding to move and evaluating your property's worth to finding an estate agent and putting your home on the market, every step comes with it's own difficulties. Plus the advent of the Home Information Packs has also created a new headache for potential vendors. **Buying and Selling a Home For Dummies, 2nd Edition** covers everything from finding a property and getting a mortgage to preparing your home for sale and moving on. It is also one of the few guides to cover England, Wales and Northern Ireland as separate entitles from Scotland, and to cover the Scottish property market. This updated guide also contains coverage of HIPS (Home Information Packs), which were made compulsory in September 2007 and apply to all properties with three or more bedrooms.

IoT Development for ESP32 and ESP8266 with JavaScript Peter Hoddie 2020-06-25 This book introduces a new approach to embedded development, grounded in modern, industry-standard JavaScript. Using the same language that powers web browsers and Node.js, the Moddable SDK empowers IoT developers to apply many of the same tools and techniques used to build sophisticated websites and mobile apps. The Moddable SDK enables you to unlock the full potential of inexpensive microcontrollers like the ESP32 and ESP8266. Coding for these microcontrollers in C or C++ with the ESP-IDF and Arduino SDKs works for building basic products

but doesn't scale to handle the increasingly complex IoT products that customers expect. The Moddable SDK adds the lightweight XS JavaScript engine to those traditional environments, accelerating development with JavaScript while keeping the performance benefits of a native SDK. Building user interfaces and communicating over the network are two areas where JavaScript really shines. IoT Development for ESP32 and ESP8266 with JavaScript shows you how to build responsive touch screen user interfaces using the Piu framework. You'll learn how easy it is to securely send and receive JSON data over Wi-Fi with elegant JavaScript APIs for common IoT protocols, including HTTP/HTTPS, WebSocket, MQTT, and mDNS. You'll also learn how to integrate common sensors and actuators, Bluetooth Low Energy (BLE), file systems, and more into your projects, and you'll see firsthand how JavaScript makes it easier to combine these diverse technologies. If you're an embedded C or C++ developer who has never worked in JavaScript, don't worry. This book includes an introduction to the JavaScript language just for embedded developers experienced with C or C++. What You'll Learn Building, installing, and debugging JavaScript projects on the ESP32 and ESP8266 Using modern JavaScript for all aspects of embedded development with the Moddable SDK Developing IoT products with animated user interfaces, touch input, networking, BLE, sensors, actuators, and more Who This Book Is For Professional embedded developers who want the speed, flexibility, and power of web development in their embedded software work Makers who want a faster, easier way to build their hobby projects Web developers working in JavaScript who want to extend their skills to hardware products

I Loved a Rogue Katharine Ashe 2015-02-24 In the third in Katharine Ashe's Prince Catchers series, the eldest of three very different sisters must fulfill a prophecy to discover their birthright. But if Eleanor is destined to marry a prince, why can't she resist the scoundrel who seduced her? She can pour tea, manage a household, and sew a modest gown. In short, Eleanor Caulfield is the perfect vicar's daughter. Yet there was a time when she'd risked everything for a black-eyed gypsy who left her brokenhearted. Now he stands before her—dark, virile, and ready to escort her on a journey to find the truth about her heritage. Leaving eleven years ago should have given Taliesin freedom. Instead he's returned to Eleanor, determined to have her all to himself, tempting her with kisses and promising her a passion she's so long denied herself. But if he was infatuated before, he's utterly unprepared for what will happen when Eleanor decides to abandon convention—and truly live . . .

The Buy Nothing, Get Everything Plan Liesl Clark 2020-04-14 In the spirit of *The Gentle Art of Swedish Death Cleaning* and *The Joy of Less*, experience the benefits of buying less and sharing more with this accessible 7-step guide to decluttering, saving money, and creating community from the creators of the Buy Nothing Project. In their island community, friends Liesl Clark and Rebecca Rockefeller discovered that the beaches of Puget Sound were spoiled by a daily

