The Fog of Peace Jean-Marie Guéhenno 2015-05-12 No small number of books laud and record the heroic actions of those at war. But the peacekeepers? Who tells their stories? At the beginning of the 1990s, the world exited the cold war and entered an era of great promise for peace and security. Guided by an invigorated United Nations, the international community set out to end conflicts that had flared into vicious civil wars and to unconditionally champion human rights and hold abusers responsible. The stage seemed set for greatness. Today that optimism is shattered. The failure of international engagement in conflict areas ranging from Afghanistan to Congo and Lebanon to Kosovo has turned believers into skeptics. The Fog of Peace is a firsthand reckoning by Jean-Marie Guéhenno, the man who led UN peacekeeping efforts for eight years and has been at the center of all the major crises since the beginning of the 21st century. Guéhenno grapples with the distance between the

international community's promise to protect and the reality that our noble aspirations may be beyond our grasp. The author illustrates with personal, concrete examples—from the crises in Afghanistan, Iraq, Congo, Sudan, Darfur, Kosovo, Ivory Coast, Georgia, Lebanon, Haiti, and Syria—the need to accept imperfect outcomes and compromises. He argues that nothing is more damaging than excessive ambition followed by precipitous retrenchment. We can indeed save many thousands of lives, but we need to calibrate our ambitions and stay the course.

Affect Regulation Training Matthias Berking 2014-08-30 Emotion Regulation is currently one of the most popular topics in clinical psychology. Numerous studies demonstrate that deficits in emotion regulation skills are likely to help maintain various forms of psychological disorders. Thus, enhancing emotion regulation has become a major target in psychotherapeutic treatments. For this purpose, a number of therapeutic strategies have been developed and shown to be effective. However, for practitioners it is often difficult to decide which of these strategies they should use or how they can effectively combine empirically-validated strategies. Thus, the authors developed the Affect Regulation Training as a transdiagnostic intervention which systematically integrates strategies from cognitive behavior therapy, mindfulness-based interventions, emotion-focused therapy, and dialectical behavioral therapy. The effectiveness of ART has been demonstrated in several high-quality studies.

Women Artists and the Surrealist Movement Whitney Chadwick 2021-11-23 A revised edition of Whitney Chadwick's seminal work on the women artists who shaped the Surrealist art movement. This pioneering book stands as the most comprehensive treatment of the lives, ideas, and art works of the remarkable group of women who were an essential part of the Surrealist movement. Leonora Carrington, Frida Kahlo, and Dorothea Tanning, among many others, embodied their age as they struggled toward artistic maturity and their own "liberation of the spirit" in the context of the Surrealist revolution. Their stories and achievements are presented here against the background of the turbulent decades of the 1920s, '30s, and '40s and the war that forced Surrealism into exile in New York and Mexico. Whitney Chadwick, author of the highly acclaimed *Women, Art, and Society*, interviewed and corresponded with most of the artists themselves in the course of her research. *Women Artists and the Surrealist Movement*, now revised with a new foreword by art historian Dawn Ades, contains a wealth of extracts from unpublished writings and numerous illustrations never before reproduced. Since this book was first published, it has acquired the

undeniable status of a classic among artists, art historians, critics, and cultural historians. It has inspired and necessitated a revision of the story of the Surrealist movement.

Will these children find out the answer as they deal with danger, kidnap, excitement and mystery? After the earlier death of their mother, the children have to deal with problem-solving as independent young minds in the confusing world of a foreign country. What will it take to succeed? This book melds great writing with fast-paced action and adventure, whilst also asking questions of the reader. With more than a hint of philosophy for young people, this book offers much for its readers. "Both entertaining thought-provoking, an exciting journey through danger, and philosophy, bugs, betrayal, sibling rivalry, and an awesome archaeological puzzle." The Evolution of American Urban Society Howard P. Chudacoff 1981 In over three centuries of growth and change, American cities have exerted forces that have been both centrifugal -- pulling people, resources, and interest toward them -- and centripetal -- sending out goods, services, and ideas. The story of how these forces evolved over time encompasses almost every aspect of American

history. Always cognizant of change over time, this book explores the ways that urban development influenced people's lives and on the ways people shaped the urban environment. A city is simultaneously a social, economic, and political entity, and Howard P. Chudacoff and Judith E. Smith have taken care to examine each of these dimensions of urban life. Their focus is on urban society: its institutions, its activities, and, especially, its people. In this, the Sixth Edition, Chudacoff and Smith pay particular attention to issues of race, ethnicity, gender, the built environment, regional differentials, and emerging cultural forms such as rock and rap music. New material has been added on the environmental impact of cities and suburbs and on the new racial and ethnic mix produced by the most recent immigration trends. In addition, the final chapter has been expanded to take into account issues relating to the presidential administration of George W. Bush and to the consequences of the terrorist attacks of September 11, 2001. Book jacket.
