Recovering Christian Character Robert C Roberts 2022-03-17 Discipleship guidance from the writings of Kierkegaard Genuine Christian character often runs counter to prevailing notions of Christianity--as much in today's era of nationalistic religiosity as in the staid Christendom of Søren Kierkegaard's time. Kierkegaard responded to the hypocrisy around him by becoming a missionary of sorts in the Western world. Through his writing he exposed the illusions of conventional wisdom while advancing a compelling vision of the true Christian life that would give rise to essential virtues like faith, hope, love, patience, gratitude, and humility. What might Kierkegaard say to us today about recovering a genuine Christian character amid manifold corruptions of the gospel? Robert C. Roberts guides the reader through Kierkegaard's thought about character--clarifying while never unduly simplifying--to show how Kierkegaard's prescient psychological insights can be applied in the lives of twenty-first-century Christians interested in personal formation. Taking on a Kierkegaardian voice of his own, Roberts powerfully illustrates how virtue arises not from the mastery of individual ethical principles but from the continuity of one's soul with the heart of God.

European Preventive Restructuring Christoph G Paulus 2021-05-20 The European Directive (Directive (EU) 2019/1023 of the European Parliament and of the Council of 20 June 2020 on preventive restructuring frameworks, on discharge of debts and disqualification, and on measures to increase the efficiency of procedures concerning restructuring, insolvency and discharge of debt) has to be transposed into national legislation by 26 June 2021. The main features of the Directive are: - the obligatory making available of early warning systems; - the obligatory creation of an insolvency avoidance mechanism; - the determination of certain insolvency related officers' duties; - the uniformisation of discharge rules among member states; and - measures to increase the national insolvency laws' efficiency In this book a team of European-wide recognised, experienced insolvency law experts, some of whom had been involved in the drafting process of the Directive, analyse the Directive. The authors focus not only on the officials tasked in the national surroundings with drafting the national statutes but also on the wider implications which, one way or the other, will be national law. The commentary, thus, serves also the purposes of practitioners and judges in the field of restructuring.

Social Ecology Helmut Haberl 2016-07-01 This book presents the current state of the art in Social Ecology as practiced by the Vienna School of Social Ecology, globally one of the main research groups in this field. As a significant contribution to the growing literature on interdisciplinary sustainability studies, the book introduces the purpose and nature of Social Ecology and then places the "Vienna School" within the broader context of socioecological and other interdisciplinary environmental approaches. The conceptual and methodological foundations of Social Ecology are discussed in detail, allowing the reader to obtain a broad overview of current socioecological thinking. Issues covered include socio-metabolic transitions, socioecological approaches to land use, the relation between actor-centered and system approaches, a socioecological theory of labor and the importance of legacies, as conceived in Environmental History and in Long-Term Socio-Ecological Research. To underpin this overview empirically, the strengths of socioecological research are elucidated in cases of cutting-edge research, introducing a variety of themes the Vienna School has been tackling empirically over the past years. Given how the field is presented – reflecting research carried out on different scales, reaching from local to global as well as from past to present and future – and due to the way the book is structured, it is suitable for classroom use, as a primer, and also as an overview of how Social Ecology evolved, right up to its current research frontiers.

The Inner Bird Gary W. Kaiser 2010-10-01 Birds are among the most successful vertebrates on Earth. An important part of our natural environment and deeply embedded in our culture, birds are studied by more professional ornithologists and enjoyed by more amateur enthusiasts than ever before. However, both amateurs and professionals typically focus on birds' behaviour and appearance and only superficially understand the characteristics that make birds so unique. The Inner Bird introduces readers to the avian skeleton, then moves beyond anatomy to discuss the relationships between birds and dinosaurs and other early ancestors. Gary Kaiser examines the challenges scientists face in understanding avian evolution - even recent advances in biomolecular genetics have failed to provide a clear evolutionary story. Using examples from recently discovered fossils of birds and near-birds, Kaiser describes an avian history based on the gradual abandonment of dinosaur-like characteristics, and the related acquisition of avian characteristics such as sophisticated flight techniques and the production of large eggs. Such developments have enabled modern birds to invade the oceans and to exploit habitats that excluded dinosaurs for millions of years. While ornithology is a complex discipline that draws on many fields, it is nevertheless burdened with obsolete assumptions and archaic terminology. The Inner Bird offers modern interpretations for some of those ideas and links them to more current research. It should help anyone interested in birds to bridge the gap between long-dead fossils and the challenges faced by living species.

