American Fiction in Transition Adam Kelly 2013-04-25 American Fiction in Transition is a study of the observer-hero narrative, a highly significant but critically neglected genre of the American novel. Through the lens of this transitional genre, the book explores the 1990s in relation to debates about the end of postmodernism, and connects the decade to other transitional periods in US literature. Novels by four major contemporary writers are examined: Philip Roth, Paul Auster, E. L. Doctorow and Jeffrey Eugenides. Each novel has a similar structure: an observer-narrator tells the story of an important person in his life who has died. But each story is equally about the struggle to tell the story, to find adequate means to narrate the transitional quality of the hero's life. In playing out this narrative struggle, each novel thereby addresses the broader problem of historical transition, a problem that marks the legacy of the postmodern era in American literature and culture.

Traditional Knowledge in Modern India Nirmal Sengupta 2018-09-29 This book demonstrates how traditional knowledge can be connected to the modern world. Human knowledge of housing, health and

agriculture dates back thousands of years, with old wisdom developing and becoming modern. But in the past few decades, global communities have increasingly become aware that some of this valuable knowledge has fallen by the wayside. This has sparked systematic efforts at the local, national and global levels to connect this neglected knowledge to the modern world. It discusses the origin of the topic, its importance, recent developments in India and abroad, and what is being done and still needs to be done in order to preserve India's traditional knowledge. The discussions address a broad range of fields and organizations: from Basmati rice to Ayurvedic cosmetics; from traditional irrigation and folk music to modern drug discovery and climate change adaptation; and from the Biodiversity Convention to the WHO, WTO and WIPO.
