*Promoting Your Music* Tom May 2013-10-31 While many dream of a career as a singer/songwriter, few know how to go about getting bookings, copywriting and protecting their songs, making promotional recordings, getting radio and print coverage and negotiating contracts for appearances. This book covers

all of these topics and more, aimed at everyone from the absolute beginner to the more seasoned performer, to help them avoid the common pitfalls and problems encountered along the road to success. The authors draw on years of experience as songwriters and performers. They have conducted interviews with many singer/songwriters who share their experiences, both good and bad, as they've worked their way up from local gigs to full-time careers. Throughout, practical tips are highlighted and real-life stories help illuminate common issues faced by all performers/songwriters.

### **Medicare and Medicaid Guide** 1969

*Risk Management and Insurance* Chester Arthur Williams 1985 The content and structure of this text are based on the twin beliefs that (1) the study of insurance, a major tool of risk management, should be preceded by an understanding of procedures and concepts of risk management and (2) most students will take only one course in the area. For students who plan further study in the area, the balanced treatment of both subjects provides a broad introduction to the field. The first 6 editions of this text occupied a niche at the upper end of the textbooks on risk management and insurance. The purpose in developing the 7th and 8th editions was to further develop the reputation established by earlier editions. Most texts in the area of risk management and insurance emphasize principles of insurance and other institutional aspects of the subject. Although this text includes some institutional information, it emphasizes an analytical approach. The text focuses on the management of risk by organizations. Because of the reliance on analytical methods, the book is most appropriate for the advanced undergraduate--or introductory graduate-level courses.
