Stonewall Jim Willie Walker Caldwell 1990-01-01 Biography of General James A. Walker (1832-1901), headstrong, colorful Confederate officer whom Stonewall Jackson on his deathbed named to command the Stonewall Brigade. Written by Walker's daughter, a successful novelist, the manuscript has been available to historians for years but is now published for the first time. Walker was in the thick of almost every Civil War battle in Virginia-Pennsylvania-Maryland from before First Manassas until Appomattox; he was wounded at Spotsylvania. Book describes Walker's relationship with Jackson, dating from student days at Virginia Military Institute where Jackson, as professor, expelled student Walker for insubordination, through Valley Campaign & Jackson's death at Chancellorsville. Also covers Walker's post war political life in Virginia as a Democratic Lieutenant Governor & a Republican Congressman, & a courtroom shooting in which Walker suffered a gunshot wound that led to his death two years later. With an introduction by former Congressman M. Caldwell Butler, great-grandson of the subject. With photographs, bibliographical references & Index.

The Scottish Suffragettes and the Press Sarah Pedersen 2017-07-03 This book approaches the Scottish women's suffrage campaign from the point of view of the popular press. It investigates how the press engaged with the women's suffrage movement; how suffragettes were portrayed in newspapers; and how different groups attempted to use the press to get their message into the public sphere. Scottish suffrage campaigners acknowledged the need for press coverage from the start of the campaign in the 1870s, but the arrival of the militant suffragettes completely transformed newspaper coverage. The Scottish newspapers were particularly interested in suffragette activities during local by-elections and their hounding of local anti-suffrage MPs such as Herbert Asquith. The book also investigates the impact of the First World War on the movement.

Heating, Ventilating, and Air Conditioning Faye C. McQuiston 2004-08-06 HEATING, VENTILATING, AND AIR CONDITIONING Completely revised with the latest HVAC design practices! Based on the most recent standards from ASHRAE, this Sixth Edition provides complete and up-to-date coverage of all aspects of heating, ventilation, and air conditioning. You'll find the latest load calculation procedures, indoor air quality procedures, and issues related to ozone depletion. Throughout the text, numerous worked examples clearly show you how to apply the concepts in realistic scenarios. In addition, several computer programs (several new to this edition) help you understand key concepts and allow you to simulate various scenarios, such as psychometrics and air quality, load calculations, piping system design, duct system design, and cooling coil simulation. Additionally, the load calculation program has been revised and updated. These computer programs are available at the book's website: www.wiley.com/college/mcquiston Key Features of the Sixth Edition Additional new worked examples in the text and on the accompanying software. Chapters 6-9 have been extensively revised for clarity and ease of use. Chapter 8, The Cooling Load, now includes two approaches: the heat balance method, as recommended by ASHRAE, and the simpler RTS method. Both approaches include computer applications to aid in calculations. Provides complete, authoritative treatment of all aspects of HVAC, based on current ASHRAE standards. Numerous worked examples and homework problems provide realistic scenarios to apply concepts.

Innovating in the Open Lab Albrecht Fritzsche 2020-05-05 Open labs provide spaces for interaction across organizational boundaries. They create a huge potential to advance innovation processes. Making use of this potential, however, is not an easy task. It requires diligence, sophistication and perseverance from everyone involved in the implementation and the management of the lab. This book brings together contributions from leading experts in engineering, design, strategy, foresight and marketing research as well as policy makers and practitioners from an open lab. It explores from different perspectives how open labs can be used to facilitate innovation and what needs to be done to make the operation of an open lab successful. The topics addressed in the book include: interaction patterns and mediation in open labs, innovation technology, resource management, ecosystem and platform design, cultural translation, productivity, multi-channel communication, and more. The first part of the book is dedicated to the study of JOSEPHS®, an open lab in Germany. It gives insight in the practical challenges of running an open lab and its role in the local business ecosystem. The other parts of the book discuss the phenomenon of open labs in general and its significance in different contexts all

around the world.

What levels of explanation in the behavioural sciences? Giuseppe Boccignone 2015-07-03 Complex systems are to be seen as typically having multiple levels of organization. For instance, in the behavioural and cognitive sciences, there has been a long lasting trend, promoted by the seminal work of David Marr, putting focus on three distinct levels of analysis: the computational level, accounting for the What and Why issues, the algorithmic and the implementational levels specifying the How problem. However, the tremendous developments in neuroscience knowledge about processes at different scales of organization together with the complexity of today cognitive theories suggest that there will hardly be only three levels of explanation. Instead, there will be many different degrees of commitments corresponding to the different granularities - from high-level (behavioural) models to low-level (neural and molecular) models of the cognitive research program. For instance, Bayesian approaches, that are usually advocated for formalizing Marr's computational level and rational behaviour, have even been adopted to model synaptic plasticity and axon guidance by molecular gradients. As a result, we can consider the behavioural scientist as dealing with models at a multiplicity of levels. The purpose of this Research Topic in *Frontiers in Theoretical and Philosophical Psychology* is to promote an approach to the role of the levels and explanation and models which is of interest for cognitive scientists, neuroscientists, psychologists, behavioural scientists, and philosophers of science.

