Mephisto Klaus Mann 1995-09-01 “It chimes eerily with the times we are living through now.” □Margaret Atwood, The New York Times Book Review Hendrik Hofgen is a man obsessed with becoming a famous actor. When the Nazis come to power in Germany, he willingly renounces his Communist past and deserts his wife and mistress in order to keep on performing. His diabolical performance as Mephistopheles in Faust proves to be the stepping-stone he yearned for: attracting the attention of Hermann Göring, it wins Hofgen an appointment as head of the State Theatre. The rewards – the respect of the public, a castle-like villa, a place in Berlin's highest circles – are beyond his wildest dreams. But the moral consequences of his betrayals begin to haunt him, turning his dreamworld into a nightmare. That Winter Pamela Gillilan 1986 Pamela Gillilan was born in London in 1918, married in 1948 and moved to Cornwall in 1951. When she sat down to write her poem *Come Away* after the death of her husband David, she had written no poems for a quarter of a century. Then came a sequence of incredibly moving elegies. Other poems followed, and two years after starting to write again, she won the Cheltenham Festival poetry competition. Her first collection *That Winter* (Bloodaxe, 1986) was shortlisted for the Commonwealth Poetry Prize.

Exploring the Interior Karl S. Guthke 2018-05-24 In this fascinating collection of essays Harvard Emeritus Professor Karl S. Guthke examines the ways in which, for European scholars and writers of the eighteenth and early nineteenth century, world-wide geographical exploration led to an exploration of the self. Guthke explains how in the age of Enlightenment and beyond intellectual developments were fuelled by excitement about what Ulrich Im Hof called "the grand opening-up of the wide world", especially of the interior of the non-European continents. This outward turn was complemented by a fascination with "the world within" as anthropology and ethnology focused on the humanity of the indigenous populations of far-away lands – an interest in human nature that suggested a way for Europeans to understand themselves, encapsulated in Gauguin's Tahitian rumination "What are we?" The essays in the first half of the book discuss first- or second-hand, physical or mental encounters with the exotic lands and populations beyond the supposed cradle of civilisation. The works of literature and documents of cultural life featured in these essays bear testimony to the crossing not only of geographical, ethnological, and cultural borders but also of borders of a variety of intellectual activities and interests. The second section examines the growing interest in astronomy and the engagement with imagined worlds in the universe, again with a view to understanding homo sapiens, as compared now to the extra-terrestrials that were confidently assumed to exist. The final group of essays focuses on the exploration of the landscape of

what was called "the universe within"; featuring, among a variety of other texts, Schiller's plays *The Maid of Orleans* and *William Tell*, these essays observe and analyse what Erich Heller termed "The Artist's Journey into the Interior." This collection, which travels from the interior of continents to the interior of the mind, is itself a set of explorations that revel in the discovery of what was half-hidden in language. Written by a scholar of international repute, it is eye-opening reading for all those with an interest in the literary and cultural history of (and since) the Enlightenment.

Economics of Good and Evil Tomas Sedlacek 2011-07-01 Tomas Sedlacek has shaken the study of economics as few ever have. Named one of the "Young Guns" and one of the "five hot minds in economics" by the *Yale Economic Review*, he serves on the National Economic Council in Prague, where his provocative writing has achieved bestseller status. How has he done it? By arguing a simple, almost heretical proposition: economics is ultimately about good and evil. In *The Economics of Good and Evil*, Sedlacek radically rethinks his field, challenging our assumptions about the world. Economics is touted as a science, a value-free mathematical inquiry, he writes, but it's actually a cultural phenomenon, a product of our civilization. It began within philosophy--Adam Smith himself not only wrote *The Wealth of Nations*, but also *The Theory of Moral Sentiments*--and economics, as Sedlacek shows, is woven out of history, myth, religion, and ethics. "Even the most sophisticated mathematical model," Sedlacek writes, "is, de facto, a story, a parable, our effort to (rationally) grasp the world around us." Economics not only describes the world, but establishes normative standards, identifying ideal conditions. Science, he claims, is a system of beliefs to which we are committed. To grasp the beliefs underlying economics, he breaks out of the field's confines with a tour de force exploration of economic thinking, broadly defined, over the millennia. He ranges from the epic of *Gilgamesh* and the Old Testament to the emergence of Christianity, from Descartes and Adam Smith to the consumerism in *Fight Club*. Throughout, he asks searching meta-economic questions: What is the meaning and the point of economics? Can we do ethically all that we can do technically? Does it pay to be good? Placing the wisdom of philosophers and poets over strict mathematical models of human behavior, Sedlacek's groundbreaking work promises to change the way we calculate economic value.

