Pipsqueaks, Slowpokes, and Stinkers Melissa Stewart 2020-09-01 Underdogs, unite! Celebrated nonfiction author Melissa Stewart offers young readers a funny, informative look at some animal "underdogs" that have amazing means of survival. Pee-ew! Should the stinky, skunklike zorilla take a bath? And should the slowpoke Galápagos tortoise get a move on? Everyone knows "cool" animals like elephants and cheetahs, but you should meet these lesser-known creatures that have amazing, creative means of survival! Written with a lively, playful voice, this book introduces young readers to a variety of animal "underdogs" and explains how characteristics that might seem like weaknesses are critical for finding food and staying safe in an eat-or-be-eaten world. Along with her engaging animal facts, Stewart weaves in a gentle message of understanding and celebrating differences. Stephanie Laberis's bright, humorous, and scientifically accurate illustrations add to the fun.

Canadian Beetles (Coleoptera) Injurious to Crops, Ornamentals, Stored Products, and Buildings John Milton Campbell 1989 Manual providing a comprehensive inventory of the species of beetles that were reported as agricultural, ornamental, stored-product, and noxious pests in Canada or that were reported as pests elsewhere and are known to occur in Canada. Not included are species important only to the forest industry, although species known to damage furniture and structural timbers in buildings are included; species frequently intercepted at ports of entry in Canada unless the species is known or suspected to be established in Canada; and species that are frequently reported to enter homes in search of overwintering quarters, with the exception of species that may damage household effects when present in large numbers. Families are arranged in alphabetical order, and within each family the species are arranged in alphabetical order of Latin name, with common family and generic names listed in the index. For each listing, information is included on provincial distribution, origin, economic injury, and biology.

Eagles of the RAF Philip D. Caine 1994-07-01 U.S. citizens fought and died in WW II long before the Japanese attacked Pearl Harbor. Among them were the pilots of the Eagle Squadrons, three fighter squadrons of Britain's Royal Air Force manned by young U.S. flyers. This book tells how the Eagle squadrons were formed and summarizes the history of the units and evaluates their deeds, motivations, and contributions. Draws on interviews from more than 35 surviving Eagles, their letters and memoirs,

and official records. Depicts their daily lives along with special heroes and amazing sacrifices. "An important contribution to the study of American involvement in WWII. Highly recommended."

Geoponika Cassianus Bassus (Scholasticus.) 2011 This remarkable anthology of classical agricultural texts, entitled 'Farm Work' or Geoponika, was compiled at the behest of the Byzantine emperor Constantine VII Porphyrogenitus (AD 913-959). Under his direction a series of handbooks was produced, distilling useful knowledge from more than a millennium of Greek and Latin writing on various subjects of practical use from diplomacy and siege warfare to farming. It is of particular value to modern scholars because it quotes from texts that have long since been lost to the world, particularly from authors of the late classical period whose works reflected the agricultural practices of Anatolia, Africa and the Near East. Although the Geoponika has been known in Britain since it was first published here in 1704, there has only been the one English translation, by the Rev. Thomas Owen in 1804/5. Andrew Dalby has considered the original afresh, leaning on the more modern edition of the Greek by Beckh in 1894, and has come up with a more fluent and comprehensible version for the present-day reader. His expertise in matters of food and cookery in the classical and Byzantine world has contributed greatly to the wider utility of his translation. So little is known, or published, about Byzantine food culture and domestic economy that this book should be a really important step forward for students and scholars alike.

Dosso's Fate Dosso Dossi 1998 Dosso Dossi has long been considered one of Renaissance Italy's most intriguing artists. Although a wealth of documents chronicles his life, he remains, in many ways, an enigma, and his art continues to be as elusive as it is compelling. In Dosso's Fate, leading scholars from a wide range of disciplines examine the social, intellectual, and historical contexts of his art, focusing on the development of new genres of painting, questions of style and chronology, the influence of courtly culture, and the work of his collaborators, as well as his visual and literary sources and his painting technique. The result is an important and original contribution not only to literature on Dosso Dossi but also to the study of cultural history in early modern Italy.

