Mate Choice Gil G. Rosenthal 2017-07-18 A major new look at the evolution of mating decisions in organisms from protozoans to humans The popular consensus on mate choice has long been that females select mates likely to pass good genes to offspring. In *Mate Choice*, Gil Rosenthal overturns much of this conventional wisdom. Providing the first synthesis of the topic in more than three decades, and drawing from a wide range of fields, including animal behavior, evolutionary biology, social psychology, neuroscience, and economics, Rosenthal argues that "good genes" play a relatively minor role in shaping mate

choice decisions and demonstrates how mate choice is influenced by genetic factors, environmental effects, and social interactions. Looking at diverse organisms, from protozoans to humans, Rosenthal explores how factors beyond the hunt for good genes combine to produce an endless array of preferences among species and individuals. He explains how mating decisions originate from structural constraints on perception and from nonsexual functions, and how single organisms benefit or lose from their choices. Both the origin of species and their fusion through hybridization are strongly influenced by direct selection on preferences in sexual and nonsexual contexts. Rosenthal broadens the traditional scope of mate choice research to encompass not just animal behavior and behavioral ecology but also neurobiology, the social sciences, and other areas. Focusing on mate choice mechanisms, rather than the traits they target, *Mate Choice* offers a groundbreaking perspective on the proximate and ultimate forces determining the evolutionary fate of species and populations.

Into the Wild Jon Krakauer 2009-09-22 Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." –New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's stoytelling blaze through every page.

Elizabeth Gaskell's Cranford Thomas Recchio 2009 Tracing the publishing history of Elizabeth Gaskell's *Cranford* from its initial 1851-53 serialization in Dickens's *Household Words* through its numerous editions and adaptations, Recchio focuses especially the text's deployment in support of ideas related to nation and national identity on both sides of the Atlantic. Making extensive use of primary materials, Recchio offers a convincing micro-history of the way English literature was positioned in England and the United States to support an Anglocentric cultural project.

Advances in Exercise Immunology Laurel T. Spectrometric Identification of Organic Compounds Robert M. Silverstein 2014-09-29 First published over 40 years ago, this was the first text on the identification of organic compounds using spectroscopy. This text is now considered to be a classic. This text presents a unified approach to the structure determination of organic compounds based largely on mass spectrometry, infrared (IR) spectroscopy, and multinuclear and multidimensional nuclear magnetic resonance (NMR) spectroscopy. The key strength of this text is the extensive set of practice and real-data problems (in Chapters 7 and 8). Even professional chemists use these spectra as reference data. *Spectrometric Identification of Organic Compounds* is written by and for organic chemists, and emphasizes the synergistic effect resulting from the interplay of the spectra. This book is characterized by its problem-solving approach with extensive reference charts and tables. The 8th edition of this text maintains its student-friendly writing style - wording throughout has been updated for consistency and to be more reflective of modern usage and methods. Chapter 3 on proton NMR spectroscopy has been overhauled and updated. Also, new information on polymers and phosphorus functional groups has been added to Chapter 2 on IR spectroscopy.

Wuthering Heights Emily Bronte *Wuthering Heights* is the name of Mr. Heathcliff's dwelling. "Wuthering" being a significant provincial adjective, descriptive of the atmospheric tumult to which its station is exposed in stormy weather. Pure, bracing ventilation they must have up there at all times, indeed: one may guess the power of the north wind blowing over the edge, by the excessive slant of a few stunted firs at the end of the house; and by a range of gaunt thorns all stretching their limbs one way, as if craving alms of the sun. Happily, the architect had foresight to build it strong: the narrow windows are deeply set in the wall, and the corners defended with large jutting stones. Before passing the threshold, I paused to admire a quantity of grotesque carving lavished over the front, and especially about the principal door; above which, among a wilderness of crumbling griffins and shameless little boys, I detected the date "1500," and the name "Hareton Earnshaw." I would have made a few comments, and requested a short history of the place from the surly owner; but his attitude at the door appeared to demand my speedy entrance, or complete departure, and I had no desire to aggravate his impatience previous to inspecting the penetralium. One stop brought us into the family sitting-room, without any introductory lobby or passage: they call it here "the house" pre-eminently. It includes kitchen and parlour, generally; but

I believe at Wuthering Heights the kitchen is forced to retreat altogether into another quarter: at least I distinguished a chatter of tongues, and a clatter of culinary utensils, deep within; and I observed no signs of roasting, boiling, or baking, about the huge fireplace; nor any glitter of copper saucepans and tin cullenders on the walls. One end, indeed, reflected splendidly both light and heat from ranks of immense pewter dishes, interspersed with silver jugs and tankards, towering row after row, on a vast oak dresser, to the very roof. The latter had never been under-drawn: its entire anatomy lay bare to an inquiring eye, except where a frame of wood laden with oatcakes and clusters of legs of beef, mutton, and ham, concealed it. Above the chimney were sundry villainous old guns, and a couple of horse-pistols: and, by way of ornament, three gaudily-painted canisters disposed along its ledge. The floor was of smooth, white stone; the chairs, high-backed, primitive structures, painted green: one or two heavy black ones lurking in the shade. In an arch under the dresser reposed a huge, liver-coloured bitch pointer, surrounded by a swarm of squealing puppies; and other dogs haunted other recesses.