On Diary Philippe Lejeune 2009-04-30 Summary: "On Diary is the second collection in English of the groundbreaking and profoundly influential work of one of the best-known and provocative theorists of autobiography and diary. Ranging from the diary's historical origins to its pervasive presence on the Internet, from the spiritual journey of the sixteenth century to the diary of Anne Frank, and from the materials and methods of diary writing to the question of how diaries end, these essays display Philippe Lejeune's expertise, eloquence, passion, and humor as a commentator on the functions, practices, and significance of keeping or reading a diary. Two substantial introductory essays by Jeremy Popkin and Julie Rak place Lejeune's work within its critical and theoretical traditions and comment on his central importance within the fields of life writing, literary genetic studies, and cultural studies."--Publisher description.

Hunger and Modern Writing Daniel Rees 2016-12-20 Hunger is a contentious theme in modernist

literature, and this study addresses its relevance in the works of four major American and European writers. Taking an in-depth look at works by Melville, Kafka, Hamsun, and Wright, it argues that hunger is deeply involved with concepts of modernity and modern literature. Exploring how it is bound up with the writer's role in modern society this study draws on two conflicting and complex views of hunger: the first is material, relating to the body as a physical entity that has a material existence in reality. Hunger, in this sense, is a physiological process that affects the body as a result of the need for food, the lack of which can lead to discomfort, listlessness, and eventually death. The second view is that of hunger as an appetite of the mind, the kind of hunger for immaterial things that is associated with an individual's desire for a new form of knowledge, sentiment, or a different way of perceiving the reality of the world. By discussing the selected authors' conceptualization of hunger as both desire and absence of desire, or as both a creative and a destructive force, it examines how it has influenced literary representations of modern life. This study then offers a focused approach to a broad field of inquiry and presents analyses that address a variety of critical perspectives on hunger and modern literature.

Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Diploma Democracy Mark Bovens 2017-06-23 Lay politics lies at the heart of democracy. Political offices are the only offices for which no formal qualifications are required. Contemporary political practices are diametrically opposed to this constitutional ideal. Most democracies in Western Europe are diploma democracies - ruled by those with the highest formal qualifications. Citizens with low or medium educational qualifications currently make up about 70 percent of the electorates, yet they have become virtually absent from almost all political arenas. University graduates have come to dominate all political institutions and venues, from political parties, parliaments and cabinets, to organised interests, deliberative

settings, and Internet consultations. This rise of a political meritocracy is part of larger trend. In the information society, educational background, like class or religion, is an important source of social and political divides. Those who are well educated tend to be cosmopolitans, whereas the lesser educated citizens are more likely to be nationalists. This book documents the context, contours, and consequences of this rise of a political meritocracy. It explores the domination of higher educated citizens in political participation, civil society, and political office in Western Europe. It discusses the consequences of this rise of a political meritocracy, such as descriptive deficits, policy incongruences, biased standards, and cynicism and distrust. Also, it looks at ways to remedy, or at least mitigate, some of the negative effects of diploma democracy.

The Funding of Party Competition Karl-Heinz Nassmacher 2009 Has money in politics become more important over time? Has new campaign technology caused a 'cost explosion?' Who gives and spends for political purposes and why? Is illegal funding of parties a real problem? What are the impacts of public funding for sustainable democracy? The Funding of Party Competition examines these questions, and the result is a major contribution to scholarly research on party democracy and on democracy building. As political finance is a restless issue, detailed findings on the impact of legal regulations are important for policy-makers. This comprehensive monograph â?? by the renowned expert Karl-Heinz Nassmacher â?? covers all aspects of political finance in modern democracies. The reader is given all information that is presently available on: the factual patterns of party spending â?¢ the causes of an allegedly high level and increase of political spending â?¢ the various sources of political funds and strategies of fundraising â?¢ the impacts of funding on party organization, party types and party systems.