Basic Japanese Samuel E. Martin 2017-11-14 An introduction to Japanese through authentic, commonly-used sentences. This best-selling Japanese textbook is a user-friendly guide for beginners designed for use in a classroom or self-study. It adopts a very different approach from other Japanese language books—teaching you the underlying sentence structures and patterns of Japanese along with essential vocabulary and phrases so you can attain basic fluency quickly. The emphasis is on acquiring a working knowledge of simple, everyday Japanese sentences. This new edition has been thoroughly updated and expanded to reflect the way Japanese is spoken in Japan today. Manga illustrations have been added to each dialogue along with the latest jargon for the internet, social media, cellphones, and IT, and a bidirectional dictionary is included at the back. Each self-contained lesson presents a simple four-step method: Step 1: Basic Sentences: Each lesson begins with a few simple sentences. Essential vocabulary and phrases are learned within the context of these sentences. Audio recordings by native speakers are in the downloadable audiok. Step 2: Communication Notes: A detailed discussion of each sentence follows to assist you in understanding the underlying structure and how to form new sentences based on the same pattern. Step 3: Everyday Conversations: Authentic dialogues with manga illustrations and native-speaker recordings show you how people communicate naturally in Japan today through simple, everyday interactions. Step 4: Exercises: Several sets of easy exercises help reinforce your understanding of the key points presented in the lesson and review what you have learned so you can move on to the next lesson.

Spacing (in) Diaspora Emma Patchett 2017-06-26 This work attempts to counteract the essentialism of originary thinking in the contemporary era by providing a new reading of a relatively understudied corpus of literature from a ambivalently stereotyped diasporic group, in order to rethink and problematise the concept of diaspora as a spatial concept. As work situated in the Law-in-Literature movement, beyond the disciplinary boundaries of scholarship, this book aims to construct a 'literary jurisprudence' of diaspora space, deconstructing space in order to question what it means to be 'settled' in literary refractions of the lawscape by drawing on refractions of case law in a corpus of texts by Romani authors. These texts are used as hermetic framings to draw unique spatio-temporal landscapes through which the reader can explore the refractive, reflective, interpretative conditions of legality as a crucible in which to theorise law. The radical intent of this work, therefore, is to deconstruct jurisprudential spatial order in order to theorize diaspora space, in the context of the Roma Diaspora. This work will offer readers new possibilities to re-imagine diaspora through law and literature and provides an innovative critical interdisciplinary analysis of the shaping of space.

Artificial Intelligence Applications and Innovations Harris Papadopoulos 2010-09-21 The abundance of information and increase in computing power currently enable researchers to tackle highly complicated and challenging computational problems. Solutions to such problems are now feasible using advances and innovations from the area of Artificial Intelligence. The general focus of the AIAI conference is to provide insights on how Artificial Intelligence may be applied in real-world situations and serve the study, analysis and modeling of theoretical and practical issues. This volume contains papers selected for presentation at the 6th IFIP Conference on Artificial Intelligence Applications and Innovations (AIAI 2010) and held in Larnaca, Cyprus, during October 6-7, 2010. IFIP AIAI 2010 was co-organized by the University of Cyprus and the Cyprus University of Technology and was sponsored by the Cyprus University of Technology, Frederick University and the Cyprus Tourism Organization. AIAI 2010 is the official conference of the WG12.5 "Artificial Intelligence Applications" working group of IFIP TC12, the International Federation for Information Processing Technical Committee on Artificial Intelligence (AI).

AIAI is a conference that grows in significance every year attracting researchers from different countries around the globe. It maintains high quality, standards and welcomes research papers describing technical advances and engineering and industrial applications of intelligent systems. AIAI 2010 was not confined to introducing how AI may be applied in real-life situations, but also included innovative methods, techniques, tools and ideas of AI expressed at the algorithmic or systemic level.

