Artificial Intelligence and Machine Learning for COVID-19 Fadi Al-Turjman 2021-02-19 This book is dedicated to addressing the major challenges in fighting COVID-19 using artificial intelligence (AI) and machine learning (ML) – from cost and complexity to availability and accuracy. The aim of this book is to focus on both the design and implementation of AI-based approaches in proposed COVID-19 solutions that are enabled and supported by sensor networks, cloud computing, and 5G and beyond. This book presents research that contributes to the application of ML techniques to the problem of computer communication-assisted diagnosis of COVID-19 and similar diseases. The authors present the latest theoretical developments, real-world applications, and future perspectives on this topic. This book brings together a broad multidisciplinary community, aiming to integrate ideas, theories, models, and techniques from across different disciplines on intelligent solutions/systems, and to inform how cognitive systems in Next Generation Networks (NGN) should be designed, developed, and evaluated while exchanging and processing critical health information. Targeted readers are from varying disciplines who are interested in implementing the smart planet/environments vision via wireless/wired enabling technologies.

To the Power of One Philip S. Berg 1991 The universe, according to modern day physics, is not composed of the individual parts and pieces that we perceive with our five senses but instead is described as being one unified whole through a mysterious invisible force that instantly connects every part of the cosmos. These and many other incredible findings in the area of Quantum Physics have shaken the foundations of the scientific community. Even more important, the general public at large is not aware of these discoveries. Book jacket.

Creació i simulació de mapes de canvi per a vehicles comercials lleugers elèctrics

Xavier Morales Melero 2014 En aquests últims anys s'ha vist incrementada l'oferta de vehicles de passatgers elèctrics, mentre que en els LCV (de l'anglès Light Commercial Vehicle o Vehicle Comercial Lleuger) l'oferta ha estat bastant més reduïda, no obstant s'ha observat un creixent interès d'aquests fabricants en portar la tecnologia elèctrica cap aquest sector. Aquest projecte es descompon en varies etapes. Primer de tot i basant-se en un prototip de LCV elèctric existent, es pretén explicar d'una manera simplificada la transformació que es va dur a terme partint d'un Nissan Cabstar MT de 3,5 tones i motor Diesel per arribar a un vehicle elèctric amb reductor d'una marxa. Generalment, en vehicles de passatgers, amb un motor i un reductor de velocitat el vehicle obté unes prestacions acceptables, però degut a que els LCV són vehicles destinats al transport de mercaderies l'enginyer es veuria obligat a posar un motor elèctric d'unes dimensions destacables o, com en aquest prototip, a acceptar un vehicle elèctric amb unes prestacions poc competitives. Aquest projecte aporta una idea diferent i pretén millorar el disseny utilitzant un motor elèctric de potencia mitja amb una caixa de canvis AMT (de l'anglès Automated Manual Transmission o Caixa de canvis Manual Automatitzada) de dues marxes. Aquest tipus de caixes tenen una unitat de control que decideix quina marxa posar en funció d'un mapa de canvi que depèn d'unes variables d'entrada. Al ser un estudi de la construcció d'un prototip de baix cost, es pretén utilitzar peces existents o peces de Nissan les quals es poden obtenir via recanvis. En quant a la caixa, es disposa d'una AMT de 6 marxes de les quals s'estudiarà quines dues marxes s'haurien d'utilitzar. Per tant, la primera etapa d'aquest projecte avarca primer l'estudi de quins elements de la línia motriu del vehicle es van suprimir i quins es van afegir per a la construcció del prototip i segon, la realització d'una comparativa per demostrar la justificació d'utilització d'una caixa de dues marxes vers un reductor d'una única marxa. Un cop definida l'especificació de la línia motriu, el segon objectiu d'aquest projecte és desenvolupar una eina informàtica amb MATLAB que permeti obtenir un mapa de canvi de partida introduint-hi com a paràmetres d'entrada l'especificació del vehicle. Un cop obtingut aquest mapa, el tercer i últim objectiu és dissenyar un model de vehicle en SIMULINK en el que es pugui introduir el mapa de canvi anterior i testejar-lo en diferents condicions dinàmiques. Com és un departament específic qui valida aquests mapes de canvi valorant des de les prestacions fins a les sensacions, és complicat obtenir un mapa correcte directament de l'eina. Per això el que es pretén és que entre l'algorisme i les simulacions s'obtingui el mapa més ajustat possible.