influx of plastic items and trash washing on shore. From pens and toothbrushes to toys and straws, they wondered, where did it all come from? Of course, it comes from us—our homes, our backyards, our cars, and our workplaces. And so, a rallying cry against excess stuff was born. In 2013, they launched the first Facebook Buy Nothing Project group in their small town off the coast of Seattle, and they never expected it to become a viral sensation. Today there are thousands of Buy Nothing groups all over the world, boasting more than a million members, and 5,000 highly active volunteers. Inspired by the ancient practice of gift economies, where neighbors share and pool resources, The Buy Nothing, Get Everything Plan introduces an environmentally conscious 7-step guide that teaches us how to buy less, give more, and live generously. At once an actionable plan and a thought-provoking exploration of our addiction to stuff, this powerful program will help you declutter your home without filling landfills, shop more thoughtfully and discerningly, and let go of the need to buy new things. Filled with helpful lists and practical suggestions including 50 items you never need to buy (Ziploc bags and paper towels) and 50 things to make instead (gift cards and salad dressing), The Buy Nothing, Get Everything Plan encourages you to rethink why you shop and embrace a space-saving, money-saving, and earth-saving mindset of buying less and sharing more.

Posthumous Interests Daniel Sperling 2011-02-17 Daniel Sperling discusses the legal status of posthumous interests and their possible defeat by actions performed following the death of a person. The author first explores the following questions: Do the dead have interests and/or rights, the defeat of which may constitute harm? What does posthumous harm consist of and when does it occur, if at all? This is followed by a more detailed analysis of three categories of posthumous interests arising in the medico-legal context: the proprietary interest in the body of the deceased, the testamentary interest in determining the disposal of one's body after death and the interest in post-mortem medical confidentiality. Sperling concludes that if we acknowledge the interest in one's symbolic existence and legally protect it, not only do some interests survive a person's death but we should also enjoy a peremptory legal power to shape in advance our symbolic existence after death.

People Buy You Jeb Blount 2010-06-21 The ultimate guide to relationships, influence and persuasion in 21st century business. What is most important to your success as a sales or business professional? Is it education, experience, product knowledge, job title, territory, or business dress? Is it your company's reputation, product, price, marketing collateral, delivery lead times, in stock ratios, service guarantees, management strength, or warehouse location? Is it testimonials, the latest Forbes write up, or brand awareness? Is it the investment in the latest CRM software, business 2.0 tools, or social media strategy? You could hire a fancy consulting firm, make the list longer, add some bullet points, put it into a PowerPoint presentation, and go through the whole dog and pony show. But at the end of the day there will be only one conclusion... None of the above! You see, the most important competitive edge for today's business professionals cannot be found on this list, your resume, or in any of your company's marketing brochures. If you want to know the real secret

to what matters most in business, just look in the mirror. That's right, it's YOU. Do these other things matter? Of course they do, but when all things are equal (and in the competitive world we live in today, things almost always are) People Buy You. Your ability to build lasting business relationships that allow you to close more deals, retain clients, increase your income, and advance your career to rise the top of your company or industry, depends on your skills for getting other people to like you, trust you, and BUY YOU. This break-through book pushes past the typical focus on mechanics and stale processes found in so many of today's sales and business books, and goes right to the heart of what matters most in 21st century business. Offering a straight forward, actionable formula for creating instant connections with prospects and customers, People Buy You will enable you to achieve a whole new level of success in your sales and business career. You'll discover: Three relationship myths that are holding you back Five levers that open the door to stronger relationships that quickly increase sales, improve retention, increase profits and advance your career The real secret to making instant emotional connections that eliminate objections and move buyers to reveal their real problems and needs How to anchor your business relationships and create loyal customers who will never leave you for a competitor How to build your personal brand to improve your professional presence and stand-out in the market place People Buy You is the new standard in the art of influence and persuasion. Few books have tackled the subject of interpersonal relationships in the business world in such a practical and down-to-earth manner, breaking what many perceive as a complex and frustrating process into easy, actionable steps that anyone can follow.

Not Buying It Brett Graff 2016-03-29 Parents will do just about anything to give their kids happy lives and successful futures. Unfortunately, the drive to give kids the best of everything leads to a financial strategy based in fear and competition, and results in millions of dollars worth of unnecessary purchases. Enough is enough. In Not Buying It, Brett Graff, the "Home Economist," separates the truth about what parents need for their kids to succeed from the fiction perpetuated by ads, peer pressure, and internal fear. Graff shows how parents can save up to a million dollars by investing the money they would otherwise spend on overpriced and unnecessary purchases for their kids. Graff exposes the many ways that overspending can actually harm kids by encouraging narcissism and unhealthy habits. Her tips range from the everyday (understand when supposedly "organic" products aren't worth the extra dollars)

to the long-term (consider investing in a smaller home for your family, which encourages intimacy and connection), making this a valuable manual for all stages of a parent's life. An essential book for new parents as well as parenting veterans, *Not Buying It* is the definitive guide for families who want to separate the truth about raising kids from the hype.