A Reference Grammar of Spoken Tamil Harold F. Schiffman 1999-10-14 This is a reference grammar of the standard spoken variety of Tamil, a language with 65 million speakers in India, Sri Lanka, Malaysia and Singapore. The spoken variety is radically different from the standard literary variety, last standardized in the thirteenth century. The standard spoken language is used by educated people in their interactions with people from different regions and different social groups, and is also the dialect used in films, plays and the media. This book, a much expanded version of the author's *Grammar of Spoken Tamil* (1979), is the first such grammar to contain examples both in Tamil script and in transliteration, and the first to be written so as to be accessible to students studying the modern spoken language as well as to linguists and other specialists. The book has benefited from extensive native-speaker input and the author's own long experience of teaching Tamil to English-speakers.

Fencing Camillo Agrippa 2010-01 Camillo Agrippa's widely influential "Treatise on the Science of Arms" was a turning point in the history of fencing. The author - an engineer by trade and not a professional master of arms - was able to radically re-imagine teaching the art of fencing. Agrippa's treatise is the fundamental text of Western swordsmanship. Just as earlier swordsmanship can be better understood from Agrippa's critiques, so too was his book the starting point for the rapier era. Every other treatise of the early-modern period had to deal explicitly or implicitly with Agrippa's startling transformation of the art and science of self-defense with the sword. Likewise, all of the fundamental ideas that are still used today - distance, time, line, blade opposition, counterattacks and countertime - are expressed in this paradigm-shifting treatise. This is a work that should be on the bookshelf of anyone interested in the history, practice or teaching of fencing. His treatise was also a microcosm of sixteenth-century thought. It examines the art, reduces it to its very principles, and reconstructs it according to a way of thinking that incorporated new concepts of art, science and philosophy. Contained within this handy volume are concrete examples of a new questioning of received wisdom and a turn toward empirical proofs, hallmarks of the Enlightenment. The treatise also presents evidence for a redefinition of elite masculinity in the wake of the military revolution of the sixteenth century. At the same time, it offers suggestive clues to the place of the hermetic tradition in the early-modern intellectual life and its implications for the origins of modern science. Camillo Agrippa's "Treatise on the Science of Arms" was first published in

Rome in 1553 by the papal printer Antonio Blado. The original treatise was illustrated with 67 engravings that belong to the peak of Renaissance design. They are reproduced here in full. "Mondschein has at last made available to English-speaking readers one of the most important texts in the history of European martial arts. Agrippa marks a turning point in the intellectual history of these arts.... Mondschein's introduction to his work helps the reader understand Agrippa - and the martial practices themselves - as pivotal agents in the evolving cultural and intellectual systems of the sixteenth century. Above all, Mondschein's translation is refreshingly clean and idiomatic, rendering the systematic clarity of the Italian original into equally clear modern English - evidence of the author's familiarity with modern fencing and understanding of the physical realities that his author is trying to express. Mondschein's contextualization of his topic points the way for future scholarly exploration, and his translation will doubtless be valued by both students of cultural history and practitioners of modern sword arts." - Dr. Jeffrey L. Forgeng, Paul S. Morgan Curator -Higgins Armory Museum, Adj. Assoc. Prof. of Humanities, Worcester Polytechnic Institute First English translation. Hardcover, 234 pages, 67 illustrations, introduction, bibliography, glossary, appendix, index."

Brought to Life by the Voice Amanda Weidman 2021-06-15 To produce the song sequences that are central to Indian popular cinema, singers' voices are first recorded in the studio and then played back on the set to be lip-synced and danced to by actors and actresses as the visuals are filmed. Since the 1950s, playback singers have become revered celebrities in their own right. *Brought to Life by the Voice* explores the distinctive aesthetics and affective power generated by this division of labor between onscreen body and offscreen voice in South Indian Tamil cinema. In Amanda Weidman's historical and ethnographic account, playback is not just a cinematic technique, but a powerful and ubiquitous element of aural public culture that has shaped the complex dynamics of postcolonial gendered subjectivity, politicized ethnolinguistic identity, and neoliberal transformation in South India.
