The Welfare of Fish Tore S. Kristiansen 2020-07-01 This book investigates how fish experience their lives, their amazing senses and abilities, and how human actions impact their quality of life. The authors examine the concept of fish welfare and the scientific knowledge behind the inclusion of fish within the moral circle, and how this knowledge can change the way we treat fish in the future. In many countries fish are already protected by animal welfare legislation in the same way as mammals, but in practice there is still a major gap between how we ethically view these groups and how we actually treat them. The poor treatment of fish represents a massive animal welfare problem in aquaculture and fisheries, both in terms of the number of animals affected and the severity of the welfare issues. Thanks to its interdisciplinary scope, this thought-provoking book appeals to professionals, academics and students in the fields of animal welfare, cognition and physiology, as well as fisheries and aquaculture management.

Spanish Women Authors of Serial Crime Fiction Inmaculada Pertusa-Seva 2020-09-23 With its focus on recent detective series featuring female investigators, this collection analyzes the authors' treatment of current social, political and economic problems in Spain and beyond, in addition to exploring interrelations between gender, globalization, the environment and technology. The contributions here reveal the varied ways in which the use of a series allows for a deeper consideration of such issues, in addition to permitting the more extensive development of the protagonist investigator and her reactions to, and methods of, dealing with personal and professional challenges of the twenty-first century. In these stories, the authors employ strategies that break with long-standing conventions, developing crime fiction in unexpected ways, incorporating elements of science fiction, the supernatural, and the historical novel, as well as varied geographical settings (small towns, provincial cities, and rural communities) beyond the urban environment, all of which contributes to the reinvigoration of the genre.

Heinrich Bullinger on Prophecy and the Prophetic Office (1523–1538) Daniël Timmerman 2015-02-18 It has often been noted that the Protestant Reformation of the early sixteenth century witnessed a revived interest in the scriptural notions of prophets and prophecy. Drawing from both late medieval apocalyptic expectations of the immanent end of the world and from a humanist revival of biblical studies, the prophet appeared to many as a suitable role model for the Protestant preacher. A prominent proponent of this prophetic model was the Swiss theologian and church leader Heinrich Bullinger (1504–1575). This study by Daniël Timmerman presents the first in-depth investigation of Bullinger's concept of prophecy and his understanding of the prophetic office. It also engages with the history of the Zurich institute for the study of the Scriptures, which has become widely known as the »Prophezei«.

Augustine Our Contemporary Willemien Otten 2018-05-30 In the massive literature on the idea of the self, the Augustinian influence has often played a central role. The volume *Augustine Our Contemporary*, starting from the compelling first essay by David W. Tracy, addresses this influence from the Middle Ages to modernity and from a rich variety of perspectives, including theology, philosophy, history, and literary studies. The collected essays in this volume all engage Augustine and the Augustinian legacy on notions of selfhood, interiority, and personal identity. Written by prominent scholars, the essays demonstrate a connecting thread: Augustine is a thinker who has proven his contemporaneity in Western thought time and time again. He has been "the contemporary" of thinkers ranging from Eriugena to Luther to Walter Benjamin and Jacques Derrida. His influence has been dominant in certain eras, and in others he has left traces and fragments that, when stitched together, create a unique impression of the "presentness" of Christian selfhood. As a whole, *Augustine Our Contemporary* sheds relevant new light on the continuity of the Western Christian tradition. This volume will interest academics and students of philosophy, political theory, and religion, as well as scholars of postmodernism and Augustine. Contributors: Susan E. Schreiner, David W. Tracy, Bernard McGinn, Vincent Carraud, Willemien Otten, Adriaan T. Peperzak, David C. Steinmetz, Jean-Luc Marion, W. Clark Gilpin, William Schweiker, Franklin I. Gamwell, Jean Bethke Elshtain, Fred Lawrence, and Françoise Meltzer.