How to Cheat at Managing Windows Small Business Server 2003 Susan Snedaker 2004-09-23 *How to Cheat at Managing Windows Small Business Server 2003* deals only with the vital, and will be a huge relief to the hundreds of thousands of managers who probably never imagined they would be managing the operating system equivalent of the Space Shuttle. The "80/20" Rule applied to managing a Windows Small Business Server 2003 network. Concise coverage, with ready-to-use solutions, of the most commonly encountered W2K3 Server tasks and problems. Written for the non-MCSE, with little technical training, who is responsible for running a small to medium sized network. Microsoft has announced it will no longer support Windows NT 4 products, effective Dec. 31, 2004. Millions of small businesses that did not upgrade to Windows Server 2000 will choose to upgrade directly to Windows Server 2003, and this will be a timely book.

Milk Production and Processing C. Ibraheem Kutty 2014-01-01 The book covers various aspects of dairying and milk products such as dairy farm establishment, management, production and utilisation of various dairy products. Information has been included on various aspects of dairy farming starting with selection and purchase of dairy cattle, their care and management, with respect to housing, feeding, breeding and health care during various physiological states such as growth, pregnancy and lactation and during different seasons. Details of health care management along with common diseases have been covered with all information required for educated farmers and technicians working in these areas. Various means for consistent improvement of the stock has also been included. Production of clean milk, its procurement, processing and distribution has been covered with more emphasis on common processing technologies such as pasteurisation and sterilisation. Different forms of liquid milk available in the market has been described along with its standards and other specifications for the knowledge of common man and technicians. Manufacturing methods of milk products have been included with appropriate flow chart wherever required and various categories of milk products have been covered in detail under different chapters under milk products. This book has been prepared with emphasis on second year syllabus of Vocational higher secondary course on milk products and dairying and considering the lack of a suitable textbook for this subject. Hence the book is expected to fill the gap of a textbook for the above said and similar courses. Also the book may be accepted as a textbook/manual for educated farmers, other teaching and training programmes covering similar syllabus like that of dairy farm instructors and as a handbook for Veterinary Students and Dairy Extension Officers. With these introductory notes, we presume that the book will satisfy its readers' requirements and form a valuable textbook/reference book for all those concerned with dairy animal production and utilisation of their products ultimately benefiting the farming community.

Is Capitalism Still Progressive? Cosimo Perrotta 2020-07-31 The economic crisis of 2007/2008 has prompted much debate as to what caused it and what remedies may be implemented in order to regain a healthy economy. This book addresses these issues through the lens of capitalism with a focus on labour economics, arguing that capitalism, and the employment of young people and migrants, may be a suitable antidote to the ongoing political crises in Europe that are taking place as a result of the financial crisis. Using economic history and the history of economic thought to inform debate, *Is Capitalism Still Progressive?: A Historical Approach* will be of interest to policy makers (especially in emerging countries), students and researchers interested in exploring the pros and cons, and persistence, of the capitalist system.

Religious Experience in Trauma KwangYu Lee 2020-09-03 This book offers a psychohistorical analysis of the rapid growth of the Korean Protestant Church. KwangYu Lee looks at some of the traumatic historical events of Korea in the 20th century, including the fall of the Joseon Dynasty (1392-1910), the Japanese Occupation (1910-1945), the Korean War (1950-1953), and the Korean Military Dictatorship (1961-1987), and explores the psychological impacts of these events on the collective unconsciousness of Koreans. He argues that Koreans' collective (or cultural) complex of inferiority, which was caused and gradually exacerbated by these traumatic events, along with their psychological relationships with their two colonizers—the Japanese and Americans—prompted them to convert to Korean Protestantism en masse as a means to avoid their psychological pains and to fulfil their futile desire to become like Americans, their overtly idealized psychological-object.

