Export Control Law and Regulations Handbook Yann Aubin 2016-05-15 The importance of export control laws and regulations in international trade continues to grow, not only because of the increase in world trade and technology dispersion, but also due to concerns surrounding national and regional stability and the risk of terrorism. Accordingly, familiarity with export control laws and regulations around the world has become extremely important for those involved in the international trade of dual-use or military goods, technology, and services. In this preeminent handbook, now in its third edition, two experienced professionals have gathered contributions from expert practitioners and academics. The third edition adds three new country chapters (Brazil, Israel, and Sweden) and a new separate chapter on sanctions and embargoes. In addition to chapters on the international regime in general, the book provides a practical overview of the export/import control regimes covering defence and dual-use goods and services in fourteen key jurisdictions. Country reports each follow the same structure for easy comparison. Issues and topics covered include the following and much more: • import/export legal and regulatory requirements for controlled goods and services; • sanctions for breach of such requirements (civil, administrative, or criminal); • licence application processes; • arms, dual-use and other products embargo (including chemical and biological materials and technology); and • enforcement measures. The Handbook also makes available, through an online application, all important standard export control-related forms, templates, and other related documents, all of which readers can use to draft their own documents. The Handbook is invaluable to any professional (such as lawyers, compliance key players, procurement, logistics, finance and customs practitioners) working in relation to an organisation with a need to know the specific requirements to be followed for the efficient – and legally compliant – import or export of controlled military or dual-use goods, technologies or services.

Attribute-Based Access Control Vincent C. Hu 2017-10-31 This comprehensive new resource provides an introduction to fundamental Attribute Based Access Control (ABAC) models. This book provides valuable information for developing ABAC to improve information sharing within organizations while taking into consideration the planning, design, implementation, and operation. It explains the history and model of ABAC, related standards, verification and assurance, applications, as well as deployment challenges. Readers find authoritative insight into specialized topics including formal ABAC history, ABAC's relationship with other access control models, ABAC model validation and analysis, verification and testing, and deployment frameworks such as XACML. Next Generation Access Model (NGAC) is explained, along with attribute considerations in implementation. The book explores ABAC applications in SOA/workflow domains, ABAC architectures, and includes details on feature sets in commercial and open source products. This insightful resource presents a combination of technical and administrative information for models, standards, and products that will benefit researchers as well as implementers of ABAC systems in the field.

Toward a Theory of Spacepower Charles D. Lutes 2015-03-18 This volume is a product of the efforts of the Institute for National Strategic Studies Spacepower Theory Project Team, which was tasked by the Department of Defense to create a theoretical framework for examining spacepower and its relationship to the achievement of national objectives. The team was charged with considering the space domain in a broad and holistic way, incorporating a wide range of perspectives from U.S. and international space actors engaged in scientific, commercial, intelligence, and military enterprises. This collection of papers commissioned by the team serves as a starting point for continued discourse on ways to extend, modify, refine, and integrate a broad range of viewpoints about human-initiated space activity, its relationship to our globalized society, and its economic, political, and security interactions. It will equip practitioners, scholars, students, and citizens with the historical background and conceptual framework to navigate through and assess the challenges and opportunities of an increasingly complex space environment.

United States Export Controls John R. Liebman 2011-11-22 There should be no question in the mind of any exporter about the government'sintention to enforce applicable legislation and regulations. The penaltiesimposed by export laws and regulations are severe. Violations often lead toheavy fines and, in serious cases, to debarment from contracting with the U.S.Government, and possibly imprisonment. Additionally, the privilege ofexporting can be withdrawn from firms or individuals who have violated theregulations, either for specified periods or indefinitely. Ample resources aredevoted by the government to the detection and prosecution of violators. TheDepartments of Defense, Commerce, Homeland Security, Justice, and the severalintelligence agencies cooperate in this endeavor. Knowing and willfulviolations receive, of course, the heaviest sanctions, but unintentionalviolations are by no means exempt from penalties. Parties to an exporttransaction are expected to know and comply with the regulations.United States Export Controls, Sixth Edition provides areference to which exporters, and those who work closely with them, can referin their daily business operations in order to comply with the myriad exportrules and regulations. Thorough knowledge of the regulations is essential infinding practical solutions to export licensing problems related to specifictransactions, in formulating export marketing plans to minimize the impact ofcontrols, and in the organizing company resources to deal correctly andefficiently with both the legal requirements and the day-to-day operationaldemands of the export control regulations.

Protecting Controlled Unclassified Information in Nonfederal Systems and Organizations Ron Ross 2020 The protection of Controlled Unclassified Information (CUI) resident in nonfederal systems and organizations is of paramount importance to federal agencies and can directly impact the ability of the federal government to successfully conduct its essential missions and functions. This publication provides agencies with recommended security requirements for protecting the confidentiality of CUI when the information is resident in nonfederal systems and organizations; when the nonfederal organization is not collecting or maintaining information on behalf of a federal agency or using or operating a system on behalf of an agency; and where there are no specific safeguarding requirements for protecting the confidentiality of CUI prescribed by the authorizing law, regulation, or

governmentwide policy for the CUI category listed in the CUI Registry. The requirements apply to all components of nonfederal systems and organizations that process, store, and/or transmit CUI, or that provide protection for such components. The security requirements are intended for use by federal agencies in contractual vehicles or other agreements established between those agencies and nonfederal organizations.