Posthumous Interests Daniel Sperling 2011-02-17 Daniel Sperling discusses the legal status of posthumous interests and their possible defeat by actions performed following the death of a person. The author first explores the following questions: Do the dead have interests and/or rights, the defeat of which may constitute harm? What does posthumous harm consist of and when does it occur, if at all? This is followed by a more detailed analysis of three categories of posthumous interests arising in the medico-legal context: the proprietary interest in the body of the deceased, the testamentary interest in determining the disposal of one's body after death and the interest in post-mortem medical confidentiality. Sperling concludes that if we acknowledge the interest in one's symbolic existence and legally protect it, not only do some interests survive a person's death but we should also enjoy a peremptory legal power to shape in advance our symbolic existence after death.

Writing World History 1800-2000 Benedikt Stuchtey 2003 Writing World History contributes to the highly topical debate on world history by addressing the subject comparatively. Building on the current academic as well as public interest in world history in the Western and non-Western world, and especially in the United States, this volume links a critical investigation of the traditions of world history-writing with the most recent theoretical, methodological, and ideological debates on the subject. It is original in two ways: first, it presents different modern approaches to contemporary world history and its debates. Secondly, it offers a critical analysis of the historical traditions of world history over the past 200 years by providing a selection of case studies. From a transcultural perspective, these demonstrate different ideas about the world and the relationship between 'periphery' and 'centre' in various geographical areas such as the USA, Britain, Germany, France, and Russia; Africa; and China, India, and Japan. The essays make clear that interpretations of the world reflect perceptions of one's own culture, and that the notion of the world can be used to legitimize political aims. Since this field emerged in the USA and developed into a separate subdiscipline, American concepts of world history have dominated the discourse. The objective is to go beyond the comparison of Western and non-Western concepts by offering a critical evaluation of their theoretical foundations, ideological implications, and moral connotations. The volume offers a critique of a Eurocentric and an ethnocentric world history.

The Shaolin Grandmasters' Text Order of Shaolin Chán 2004 For the last 100 years, the Order of Shaolin Ch'an has worked quietly to preserve the traditions, philosophy, and arts of the Order in the United States of America. Since 1970, Shaolin and its martial arts have increasingly become a focal point of popular culture. Misinformation and disinformation have anchored this growing notoriety. In contrast, this volume strives to accurately share what is spiritually meaningful and martially significant about Shaolin. The living authors are Shaolin monks who wish to remain anonymous, but who put the book together largely from written records and orally transmitted teachings from three Shaolin priests, all of whom passed away in the 1970's. They were Li En Huo, Hua Ling P'o, and Ben Ch'i Lo.

Company Laws of the EU Andrea Vicari 2020 "This book aims to fill a gap in the process of confrontation between the disciplines, case laws and literature of the central EU member states. The main features of the discipline of Corporate Law in Germany, England, France, Italy, Spain, Poland, Romania and the Netherlands are illustrated. Hidden Agendas Jane Kelsey 2013-05-01 'Forget the label "free trade agreement". The TPPA, under negotiation between New Zealand, the USA and ten other countries, is a direct assault on our right to decide our own future.' In this hard-hitting BWB Text, Professor Jane Kelsey picks apart the current negotiations surrounding the proposed Trans-Pacific Partnership Agreement (TPPA) and comes to some disturbing conclusions. Such a treaty, she says in this new work, has little credible economic rationale but could have potentially dangerous effects on our ability to decide for ourselves how we address the economic, environmental, social and Treaty challenges of the twenty-first century. At a time of constitutional review, the secrecy surrounding the TPPA negotiations raises hard questions about the future shape of New Zealand.