Hidden Agendas Jane Kelsey 2013-05-01 'Forget the label "free trade agreement". The TPPA, under negotiation between New Zealand, the USA and ten other countries, is a direct assault on our right to decide our own future.' In this hard-hitting BWB Text, Professor Jane Kelsey picks apart the current negotiations surrounding the proposed Trans-Pacific Partnership Agreement (TPPA) and comes to some disturbing conclusions. Such a treaty, she says in this new work, has little credible economic rationale but could have potentially dangerous effects on our ability to decide for ourselves how we address the economic, environmental, social and Treaty challenges of the twenty-first century. At a time of constitutional review, the secrecy surrounding the TPPA negotiations raises hard questions about the future shape of New Zealand.

Inequality in the Workplace José M. Soltero 2018-12-14 First published in 1995. During the late 1980s and early 1990s the American economy again became immersed in a recession. Consequently, it became very likely that the quality of employment generated during this period would suffer, and the situation of the labor force would be expected to worsen. The study of labor force stratification can illuminate ways in which the American working class is segmented, as well as the relation to other social problems like poverty and delinquency. In this book, the author explores underemployment, an arguably more accurate measure of labor force hardship than unemployment, amongst several demographic groups. This study will be of interest to students of both economics and sociology.

Buying and Maintaining a Modern Traditional Morgan David Wellings 2018-02-19 From 1997, traditional four-wheeled Morgans were modernized with superformed aluminium wings, a stainless steel bulkhead, stainless exhausts, and alterations to the body tub that provided longer doors, an increase in interior width, and a roll hoop under the dashboard. *Buying and Maintaining a Modern Traditional Morgan* provides practical advice on choosing, running and even modifying one of these exceptional cars, including full technical specifications of each model since 1997. Topics covered in the book include: buying your first Morgan, and the variations available; making the best of the cockpit area and optimizing comfort; staying dry in the rain and protecting the bodywork from wear and tear; Morgan suspension, the practicalities and the modifications available; service and maintenance for the home mechanic and, finally, a practical guide to touring holidays in a Morgan. Includes a Foreword by Steve Morris. Superbly illustrated with 251 colour photographs.

Company Laws of the EU Andrea Vicari 2020 "This book aims to fill a gap in the process of confrontation between the disciplines, case laws and literature of the central EU member states. In particular it aims to address the difficulty of finding sources for scholars and professionals explaining the rules and

guidelines of corporate law in the different European states. The main features of the discipline of Corporate Law in Germany, England, France, Italy, Spain, Poland, Romania and the Netherlands are illustrated. The objective of the work is not only to describe the main features of the discipline, but especially to highlight the most important critical profiles, and particularly those under the scrutiny of the case law and most studied (as problematic) by the doctrine."--Bloomsbury Publishing.

Statistical Field Theory for Neural Networks Moritz Helias 2020-08-20 This book presents a self-contained introduction to techniques from field theory applied to stochastic and collective dynamics in neuronal networks. These powerful analytical techniques, which are well established in other fields of physics, are the basis of current developments and offer solutions to pressing open problems in theoretical neuroscience and also machine learning. They enable a systematic and quantitative understanding of the dynamics in recurrent and stochastic neuronal networks. This book is intended for physicists, mathematicians, and computer scientists and it is designed for self-study by researchers who want to enter the field or as the main text for a one semester course at advanced undergraduate or graduate level. The theoretical concepts presented in this book are systematically developed from the very beginning, which only requires basic knowledge of analysis and linear algebra.

Investment Management V. A. Avadhani 2010 The theory and principles of Investment Management remain unaltered but the backdrop of the operations of investment and the practices and procedures of investment management change from time to time. The financial markets in which most of the operations take place are a reflection of the economy and its performance. The economic and financial reforms in India are a continuing process and these affect the operations in the financial markets. The changes are to be incorporated in any revision of a book of this nature, which is being used by students of finance whether in MBA or M.com. or any othe.

Climate Change Litigation Wolfgang Kahl 2021-04-08 This book investigates and discusses the respective issues arising in the current discourse on climate protection from different legal perspectives (including international law, European law and national public and civil law). In particular, it addresses the issue of "climate protection by courts". It gives an overview of important jurisdictions in the field of climate change litigation, including the US, Canada, Australia, the UK, France, the Netherlands, Italy, Brazil and Germany. The handbook provides answers and ideas both to scholars and practitioners in

the field. Furthermore, it is guaranteed to provide an overview of the latest news in cases and progress in the field of climate change litigation.

