The Unseen World: A Novel Liz Moore 2016-07-26 The moving story of a daughter's quest to discover the truth about her beloved father's hidden past. Ada Sibelius is raised by David, her brilliant, eccentric, socially inept single father, who directs a computer science lab in 1980s-era Boston. Home-schooled, Ada accompanies David to work every day; by twelve, she is a painfully shy prodigy. The lab begins to gain acclaim at the same time that David's mysterious history comes into question. When his mind begins to falter, leaving Ada virtually an orphan, she is taken in by one of David's colleagues. Soon she embarks on a mission to uncover her father's secrets: a process that carries her from childhood to adulthood. What Ada discovers on her journey into a virtual universe will keep the reader riveted until *The Unseen World's* heart-stopping, fascinating conclusion.

Towards a Jungian Theory of the Ego Karen Evers-Fahey 2016-07-15 Despite their prevalence and weight in many of his collected works and letters, Jung did not articulate a general theory of the ego and consciousness. *Towards a Jungian Theory of the Ego* examines the development of Jung's concept of the ego as he expanded and revised this concept, from his earliest formulations about consciousness while a student, to his mature thoughts at the end of his life. Drawing on Ego Psychology as a theoretical framework, Evers-Fahey proposes that Jung uses the concept of ego in four distinct ways and that he developed and used his ego concept based on two discrete paradigms. These distinctions explain the confusion and ambiguity found when examining the development of Jung's analytical psychology over his lifetime. This book provides an examination of ego development and ego defenses based on a unique Jungian standpoint, as well as discussion of the relationship between the ego and the Self and the ego and 'the individuum'. Furthermore, the inclusion of a historical framework helps to place the development of these concepts in context. This book proposes a theory of ego psychology based on Jungian theory rather than traditional psychoanalytic theory, thereby filling a gap in the knowledge of Jungian theory. The book will be essential reading for academics and postgraduate students engaged in the study of Jungian psychology and psychoanalytic theory and will also be valued by those interested in Jung and ego psychology more generally.

Angels All Around Us Anthony DeStefano 2012-10-16 In *Angels All Around Us* (previously titled *The Invisible World* in hardcover), the international bestselling author of *A Travel Guide to Heaven* and *Ten Prayers God Always Says Yes To* explains the awesome and mysterious reality of the spiritual dimension that surrounds and permeates our very existence. All aspects of the spiritual realm are discussed, including the existence of angels and demons, the whereabouts of loved ones who have passed, the gift of grace, heaven, hell, and even the presence and activity of God in our lives. Completely consistent with traditional Christian teaching, *Angels All Around Us* will help readers embrace a certitude that makes it easier to act according to their moral beliefs, give them a greater sense of the richness of life, and show them that no amount of suffering-physical, mental, or emotional-will ever be able to destroy the profound sense of inner peace that they can experience on a daily basis.

Sorcery or Science? Ariela Marcus-Sells 2022-02-24 *Sorcery or Science?* examines how two Sufi Muslim theologians who rose to prominence in the western Sahara Desert in the late eighteenth century, Sīdi al-Mukhtār al-Kuntī (d. 1811) and his son and successor, Sīdi Muḥammad al-Kuntī (d. 1826), decisively influenced the development of Sufi Muslim thought in West Africa. Known as the Kunta scholars, Mukhtār al-Kuntī and Muḥammad al-Kuntī were influential teachers who developed a pedagogical network of students across the Sahara. In exploring their understanding of “the realm of the unseen”—a vast, invisible world that is both surrounded and interpenetrated by the visible world—Ariela Marcus-Sells reveals how these theologians developed a set of practices that depended on knowledge of this unseen world and that allowed practitioners to manipulate the visible and invisible realms. They called these practices “the sciences of the unseen.” While they acknowledged that some Muslims—particularly self-identified “white” Muslim elites—might consider these practices to be “sorcery,” the Kunta scholars argued that these were legitimate Islamic practices. Marcus-Sells situates their ideas and beliefs within

the historical and cultural context of the Sahara Desert, surveying the cosmology and metaphysics of the realm of the unseen and the history of magical discourses within the Hellenistic and Arabo-Islamic worlds. Erudite and innovative, this volume connects the Islamic sciences of the unseen with the reception of Hellenistic discourses of magic and proposes a new methodology for reading written devotional aids in historical context. It will be welcomed by scholars of magic and specialists in Africana religious studies, Islamic occultism, and Islamic manuscript culture.