The Jewish Reception of Heinrich Heine Mark H. Gelber 2013-11-07 This volume contains the lectures, many substantially expanded and revised, which were delivered at an international conference held at Ben-Gurion University in Beersheva in 1990. By utilizing the methodological guidelines and insights of reception aesthetics, a range of Jewish readings of Heine's works and his complex literary personality are analyzed. Considerations of his impact on major figures, like Sigmund Freud, Karl Marx, Theodor Herzl, Max Nordau, Karl Kraus, Else Lasker-Schüler, Lion Feuchtwanger, and Max Brod comprise the major part of the book. In addition, there are readings of Heine by minor or neglected Jewish writers and poets, including, for example, Aron Bernstein and Fritz Heymann, and by Jewish writers in Hebrew and Yiddish literature, as well as by Jewish readers within other national readerships, for example, the American and Croatian. In the process of this analysis, the notion of Jewish reception itself is naturally subjected to critical scrutiny.

Republic, Lost Lawrence Lessig 2015-10-20 Revised and updated for the 2016 election with 75% new material. In an era when special interests funnel huge amounts of money into our government—driven by shifts in campaign-finance rules and brought to new levels by the Supreme Court in *Citizens United v. Federal Election Commission*—trust in our government has reached an all-time low. More than ever before, Americans believe that money buys results in Congress, and that business interests wield control over our legislature. With heartfelt urgency and a keen desire for righting wrongs, Harvard law professor Lawrence Lessig takes a clear-eyed look at how we arrived at this crisis: how fundamentally good people, with good

intentions, have allowed our democracy to be co-opted by outside interests, and how this exploitation has become entrenched in the system. Rejecting simple labels and reductive logic-and instead using examples that resonate as powerfully on the Right as on the Left-Lessig seeks out the root causes of our situation. He plumbs the issues of campaign financing and corporate lobbying, revealing the human faces and follies that have allowed corruption to take such a foothold in our system. He puts the issues in terms that nonwonks can understand, using real-world analogies and real human stories. And ultimately he calls for widespread mobilization and a new Constitutional Convention, presenting achievable solutions for regaining control of our corrupted-but redeemable-representational system. In this way, Lessig plots a roadmap for returning our republic to its intended greatness. While America may be divided, Lessig vividly champions the idea that we can succeed if we accept that corruption is our common enemy and that we must find a way to fight against it. In *REPUBLIC, LOST*, he not only makes this need palpable and clear- he gives us the practical and intellectual tools to do something about it.

The Wealth Elite Rainer Zitelmann 2019-05-09 What makes the super rich tick? Is there a specific mindset that sets ultra-high net worth individuals apart from the rest of us? Are they meticulous planners -- or is their wealth an unintended by-product of their entrepreneurial activities? Is it nature or nurture that sets them on the path to great financial success? This book represents one of the most comprehensive modern-day studies of the super rich. Based on interviews with members of the financial elite, and rigorous academic analysis, this empirical study investigates the link between personality traits and the creation of enormous wealth. In short, the book provides a fascinating insight into the world of the super rich -- and how they think, behave and make their fortunes.

The Participation Gap Russell J. Dalton 2017-10-06 The dilemma of democracy arises from two contrasting trends. More people in the established democracies are participating in civil society activity, contacting government officials, protesting, and using online activism and other creative forms of participation. At the same time, the importance of social status as an influence on political activity is increasing. The democratic principle of the equality of voice is eroding. The politically rich are getting richer-and the politically needy have less voice. This book assembles an unprecedented set of international public opinion surveys to identify the individual, institutional, and political factors that produce

these trends. New forms of activity place greater demands on participants, raising the importance of social status skills and resources. Civil society activity further widens the participation gap. New norms of citizenship shift how people participate. And generational change and new online forms of activism accentuate this process. Effective and representative government requires a participatory citizenry and equal voice, and participation trends are undermining these outcomes. The Participation Gap both documents the growing participation gap in contemporary democracies and suggests ways that we can better achieve their theoretical ideal of a participatory citizenry and equal voice.