Nevada Days Bernardo Atxaga 2018-07-10 A seductive, unclassifiable blend of autobiography and fiction set in Reno, from the preeminent Basque author *Nine months as a writer in residence can prove unnerving for anyone.* For Bernardo Atxaga, newly arrived with his wife and two daughters, research at the Center for Basque Studies in Reno, Nevada, is anything but straightforward. The neon lights and harsh, windswept desert appear full of ominous signs: A raccoon that watches the house at night, eyes glowing. A series of sexual assaults on campus by an unknown assailant. A spider scuttling endlessly in a glass jar kept by a colleague. And the kidnapping and murder of a young college girl in the house next door. Fragments of the Basque diaspora appear everywhere: A photo of the heavyweight boxer Paulino Uzcudun, who fought Max Baer in the 1930s. The funeral of a Basque sheepherder. Daily life also turns up some unusual characters—a university friend suspected of involvement in the assaults on campus, a friend who takes Atxaga for long drives in the desert where *The Misfits* was filmed, and cowboys at a Tex-Mex joint. *Nevada Days*, told in a series of diary-like entries, mixes a constellation of lively incidents in Reno with memories from Atxaga's childhood. The routines of everyday life are the only way to resolve the deep wounds of history and relationships, however fleeting or enduring. Trapped in the deeply alien landscape of Nevada, Atxaga weaves together past and present to see the West from a refreshing, if also ominous and unsettling, vantage.

The Evolution of Insect Mating Systems David Shuker 2014-07-31 Insects display a staggering diversity of mating and social behaviours. Studying these systems provides insights into a wide range of evolutionary and behavioural questions, such as the evolution of sex, sexual selection, sexual conflict, and parental care. This

edited volume provides an authoritative update of the landmark book in the field, *The Evolution of Insect Mating Systems* (Thornhill and Alcock, 1983), which had such a huge impact in shaping adaptationist approaches to the study of animal behaviour and influencing the study of the evolution of reproductive behaviour far beyond the taxonomic remit of insects. This accessible new volume brings the empirical and conceptual scope of the original book fully up to date, incorporating the wealth of new knowledge and research of the last 30 years. It explores the evolution of complex forms of sex determination in insects, and the role of sexual selection in shaping the evolution of mating systems. Selection arising via male contest competition and female choice (both before and after copulation) are discussed, as are the roles of parasites and pathogens in mediating the strength of sexual selection, and the role that parental care plays in successful reproduction. *The Evolution of Insect Mating Systems* is suitable for both graduate students and researchers interested in insect mating systems or behaviour from an evolutionary, genetical, physiological, or ecological perspective. Due to its interdisciplinary and concept-driven approach, it will also be of relevance and use to a broad audience of evolutionary biologists.

Infanticide Glenn Hausfater 2017-07-12 Recent field studies of a variety of mammalian species reveal a surprisingly high frequency of infanticide - the killing of unweaned or otherwise maternally dependent offspring. Similarly, studies of birds, fish, amphibians, and invertebrates demonstrate egg and larval mortality in these species, a phenomenon directly analogous to infanticide in mammals. In this collection, Hausfater and Hrdy draw together work on animal and human infanticide and place these studies in a broad evolutionary and comparative perspective. *Infanticide* presents the theoretical background and taxonomic distribution of infanticide, infanticide in nonhuman primates, infanticide in rodents, and infanticide in humans. It examines closely sex allocation and sex ratio theory, surveys the phylogeny of mammalian interbirth intervals, and reviews data on sources of egg and larval mortality in a variety of invertebrate and lower vertebrate species.

Dealing with infanticide in nonhuman primates, two chapters critically examine data on infanticide in langurs and its broader theoretical implications. By reviewing sources of infant mortality in populations of small mammals and new laboratory analyses of the causes and consequences of infanticide, this work explores such issues as the ontogeny of infanticide, proximate cues of infants and females which elicit infanticidal behavior in males, the genetical basis of infanticide, and the hormonal determinants. Hausfater and Sarah Blaffer Hrdy, through their selection of materials for this book, evaluate the frequency, causes, and function of infanticide. Historical, ethnographic, and recent data on infanticide are surveyed. "Infanticide" summarizes current research on the evolutionary origins and proximate causation of infanticide in animals and man. As such it will be indispensable reading for anthropologists and behavioral biologists as well as ecologists, psychologists, demographers, and epidemiologists.