Invisible (Signed Edition) Trevor Paglen 2010-08-30 "Invisible: Covert Operations and Classified Landscapes" is Trevor Paglen's long-awaited first photographic monograph. Social scientist, artist, writer and provocateur, Paglen has been exploring the secret activities of the U.S. military and intelligence agencies--the "black world"--for the last eight years, publishing, speaking and making astonishing photographs. As an artist, Paglen is interested in the idea of photography as truth-telling, but his pictures often stop short of traditional ideas of documentation. In the series "Limit Telephotography," for example, he employs high-end optical systems to photograph top-secret governmental sites; and in "The Other Night Sky," he uses the data of amateur satellite watchers to track and photograph classified spacecraft in Earth's orbit. In other works Paglen transforms documents such as passports, flight data and aliases of CIA operatives into art objects. Rebecca Solnit contributes a searing essay that traces this history of clandestine military activity on the American landscape.

The 99% Invisible City Roman Mars 2020-10-06 A NEW YORK TIMES, WASHINGTON POST, USA TODAY, AND PUBLISHERS WEEKLY BESTSELLER "[A] diverse and enlightening book . . . The 99% Invisible City is altogether fresh and imaginative when it comes to thinking about urban spaces." —The New York Times Book Review "Here is a field guide, a boon, a bible, for the urban curious. Your city's secret anatomy laid bare—a hundred things you look at but don't see, see but don't know. Each entry is a compact, surprising story, a thought piece, an invitation to marvel. Together, they are almost transformative. To know why things are as they are adds a satisfying richness to daily existence. This book is terrific, just terrific." —Mary Roach, New York Times bestselling author of *Stiff*, *Grunt*, and *Gulp* "The 99% Invisible City brings into view the fascinating but often unnoticed worlds we walk and drive through every day, and to read it is to feel newly alive and aware of your place in the world. This book made me laugh, and it made me cry, and it reminded me to always read the plaque." —John Green, New York Times bestselling author of *The Fault in Our Stars* and *Turtles All The Way Down* A beautifully designed guidebook to the unnoticed yet essential elements of our cities, from the creators of the wildly popular 99% Invisible podcast Have you ever wondered what those bright, squiggly graffiti marks on the sidewalk mean? Or stopped to consider why you don't see metal fire escapes on new buildings? Or pondered the story behind those dancing inflatable figures in car dealerships? 99% Invisible is a big-ideas podcast about small-seeming things, revealing stories baked into the buildings we inhabit, the streets we drive, and the sidewalks we traverse. The show celebrates design and architecture in all of its functional glory and accidental absurdity, with intriguing tales of both designers and the people impacted by their designs. Now, in *The 99% Invisible City: A Field Guide to Hidden World of Everyday Design*, host Roman Mars and coauthor Kurt Kohlstedt zoom in on the various elements that make our cities work, exploring the origins and other fascinating stories behind everything from power grids and fire escapes to drinking fountains and street signs. With deeply researched entries and beautiful line drawings throughout, *The 99% Invisible City* will captivate devoted fans of the show and anyone curious about design, urban environments, and the unsung marvels of the world around them.

An Immense World Ed Yong 2022-06-21 NEW YORK TIMES BESTSELLER • A "thrilling" (The New York Times), "dazzling" (The Wall Street Journal) tour of the radically different ways that animals perceive the world that will fill you with wonder and forever alter your perspective, by Pulitzer Prize-winning science