Translation in a Postcolonial Context Maria Tymoczko 2016-04-08 This groundbreaking analysis of the cultural trajectory of England's first colony constitutes a major contribution to postcolonial studies, offering a template relevant to most cultures emerging from colonialism. At the same time, these Irish case studies become the means of interrogating contemporary theories of translation. Moving authoritatively between literary theory and linguistics, philosophy and cultural studies, anthropology and systems theory, the author provides a model for a much needed integrated approach to translation theory and practice. In the process, the work of a number of important literary translators is scrutinized, including such eminent and disparate figures as Standish O'Grady, Augusta Gregory and Thomas Kinsella. The interdependence of the Irish translation movement and the work of the great 20th century writers of Ireland - including Yeats and Joyce - becomes clear, expressed for example in the symbiotic relationship that marks their approach to Irish formalism. *Translation in a Postcolonial Context* is essential reading for anyone interested in translation theory and practice, postcolonial studies, and Irish literature during the 19th and 20th centuries.

Opportunities in Intense Ultrafast Lasers National Academies of Sciences, Engineering, and Medicine 2018-03-03 The laser has revolutionized many areas of science and society, providing bright and versatile light sources that transform the ways we investigate science and enables trillions of dollars of commerce. Now a second laser revolution is underway with pulsed petawatt-class lasers (1 petawatt: 1 million billion watts) that deliver nearly 100 times the total world's power concentrated into a pulse that lasts less than one-trillionth of a second. Such light sources create unique, extreme laboratory conditions that can accelerate and collide intense beams of elementary particles, drive nuclear reactions, heat matter to conditions found in stars, or even create matter out of the empty vacuum. These powerful lasers came largely from U.S. engineering, and the science and technology opportunities they enable were discussed in several previous National Academies' reports. Based on these advances, the principal research funding agencies in Europe and Asia began in the last decade to invest heavily in new facilities that will employ these high-intensity lasers for fundamental and applied science. No similar programs exist in the United States. Opportunities in Intense Ultrafast Lasers assesses the opportunities and recommends a path forward for possible U.S. investments in this area of science.

A Walk to the River in Amazonia Carla Stang 2009 Our lives are mostly composed of ordinary reality—the flow of moment-to-moment existence. In this

anthropological study of the Amazon's Mehinaku Indians, the author achieves an understanding of this part of reality by both observing various aspects of their experience and by relating how these different facets come to play in a stream of ordinary consciousness, a walk to the river. In this way, abstract schemata such as 'cosmology,' 'sociality,' 'gender,' and the 'everyday' are understood as they are actually lived.

Wanat : Combat Action In Afghanistan, 2008 [Illustrated Edition] Combat Studies Institute 2014-08-15 Includes 16 maps, photos and plans "The Battle of Wanat occurred on July 13, 2008, when about 200 Taliban guerrillas attacked NATO troops near the Quam, (large clan village), of Wanat in the Waygal district in Afghanistan's far eastern province of Nuristan. The position was defended primarily by U.S. Army soldiers of the 2nd Platoon, Chosen Company, 2nd Battalion, 503rd Infantry Regiment (Airborne), 173rd Airborne Brigade Combat Team. "The Taliban surrounded the remote base and its observation post and attacked it from the Quam and the surrounding farmland. They destroyed much of the Americans' heavy munitions, broke through U.S. lines, and entered the main base before being repelled by artillery and aircraft. American casualties included nine killed and 27 wounded, while four Afghan National Army (ANA) soldiers were wounded. The U.S. combat deaths represent the most in a single battle since the start of U.S. operations in 2001. "The Battle of Wanat has been described as the "Black Hawk Down" of the War in Afghanistan, as one of the bloodiest attacks of the war and one of several attacks on remote outposts. In contrast to previous roadside bombs and haphazard attacks and ambushes, this attack was well coordinated with fighters from many insurgent and terrorist groups with an effort that was disciplined and sustained which was able to target key assets such as the TOW launcher with precision. "The battle became the focus of widespread debate, generating "a great deal of interest and scrutiny among military professionals and from outside observers." mainly due to the relatively "significant number of coalition casualties".

The Socially Responsible Organization Ian I. Mitroff 2022-05-24 This book explores the nature of the socially responsible organization, specifically the role of crisis management in creating a socially responsible organization. It applies the Myers-Briggs Personality Typology (MBPTI) and the Thomas-Kilmann Conflict Framework to issues such as responses to the COVID-19 pandemic, regulation of tech companies, and infrastructure. Dr. Mitroff lists the major arguments given in regards to these issues and subjects them to the strongest possible scrutiny and critique to hold both individuals and organizations accountable to the larger responsibilities we share as global citizens. This is an open access book.

to date. While its core concepts endure, it requires the holistic incorporation of additional insights and prescriptions, based on current and future trends. This book reviews Porter's work in the context of the global economic forces and rapid technological changes that have affected businesses and their strategies from the mid-2000s. It focuses on select aspects of competitive strategy particularly affected by such forces and develops several novel constructs to strengthen and expand the core analytical framework of competitive strategy with a futuristic perspective. The book embeds the impact of technology throughout but recognises that a more focused and detailed analysis of the same has been presented in the author's recent companion work, *Technology and Competitive Strategy: Perspectives for Innovators, Differentiators and Followers*. Each of the book's chapters is dedicated to a unique facet of competitive strategy, with novel hypotheses and constructs supported by multiple real-life examples. The book will inspire professionals, business leaders, academicians and public policy makers involved in strategy and growth to appreciate issues and solutions in a broader and a more contemporaneous industrial and economic context.