Pictorial Affects, Senses of Rupture Michael Wedel 2019-05-20 German film in the Wilhelmine and Weimar periods is regarded as marked by a strong sense of cultural conservatism and the aspiration to be recognized as an art form. This book takes an alternative approach to the history of German cinema from the emergence of the early feature film to the transition to sound by focusing on the poetics of popular genres such as the disaster film, melodrama, the musical and the war film, exploring their cultural reverberations and modes of audience address. Based on the assumption that popular cinema contributed immensely to the breakthrough of a modern audiovisual "culture of the senses" in Germany between 1910 and 1930, *Pictorial Affects, Senses of Rupture* offers close readings of a number of rarely analyzed films, including one of the first cinematic adaptations of the Titanic disaster from 1912 and the German version of *All Quiet on the Western Front* from 1930. Restoring the films' horizons of historicity by locating them at crucial points of intersection between social, cultural, technological and aesthetic discourses, this book argues for the prominent role popular German cinema's own forms of discursivity have played within the historical formation of modernity.

Student Culture in a Changing World Nasser Tolba 2019-12 The revolution of the Arab Spring also transformed the conditions at universities. This book analyzes the changes that occurred in student culture after the Egyptian Revolution in 2011 and identifies the political, religious, societal and educational dynamics behind these transformations. The study finds that the political engagement of students increased after the revolution and illustrates intersections between Egyptian and international student activism.

The Länder and German federalism Arthur Gunlicks 2013-07-19 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. An illuminating introduction to how the Lander (the sixteen states of Germany) function not only within the country itself but also within the wider context of European political affairs. Looks at the Lander in the constitutional order of the country, and the political and administrative system. Their organization and administration is fully covered, as is their financial administration. The role of parties and elections in the Lander is looked at, and the importance of their parliaments. The first work in the English language that considers the Lander in this depth.

The Politics of Party Funding Michael Koß 2010-11-04 The Politics of Party Funding analyses an increasingly popular institutional choice--the introduction of state funding to political parties--and represents a first step towards a theory which explains differences and similarities in party funding regimes.

Democracy in America? Benjamin I. Page 2020-04-02 America faces daunting problems--stagnant wages, high health care costs, neglected schools, deteriorating public services. How did we get here? Through decades of dysfunctional government. In *Democracy in America?* veteran political observers Benjamin I. Page and Martin Gilens marshal an unprecedented array of evidence to show that while other countries have responded to a rapidly changing economy by helping people who've been left behind, the United States has failed to do so. Instead, we have actually exacerbated inequality, enriching corporations and the wealthy while leaving ordinary citizens to fend for themselves. What's the solution? More democracy. More opportunities for citizens to shape what their government does. To repair our democracy, Page and Gilens argue, we must change the way we choose candidates and conduct our elections, reform our governing institutions, and curb the power of money in politics. By doing so, we can reduce polarization and gridlock, address pressing challenges, and enact policies that truly reflect the interests of average

Americans. Updated with new information, this book lays out a set of proposals that would boost citizen participation, curb the power of money, and democratize the House and Senate.

The Power of Capitalism Rainer Zitelmann 2018-11-30 "The market has failed, we need more government intervention." That's the mantra politicians, the media, and intellectuals have been reiterating ever since the outbreak of the 2008 financial crisis. By taking the reader on a journey across continents and through recent history, Rainer Zitelmann disproves this call for greater government intervention, and demonstrates that capitalism matters more than ever. The author provides compelling evidence from across the world that capitalism has been the solution to a number of massive problems. He compares developments in West and East Germany, North and South Korea, capitalist Chile v. Socialist Venezuela, and analyzes the extraordinary economic rise of China. For many people, "capitalism" is a dirty word. This book provides a timely reminder of capitalism's power in enabling growth and prosperity, and in alleviating poverty.