Passage to Faith Michael J Lee 2021-02-19 Passage to Faith is Book 1 in The Faith Today Trilogy series. Passage to Faith explores current scientific evidence supporting the case for the existence of a creator God. It draws on dozens of historical testimonies of individuals who had encounters with a Supreme Being which influenced them to change their lives, and sometimes the world, for the better. Taking the reader on an evidence-based tour through the cosmos, Lee, qualified in the fields of the philosophy of futures studies, theology, literature and education, reveals a stunning degree of indwelling intelligence and beauty on display throughout the universe and on Earth. He then traces the common ground between the creation account in Genesis in the Bible and scientific cosmology, the Big Bang theory and Albert Einstein's theory of relativity. Lee discusses the faith of a wide range of people from different eras and disciplines to reinforce the conviction that God's redeeming power actively intervenes not just in nature but in history. These examples include, among others, figures from history like Joan of Arc, Nelson Mandela and Barack and Michelle Obama, scientists and mathematicians like Copernicus, Galileo, Kepler, Newton, Faraday, Mendel, Pasteur, Pascal, George Washington Carver, Dr Wernher von Braun, Professor Christiaan Barnard and Francis S. Muncie 4-Speed Transmissions Paul Cangialosi 2014-10-15 The Muncie 4-speeds, M20, M21, and M22 are some of the most popular manual transmissions ever made and continue to be incredibly popular. The Muncie was the top high-performance manual transmission GM offered in its muscle cars of the 60s and early 70s. It was installed in the Camaro, Chevelle, Buick GS, Pontiac GT0, Olds Cutlass, and many other classic cars. Many owners want to retain the original transmission in their classic cars to maintain its value. Transmission expert and veteran author Paul Cangialosi has created an indispensable reference to Muncie 4-speeds that guides you through each crucial stage of the rebuild process. Comprehensive ID information is provided, so you can positively identify the cases, shafts, and related parts. It discusses available models, parts options, and gearbox cases. Most important, it shows how to completely disassemble the

gearbox, identify wear and damage, select the best parts, and complete the rebuild. It also explains how to choose the ideal gear ratio for a particular application. Various high-performance and racing setups are also shown, including essential modifications, gun drilling the shafts, cutting down the gears to remove weight, and achieving race-specific clearances. Muncie 4-speeds need rebuilding after many miles of service and extreme use. In addition, when a muscle car owner builds a high-performance engine that far exceeds stock horsepower, a stronger high-performance transmission must be built to accommodate this torque and horsepower increase. No other book goes into this much detail on the identification of the Muncie 4-speed, available parts, selection of gear ratios, and the rebuild process.

Anglomania Ian Buruma 2012-12-05 "Imaginative, original--wittily written."--The Washington Post Book World To some, England has long represented tolerance, reason, and political moderation. To others, it is a moribund bastion of snobbery and outdated tradition. In this lively and diverting social history, noted author Ian Buruma, himself the son of Dutch immigrants to England, provides an incisive look at anglophilia--and anglophobia--over the last two centuries. From passionate enthusiasts like Voltaire and Goethe, to exiles like Garibaldi and Herzen, to colorful England-bashers like Napoleon, Marx, and Kaiser Wilhelm II, *Anglomania* gives a sharply satirical account of Europe's sometimes comical, sometimes deadly prejudices, and explains why England's individuality and her relationship with Europe is still vitally important as we enter the twenty-first century.

Addressing Challenging Moments in Psychotherapy Jerome S. Gans 2021-09-30 "This practical and helpful volume details how clinicians can work through various and common challenges inherent to psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt termination of therapy,

Pistons and Engine Testing 2016 The ever-increasing demands placed on combustion engines are just as great when it comes to this centerpiece-the piston. Achieving less weight or friction, or even greater wear resistance, requires in-depth knowledge of the processes taking place inside the engine, suitable materials, and appropriate design and manufacturing processes for pistons, including the necessary testing measures. It is no longer possible for professionals in automotive engineering to manage without specific expertise of this kind, whether they work in the field of design, development, testing, or maintenance. This technical book answers these questions in detail and in a very clear and comprehensible way. In this second, revised edition, every chapter has been revised and expanded. The chapter on "Engine testing", for example, now include extensive results in the area of friction power loss measurement and lube oil consumption measurement.
