The Invisible Man from Salem Christoffer Carlsson 2015-03-25 In the final days of summer, a young woman is shot dead in her apartment. Three floors above, the blue lights of the police cars awaken disgraced ex-officer Leo Junker. Though suspended from the force, he can't stay away for long. Bluffing his way onto the crime scene, he examines the dead woman and sees that she is clasping a cheap necklace – a necklace he instantly recognises. As Leo sets out on a rogue investigation to catch the killer, a series of frightening connections emerge, linking the murder to his own troubled youth in Salem – a suburb of Stockholm where social and racial tensions run high – and forcing him to confront a long ago incident that changed his life forever. Now, in backstreets, shadowed alleyways, and decaying suburbs ruled by Stockholm's criminal underground, the search for the young woman's killer – and the truth about Leo's past – begins.

**Discourses on Nations and Identities** Daniel Syrový 2021-01-18 The third volume of the collected papers of the ICLA congress "The Many Languages of Comparative Literature" includes contributions that focus on the interplay between concepts of nation, national languages, and individual as well as collective identities. Because all literary communication happens within different kinds of power structures - linguistic, economic, political -, it often results in fascinating forms of hybridity. In the first of four thematic chapters, the papers investigate some of the ways in which discourses can establish modes of thinking, or how discourses are in turn controlled by active linguistic interventions, whether in the context of the patriarchy, war, colonialism, or political factions. The second thematic block is predominantly concerned with hybridity as an aspect of modern cultural identity, and the cultural and

linguistic dimensions of domestic life and in society at large. Closely related, a third series of papers focuses on writers and texts analysed from the vantage points of exile and exophony, as well as theoretical contributions to issues of terminology and what it means to talk about transcultural phenomena. Finally, a group of papers sheds light on more overtly violent power structures, mechanisms of exclusion, Totalitarianism, torture, and censorship, but also resistance to these forms of oppression. In addition to these chapters, the volume also collects a number of thematically related group sections from the ICLA congress, preserving their original context.

**The Second Slavery** Javier Lavina 2014 "Slavery throughout the capitalist world-economy expands. The old zones in one way or another reach their limits and the new zones break through: to become part of the new division of labor (in the 19th century). In that sense The Second Slavery would encompass both decline and renewal of slaveries. I never intended the idea to apply just to Cuba, Brazil, and the cotton South as some people seem to take it. For me it is a concept of world economy and Cuba, Brazil, and the South are the obvious examples of those zones that break through. They permit us to think about slavery in a more dynamic way, but there is much more work to be done. From this perspective I would be more inclined to include Reunion, Mauritius and some parts of India, Ceylon and Java as well as British Guiana, than the older French and British Caribbean islands." -- contributor Dale Tomich, Binghamton U., New York \*\*\* The Second Slavery includes the following essays: African Slaves and the Atlantic: A Cultural Overview \* The End of the British Atlantic Slave Trade or the Beginning of the Big Slave Robbery, 1808-1850 \* Peasant or Proletarian: Emancipation and the Struggle for Freedom in British Guiana in the Shadow of the Second Slavery \* The End of the "Second Slavery" in the Confederate South and the "Great Brigandage" in Southern Italy: A Comparative Study \* Puerto Rico: "Atlantización" and Culture during the "Segunda Esclavitud" \* The Second Slavery: Modernity, Mobility, and Identity of Captives in Nineteenth-Century Cuba and the Atlantic World \* Commodity Frontiers, Conjunction and Crisis: The Remaking of the Caribbean Sugar Industry, 1783-1866 \* The Aftermath of Abolition: Distortions of the Historical Record in Machado de Assis' Counselor Aires' Memorial \* The Second Slavery: Modernity in the 19th-Century South and the Atlantic World. *Collection Care/Sammlungspflege* Gabriela Krist 2015-05-21 Prevention is an attempt to look into the future and have a positive influence on it – therefore it is one of the most important aspects in the area of collection care, the central, current field of applied research in conservation and restoration. With sustainability damage and loss are avoided, dangers averted and research conducted. Collection care is only successful, if the theory is appropriately implemented in museum practice.