journalist Ed Yong “One of this year’s finest works of narrative nonfiction.”—Oprah Daily ONE OF THE TEN BEST BOOKS OF THE YEAR: The Wall Street Journal, The New York Times, Time, Publishers Weekly, BookPage ONE OF THE BEST BOOKS OF THE YEAR: Oprah Daily, The Washington Post, Kirkus Reviews The Earth teems with sights and textures, sounds and vibrations, smells and tastes, electric and magnetic fields. But every kind of animal, including humans, is enclosed within its own unique sensory bubble, perceiving but a tiny sliver of our immense world. In *An Immense World*, Ed Yong coaxes us beyond the confines of our own senses, allowing us to perceive the skeins of scent, waves of electromagnetism, and pulses of pressure that surround us. We encounter beetles that are drawn to fires, turtles that can track the Earth’s magnetic fields, fish that fill rivers with electrical messages, and even humans who wield sonar like bats. We discover that a crocodile’s scaly face is as sensitive as a lover’s fingertips, that the eyes of a giant squid evolved to see sparkling whales, that plants thrum with the inaudible songs of courting bugs, and that even simple scallops have complex vision. We learn what bees see in flowers, what songbirds hear in their tunes, and what dogs smell on the street. We listen to stories of pivotal discoveries in the field, while looking ahead at the many mysteries that remain unsolved. Funny, rigorous, and suffused with the joy of discovery, *An Immense World* takes us on what Marcel Proust called “the only true voyage . . . not to visit strange lands, but to possess other eyes.” FINALIST FOR THE KIRKUS PRIZE • FINALIST FOR THE ANDREW CARNEGIE MEDAL

The Invisible World Anthony DeStefano 2011 The author of *A Travel Guide to Heaven* draws on scripturally sound teachings to explain how readers can connect with the spiritual dimension surrounding everyday life in order to achieve profound inner peace.

Making the Invisible Visible Leonie Sandercock 1998-02-08 While the official history of planning as a defined profession celebrates the state and its traditions of city building and regional development, this collection of essays reveals a flip side. This scrutiny of the class, race, gender, ethnic, or other biased agendas previously hidden in planning histories points to the need for new planning paradigms for our multicultural cities of the future. Invisible Philip Ball 2015-04-08 If offered the chance—by cloak, spell, or superpower—to be invisible, who wouldn’t want to give it a try? We are drawn to the idea of stealthy voyeurism and the ability to conceal our own acts, but as desirable as it may seem, invisibility is also dangerous. It is not just an optical phenomenon, but a condition full of ethical questions. As esteemed science writer Philip Ball reveals in this book, the story of invisibility is not so much a matter of how it might be achieved but of why we want it and what we would do with it. In this lively look at a timeless idea, Ball provides the first comprehensive history of our fascination with the unseen. This sweeping narrative moves from medieval spell books to the latest nanotechnology, from fairy tales to telecommunications, from camouflage to ghosts to the dawn of nuclear physics and the discovery of dark energy. Along the way, *Invisible* tells

little-known stories about medieval priests who blamed their misdeeds on spirits; the Cock Lane ghost, which intrigued both Samuel Johnson and Charles Dickens; the attempts by Victorian scientist William Crookes to detect forces using tiny windmills; novelist Edward Bulwer-Lytton's belief that he was unseen when in his dressing gown; and military efforts to enlist magicians to hide tanks and ships during WWII. Bringing in such voices as Plato and Shakespeare, Ball provides not only a scientific history but a cultural one—showing how our simultaneous desire for and suspicion of the invisible has fueled invention and the imagination for centuries. In this unusual and clever book, Ball shows that our fantasies about being unseen—and seeing the unseen—reveal surprising truths about who we are.

The Invisible Universe Matthew Bothwell 2021-11-11 From the discovery of entirely new kinds of galaxies to a window into cosmic 'prehistory', Bothwell shows us the Universe as we've never seen it before - literally. Since the dawn of our species, people all over the world have gazed in awe at the night sky. But for all the beauty and wonder of the stars, when we look with just our eyes we are seeing and appreciating only a tiny fraction of the Universe. What does the cosmos have in store for us beyond the phenomena we can see, from black holes to supernovas? How different does the invisible Universe look from the home we thought we knew? Dr Matt Bothwell takes us on a journey through the full spectrum of light and beyond, revealing what we have learned about the mysteries of the Universe. This book is a guide to the ninety-nine per cent of cosmic reality we can't see - the Universe that is hidden, right in front of our eyes. It is also the endpoint of a scientific detective story thousands of years in the telling. It is a tour through our Invisible Universe.

Exploring the Edge Realms of Consciousness Daniel Pinchbeck 2012-09-18 A diverse group of authors journey into the fringes of human consciousness, tackling psychic and paranormal phenomena, lucid dreaming, synchronistic encounters, and more. Collected from the online magazine Reality Sandwich, these essays explore regions of the mind often traversed by shamans, mystics, and visionary artists; adjacent and contiguous to our normal waking state, these realms may be encountered in dreams or out-of-body experiences, accessed through meditation or plant medicines, and marked by psychic phenomena and uncanny synchronicities. From demons encountered in sleep paralysis visions to psychic research conducted by the CIA, the seemingly disparate topics covered here congeal to form a larger picture of what these extraordinary states of consciousness might have to tell us about the nature of reality itself.