Relativistically Intense Laser–Microplasma Interactions Tobias Ostermayr
2019-07-16 This dissertation covers several important aspects of relativistically intense laser–microplasma interactions and some potential applications. A Paul-trap based target system was developed to provide fully isolated, well defined and well positioned micro-sphere-targets for experiments with focused peta-watt laser pulses. The laser interaction turned such targets into microplasmas, emitting proton beams with kinetic energies exceeding 10 MeV. The proton beam kinetic energy spectrum and spatial distribution were tuned by variation of the acceleration mechanism, reaching from broadly distributed spectra in relatively cold plasma expansions to spectra with relative energy spread as small as 20% in spherical multi-species Coulomb explosions and in directed acceleration processes. Numerical simulations and analytical calculations support these experimental findings and show how microplasmas may be used to engineer laser-driven proton sources. In a second effort, tungsten micro-needle-targets were used at a peta-watt laser to produce few-keV x-rays and 10-MeV-level proton beams simultaneously, both measured to have only few- μm effective source-size. This source was used to demonstrate single-shot simultaneous radiographic imaging with x-rays and protons of biological and technological samples. Finally, the dissertation discusses future perspectives and directions for laser–microplasma interactions including non-spherical target shapes, as well as thoughts on experimental techniques and advanced quantitative image evaluation for the laser driven radiography.

The Psychology of Quality of Life M. Joseph Sirgy 2002-08-31 This book summarizes much of the research in subjective well-being and integrates this research into a parsimonious theory. The theory posits that much of the research on subjective well-being can be construed in terms of the personal strategies that people use to 'optimize' their happiness and life satisfaction. These strategies include bottom-up spillover, top-down spillover, horizontal spillover, balance, re-evaluation, goal selection, and goal implementation.

Popular Music and Human Rights: World music Ian Peddie 2011 Popular music has long understood that human rights, if attainable at all, involve a struggle without end. The right to imagine an individual will, the right to some form of self-determination and the right to self-legislation have long been at the forefront of popular music's approach to human rights. At a time of such uncertainty and confusion, with human rights currently being violated all over the world, a new and sustained examination of cultural responses to such issues is warranted. In this respect music, which is always produced in a social context, is an extremely useful medium; in its immediacy music has a potency of expression that reaches far and wide.

Evolutionary Ecology Across Three Trophic Levels Warren G. Abrahamson
1997-05-04 In a work that will interest researchers in ecology, genetics, botany, entomology, and parasitology, Warren Abrahamson and Arthur Weis present the results of more than twenty-five years of studying plant-insect interactions. Their study centers on the ecology and evolution of interactions among a host plant, the parasitic insect that attacks it, and the suite of insects and birds that are the natural enemies of the parasite. Because this system provides a model that can be subjected to experimental manipulations, it has allowed the authors to address specific theories and concepts that have guided biological research for more than two decades and to engage general problems in evolutionary biology. The specific subjects of research are the host plant goldenrod (*Solidago*), the parasitic insect *Eurosta solidaginis* (Diptera: Tephritidae) that induces a gall on the plant stem, and a number of natural enemies of the gallfly. By presenting their detailed empirical studies of the *Solidago-Eurosta* natural enemy system, the authors demonstrate the complexities of specialized enemy-victim interactions and, thereby, the complex interactive relationships among species more broadly. By utilizing a diverse array of field, laboratory, behavioral, genetic, chemical, and statistical techniques, Abrahamson and Weis present the most thorough study to date of a single system of interacting species. Their interest in the evolutionary ecology of plant-insect interactions leads them to insights on the evolution of species interactions in general. This major work will interest anyone involved in studying the ways in which interdependent species interact.

Collective Action Russell Hardin 2015-12-03 Public choice, an important subdiscipline in the field of political theory, seeks to understand how people and societies make decisions affecting their collective lives. Relying heavily on theoretical models of decision making, public choice postulates that people act in their individual interests in making collective decisions. As it happens, however, reality does not mirror theory, and people often act contrary to what the principal public choice models suggest. In this book, Russell Hardin looks beyond the models to find out why people choose to act together in situations that the models find quite hopeless. He uses three constructs of modern political economy--public goods, the Prisoner's Dilemma, and game theory--to test public choice theories against real world examples of collective action. These include movements important in American society in the past few decades--civil rights, the Vietnam War, women's rights, and environmental concerns. This classic work on public choice will be of interest to theoreticians and graduate students in the fields of public choice, political economy, or political theory--and to those in other disciplines who are concerned with the problem of collective action in social contexts.
