Whitman Encyclopedia of Obsolete Paper Money Q. David Bowers 2014-06-01 The "Whitman Encyclopedia of Obsolete Paper Money" is a multiple-volume study of currency issued by American banks from 1782-1866, before the modern era of National Banks and the Federal Reserve. In volume 2, Q. David Bowers gives the history of every town and city, as well as every bank that issued this uniquely American currency in the New England states of Connecticut, Maine, and New Hampshire. Each note is studied, and thousands are pictured in full color, with information on grading, rarity, values, significant auction results, advice for collectors, and more.

Wake Up, Woods Michael A. Homoya 2019-10 Early in the year, our North American forests come to life as native wildflowers start to push up through patches of snow. With longer days and sunlight streaming down through bare branches of towering trees, life on the forest floor awakens from its winter sleep. Plants such as green dragon, squirrel corn, and bloodroot interact with their pollinators and seed dispersers and rush to create new life before the trees above leaf out and block the sun's rays. *Wake Up, Woods* showcases the splendor of our warming forests and offers clues to nature's annual springtime floral show as we walk in our parks and wilderness areas, or even in shade gardens around our homes. Readers of *Wake Up, Woods* will see that Gillian Harris, Michael Homoya and Shane Gibson, through illustrations and text, present a captivating look into our forests' biodiversity, showing how species depend on plants for food and help assure plant reproduction. This book celebrates some of nature's most fascinating moments that happen in forests where we live and play.

Tom Kundig: Houses Dung Ngo 2006-11-09 "Architect Tom Kundig is known worldwide for the originality of his work. This paperback edition of *Tom Kundig: Houses*, first published in 2006, collects five of his most prominent early residential projects, which remain touchstones for him today. In a new preface written for this edition, Kundig reflects on the influence that these designs continue to have on his current thinking. Each house, presented from conceptual sketches through meticulously realized details, is the product of a sustained and active collaborative process among designer, builder, and client. The work of the Seattle-based architect has been called both raw and refined--disparate characteristics that produce extraordinarily inventive designs inspired by both the industrial structures ubiquitous to his upbringing in the Pacific Northwest and the vibrant craft cultures that are fostered there." --

The Red Fog Over America William Carr 2021-09-11 At the age of twelve the author was thoroughly indoctrinated into the Bolshevik ideology by two revolutionary missionaries who traveled on the same ship with him out to the Orient in 1907. Unlike many others he didn't swallow the bait they offered him "Hook, Line, and Sinker". He decided to keep an open mind, and to investigate matters thoroughly, before reaching any conclusions. His investigations and studies of all angles of the International Conspiracy have taken him to nearly every country in the world. Commander Carr has had a distinguished naval career. During WWI he served as Navigating Officer of H.M. Submarines. In WWII he was Naval Control Officer for the St. Lawrence; then Staff Officer Operations at Shelbourne, N.S.; then Senior Naval Officer at Goose Bay, Labrador. As an Officer on the staff of Commodore Reginald Brock he organized the 7th Victory Loan for the twenty-two Royal Canadian Naval Training Divisions. As an author he has previously published seven books. Some were specially bound for inclusion in the Royal Library; The Library of The Imperial War Museum; and the Sir Millington Drake Library (which is bequeathed to Eton College), and the Braille Library for the Blind. Commander Carr is known to many Canadians who have attended his public lectures. He warned people of the existence of an International Conspiracy. He foretold that the conspirators would, unless checked, drag the World into another Global War. Commander Carr is determined to inform as many people as possible regarding the Evil Forces which adversely affect all our lives, and the lives of our children. His book will be an eye-opener to parents, clergymen, teachers, students, statesmen, politicians, and labor leaders.

American-Russian Rivalry in the Far East Edward H. Zabriskie 2016-11-11 This study of relations examines the close diplomatic association of Russia and the United States, both close and distant. The book deals particularly with the still vital and very timely question: the control of Manchuria. It describes in detail the struggle between Russia and America, checked and counterchecked by nearly all the other governments of Europe and Asia, for domination of this rich and strategic area. It is safe to say that the full, detailed story of this little-known chapter in our political history is told here for the first time as the author had access to official documents only recently opened to scrutiny by students of foreign affairs. The study begins with a historical sketch of the early friendship between the two countries, but subsequent chapters reveal how this cordiality deteriorated toward the end of the nineteenth century as political and economic interests in the Far East came into open conflict. With the acquisition of the Philippines following the Spanish-American War, America's eyes turned Eastward, and by the conclusion of the Boxer Rebellion her policy of the Open Door in China was firmly established. Under the cloak of this principle, however, American trading, industrial, and railway interests, with the encouragement of our diplomatic agents in the Far East, quickly made a bid for the economic expansion of eastern Asia, at the same time that Russia was attempting to annex Manchuria for herself. When the tinderbox of Far Eastern affairs flared into the Russo-Japanese War in 1904, Roosevelt's policy "balanced antagonism" during the conflict eventually had the result of strengthening Japan and of drawing that country closer to Russia. The outbreak of World War I found these two powers dominating Manchuria, with the United States in spite of its Dollar Diplomacy excluded from the competition. The account is given chiefly through the personalities who took part on both sides in the diplomatic maneuvers. The book is therefore of unusual human interest, as well as an important documentary contribution to an understanding of the present relations of two leading world power.

Southern Edwardseans Obbie Tyler Todd 2022-01-17 The founders and forerunners of the Southern Baptist Convention were fundamentally shaped by the thought of Puritan theologian Jonathan Edwards and his theological successors. While Baptists in the antebellum South boasted a different theological pedigree than Presbyterians or Congregationalists, and while they inhabited a Southern landscape unfamiliar to the bustling cities and tall forests of New England, they believed their similarities with Edwards far outweighed their differences. Like Edwards, these Baptists were revivalistic, Calvinistic, loosely confessional, and committed to practical divinity. In these four things, Southern Edwardseanism lived, moved, and had its being. In the nineteenth-century, when so many Presbyterians scoffed at Edwards's "innovation" and Methodists scorned his Calvinism, Baptists found in Edwards a man after their own heart. By 1845, at the first Southern Baptist Convention, Southern Edwardseans had laid the groundwork for a convention marked by the theology of Jonathan Edwards.

Architectural Graphics Frank Ching 2014-05-16 Architectural Graphics focuses on the techniques, methodologies, and graphic tools used in conveying architectural ideas. The book takes a look at equipment and materials, architectural drafting, and architectural drawing conventions. Discussions focus on drawing pencils, technical drawing pens, set squares/templates, circle templates/compasses, line weight/line types, drafting technique, drawing circular elements, floor plan, doors and windows in plan, stairs, wall indications, plan grids, and site boundaries. The manuscript examines rendition of value and context and graphic symbols and lettering. Topics include tonal values, media and techniques, value/texture rendition, material rendition, shades and shadows, people, furniture, graphic representation symbols, and hand lettering. The text explores freehand drawing and architectural presentations, including freehand sketching, graphic diagraming, and sketching equipment. The publication is a valuable reference for architects interested in doing further studies in architectural graphics.