Invisible Man, Got the Whole World Watching Mychal Denzel Smith 2016-06-14 A New York Times Bestseller An unflinching account of what it means to be a young black man in America today, and how the existing script for black manhood is being rewritten in one of the most fascinating periods of American history. How do you learn to be a black man in America? For young black men today, it means coming of age during the presidency of Barack Obama. It means witnessing the deaths of Oscar Grant, Trayvon Martin, Michael Brown, Akai Gurley, and too many more. It means celebrating powerful moments of black self-determination for LeBron James, Dave Chappelle, and Frank Ocean. In *Invisible Man, Got the Whole World Watching*, Mychal Denzel Smith chronicles his own personal and political education during these tumultuous years, describing his efforts to come into his own in a world that denied his humanity. Smith unapologetically upends reigning assumptions about black masculinity, rewriting the script for black manhood so that depression and anxiety aren't considered taboo, and feminism and LGBTQ rights become part of the fight. The questions Smith asks in this book are urgent--for him, for the martyrs and the tokens, and for the Trayvons that could have been and are still waiting.

human history. Now fully revised and expanded, this richly illustrated book describes two hundred years of scientific discoveries that inspired French Impressionist painters and Art Nouveau architects, as well as Surrealists in Europe, Latin America, and Japan. Lynn Gamwell describes how the microscope and telescope expanded the artist's vision into realms unseen by the naked eye. In the nineteenth century, a strange and exciting world came into focus, one of microorganisms in a drop of water and spiral nebulas in the night sky. The world is also filled with forces that are truly unobservable, known only indirectly by their effects—radio waves, X-rays, and sound-waves. Gamwell shows how artists developed the pivotal style of modernism—abstract, non-objective art—to symbolize these unseen worlds. Starting in Germany with Romanticism and ending with international contemporary art, she traces the development of the visual arts as an expression of the scientific worldview in which humankind is part of a natural web of dynamic forces without predetermined purpose or meaning. Gamwell reveals how artists give nature meaning by portraying it as mysterious, dangerous, or beautiful. With a foreword by Neil deGrasse Tyson and a wealth of stunning images, this expanded edition of *Exploring the Invisible* draws on the latest scholarship to provide a global perspective on the scientists and artists who explore life on Earth, human consciousness, and the space-time universe.

Contextualizing Eschatology in African Cultural and Religious Beliefs Ibigbolade S. Aderibigbe 2019-10-21 Contextualizing Eschatology in African Cultural and Religious Beliefs addresses the African consciousness and nuances of eschatological beliefs as part and parcel of the holistic African Indigenous worldviews within the context of the people's traditional heritage. The concept of eschatology is usually explained from the perspective of "endtimes" in relation to either the human individual or the cosmos. Within these contexts, the primary interests, particularly with regard to human eschatology, have centred on the questions of death, afterlife, immortality, destiny, judgment, reward and punishment, and the final destination or eternal "home" of humans. This book explores the characteristic nature, the modes, the process as well as the dynamics associated with the various features culminating the functional expression of the "reality" of eschatological beliefs demonstrated in varied but fundamentally the same subject matter of practices among different African ethnic groups. It also discusses the influences of other religious traditions, particularly Christianity and Islam, on contemporary African eschatological thoughts and their attendant consequences. This book will be of interest to students and scholars of African studies, eschatology, religious studies, and the philosophy of religion.

Musings of a Missionary Mom Jayne P. Bowers 2006-01-23 This volume reflects a few of the authors thoughts and insights while her son was spending the best two years of his life serving a full-time mission for the Church of Jesus Christ of Latter-day Saints in Torreon, Mexico. Turning to the scriptures as a way of better coping with his absence, she was soon reminded that whether a person needed a lesson in faith, a reminder to be grateful, or a proverb on the value of hard work, she could find the answer within these divine pages. Applying scripture references from the Bible, the Book of Mormon, and the Doctrine and Covenants to everyday life, *Musings* underscores the importance of the sacred works in finding solace, inspiration, and guidance.