**The Routledge Handbook of Material Culture in Early Modern Europe** Catherine Richardson 2016-09-13 The Routledge Handbook of Material Culture in Early Modern Europe marks the arrival of early modern material culture studies as a vibrant, fully-established field of multi-disciplinary research. The volume provides a rounded, accessible collection of work on the nature and significance of materiality in early modern Europe – a term that embraces a vast range of objects as well as addressing a wide variety of human interactions with their physical environments. This stimulating view of materiality is distinctive in asking questions about the whole material world as a context for lived experience, and the book considers material interactions at all social levels. There are 27 chapters by leading experts as well as 13 feature object studies to highlight specific items that have survived from this period (defined broadly as c.1500–c.1800). These contributions explore the things people acquired, owned, treasured, displayed and discarded, the spaces in which people used and thought about things, the social relationships which cluster around goods – between producers, vendors and consumers of various kinds – and the way knowledge travels around those circuits of connection. The content also engages with wider issues such as the relationship between public and private life, the changing connections between the sacred and the profane, or the effects of gender and social status upon lived experience. Constructed as an accessible, wide-ranging guide to research practice, the book describes and represents the methods which have been developed within various disciplines for analysing pre-modern material culture. It comprises four sections which open up the approaches of various disciplines to non-specialists: ‘Definitions, disciplines, new directions’, ‘Contexts and categories’, ‘Object studies’ and ‘Material culture in action’. This volume addresses the need for sustained, coherent comment on the state, breadth and potential of this lively new field, including the work of historians, art historians, museum curators, archaeologists, social scientists and literary scholars. It consolidates and communicates recent developments and considers how we might take forward a multi-disciplinary research agenda for the study of material culture in periods before the mass production of goods.

The Rhetoric of Topics and Forms Gianna Zocco 2021-01-18 The fourth volume of the collected papers of the ICLA congress "The Many Languages of Comparative Literature" includes articles that study thematic and formal elements of literary texts. Although the question of prioritizing either the level of content or that of form has often provoked controversies, most contributions here treat them as internally connected. While theoretical considerations inform many of the readings, the main interest of most articles can be described as rhetorical (in the widest sense) – given that the ancient discipline of rhetoric did not only include the study of rhetorical figures and tropes such as metaphor, irony, or satire, but also that of *topoi*, which were originally viewed as the 'places' where certain arguments could be found, but later came to represent the arguments or intellectual themes themselves. Another feature shared by most of the articles is the tendency of 'undeclared thematology', which not only reflects the persistence of the charge of positivism, but also shows that most scholars prefer to locate themselves within more specific, often interdisciplinary fields of literary study. In this sense, this volume does not only prove the ongoing relevance of traditional fields such as rhetoric and thematology, but provides contributions to currently flourishing research areas, among them literary multilingualism, literature and emotions, and ecocriticism.

**Toile de Jouy** Mélanie Riffel 2003 In the seventeenth century, printed and painted cottons from India first appeared in France. In reaction to the enormous commercial success of these bright Indian cottons, a French embargo was placed on the importation of foreign textiles. In 1759 this ban was finally lifted, and in 1760 the Manufacture Royale de Jouy was founded in Jouy-en-Josas, near Paris, to produce printed cotton fabrics on French soil that could compete with the popular imported ones. At first the factory produced polychrome cottons with floral or plant motifs that were intended for clothing. Subsequently, the "monochromes" appeared; adorned with rural, historical, mythological, narrative, and oriental themes, they were used mainly for home furnishings. Within a few years, the factory was the biggest of its kind in Europe, and its printed textiles had become widely used in France and abroad. In all, some 30,000 designs were created at Jouy-en-Josas through the years, many of them the work of renowned eighteenth-century artists such as Fragonard

and Boucher. The authors, both curators at the Muse de la Toile de Jouy, have drawn upon the museum's rich collections to produce the first-ever complete history of these textiles. The illustrations include original designs that are conserved in the museum, exceptional historical examples of toile de Jouy clothing and furniture, documents relating to manufacture and to the founding of the company, and examples of contemporary uses of the textiles. Toile de Jouy has become increasingly popular among designers and decorators, who incorporate its classic patterns in upholstery, wallpaper, bed linens, tablecloths, napkins, and stationery. For anyone interested in the history of textiles and design, or looking for fresh ideas for interior decor, this book will be an essential reference.