Saving Leonardo Nancy Pearcey 2010-09-01 Is secularism a positive force in the modern world? Or does it lead to fragmentation and disintegration? In *Saving Leonardo*, best-selling award-winning author Nancy Pearcey (Total Truth, coauthor *How Now Shall We Live?*) makes a compelling case that secularism is destructive and dehumanizing. Pearcey depicts the revolutionary thinkers and artists, the ideas and events, leading step by step to the unleashing of secular worldviews that undermine human dignity and liberty. She crafts a fresh approach that exposes the real-world impact of ideas in philosophy, science, art, literature, and film--voices that

surround us in the classroom, in the movie theater, and in our living rooms. A former agnostic, Pearcey offers a persuasive case for historic Christianity as a holistic and humane alternative. She equips readers to counter the life-denying worldviews that are radically restructuring society and pervading our daily lives. Whether you are a devoted Christian, determined secularist, or don't know quite where you stand, reading *Saving Leonardo* will unsettle established views and topple ideological idols. Includes more than 100 art reproductions and illustrations that bring the book's themes to life. Praise for *Saving Leonardo*: "A feast for the mind and for the eye. Nancy Pearcey not only is a trustworthy guide for a nuanced discussion on the relationship between culture and the gospel, but she is a gifted teacher as well . . . *Saving Leonardo* is a rare, precious gift to the churches and universities alike." Makoto Fujimura, artist and author of *Refractions: A Journey of Faith, Art, and Culture* "Nancy Pearcey has done it again and better than ever. She has taken the complex sophistication of the best cultural analysis and laid it out for any person to grasp, enjoy and use to live out their daily lives honoring Christ. An astounding accomplishment!" James W. Sire, author of *The Universe Next Door* "G. K. Chesterton said 'the danger when Men stop believing in God is not that they'll believe in nothing; but that they will believe in anything.' Nancy Pearcey understands where believing in anything leads and in this book she reveals where a secular philosophy is taking us. A balanced, fair, and impacting work!" Cal Thomas, syndicated and USA Today columnist "Nancy Pearcey helps a new generation of evangelicals to understand the worldview challenges we now face and to develop an intelligent and articulate Christian understanding . . . *Saving Leonardo* should be put in the hands of all those who should always be ready to give an answer--and that means all of us." R. Albert Mohler, Jr., president, The Southern Baptist Theological Seminary "Nancy Pearcey is an intellectual prophet in our day and one of Evangelicalism's foremost cultural observers. *Saving Leonardo* is a tour de force. In it, Pearcey provides a penetrating analysis of the nature of contemporary secularism, a helpful exposition of how we got to the present situation, and a well-crafted strategy for changing the situation. This is her best effort yet . . . a must read." J. P. Moreland, distinguished professor of Philosophy, Biola University and author of *The God Question* "Nancy Pearcey is unsurpassed in the current generation of Christian thinkers . . . The magic continues with this book. Pearcey's virtues as a writer and thinker are once again fully evident in the range of material that she has mastered, the encyclopedic collection of data that she presents, and the analytic rigor with which she separates truth from error in worldviews. She is a prophetic voice for contemporary Christians." Leland Ryken, Clyde S. Kilby professor of English, Wheaton College "Brilliant . . . The book brings complex, abstract ideas down-to-earth -- or rather, down-to-life. . . . *Saving Leonardo* bridges the gaps between the arts and the sciences, the theoretical and the practical. The book not only argues for the unity of Christian truth but exemplifies that unity and shows it in action." Gene Edward Veith, provost, Patrick Henry College

The Dancing Girl of Izu and Other Stories Yasunari Kawabata 1998-08-29 A collection of twenty-three stories from one of the most influential figures in modern Japanese literature. Yasunari Kawabata is widely known for his innovative short stories, some called "palm-of-the-hand" stories short enough to fit into ones palm. This collection reflects Kawabata's keen perception, deceptive simplicity, and the deep melancholy that characterizes much of his work. The stories were written between 1923 and 1929, and many feature autobiographical events and themes that reflect the painful losses he experienced early in his life.

Life and Death of Harriett Freen May Sinclair 1922 "In a few short pages," writes Francine Prose in her Introduction, "May Sinclair succeeds in rendering the oppressive weight and strength of the chains of family love." Young Harriett Freen is taught that "behaving beautifully" is paramount, and she becomes a self-sacrificing woman whose choices prove devastating to herself and to those who love her most. An early pioneer of stream-of-consciousness writing, Sinclair employs the technique brilliantly in this finely crafted psychological novel. Evoking the style and depth of her contemporaries Virginia Woolf and D. H. Lawrence, Sinclair's haunting narrative also reflects her keen interest in the theories of Jung and Freud.

Will Also Tom Porter 2010-10-04 Driven by his three tenets of architecture, Diversity, Individuality and Naughtiness. Will Also paints his way into architecture through a design process that acts as a conduit for the

dreams and aspiration of others. Moving from public consultation to the privacy of his painting studio ù it is here, born in the liquidity of paint, the flourish of line and the serendipity of collage, that Alsop disengages from cultural baggage, discards the tyranny of taste and opens up to a world of less predictable and more diverse solutions.