National Reckonings Ryan Hackenbracht 2019-03-15 During the tumultuous years of the English Revolution and Restoration, national crises like civil wars and the execution of the king convinced Englishmen that the end of the world was not only inevitable but imminent. *National Reckonings* shows how this widespread eschatological expectation shaped nationalist thinking in the seventeenth century. Imagining what Christ's return would mean for England's body politic, a wide range of poets, philosophers, and other writers—including Milton, Hobbes, Winstanley, and Thomas and Henry Vaughan,—used anticipation of the Last Judgment to both disrupt existing ideas of the nation and generate new ones. Ryan Hackenbracht contends that nationalism, consequently, was not merely a horizontal relationship between citizens and their sovereign but a vertical one that pitted the nation against the shortly expected kingdom of God. The Last Judgment was the site at which these two imagined communities, England and ecclesia (the universal church), would collide. Harnessing the imaginative space afforded by literature, writers measured the shortcomings of an imperfect and finite nation against the divine standard of a perfect and universal community. In writing the nation into end-times prophecies, such works as *Paradise Lost* and *Leviathan* offered contemporary readers an opportunity to participate in the cosmic drama of the world's end and experience reckoning while there was still time to alter its outcome.

Irish Voices from the Spanish Inquisition Thomas O'Connor 2016-04-08 This book explores the activities of early modern Irish migrants in Spain, particularly their rather surprising association with the Spanish Inquisition. Pushed from home by political, economic and religious instability, and attracted to Spain by the wealth and opportunities of its burgeoning economy and empire, the incoming Irish fell prey to the Spanish Inquisition. For the inquisitors, the Irish, as vassals of Elizabeth I, were initially viewed as a heretical threat and suffered prosecution for Protestant heresy. However, for most Irish migrants, their dual status as English

vassals and loyal Catholics permitted them to adapt quickly to provide brokerage and intermediary services to the Spanish state, mediating informally between it and Protestant jurisdictions, especially England. The Irish were particularly successful in forging an association with the Inquisition to convert incoming Protestant soldiers, merchants and operatives for useful service in Catholic Spain. As both victims and agents of the Inquisition, the Irish emerge as a versatile and complex migrant group. Their activities complicate our view of early modern migration and raise questions about the role of migrant groups and their foreign networks in the core historical narratives of Ireland, Spain and England, and in the history of their connections. *Irish Voices from the Spanish Inquisition* throws new light on how the Inquisition worked, not only as an organ of doctrinal police, but also in its unexpected role as a cross-creedal instrument of conversion and assimilation.

Two Years in California Mary Cone 1876 A resident of Marietta, Ohio, Mary Cone spent two years in California in the 1870s. *Two Years in California (1876)* is more a guide than a first-person narrative of her experiences in the West. She treats the state's history, climate, agriculture, and geography before turning to its regions: Southern California (San Diego, Los Angeles, Santa Barbara), the Sacramento and San Joaquin Valleys (with chapters on individual Sacramento ranches), Northern California's redwoods and Mount Shasta and the same region's other tourist attractions (San Francisco, Mount St. Helena). Separate chapters discuss the Chinese in California and the author's visit to Yosemite.

Fish Welfare Edward J. Branson 2008-04-30 Fish have the same stress response and powers of nociception as mammals. Their behavioural responses to a variety of situations suggest a considerable ability for higher level neural processing – a level of consciousness equivalent perhaps to that attributed to mammals. Each chapter of this book has been written by specialists in their field. The subject matter is wide ranging and covers in detail concepts of animal welfare in addition to more specific aspects of fish welfare. Philosophical concepts of welfare are discussed along with more practical areas of fish welfare encompassing all husbandry and management activities that have a potential to affect the welfare of the fish in our care. This book is an essential purchase for fish veterinarians, fish farmers, fish biologists and those involved in the aquaculture industry and its regulation.

Seven Houses in France Bernardo Atxaga 2012-09-04 A brooding novel of colonial intrigue in the Congo, from the author of *The Accordionist's Son* and *Obabakoak* The year is 1903, and the garrison of Yangambi on the banks of the Congo is under the command of Captain Lalande Biran. The captain is also a poet whose ambition is to amass a fortune and return to the literary cafés of Paris. His glamorous wife, Christine, has a further ambition: to own seven houses in France, a house for every year he has been abroad. At Lalande Biran's side are the ex-legionnaire van Thiegel, a brutal womanizer, and the servile, treacherous Donatien, who dreams of running a brothel. The officers spend their days guarding enslaved rubber-tappers and kidnapping young girls, and at their hands the jungle is transformed into a wild circus of human ambition and absurdity. But

everything changes with the arrival of a new officer and brilliant marksman: the enigmatic Chrysostome Liege. An outstanding new novel from the critically acclaimed and prizewinning author Bernardo Atxaga, *Seven Houses in France* is a blackly comic tale which reveals the darkest sides of human desire.