The Alchemy of Power Dr. Joni Carley 2019-10-15 Just like master scientists use principles of physics to transform energy into extraordinary displays of power, alchemical leaders use metaphysical principles to transform resources into results that exceed norms and expectations. Grounded squarely in data, and anchored deeply in universal wisdom, *The Alchemy of Power* reveals: what power is what it means to have it how to develop and manage it how to navigate the global call for leaders to use their power to create a better world by developing better workplaces. *The Alchemy of Power* is rich with information and inspiration that connects studies on leadership, with emergent global trends, and with ageless metaphysical teachings—and ties it all to what's on leaders' minds and desktops right now. Written by a seasoned leadership and cultural consultant who has trekked the globe exploring world philosophies and spiritual practices, *The Alchemy of Power* is about increasing your capacity for causing results that amount to much more than the sum of parts—leadership alchemy.

Space 50 Piers Bizony 2006-10-24 A half-century history of space exploration documents efforts from Sputnik to the present day, in a visual tour that profiles such subjects as a Gemini space capsule and deep-field images of ancient galaxies as captured by the Hubble Space Telescope.

Exploring Unseen Worlds George William Barnard 1997-01-01 *Exploring Unseen Worlds* is a critically sophisticated, yet gripping immersion into the inner worlds of one of America's foremost thinkers. It demonstrates convincingly the extent to which James's psychological and philosophical perspectives continue to be a rich resource for those specifically interested in the study of mysticism. The book focuses on James's enduring fascination with mysticism and not only unearths James's lesser-known works on mysticism, but also probes into the tacit mystical dimensions of James's personal life and uncovers the mystical implications of his decades long interest in psychical research.

The Wonders of the Invisible World David Gates 2010-09-29 The author of the highly acclaimed novels *Jernigan* (Pulitzer Prize Finalist) and *Preston Falls* (National Book Critics Circle Award Finalist) offers up a mordantly funny collection of short stories about the faulty bargains we make with ourselves to continue the high-wire act of living meaningful lives in late twentieth-century America. Populated by highly educated men and women in combat with one another, with substance abuse, and above all with their own relentless self-awareness, the stories in *The Wonders of the Invisible World* take place in and around New York City, and put urbanism into uneasy conflict with a fleeting dream of rural happiness. Written with style and ferocious black humor, they confirm David Gates as one of the best-and funniest-writers of our time.

The Invisible Elephant Tom Verghese 2007 *The Invisible Elephant* will improve your understanding and awareness of all cultures, including our own. It is a user-friendly, easy to read guide designed to increase your effectiveness when dealing with people of different cultures. The theories and models presented will increase your Cultural Intelligence, and help you prepare for tomorrow's world today.

sexual adventuress Jacqueline. In Amsterdam their fatal passion leads Nico to six months in a psychiatric ward, after which, though at one once more with his true self, he is totally alone. Hiding himself in the mountains of Provence, he continues to push the boundaries and risk his sanity by probing for a reality that will match his poetic ardor and will endure. It is only on his return to Australia and the advent of Felicity that his mission is accomplished and the circle complete.

The Unseen Body Jonathan Reisman 2021-11-09 "A fascinating, lyrical book... Reisman's experiences in other cultures bring a richness and depth to *The Unseen Body*. The way he thinks about the body and medicine—the rivers and tributaries, the flowing and unclogging, the top-down organization of the brain—is extraordinary!" —Mary Roach In this fascinating journey through the human body and across the globe, Dr. Reisman weaves together stories about our insides with a unique perspective on life, culture, and the natural world. Jonathan Reisman, M.D.—a physician, adventure traveler and naturalist—brings readers on an odyssey navigating our insides like an explorer discovering a new world with *The Unseen Body*. With unique insight, Reisman shows us how understanding mountain watersheds helps to diagnose heart attacks, how the body is made mostly of mucus, not water, and how urine carries within it a tale of humanity's origins. Through his offbeat adventures in healthcare and travel, Reisman discovers new perspectives on the body: a trip to the Alaskan Arctic reveals that fat is not the enemy, but the hero; a stint in the Himalayas uncovers the boundary where the brain ends and the mind begins; and eating a sheep's head in Iceland offers a lesson in empathy. By relating rich experiences in far-flung lands and among unique cultures back to the body's inner workings, he shows how our organs live inextricably intertwined lives—an internal ecosystem reflecting the natural world around us. Reisman offers a new and deeply moving perspective, and helps us make sense of our bodies and how they work in a way readers have never before imagined.