International Commercial Arbitration Stephan Balthasar 2021

Writing World History 1800-2000 Benedikt Stuchtey 2003 Writing World History contributes to the highly topical debate on world history by addressing the subject comparatively. Building on the current academic as well as public interest in world history in the Western and non-Western world, and especially in the United States, this volume links a critical investigation of the traditions of world history-writing with the most recent theoretical, methodological, and ideological debates on the subject. It is original in two ways: first, it present different modern approaches to contemporary world history and its debates. Secondly, it offers a critical analysis of the historical traditions of world history over the past 200 years by providing a selection of case studies. From a transcultural perspective, these demonstrate different ideas about the world and the relationship between 'periphery' and 'centre' in various geographical areas such as the USA, Britain, Germany, France, and Russia; Africa; and China, India, and Japan. The essays make clear that interpretations of the world reflect perceptions of one's own culture, and that the notion of the world can be used to legitimize political aims. Since this field emerged in the USA and developed into a separate subdiscipline, American concepts of world history have dominated the discourse. The objective is to go beyond the comparison of Western and non-Western concepts by offering a critical evaluation of their theoretical foundations, ideological implications, and moral connotations. The volume offers a critique of a Eurocentric and an ethnocentric world history.

Not Buying It Judith Levine 2007-02-27 A journalist traces a year during which she and her partner struggled to stop consumer spending practices in spite of their American conditioning, an effort that had an impact on their careers, family relationships, and personal identities.

Gun Love Jennifer Clement 2018 "Pearl's mother took her away from her family just weeks after she was born, and drove off to central Florida determined to begin a new life for herself and her daughter--in the parking lot next to a trailer park. Pearl grew up in the front seat of their '94 Mercury, while her mother lived in the back. Despite their hardships, mother and daughter both adjusted to life, making friends with the residents of the trailers and creating a deep connection to each other"--Amazon.com.

Buying a Piece of Paris Ellie Nielsen 2009-01-06 Recounts how the author's

dream of owning a Hollywood-worthy Parisian apartment prompted a haphazard journey through the French real-estate scene, an effort fraught with elitist agents, foreigner-wary bankers, and her own limited grasp of the language. 15,000 first printing.

The Human Elder In Nature, Culture, And Society David Gutmann 2019-07-11
Chronicling the evolution of David Gutmann's cross-cultural, empirical studies on which his developmental theories of aging are based, this volume reveals how descriptions of the developmental sequences (as they show themselves in older men and women) lead to identification of the psychological forces that drive these processes across the years. This book of new and previously published work first reports on the research that buttressed the more hopeful view of aging as a period of growth and then sets forth the broad, unifying ideas that came out of the empirical work. These concepts include the theory of the "Parental Imperative"—the engine of human development in early and later adulthood; observations on the "gentling" of the older man and the increased assertiveness of the older woman; essays about the unique qualities of aging leaders and the special role of the aged as representatives of the community to its gods; and ideas about the evolutionary basis of the third age—aging as a human adaptation, a legitimate life stage, rather than the grim prelude to death. The last group of selections focuses on the clinical perspective, applying developmental insights to the psychological disorders of later life, ultimately leading to a more hopeful view of these conditions as well as more effective approaches to their treatment. Each section contains original commentary placing the material in the context of current research. This text is for gerontologists, for all students of human development, and for all thoughtful readers who are concerned with the great themes of the human life-cycle—including their own.

Fundraising on the Internet Nick Allen 1996 As well as guiding readers to the Web sites especially useful for fundraisers and teaching them how to use the Internet to research possible donors, this book also shows how fundraisers can adapt the techniques they have already mastered to the special requirements and advantages of the Internet.

Emotion and Information Processing Sachi Nandan Mohanty 2020-10-21 This book consists of thirteen chapters covering many facts like psycho-social intervention on emotional disorders in individuals, impact of emotion and cognition on blended theory, theory and implication of information processing, effects of emotional self esteem in women, emotional dimension of women in workplace, effects of mental thinking in different age groups irrespective of the gender, negative emotions and its effect on information processing, role of emotions in education and lastly emotional analysis in multi perspective domain adopting machine learning approach. experiments of quasi-experimental design.