Milk Production and Processing C. Ibraheem Kutty 2014-01-01 The book covers various aspects of dairying and milk products such as dairy farm establishment, management, production and utilisation of various dairy products. Information has been included on various aspects of dairy farming starting with selection and purchase of dairy cattle, their care and management, with respect to housing, feeding, breeding and health care during various physiological states such as growth, pregnancy and lactation and during different seasons. Details of health care management along with common diseases have been covered with all information required for educated farmers and technicians working in these areas. Various means for consistent improvement of the stock has also been included. Production of clean milk, its procurement, processing and distribution has been covered with more emphasis on common processing technologies such as pasteurisation and sterilisation. Different forms of liquid milk available in the market has been described along with its standards and other specifications for the knowledge of common man and technicians. Manufacturing methods of milk products have been included with appropriate flow chart wherever required and various categories of milk products have been covered in detail under different chapters under milk products. This book has been prepared with emphasis on second year syllabus of Vocational higher secondary course on milk products and dairying and considering the lack of a suitable textbook for this subject. Hence the book is expected to fill the gap of a textbook for the above said and similar courses. Also the book may be accepted as a textbook/manual for educated farmers, other teaching and training programmes covering similar syllabus like that of dairy farm instructors and as a handbook for Veterinary Students and Dairy Extension Officers. With these introductory notes, we presume that the book will satisfy its readers' requirements and form a valuable textbook/reference book for all those concerned with dairy animal production and utilisation of their products ultimately benefiting the farming community.

In all probability you will, from time to time, continue to experience disappointments and frustrations and suffer the pain of grief, sadness and sorrow as everyone else. The world is certainly no rose garden. However, with the right mental attitude you can take most of the sting out of the pain, when occasionally some personal misfortune knocks off your perch, or life give you a tough time. otherwise thought possible.

The Human Elder In Nature, Culture, And Society David Gutmann 2019-07-11 Chronicling the evolution of David Gutmann's cross-cultural, empirical studies on which his developmental theories of aging are based, this volume reveals how descriptions of the developmental sequences (as they show themselves in older men and women) lead to identification of the psychological forces that drive these processes across the years. This book of new and previously published work first reports on the research that buttressed the more hopeful view of aging as a period of growth and then sets forth the broad, unifying ideas that came out of the empirical work. These concepts include the theory of the "Parental Imperative"—the engine of human development in early and later adulthood; observations on the "gentling" of the older man and the increased assertiveness of the older woman; essays about the unique qualities of aging leaders and the special role of the aged as representatives of the community to its gods; and ideas about the evolutionary basis of the third age—aging as a human adaptation, a legitimate life stage, rather than the grim prelude to death. The last group of selections focuses on the clinical perspective, applying developmental insights to the psychological disorders of later life, ultimately leading to a more hopeful view of these conditions as well as more effective approaches to their treatment. Each section contains original commentary placing the material in the context of current research. This text is for gerontologists, for all students of human development, and for all thoughtful readers who are concerned with the great themes of the human life-cycle—including their own.

Dante: The Divine Comedy Robin Kirkpatrick 1986-10-31 Though taking due account of the historical and philosophical dimensions of the poem, Robin Kirkpatrick focuses on Dante as a poet and story-teller. He addresses important questions such as Dante's attitude towards Virgil and demonstrates how an early work such as the Vita Nuova is a principal source of the literary achievement of the Comedy. His detailed reading reveals how the great narrative poem explores the relationship that Dante believed to exist between God as creator of the universe and the human being as a creature of God.