Europe in the Renaissance Bernard Aikema 2016-08-01 The Renaissance experienced some of the most important advances in human history: the invention of the printing press using movable letters, the West's discovery of a continent and the formulation of a new view of the earth. It was a time when people sought to solve the riddles of nature, experimented with alchemy, set out to develop a new medical science, conceived a new vision of humankind and created beauty in

the form of pictures and architecture, sculpture and literature. All these discoveries and creations would have been unimaginable without cultural exchange. The Renaissance was an era of dialogue and new horizons in thinking over great distances and time. Based on numerous examples—works of art, instruments and everyday objects—this substantial publication invites readers to trace the various paths of transference. Renowned authors take us to antiquity and the Orient, to Italy and through half of Europe.

**The Philosophy of Buddhism** Erich Frauwallner 2010 This translation, first published in 1956, opens up a classic introduction to Buddhist thought to a broader English language readership. The book covers the period of early canonical literature with examples of its philosophically relevant ideas, followed by the principal philosophical concepts of systematic Sravakayana-Buddhism. In the main part of the book, Frauwallner presents the first survey of the development of the philosophical systems of Mahayana-Buddhism. He was well aware of the limitations in presenting only the Buddhist philosophy of the "classical", i.e., the systematic period, and does not seem to have been ready to add the philosophically creative new post-systematic tradition of Buddhist epistemology and logic, a major subject of his research in subsequent years. Frauwallner's way of translating was straight-forward: to remain as close as possible to the original text. For technical terms in the source materials he maintained a single translation even when various meanings were suggested. For clarity regarding such variations of meaning he relied on the context and his explanation. The same approach was taken by the translator of the present book. However, he has inserted helpful additional headlines into the text and considerably enlarged the index. All other additions by the translator are given within square brackets.

Bowie María Hesse 2019-09-06 David Bowie was a master of artifice and reinvention. In that same spirit, illustrator María Hesse and writer Fran Ruiz have created a vivid retelling of the life of David Robert Jones, from his working-class childhood to glam rock success to superstardom, concluding with the final recording sessions after his cancer diagnosis. Narrated from the rock star's point of view, Bowie colorfully renders both the personal and the professional turning points in a life marked by evolution and innovation. We see Bowie facing the sorrow of his brother's mental illness, kicking a cocaine habit while other musicians succumbed to deadly overdoses, contending with a tumultuous love life, and radiating joy as a father. Along the way, he describes how he shattered the boundaries of song and society with a counterculture cast that included Iggy Pop, Brian Eno, and Freddie Mercury—as well as his own creations, Ziggy Stardust and the Thin White Duke. Evocatively illustrated from start to finish, Bowie is a stellar tribute to an inimitable star.

*Cotton in Context* Kim Siebenhüner 2019-09-16 - While cotton was a world-changing good in the early modern period, for producers, merchants, and consumers, it was but one of many different fabrics. This volume explores this dichotomy by contextualizing cotton within its contemporary culture of textiles. In doing, it focuses on a long, under-researched region: the German-speaking world, particularly Switzerland, which transformed into one of the most prolific European regions for the production of printed cottons in the eighteenth century. Sixteen contributions investigate the (globally entangled) history of Indiennes, silk, wool, and embroideries, giving new insights into the manufacturing, marketing, and consumption of textiles between 1500 and 1900.

Idle Days in Patagonia William Henry Hudson 1893 *Idle Days in Patagonia* by William Hudson Henry, first published in 1893, is a rare manuscript, the original residing in one of the great libraries of the world.