Exploring Everyday Landscapes Vernacular Architecture Forum (U.S.). Meeting 1997 Bringing together scholarship in diverse fields - including architecture, geography, folklore, anthropology, and urban studies - the seventeen essays in this volume confirm the transformations now occurring in the study of vernacular architecture. Moving away from a single vision of vernacular architecture that consisted only of old, rural, handmade structures built in traditional forms and materials for everyday use, scholars are exploring a wider variety of forms and landscapes - from company towns to grand expositions. Drawn from two conferences of the Vernacular Architecture Forum - one held in Charleston in 1994, the other in Ottawa in 1995 - these essays address a broad range of topics.

Invisible Women Caroline Criado Perez 2019-03-12 Data is fundamental to the modern world. From economic development, to healthcare, to education and public policy, we rely on numbers to allocate resources and make crucial decisions. But because so much data fails to take into account gender, because it treats men as the default and women as atypical, bias and discrimination are baked into our systems. And women pay tremendous costs for this bias, in time, money, and often with their lives. Celebrated feminist advocate Caroline Criado Perez investigates shocking root cause of gender inequality and research in *Invisible Women*†, diving into women's lives at home, the workplace, the public square, the doctor's office, and more. Built on hundreds of studies in the US, the UK, and around the world, and written with energy, wit, and sparkling intelligence, this is a groundbreaking, unforgettable exposé that will change the way you look at the world.

with a keen interest in the paranormal, puts forward the curious theory that a "Other Intelligences"-live under the Earth's oceans. This underwater, parallel, civilization may be twice as old as Homo sapiens, he proposes, and may have developed what we call space flight." Sanderson postulates that the OINTS are behind many UFO sightings as well as the mysterious disappearances of aircraft and ships in the Bermuda Triangle. What better place to have an impenetrable base than deep within the oceans of the planet? Yet, if UFOs, or at least some of them, are coming from beneath our oceans or lakes, does it necessarily mean that there is another civilization besides our own that is responsible? In fact, could it be that since WWII a number of underwater UFO bases have been constructed by the very human governments of our planet? Whatever their source, Sanderson offers here an exhaustive study of USOs (Unidentified Submarine Objects) observed in nearly every part of the world. He presents many well-documented and exciting case studies of these unusual sightings; more.

Connect Ilchi Lee 2019-07-15 The solution to your problems starts with connecting to yourself. An inspirational guide to a powerful meditation method for greater clarity, consciousness, and spiritual growth by New York Times bestselling author and world-renowned meditation teacher Ilchi Lee. Are you feeling stuck in your current situation or your life in general? Are you having trouble managing stress? Have you sought answers at spiritual retreats without getting the clarity you need? Relief can be closer than you think if you reframe how you look at your problems. New York Times bestselling author Ilchi Lee proposes there is one root cause to all the troubles plaguing us—separation. We put up walls in every aspect of our lives, isolating ourselves. Those walls keep us from forming healthy relationships with others, with nature, and even with ourselves. But separation has a simple cure—finding a way to connect. In *Connect: How to Find Clarity and Expand Your Consciousness with Pineal Gland Meditation*, Lee shows how to connect to your authentic self through the pineal gland in your brain. Activate your pineal gland through the meditations rooted in an ancient Korean tradition that Ilchi Lee describes in this book. You'll experience clarity instead of emotion, compassion rather than judgment, and wholeness in place of separation. This book will help you find the solutions you seek by opening the inner eye that leads to greater clarity regarding the health of your body, the dreams of your soul, and the wisdom of your spirit. Mattering the Invisible Diana Espírito Santo 2021-05-01 Exploring how technological apparatuses "capture" invisible worlds, this book looks at how spirits, UFOs, discarnate entities, spectral energies, atmospheric forces and particles are mattered into existence by human minds. Technological and scientific discourse has always been central to the nineteenth- and early twentieth-century spiritualist quest for legitimacy, but as this book shows, machines, people, and invisible beings are much more ontologically entangled in their definitions and constitution than we would expect. The book shows this entanglement through a series of contemporary case studies where the realm of the invisible arises through technological engagement, and where the paranormal intertwines with modern technology.
