Devil Stories Maximilian J. Rudwin 2016-01-07 INTRODUCTION Of all the myths which have come down to us from the East, and of all the creations of Western fancy and belief, the Personality of Evil has had the

strongest attraction for the mind of man. The Devil is the greatest enigma that has ever confronted the human intelligence. So large a place has Satan taken in our imagination, and we might also say in our heart, that his expulsion therefrom, no matter what philosophy may teach us, must for ever remain an impossibility. As a character in imaginative literature Lucifer has not his equal in heaven above or on the earth beneath. In contrast to the idea of Good, which is the more exalted in proportion to its freedom from anthropomorphism, the idea of Evil owes to the presence of this element its chief value as a poetic theme. The discrowned archangel may have been inferior to St. Michael in military tactics, but he certainly is his superior in matters literary. The fair angels—all frankness and goodness—are beyond our comprehension, but the fallen angels, with all their faults and sufferings, are kin to us. There is a legend that the Devil has always had literary aspirations. The German theosophist Jacob Böhme relates that when Satan was asked to explain the cause of God’s enmity to him and his consequent downfall, he replied: “I wanted to be an author.” Whether or not the Devil has ever written anything over his own signature, he has certainly helped others compose their greatest works. It is a significant fact that the greatest imaginations have discerned an attraction in Diabolus. What would the world’s literature be if from it we eliminated Dante’s Divine Comedy, Calderón’s Marvellous Magician, Milton’s Paradise Lost, Goethe’s Faust, Byron’s Cain, Vigny’s Eloi, and Lermontov’s Demon? Sorry indeed would have been the plight of literature without a judicious admixture of the Diabolical. Without the Devil there would simply be no literature, because without his intervention there would be no plot, and without a plot the story of the world would lose its interest. Even now, when the belief in the Devil has gone out of fashion, and when the very mention of his name, far from causing men to cross themselves, brings a smile to their faces, Satan has continued to be a puissant personage in the realm of letters. As a matter of fact, Beelzebub has perhaps received his greatest elaboration at the hands of writers who believed in him just as little as Shakespeare did in the ghost of Hamlet’s father.

Liaisons: An Introduction to French Wynne Wong 2016-01-01 LIAISONS is an innovative beginning-level French program firmly grounded in principles of communicative language teaching and research in second language acquisition. Components of the program are carefully linked together, showing students how they can make connections with their classmates, their instructor, their community, and the French-speaking world. A rich array of communicative activities is designed to stimulate interaction inside and outside the classroom. The underlying pedagogical framework in LIAISONS asks students to first discover new vocabulary and grammar through different mediums, then connect form and meaning through a set of confidence-building activities, and finally, actively create language. The Clinic and Elsewhere Todd Meyers 2013-05-15 Despite increasingly nuanced understandings of the neurobiology of addiction and a greater appreciation of the social and economic conditions that allow drug dependency to persist, there remain many unknowns regarding the individual experience of substance abuse and its treatment. In recent years, novel pharmaceutical therapies have given rise to

both new hopes for recovery and renewed fears about drug diversion and abuse. In *The Clinic and Elsewhere*, Todd Meyers looks at the problems of meaning caused by drug dependency and appraises the changing terms of medical intervention today. By following a group of adolescents from the time they enter drug rehabilitation treatment through their reentry into the outside world—the clinic, their homes and neighborhoods, and other institutional settings—Meyers traces patterns of life that become mediated by pharmaceutical intervention. His focus is not on the drug economy but rather on the therapeutic economy, where new markets, transactions of care, and highly porous conceptions of success and failure come together to shape addiction and recovery. The book is at once a meditative work of anthropology, a demonstration of the theoretical and methodological limits of medical research, and a forceful intervention into the philosophy of therapeutics at the level of the individual. 'Inquietude' in the Work of Pierre Mac Orlan Roger W. Baines 2000 This is the first major study in English of the work of the French novelist, essayist, journalist, poet and 'chansonnier' Pierre Mac Orlan (1882-1970). It assesses Mac Orlan's contribution to the post-1918 phenomenon of intellectual disillusionment and disorientation which was termed the 'nouveau mal de siècle', or 'inquietude'. Although he has largely been ignored by critics thus far, Mac Orlan was part of mainstream French literary production and a major exponent of 'inquietude'. Where he differs from his contemporaries is in his subject matter, in his use of sociological, rather than abstract, intellectual material. His expression of 'inquietude' encompasses: 'le fantastique social'; adventure; marginality; 'le cafard'; and sadistic sexuality. His originality lies in his invention of 'le fantastique social', in his constant use of certain techniques, as well as the subject matter, of German Expressionism via the depiction of the disturbing landscape of the modern city, post-1918 inflation and decadence, prostitutes and criminals, doomed adventures, the mystery of modern technology, and in the expression of a morbid interest in sexual violence. This volume will be of particular interest to students of inter-war French literature and thought.