ATF – National Firearms Act Handbook U.S. Department of Justice 2019-03-17 This handbook is primarily for the use of persons in the business of importing, manufacturing, and dealing in firearms defined by the National Firearms Act (NFA) or persons intending to go into an NFA firearms business. It should also be helpful to collectors of NFA firearms and other persons having questions about the application of the NFA. This publication is not a law book. Rather, it is intended as a ?user friendly? reference book enabling the user to quickly find answers to questions concerning the NFA. Nevertheless, it should also be useful to attorneys seeking basic information about the NFA and how the law has been interpreted by ATF. The book's Table of Contents will be helpful to the user in locating needed information. Although the principal focus of the handbook is the NFA, the book necessarily covers provisions of the Gun Control Act of 1968 and the Arms Export Control Act impacting NFA firearms businesses and collectors.

Navigating the Digital Age Matt Aiello 2018-10-05 Welcome to the all-new second edition of Navigating the Digital Age. This edition brings together more than 50 leaders and visionaries from business, science, technology, government, aca¬demia, cybersecurity, and law enforce¬ment. Each has contributed an exclusive chapter designed to make us think in depth about the ramifications of this digi-tal world we are creating. Our purpose is to shed light on the vast possibilities that digital technologies present for us, with an emphasis on solving the existential challenge of cybersecurity. An important focus of the book is centered on doing business in the Digital Age-par¬ticularly around the need to foster a mu¬tual understanding between technical and non-technical executives when it comes to the existential issues surrounding cybersecurity. This book has come together in three parts. In Part 1, we focus on the future of threat and risks. Part 2 emphasizes lessons from today's world, and Part 3 is designed to help you ensure you are covered today. Each part has its own flavor and personal¬ity, reflective of its goals and purpose. Part 1 is a bit more futuristic, Part 2 a bit more experiential, and Part 3 a bit more practical. How we work together, learn from our mistakes, deliver a secure and safe digital future-those are the elements that make up the core thinking behind this book. We cannot afford to be complacent. Whether you are a leader in business, government, or education, you should be knowledgeable, diligent, and action-oriented. It is our sincerest hope that this book provides answers, ideas, and inspiration.If we fail on the cybersecurity front, we put all of our hopes and aspirations at risk. So we start this book with a simple proposition:

When it comes to cybersecurity, we must succeed.

NL ARMS Netherlands Annual Review of Military Studies 2021 Robert Beeres 2021-09-21 This is open access volume of the NL ARMS offers an interdisciplinary view on the domain of Compliance and Integrity in International Military Trade (CIIMT), integrating defence economics, international law, arms export control frameworks and policies, information management, organizational sciences and ethics. Although, in academia, and from an interdisciplinary perspective, CIIMT constitutes a relatively novel research domain, across private and public defence-related sectors, the subject evokes high levels of attention and interest, instigating a need for critical thinking, reflection and creativity to address ensuing multi-faceted issues and problems. The Faculty of Military Sciences at the Netherlands Defence Academy extends an in-house MSc programme on CIIMT, which, by integrating practice-based and scientific-based knowledge, aims to contribute to this need. The MSc programme on CIIMT is concerned with exploring, analysing, understanding, explaining, controlling and improving the military dimension in international military trade. More particularly, CIIMT studies managerial questions regarding strategic trade control of military and dual-use goods and services. CIIMT ties in with the Netherlands Defence Academy's vision on scientific education, embedded in the reflective practitioners' paradigm uniting both management and leadership skills needed to decide and operate in high-tension and high-risk knowledge intensive environments. The Faculty of Military Sciences uses the reflective practitioners' paradigm to refer to critical thinking, reflection and Bildung that characterize its thinking doers, the so-called Thinking Soldiers, either at the academic Bachelor's or Master's level. In view of the complexity of the international trade regarding military and dual-use goods and services, the rapid evolvement of strategic trade control and frameworks, and its importance to procurement processes, defence organizations require innovative thinking doers, who, based on an in-depth understanding, from an interdisciplinary perspective can be expected to find – and take responsibility for – creative solutions to problems. NL ARMS 2021 comprises, amongst others, contributions from students and lecturers partaking in this programme. All the editors are affiliated with the Faculty of Military Sciences of the Netherlands Defence Academy in Breda, The Netherlands.

Manual of Tests and Criteria United Nations 2020-01-06 The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the "Recommendations on the Transport of Dangerous Goods" in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled "Manual of Tests and Criteria".
