273 technical questions and answers for job interview Offshore Oil & Gas Platforms PETROGAV

INTERNATIONAL This book offers you a brief, but very involved look into the operations in the exploitation of Oil & Gas wells that will help you to be prepared for job interview at oil & gas companies. From start to finish, you'll see a general prognosis of the production process. If you are new to the oil & gas industry, you'll enjoy having a leg up with the knowledge of these processes. If you are a seasoned oil & gas person, you'll enjoy reading what you may or may not know in these pages. This course provides a non-technical overview of the phases, operations and terminology used on offshore production platforms. It is intended also for non-drilling personnel who work in the offshore drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. No prior experience or knowledge of drilling operations is required. This course will provide participants a better understanding of the issues faced in all aspects of drilling operations, with a particular focus on the unique aspects of offshore operations.

Job interview questions and answers for hiring on Onshore Oil and Gas Fields Petrogav International

Root zone salinity management using fractional skimming wells with pressurized Irrigation: proceedings of the Year-End Seminar 2001 Muhammad Siddique Shafique In the short water supply environment of Pakistan, farmers try to minimize the gap between demand and supply of canal water by extracting groundwater for irrigation purposes. However, saline groundwater upconing may occur in response to fresh groundwater withdrawals from unconfined aquifer underlain by salty groundwater. Skimming well technology can help in controlling this upconing phenomenon. However, in most cases, the small discharges of such wells cannot be efficiently applied on surface irrigated croplands. Pressurized irrigation systems use small discharge effectively, but the cost and availability of equipment in the local market are the constraints. Root zone salinity is also expected to increase if this skimmed groundwater is used for irrigation purposes, particularly in the absence of proper salinity management practices. To address these issues, International Water Management Institute (IWMI), Water Resource Research Institute (WRI) and Mona Reclamation Experimental Project (MREP) collaborated to undertake an applied research project on Root Zone Salinity Management Using Fractional Skimming Wells with Pressurized Irrigation. This project was started in March 1999 and concluded in June 2003. The National Drainage Program (NDP),

Research Component -WAPDA funded this project

The Illegal Entrepreneur Yash Vinod Modi 2019-12-25 A passionate engineer is struggling to get desired package in the market. Situation is surrounded by the expectations of parents, desires of girl friend and gossips of people around him. His friends making their way in the career that made him depressed. He met people who changed engineering field just because of lack of proper job and salary. At the end, he wrote letter to Prime Minister for letting them know what is wrong with the education system. But situation, got some twists. Frustrated and jobless engineer met with someone who is running scamming business. His strong ethics and discipline denied that offer at first but situation changed again. Engineer defined new scamming process and started fraud business from his small bedroom. "All my life People kept humiliating me, 'You don't have sufficient skills to earn a single rupee. . .' And actually they were right because I wanted to play with dollars." Some incidents, some pain, some mistakes and....The End "How a scholar and ethical engineer became Scammer who introduce himself as illegal entrepreneur?" journey towards answer of this question is the story.