Stories of Tonality in the Age of François-Joseph Fétis Thomas Christensen 2019-05-27 Stories of Tonality in the Age of François-Joseph Fétis explores the concept of musical tonality through the writings of the Belgian musicologist François-Joseph Fétis (1784–1867), who was singularly responsible for theorizing and popularizing the term in the nineteenth century. Thomas Christensen weaves a rich story in which tonality emerges as a theoretical construct born of anxiety and alterity for Europeans during this time as they learned more about “other” musics and alternative tonal systems. Tonality became a central vortex in which French musicians thought—and argued—about a variety of musical repertoires, be they contemporary European musics of the stage, concert hall, or church, folk songs from the provinces, microtonal scale systems of Arabic and Indian music, or the medieval and Renaissance music whose notational traces were just beginning to be deciphered by scholars. Fétis’s influential writings offer insight into how tonality ingrained itself within nineteenth-century music discourse, and why it has continued to resonate with uncanny prescience throughout the musical upheavals of the twentieth and twenty-first centuries.

Short Stories, Knowledge and the Supernatural Amândio Reis 2022-07-11 This book proposes a comparative approach to the supernatural short stories of Machado de Assis, Henry James and Guy de Maupassant. It offers an alternative to predominantly novel-centric and Anglo-centric perspectives on literary pre-modernism by investigating a transnational and multilingual connection between genre, theme and theory, i.e., between the modern short story, the supernatural and the problem of knowledge. Incorporating a close analysis of the literary texts into a discussion of their historical context, the book argues that Machado, James and Maupassant explore and reinvent the supernatural short story as a metafictional genre. This modernized and innovative form allows them to challenge the dichotomies and conventions of realist and supernatural fiction, inviting their past and present readers to question common assumptions on reality and literary representation.

references to children and their stories, *Children's Stories* and 'Child-Time in the Works of Joseph Cornell and the Transatlantic Avant-Garde' studies the relationship between the artist's work on childhood and his search for a transfigured concept of time. As it changes the focus from Cornell's boxes to his multimedia works, this study also situates Cornell and his art in the broader context of the transatlantic avant-garde of the 1930s and 40s.

Gilles Deleuze, Postcolonial Theory, and the Philosophy of Limit Réda Bensmaïa 2017-02-23 Does a philosopher have an 'identity'? What kind of 'identity' is mobilized when the work of a philosopher becomes a major reference for certain schools of thought, as in the case of Gilles Deleuze and postcolonial theory? Have the promoters of a generalized Deleuzianism taken care their usage of his specialized work does him justice? Few exponents of postcolonial and subaltern theories now dispute the influence that Deleuze's work exerted on the intellectuals and theorists who developed those theories. However, this book contends that postcolonial and subaltern theorists have engaged with Deleuzian thought in ways that have perhaps produced a long series of misunderstandings - for which Deleuze himself is not responsible. By engaging with recent innovations in North African culture and by examining the dissemination of Deleuze's identities across a broad range of postcolonial theory, Réda Bensmaïa shows that the 'encounter' between Deleuze and the postcolonial movement can only be understood through the idea of a 'transcendental' field, in which Deleuze and his postcolonial followers find themselves captured.

Networking the World, 1794-2000 Armand Mattelart 2000 In the age of satellites and the Internet, worldwide communication has become increasingly unified amid overblown claims about the redemptive possibilities of international networks. But this rhetoric is hardly new. As Armand Mattelart demonstrates in *Networking the World, 1794-2000*, globalization and its attendant hype have existed since road and rail were the fastest way to move information. Mattelart plates contemporary global communication networks into historical context and shows that the networking of the world began much earlier than many assume, in the late eighteenth century. He argues that the internationalization of communication was spawned by such Enlightenment ideals as universalism and liberalism, and examines how the development of global communications has been inextricably linked to the industrial revolution, modern warfare, and the emergence of nationalism. Throughout, Mattelart eloquently argues that discourses of better living through globalization often mask projects of political, economic, and cultural domination.