CETA Investment Law Marc Bungenberg 2021-08-12 This article-by-article Commentary on the Canada-European Union Comprehensive Economic and Trade Agreement (CETA) is a vital resource for practitioners and academics in the field of EU investment protection law. CETA has been called a game-changer. In the investment chapter, it has introduced a number of key innovations, including; - the investment court system with an appellate tribunal, - guidelines on third party funding, - transparency and information sharing, - modern versions of standards of protection, and - detailed provisions on reservations and exceptions. Considering that the new dispute resolution provisions in this chapter have also passed the scrutiny of the Court of Justice of the European Union, it is expected that CETA's investment chapter will serve as a blueprint for future EU investment agreements and so a full understanding of this, offered by this useful commentary, is essential for lawyers.

The Duke Buys a Bride Sophie Jordan 2018-07-24 A bride wasn't in his plans . . . The last thing Marcus, the Duke of Autenberry, expects to see after sleeping off a night's drunken shenanigans is a woman being auctioned in the village square. Before he can think about the ramifications, he buys her, thinking he's winning the girl her freedom. Instead, he discovers he's bought a wife. A duke wasn't in hers . . . Alyse Bell is almost rid of the shackles that bound her in a name-only marriage, but the day her friend promised to purchase her in a wife auction, he vanishes, leaving her to face a mob of unsavory bachelors intent on owning her body and soul. But the appearance of a wicked, wealthy stranger changes her path forever. The road to ruin . . . Marcus doesn't know what to do with the impertinent chit who clearly isn't duchess material! Insisting their

marriage isn't legitimate, they leave for his estate in Scotland, hoping to devise a plan to get rid of each other. However, on a journey fraught with misadventure, their attraction grows and Marcus realizes he'll do anything to keep this fiery woman for his own.

Evidence-Based Medicine - A Paradigm Ready To Be Challenged? Marie-Caroline Schulte 2020-09-18 This open access book aims to clarify the term „evidence-based medicine“ (EBM) from a philosophy of science perspective. The author, Marie-Caroline Schulte discusses the importance of evidence in medical research and practice with a focus on the ethical and methodological problems of EBM. The claims that EBM can herald a new theory of epistemology and a Kuhnian paradigm will be refuted. The solution is to describe EBM as a necessary development in medicine to deal with the increasing amount of evidence and medical data without losing the single patient out of sight. □

European Preventive Restructuring Christoph G Paulus 2021-05-20 The European Directive (Directive (EU) 2019/1023 of the European Parliament and of the Council of 20 June 2020 on preventive restructuring frameworks, on discharge of debts and disqualification, and on measures to increase the efficiency of procedures concerning restructuring, insolvency and discharge of debt) has to be transposed into national legislation by 26 June 2021. The main features of the Directive are: - the obligatory making available of early warning systems; - the obligatory creation of an insolvency avoidance mechanism; - the determination of certain insolvency related officers' duties; - the uniformisation of discharge rules among member states; and - measures to increase the national insolvency laws' efficiency In this book a team of European-wide recognised, experienced insolvency law experts, some of whom had been involved in the drafting process of the Directive, analyse the Directive. The authors focus not only on the officials tasked in the national surroundings with drafting the national statutes but also on the wider implications which, one way or the other, will be national law. The commentary, thus, serves also the purposes of practitioners and judges in the field of restructuring.

Social Ecology Helmut Haberl 2016-07-01 This book presents the current state of the art in Social Ecology as practiced by the Vienna School of Social Ecology, globally one of the main research groups in this field. As a significant contribution to the growing literature on interdisciplinary sustainability studies, the book introduces the purpose and nature of Social Ecology and then places the “Vienna School” within the broader context of socioecological and other interdisciplinary environmental approaches. The conceptual and methodological foundations of Social Ecology are discussed in detail, allowing the reader to obtain a broad overview of current socioecological thinking. Issues covered include socio-metabolic transitions, socioecological approaches to land use, the relation between actor-centered and system approaches, a socioecological theory of labor and the importance of legacies, as conceived in Environmental History and in Long-Term Socio-Ecological Research. To underpin this overview empirically, the strengths of socioecological research are elucidated in cases of cutting-edge research, introducing a variety of themes

the Vienna School has been tackling empirically over the past years. Given how the field is presented – reflecting research carried out on different scales, reaching from local to global as well as from past to present and future – and due to the way the book is structured, it is suitable for classroom use, as a primer, and also as an overview of how Social Ecology evolved, right up to its current research frontiers.
